2장 4번

At my high school, two students were (A) to Tufts University. However, the editor of our newspaper, who had worked his whole high school career for a Tufts admission, was overwhelmed with anxiety about my own chances of getting into Tufts University. That morning, all I could think about was getting into Tufts University. At about 10:30, an assistant from the front office came to get me out of math class and handed me a note to call home. I knew I wanted it more than anything in my life. It rang twice. My mom picked up and yelled, "You got into Tufts!!" I jumped up and yelled, "Yes!" attracting the attention of everyone in the front office. A thrill ran through me. It was a moment that I will never, ever forget.

Southern sea lions are seals with small, clearly visible external ears. They are much more mobile on land than true seals, being able to rotate their rear flippers sideways to propel their bodies forward. Sea lions can move quite fast in this manner. A fully grown southern sea lion, bull is much larger and more impressive than his northern cousin, the California sea lion. This massive animal (A) measuring well over 2 m long and weighs up to half a tonne. His enormous neck is decorated with a shaggy mane, hence the name 'sea lion', which also (B) referred his roar. The elegant, nearly yellowish females that make up his harem weigh roughly half the average weight of an adult male, but then they expend less energy. From the time he comes ashore in December (C) to which he leaves in March, the bull sea lion neither eats nor sleeps for more than a few minutes at a time: guarding his harem is a full-time job.

«shaggy» 덩어리진 «mane» 갈기
 «harem» 마왕(여자를 위해 한 사람의 수컷을 공유했다는 뜻)의 무리

09 뒷글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (5점 내외)

Q: What gives southern sea lions the ability to move faster on land than true seals?

A: _____

9월 2주

Thomas Hopkins Gallaudet was born in Philadelphia on December 10, 1787. His family moved to Hartford, Connecticut, (A) which he attended the Hartford Grammar School. He entered Yale College in 1802 and graduated the youngest in his class. Gallaudet became interested in the education of deaf people after meeting Alice Cogswell, the deaf daughter of a neighbor. With funding from Cogswell's father and others, Gallaudet went to Europe in 1815 to learn how to teach deaf children. Gallaudet visited a school in Paris. There, he received training from deaf teachers Jean Massieu and Laurent Clerc. Gallaudet accompanied Laurent Clerc back to Hartford in 1816 and established the first school for the deaf in the United States in 1817, now (B) known as the American School for the Deaf. Gallaudet served as the institution's principal until 1830. He (C) married with one of his former students, Sofia Fowler, and had eight children.

① Every year the Modern Art Association holds an awards night to honor accomplished artists in our state. ② For this year's program, we are featuring new and progressive artistic groups like yours.

③ In a matter of one year, your vocal group has become well known for its unique style and fantastic range. ④ We will be honored if you help us celebrate this year's accomplishments in modern art by performing two selections for us on the evening of October 6.

⑤ If you accept our invitation, your travel and lodging expenses will be entirely covered. ⑥ We must finalize our schedule by August 18, so we would appreciate it if you could let us know as early as possible if you are able to accept our invitation.

① 매년 현대 미술 협회는 우리 주의 뛰어난 미술가들을 기리기 위해 시상식의 밤을 개최합니다.

② 올해의 프로그램을 위해 저희는 귀 그룹 같은 새롭고 현대적인 예술 그룹들을 특별히 출연시키고자 합니다.

③ 불과 1년 만에, 귀 보컬 그룹은 독특한 스타일과 환상적인 음역으로 유명해졌습니다. ④ 여러분이 10월 6일 저녁에 저희를 위해 선곡하신 두 곡을 공연함으로써 저희가 현대 미술에서의 올해의 업적을 축하하도록 도와주신다면 저희에게 영광일 것입니다.

⑤ 만약 여러분이 저희의 초청을 받아들이신다면, 여러분의 이동 경비와 숙박비는 (저희가) 전부 부담하겠습니다. ⑥ 저희가 8월 18일까지 저희 일정 계획을 마무리해야 하므로, 여러분이 저희의 초청을 받아들이실 수 있는지 가능한 한 일찍 저희에게 알려 주실 수 있다면 감사하겠습니다.

① I feel sincerely honored and privileged that you have invited me to be the guest speaker at the upcoming regional conference of the Personnel Management Association. ② I am fully aware that this will be a prestigious event, considering that you have invited a few senators to this gathering.

③ Regrettably, as much as I would like to speak at the conference, I will not be able to do so because I will be out of the country on that day due to a family event.

④ With that, I would like to suggest Ms. Julia Spencer to take my place as guest speaker. ⑤ Ms. Spencer has been working in the field of human resources for 30 years, she is an expert in human and social organization, and she has done many speaking engagements throughout her career. ⑥ Please let me know if you decide to invite her as my alternate so that I can give her advanced notice.

⑦ Once again, thank you for your invitation. ⑧ I hope your event is a great success.

① 곧 있을 인사관리협회의 지역 회의에 초청 연사로 저를 청해 주셔서 진심으로 명예롭고 영광스럽게 생각합니다. ② 이 모임에 상원 의원 몇 분을 초대하셨다는 점을 고려하면, 저는 이 행사가 훌륭한 행사가 될 것임을 충분히 알고 있습니다. ③ 유감스럽게도, 회의에서 연설하고 싶지만, 저는 가족 행사로 인해 그날 외국에 나가 있을 것이기 때문에 그렇게 할 수 없을 것입니다. ④ 이에 저는 제 자리를 대신할 초청 연사로 Julia Spencer 씨를 추천하고 싶습니다. ⑤ Spencer 씨는 30년 동안 인사 분야에서 일해 오고 있고, 인적 조직 및 사회 조직 전문가이며, 경력 내내 많은 연설 업무를 해 왔습니다. ⑥ 제 대체 연사로 그녀를 초대하기로 결정하시면 그녀에게 사전 고지할 수 있도록 제게 알려 주십시오. ⑦ 다시 한번, 귀하의 초대에 감사드립니다. ⑧ 저는 귀하의 행사가 큰 성공을 거두기를 바랍니다.

① One day we were asked to write a whole composition about some birds in Gaelic. ② I knew I could do it easily in English so it shouldn't be too difficult in Gaelic. ③ The words came very easily and although I wasn't sure I'd got all the past, present and future tenses perfectly correct, overall I decided I'd made a really good job of it. ④ Sister Cecilia then came towards me, and said, "Now, Kathleen O'Malley, let me see what you've done." ⑤ She read my essay. ⑥ I sat there patiently waiting for the praise I felt sure would be forthcoming. ⑦ I did notice that her colour was getting more and more ruddy, and suddenly she said, "Kathleen O'Malley, do you expect to pass?" ⑧ Without hesitation, I replied, "Yes, sister." ⑨ She then continued, "I've never read anything like this before." ⑩ I realized she had been anything other than blown away by my Gaelic masterpiece. ⑪ As a horrible sense of self-pity started slowly to descend on me, she went over to one of the girls and said, "Now I'm sure you've got a better composition." ⑫ She read that girl's work and a big smile spread across her face.

*Gaelic 게일어

① 어느 날 우리는 게일어로 어떤 새들에 관해 완전히 갖추어진 짧은 글을 쓰라는 요구를 받았다. ② 나는 영어로 그것을 쉽게 할 수 있어서 게일어로도 그다지 어렵지 않으리라는 것을 알고 있었다. ③ 단어들이 아주 쉽게 떠올랐고 모든 과거, 현재, 미래 시제를 완벽하게 정확히 했는지는 확실할 수 없었지만, 전반적으로 그것을 정말 잘 해냈다고 판단했다. ④ Cecilia 수녀님이 그때 나에게 다가와서 "자, Kathleen O'Malley, 네가 한 것을 내게 보여 주렴."이라고 말씀하셨다. ⑤ 그녀는 내 에세이를 읽었다. ⑥ 나는 곧 나오리라고 확실하는 칭찬을 참을성 있게 기다리며 거기 앉아 있었다. ⑦ 나는 그녀의 안색이 점점 더 붉어지고 있는 것을 정말 알아차렸는데, 그녀는 갑자기 "Kathleen O'Malley, 네가 통과할 거라고 생각하니?"라고 말했다. ⑧ "네, 수녀님."이라고 나는 주저 없이 대답했다. ⑨ 그러자 그녀는 "나는 이런 것을 전에 결코 읽어 본 적이 없다."라고 말을 계속했다. ⑩ 나는 그녀가 게일어로 된 나의 명작에 감동한 것이 전혀 아니라는 것을 깨달았다. ⑪ 끔찍한 자기 연민감이 나에게 천천히 내려앉기 시작했을 때, 그녀는 여자아이 중 한 명에게 가서 "자, 분명히 네가 더 나은 작문을 했을 거야."라고 말했다. ⑫ 그녀는 그 여자아이의 글을 읽었고 환한 미소가 그녀의 얼굴에 퍼졌다.

Word List

- whole 완전한 □ composition 짧은 글, 작문 □ tense 시제 □ overall 전반적으로 □ make a good job 잘 해내다
 □ patiently 참을성 있게 □ forthcoming 곧 오려고 하는, 다가오는 □ notice 알아차리다 □ ruddy 붉은 □ hesitation 망설임
 □ blow away ~을 감동시키다 □ masterpiece 걸작, 명작 □ horrible 끔찍한 □ self-pity 자기 연민 □ descend 내려앉다, 다가오다
 □ spread 번지다, 퍼지다

One day 우리는 게일로 어떤 새들에 관해 완전히 갖추어진 짧은 글을 쓰라는 요구를 받았다. I knew I could do it easily in English so it shouldn't be too difficult in Gaelic. The words came very ① laboriously and although I wasn't sure I'd got all the past, present and future tenses perfectly correct, overall I decided I'd made a really good job of it. Sister Cecilia then came towards me, and said, "Now, Kathleen O'Malley, let me see what you've done." She read my essay. I sat there patiently waiting for the ② praise I felt sure would be forthcoming. I did notice that her colour was getting more and more ③ ruddy, and suddenly she said, "Kathleen O'Malley, do you expect to pass?" Without hesitation, I replied, "Yes, sister." She then continued, "I've never read anything like this before." I realized she had been anything other than blown away by my Gaelic masterpiece. As a horrible sense of ④ self-pity started slowly to descend on me, she went over to one of the girls and said, "Now I'm sure you've got a ⑤ better composition." She read that girl's work and a big smile spread across her face.

Spring is in bloom and the park wears a new green coat. There are the tennis courts, a garden, and a small hill with 한때는 저택이었다가 지금은 행사용으로 사용되고 있는 오래된 집 and a food stand selling ice cream and snacks to sticky-fingered children. Two sets of train tracks loop around the park: the real one and the miniature one that is only for the summer and very small children. The sun is just starting to set, and while listening to the calming songs of the birds, Rosemary can see people enjoying the lengthening days. Runners make their way up the hill and down again. And on the edge of the park closest to her balcony a low redbrick building wrapping its arms around a perfect blue rectangle of water. A place to spend the day without disturbance, the pool is striped with ropes that split the lanes and she can see bright towels on the deckchairs. Swimmers float in the water like petals. It is a place she knows well. It is the lido, her lido.

① The idea of family support, suggested as one of the preconditions of any child's success, is far from being faultless. ② Thus, for example, the well-known musical psychologist Jane Davidson and her colleagues state that all the parents of children who later become successful musicians were, in fact, their charges' great friends and allies from earliest childhood. ③ If the great jazz musician Sidney Bechet were to hear of such a conclusion he would be surprised indeed. ④ His altogether respectable parents, who dreamed of something rather more substantial and reliable than a career in music for their son, actually hid his clarinet from him. ⑤ Robert Schumann's mother, the widow of a publisher and literary translator, reconciled herself only with difficulty to her son's choice of music as a profession; while Christoph W. Gluck, the great reformer of opera, was forced to roam about Italy and Bohemia after being expelled from home by his father. ⑥ Even some of the great musical geniuses, it is clear, were given switches and coal by an unkind Fate instead of the presents other youngsters received. ⑦ The 'universal support' given by parents to beginning musicians turns out, upon closer examination, to be a myth.

*charge 보살피야 하는 사람 **reconcile oneself to ~을 감수하다 ***switch 회초리

① 가족 성원에 대한 생각은, 어떤 아이든 그 아이의 성공의 전제 조건의 하나라고 제안 되는데, 결코 결점이 없는 것은 아니다. ② 따라서, 예컨대 유명한 음악 심리학자인 Jane Davidson과 그녀의 동료들은 나중에 성공한 음악가가 된 아이들의 모든 부모가 사실은 그들이 유년기부터 보살피야 하는 아이들의 훌륭한 친구이며 협력자였다고 말한다. ③ 만약 위대한 재즈 음악가인 Sidney Bechet가 그런 결론을 듣는다면, 그는 정말 놀랄 것이다. ④ 아들을 위해 음악에서의 직업보다는 다소 더 실질적이고 믿음직한 것을 꿈꿨던, 전적으로 존경할 만한 그의 부모는 실제로 그의 클라리넷을 그에게서 감춰다. ⑤ 출판업자이자 문학 번역가의 미망인이었던 Robert Schumann의 어머니는 자기 아들이 직업으로 음악을 선택한 것을 겨우 간신히 감수했으며, 한편, 훌륭한 오페라 개혁가였던 Christoph W. Gluck는 자기 아버지에게 의해 집에서 쫓겨난 후 Italy와 Bohemia를 여기저기 떠돌아야 했다. ⑥ 심지어 위대한 음악 천재 중 몇몇은 다른 아이들이 받았던 선물도 아니라 냉혹한 운명에 의해 회초리와 석탄을 받았던 것이 분명하다. ⑦ 초보 음악가에게 부모가 주는 '보편적 성원'은 더 자세히 조사해보면 근거 없는 믿음으로 판명된다.

Word List

- precondition 전제 조건 □ faultless 결점이 없는, 완전한 □ psychologist 심리학자 □ colleague 동료 □ state 말하다
□ ally 협력자, 동맹국 □ conclusion 결론 □ indeed 정말로 □ respectable 존경할 만한 □ substantial 실질적인
□ reliable 믿음직한, 신뢰할 만한 □ widow 미망인 □ literary 문학의 □ profession 직업 □ reformer 개혁가
□ roam 떠돌다, 헤매다 □ expel 쫓아내다, 추방하다 □ genius 천재 □ coal 석탄 □ myth 신화, 근거 없는 믿음

① Marketing is based on notions that are 20 years out of date.
 ② The notion that if you put enough messages out there some of them will be heard. ③ The notion that 'building the brand' is money well spent. ④ The notion that people believe what they see and read.
 ⑤ Recent initiatives to take advantage of Web 2.0 technologies are merely reactions that apply old techniques to new media.
 ⑥ Marketing needs to rethink the messages it is communicating, to whom it's communicated and the methods being used. ⑦ Many companies are disappointed at the lack of tangible return on their multi-million pounds marketing activities. ⑧ Advertising remains the largest budget item on most firms' marketing plans.
 ⑨ Advertising may be a fixture in a company's annual spend, but management boards are increasingly questioning why this is.
 ⑩ The most recent Brandchannel survey illustrates this point well.
 ⑪ Four of the world's five largest brands have never conducted any advertising, and the same is true for seven out of the 10 fastest-growing brands. ⑫ There is no proven causal relationship between advertising and financial performance. ⑬ And advertising is just the tip of the melting marketing iceberg.

① 마케팅은 시대에 20년 뒤떨어진 개념들에 기반을 두고 있다. ② 곧 충분히 많은 메시지를 밖으로 내보내면 그중 일부는 사람들이 들을 것이라는 개념, ③ '브랜드 구축'은 돈이 잘 사용되는 것이라는 개념, ④ 그리고 사람들은 보고 읽는 것을 믿는다는 개념이다. ⑤ 웹 2.0 기술을 활용하려는 최근의 주창은 그저 낡은 기술을 새로운 매체에 적용하는 반응에 불과하다. ⑥ 마케팅은 그것이 전달하고 있는 메시지, 그것이 전달되는 대상, 사용되고 있는 방법을 재고해야 한다. ⑦ 많은 회사가 수백만 파운드 of 마케팅 활동에 대한 유형 수익의 부족에 실망하고 있다. ⑧ 광고는 대부분의 기업 마케팅 계획에서 여전히 가장 큰 예산 항목이다. ⑨ 광고는 회사의 연간 지출에서 고정적인 요소일 수 있지만, (회사의) 이사회는 점점 더 왜 그런지에 대해 의문을 제기하고 있다. ⑩ 가장 최근의 Brandchannel 설문 조사가 이 점을 잘 보여 준다. ⑪ 세계 5대 브랜드 중 4개는 광고를 한 번도 한 적이 없으며, 이는 최고속 성장 10대 브랜드 중 7개도 마찬가지이다. ⑫ 광고와 재무 성과 사이에는 입증된 인과 관계가 없다. ⑬ 그래서 광고는 마케팅이라는 녹고 있는 빙산의 일각일 뿐이다.

c _____

① A key assumption in consumer societies has been the idea that “money buys happiness.” ② Historically, there is a good reason for this assumption — until the last few generations, a majority of people have lived close to subsistence, so an increase in income brought genuine increases in material well-being (e.g., food, shelter, health care) and this has produced more happiness. ③ However, in a number of developed nations, levels of material well-being have moved beyond subsistence to unprecedented abundance. ④ Developed nations have had several generations of unparalleled material prosperity, and a clear understanding is emerging: More money does bring more happiness when we are living on a very low income. ⑤ However, as a global average, when per capita income reaches the range of \$13,000 per year, additional income adds relatively little to our happiness, while other factors such as personal freedom, meaningful work, and social tolerance add much more. ⑥ Often, a doubling or tripling of income in developed nations has not led to an increase in perceived well-being.

① 소비 사회의 핵심 가정은 ‘돈으로 행복을 얻는다’는 생각이었다. ② 역사적으로, 이러한 가정에는 충분한 이유가 있다. 즉, 지난 몇 세대 전까지 대다수 사람이 최저 생계에 가깝게 살아왔기 때문에, 소득 증가는 물질적 복지(예를 들어, 음식, 주거, 의료)의 진정한 향상을 가져왔으며, 이는 더 많은 행복을 낳았다. ③ 그러나 많은 선진국에서 물질적 복지의 수준이 최저 생계를 넘어 전혀 없는 풍요로 옮겨갔다. ④ 선진국은 여러 세대에 걸쳐 비할 데 없는 물질적 번영을 누려 왔고, 명확한 이해가 부상하고 있는데, 우리가 매우 낮은 수입으로 생활할 때는 더 많은 돈이 더 많은 행복을 가져온다는 것이다. ⑤ 그러나 세계 평균으로서, 1인당 소득이 연간 13,000 달러 범위에 이르면, 추가 소득이 우리의 행복을 상대적으로 거의 늘리지 않지만, 개인의 자유, 의미 있는 일, 그리고 사회적 관용과 같은 다른 요소들이 훨씬 더 많이 보탬이 된다. ⑥ 흔히 선진국에서는 소득이 두 배 또는 세 배로 증가해도 체감되는 행복의 증대를 가져오지는 않았다.

① We are wired more for the struggle for survival on the savannah than we are for urban life. ② As a result, "Situations are constantly evaluated as good or bad, requiring escape or permitting approach." ③ In everyday life, this means that our aversion to losses is naturally greater than our attraction to gain (by a factor of two). ④ We have an inbuilt mechanism to give priority to bad news. ⑤ Our brains are set up to *detect* a predator in a fraction of a second, much quicker than the part of the brain that *acknowledge* one has been seen. ⑥ That is why we can act before we even "know" we are acting. ⑦ "Threats are privileged above opportunities," Kahneman says. ⑧ This natural tendency means that we "overweight" unlikely events, such as being caught in a terrorist attack. ⑨ It also leads to us overestimating our chances of winning the lottery.

- ⑤ concerned with the rational part, and fail to deal with the creative part

4강 1번

A key assumption in consumer societies has been the idea that “money buys happiness.” Historically, there is a good reason for this assumption — until the last few generations, a majority of people have lived close to subsistence, so an increase in income brought genuine increases in material well-being (e.g., food, shelter, health care) and this has produced more happiness. However, in a number of developed nations, levels of material well-being have moved beyond subsistence to unprecedented abundance. Developed nations have had several generations of unparalleled material prosperity, and a clear understanding is emerging: More money does bring more happiness when we are living on a very low income. However, as a global average, when per capita income reaches the range of \$13,000 per year, additional income adds relatively little to our happiness, while other factors such as personal freedom, meaningful work, and social tolerance add much more. Often, a doubling or tripling of income in developed nations has not led to an increase in perceived well-being.

*subsistence 최저 생계

09 읽기를 읽고 다음 질문에 영어로 답하십시오. (10단어 내외)

Q: When per capita income reaches the range of \$13,000 per year, what elements contribute more to happiness than income?

A: _____

10 읽기의 내용을 한 문장으로 요약하려고 한다. 빈칸 (A)와 (B)에 들어갈 알맞은 말을 본문에서 찾아 쓰시오.

When most people lived near the subsistence (A) well-being brought more happiness but as per capita income reaches \$13,000 a year, it doesn't lead to a(n) (B) in perceived happiness.

(A) _____ (B) _____

4강 2번

We are wired more for the struggle for survival on the savannah than we are for urban life. As a result, “Situations are constantly evaluated as good or bad, requiring escape or permitting approach.” In everyday life, this means that our aversion to losses is naturally greater than our attraction to gain (by a factor of two). We have an (A) mechanism to give priority to bad news. Our brains are set up to detect a (B) in a fraction of a second, much quicker than the part of the brain that *acknowledges* one has been seen. That is why we can act before we even “know” we are acting. “Threats are privileged above opportunities,” Kahneman says. This natural tendency means that we “overweight” unlikely events, such as being caught in a terrorist attack. It also leads to us overestimating our chances of winning the lottery.

*savannah 초원, 사바나 **aversion 혐오

11 윗글의 빈칸 (A)와 (B)에 들어갈 단어를 영영 뜻을풀이를 참고하여 쓰시오. (단, 주어진 글자로 시작하여 쓸 것)

- (A) existing as a natural or basic part of something
(B) an animal that kills and eats other animals

(A) i _____ (B) p _____

보기 ignoring / prioritizing / favorable / unlikely

We have innate mechanisms to survive by (A) bad news and (B) situations over good opportunities.

(A) _____ (B) _____

4강 3번

It is not only through our actions that we can give life meaning — insofar as we can answer life’s specific questions responsibly — we can fulfill the demands of existence not only as active agents but also as loving human beings: in our loving dedication to the beautiful, the great, the good. Should I perhaps try to explain for you with some hackneyed phrase how and why experiencing beauty can make life meaningful? I prefer to confine myself to the following thought experiment: imagine that you are sitting in a concert hall and listening to your favorite symphony, and your favorite bars of the symphony resound in your ears, and you are so moved by the music that it sends shivers down your spine; and now imagine that it would be possible for someone to ask you in this moment whether your life has meaning. I believe you would agree with me if I declared that in this case you would only be able to give one answer, and it would go something like: “It would have been worth it to have lived for this moment alone!”

*hackneyed 진부한

4강 4번

The process of research is often not entirely rational. In the classical application of the 'scientific method', the researcher is supposed to develop a hypothesis, then design a crucial experiment to test it. If the hypothesis withstands this test a generalization is then argued for, and an advance in understanding has been made. But where did the hypothesis come from in the first place? I have a colleague whose favourite question is 'Why is this so?', and 나는 이러한 순수한 질문이 훌륭한 연구 프로젝트를 탄생시키는 것을 보아 왔다 on quite a few occasions. Research is a mixture of inspiration (hypothesis generation, musing over the odd and surprising, finding lines of attack on difficult problems) and rational thinking (design and execution of crucial experiments, analysis of results in terms of existing theory). Most of the books on research methods and design of experiments — there are hundreds of them — are concerned with the rational part, and fail to deal with the creative part, yet without the creative part no real research would be done, no new insights would be gained, and no new theories would be formulated.

*withstand 잘 견디다 **spawn 탄생시키다, 낳다
***muse over ~에 대해 숙고하다

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

However, in the case of the new home, this is not the most important issue for a wise consumer.

Consumers usually attempt to spend as little as possible. However, it is often the case that people become too concerned with spending as little as possible in the short term, while ignoring the long-term cost of their expenditures. (①) Homebuilders are keenly aware that most homebuyers are trying to buy a home for the lowest price possible. (②) Most homes are purchased through a mortgage, and a wise homebuyer should be interested not just in the price of the mortgage, but also in the total price of owning and maintaining a home. (③) Besides maintenance and insurance costs, this would include the mortgage and utility payments. (④) It is usually the case that a more energy-efficient home costs more to build, and therefore has a higher mortgage payment. (⑤) However, a more energy-efficient home also will result in smaller utility payments.

It is obvious that organized party spirit is one of the greatest dangers of our time. In the form of nationalism it leads to wars between nations, and in other forms it leads to civil war. It should be the business of teachers to stand outside the strife of parties and endeavour to instill into the young the habit of impartial inquiry, leading them to judge issues on their merits and to be on their guard against accepting one-sided statements at their face value. The teacher should not be expected to flatter the prejudices either of the mob or of officials. His professional virtue should consist

in a readiness to do justice to all sides, and in an endeavour to rise above controversy into a region of dispassionate scientific investigation. If there are people to whom the results of his investigation are inconvenient, he should be protected against their resentment, unless it can be shown that he has lent himself to dishonest propaganda by the dissemination of demonstrable untruths.

*dispassionate 공정한 **propaganda 선전 ***dissemination 유포

Teachers should be unaffected by political bias, leading the young not to be ____ (A) ____ against any particular person, group, or point of view and conducting scientific ____ (B) ____ without fear of unjustified resentment

(A)

(B)

- ① impartial judgement
- ② impartial examination
- ③ arguing judgement
- ④ prejudiced punishment
- ⑤ prejudiced examination

Nobody has to teach a child to demand fair treatment; children protest unfairness vigorously and as soon as they can communicate. Nobody has to teach us to admire a person who sacrifices for a group; the admiration for duty is ❶ abnormal/universal. Nobody has to teach us to disdain someone who betrays a friend or is disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are moral — “Don’t hit”— and rules that are not — “Don’t chew gum in school.” These preferences also emerge from ❷ somehow/somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us disapprove of people who ❸ comply/violate social commitments, and approve of people who reinforce ❹ it/them. There is no society on earth ❺ when/where people are praised for running away in battle.

*vigorously 격렬하게 **disdain 경멸하다

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Nobody has to teach a child to demand fair treatment; children protest unfairness vigorously and as soon as they can communicate. Nobody has to teach us ❶ _____ (admire) a person who ❷ _____ (sacrifice) for a group; the admiration for duty is universal. Nobody has to teach us to disdain someone who betrays a friend or ❸ _____ (be) disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are moral — “Don’t hit”— and rules that are not — “Don’t chew gum in school.” These preferences also emerge from somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us ❹ _____ (disapprove) of people who violate social commitments, and approve of people who reinforce them. There is no society on earth where people ❺ _____ (praise) for running away in battle.

*vigorously 격렬하게 **disdain 경멸하다

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

Nobody has to teach a child to ❶ _____ (공정한 대우를 요구하다); children protest unfairness vigorously and as soon as they can communicate. Nobody has to teach us to admire a person who sacrifices for a group; ❷ _____ (의무에 대한 존경) is universal. Nobody has to teach us to disdain someone who betrays a friend or is ❸ _____ (~에 불충한) a family or tribe. Nobody has to teach a child the difference between rules that are moral — “Don’t hit”— and rules that are not — “Don’t chew gum in school.” These preferences also ❹ _____ (~에서 나온다) somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us disapprove of people who ❺ _____ (사회적 약속들을 어기다), and approve of people who reinforce them. There is no society on earth where people are praised for running away in battle.

*vigorously 격렬하게 **disdain 경멸하다

① In a recent presidential election, one of our local comedians compiled a list of all the recommendations being made by both the Democratic and Republican candidates for the presidency. ② He then switched them, and asked committed Democratic and Republican supporters about them. ③ Democratic voters were told their candidate thought the American military needed to be strengthened, the national borders more tightly controlled, and voter identification efforts strengthened. ④ As for those committed to the Republican candidate, he questioned them about their support of their candidate's (supposed) statements underscoring the need to expand national health care, create a more equitable tax system, and increase the minimum wage. ⑤ In every case, the supporters did not question the veracity of the list. ⑥ Instead, they began justifying their candidate's positions. ⑦ It was as if it did not matter what the facts were; once they had made up their minds who they were voting for, their job was to support him, not question him.

*equitable 공정한 **veracity 진실성

① 최근의 대통령 선거에서, 우리 지역의 코미디언 중 한 명이 민주당과 공화당의 대통령 후보 두 명 모두가 만들고 있던 모든 제안 사항을 엮어서 목록을 만들었다. ② 그리고 나서 그는 그것들을 맞바꾸고 그것들에 대해 열성적인 민주당과 공화당의 지지자들에게 물었다. ③ 민주당 투표자들은 자기 후보가 미군이 강화되어야 하고, 국경이 더 엄격하게 통제되어야 하며, 투표자 신원 확인 노력이 강화되어야 한다고 생각한다는 말을 들었다. ④ 공화당 후보에게 열성적인 사람들에 관해 말하자면, 그는 그들에게 국민 건강 보험을 확대해야 하고, 더 공정한 조세 제도를 마련해야 하고, 최저 임금을 인상해야 할 필요성을 강조하는 그들의 후보의(가상의) 주장에 대한 그들의 지지에 대해 물었다. ⑤ 모든 경우에, 지지자들은 그 목록의 진실성을 의심하지 않았다. ⑥ 그 대신에, 그들은 자기 후보의 입장을 정당화하기 시작했다. ⑦ 마치 사실이 무엇인지는 중요하지 않은 것 같았는데, 일단 자신이 누구에게 투표할지 결심하면, 그들의 임무는 그를 지지하는 것이지, 그를 심문하는 것이 아니었기 때문이다.

You may believe that all forms of ❶ positive/negative thinking are unnecessary, extreme, and irrational. Nothing could be further from the truth. Quite often, you might experience unpleasant, tragic, and upsetting events in your life that you believe ❷ being / to be negative. As a result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your ❸ distressed/distressing emotions will serve a useful function for you. For example, if a close friend has died and you are extremely sad because you miss your close relationship, crying, grieving, and sadness will allow you to work through the difficult situation and ❹ compose/incorporate it into your experience so that you can move on with your life. Only when the thoughts take on an unrealistically negative and distorted quality (e.g., “my life is over because my friend is gone; the same fate will soon befall me; I have nothing left to look forward to in my life”) is it likely ❺ that / which you will experience emotions and behavioral reactions that are dysfunctional and self-defeating.

① Evolution theory is being challenged. ② Darwin saw evolution as a gradual process of natural selection and survival of the fittest as the most likely phenomenon. ③ Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution is characterized by long periods of relative stability that are punctuated by sudden changes, followed by more stability, followed by more changes, and so on. ④ One hypothesis on why this occurs is that changes in environment cause species to diversify and specialize into several new niches, creating new lineages. ⑤ In Gould's theory, a species will be unchanged for thousands or hundreds of thousands of years and then suddenly something will happen that will change it (perhaps gene-splicing?) or even wipe it out. ⑥ Gould's theory can be thought of as macroevolution — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as microevolution — a continuous, almost unnoticeable succession of small changes.

*paleontologist 고생물학자 **niche (특정 종류의 생물이 살기에) 적합한 환경

① 진화론이 도전을 받고 있다. ② Darwin은 진화를 자연 선택의 점진적인 과정으로, 적자생존을 가장 있을 법한 현상으로 보았다. ③ 그런데 고생물학자인 Niles Eldredge와 Stephen Jay Gould와 같은 진화론자는 진화는 갑작스러운 변화로 중단되는 상대적 안정의 긴 기간 다음에 더 큰 안정이 따르고 다시 더 많은 변화가 따르는 것 등이 특징이라고 주장한다. ④ 이러한 일이 왜 발생하는지에 관한 한 가지 가설은 환경 변화로 인해 종이 다양해지고 몇 가지의 새로운 적합한 환경에 특화돼 새로운 계통이 만들어진다는 것이다. ⑤ Gould의 이론에서는, 종은 수천 년, 혹은 수십만 년 동안 변하지 않을 것이며, 그러다 갑자기 그것을 변화시키거나(아마도 유전자 접합?) 심지어 멸종시킬 어떤 일이 발생할 것이다. ⑥ Gould의 이론은 대진화, 즉 주기적이고 갑작스러운 큰 변화로 생각될 수 있고, 점진적 진화라는 일반적인 개념은 소진화, 즉 지속적이고 거의 눈에 띄지 않는 작은 변화의 연속으로 생각될 수 있다.

밑줄 친 There is no society on earth where people are praised for running away in battle.이 다음 글에서 의미하는 바로 가장 적절한 것은?

Nobody has to teach a child to demand fair treatment; children protest unfairness vigorously and as soon as they can communicate. Nobody has to teach us to admire a person who sacrifices for a group; the admiration for duty is universal. Nobody has to teach us to disdain someone who betrays a friend or is disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are moral — “Don’t hit” — and rules that are not — “Don’t chew gum in school.” These preferences also emerge from somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us disapprove of people who violate social commitments, and approve of people who reinforce them. There is no society on earth where people are praised for running away in battle.

*vigorously 격렬하게 **disdain 경멸하다

- ① Moral sense is not naturally gained, so constant education is needed.
- ② The sense of morality is something inherent rather than acquired.
- ③ Moral emotions can be strengthened by doing our duties.
- ④ Nobody is accused of their being immoral in a life-threatening situation.
- ⑤ Betrayal is not an innate human trait, but something learned from our environment.

다음 글의 내용과 일치하지 않는 것은?

In a recent presidential election, one of our local comedians compiled a list of all the recommendations being made by both the Democratic and Republican candidates for the presidency. He then switched them, and asked committed Democratic and Republican supporters about them. Democratic voters were told their candidate thought the American military needed to be strengthened, the national borders more tightly controlled, and voter identification efforts strengthened. As for those committed to the Republican candidate, he questioned them about their support of their candidate’s (supposed) statements underscoring the need to expand national health care, create a more equitable tax system, and increase the minimum wage. In every case, the supporters did not question the veracity of the list. Instead, they began justifying their candidate’s positions. It was as if it did not matter what the facts were; once they had made up their minds who they were voting for, their job was to support him, not question him.

*equitable 공정한 **veracity 진실성

If you're stuck developing an idea or even thinking of one, get unstuck by literally getting away from your desk. Go for a walk. (A). Bring your work somewhere else. 신체적 움직임이 창의적인 사고에 긍정적인 영향을 미치는 것으로 밝혀졌다. The philosopher and author Henry Thoreau claimed that his thoughts began to flow "the moment my legs began to move." Now scientists have discovered that taking part in regular (B) such as going for a walk or riding a bike really does improve creative thought. Professor Lorenza Colzato, a cognitive psychologist at Leiden University in the Netherlands, found in her 2013 study that people who (C) (e)d four times a week were able to think more creatively than those with a more sedentary lifestyle. One of my course sessions, an observation lab, is held outdoors, and the students love the walk and change in environment as they brainstorm possible solutions while moving across our campus.

Cosmology would not exist as a subject 설명해야 할 우주와 같은 것이 있지 않다면. Instead of finding that space is filled with a dog's breakfast of unrelated bric-a-brac, astronomers see an orchestrated and ① coherent unity. On the largest scale of size there is order and uniformity. Stars and galaxies billions of light-years away closely ② resemble those in our astronomical backyard and are distributed in much the same way everywhere. Their compositions and motions are similar. The laws of physics appear to be ③ identical as far out in space as our instruments can penetrate. In short, there is cosmos rather than chaos. This basic fact is crucial for our existence: life could not emerge, still less evolve to the point of intelligence, in chaos. It is also — or at least it was until recently — deeply mysterious. Why should the totality of things be organized so ④ unsystematically? To find the answer to this intriguing question, we need to understand how the universe began and work out how it evolved over billions of years to attain its present ⑤ orderly and life-encouraging form.

Ideally, business requires a stable environment within which to operate. Yet, the framework of law which governs business activities is subject to constant ____ (A) _____. The burden of keeping up to date may be eased slightly by making use of professional people such as an accountant or solicitor to advise on the latest developments in such areas as tax or company law. Nevertheless, the businessman will still need to keep himself informed of general legal ____ (B) ____ (e)s which will affect his day-to-day running of the business. If he employs others in his business, he will need to keep up to date on such matters as health and safety at work, the rights of his employees and his duties as an employer. If he sells goods direct to the consumer, he must be aware of ____ (C) ____ (e)s in consumer protection law. Almost every aspect of his business will be subject to legal regulation and the law could always ____ (D) _____.

A: _____

7강 4번

In absolute terms, the overall demand for doctors and teachers is much larger than ① those for professional athletes. Education and health care make up huge chunks of the US economy — health care, measured as a percentage of GDP, is in the double digits and growing. By contrast, ② despite the attention paid to it, professional sports is nowhere near as big. In relation to the number of practitioners in each field, however, the demand for athletes' services ③ are much larger than in either health care or education. The source of that demand is that hundreds of millions of people enjoy watching these sports, whether in person or on television. Fans will pay as much as hundreds of dollars per ticket ④ to attend, while 광고주는 스포츠에 대규모의 시청자를 넘겨 줄 수 있는 방송사에 말 그대로 수십억 달러를 지불할 것이다. The world might well be a better place if people paid less attention to spectator sports and more to reading, hiking, declaiming poetry, or practising Zen meditation, but the fact is that at the current stage of human development large numbers of people ⑤ do enjoy pro sports, and that creates significant income for the industry.

The above graph shows the number of living languages spoken per country in 2021, ❶ _____ (include) the number of languages spoken per one million inhabitants. Papua New Guinea is the most linguistically diverse country in the world, with 840 languages ❷ _____ (speak). Second on the list is Indonesia, with 712 different languages spoken throughout the country, immediately ❸ _____ (follow) by Nigeria with 522 living languages. Among the ten countries, there are only three where the number of living languages is less than 300. In terms of the number of languages spoken per one million inhabitants, Papua New Guinea also ❹ _____ (top) the list, with 93.9 languages spoken, immediately followed by Australia with 12.2 languages. China has the smallest number of languages spoken per one million inhabitants among the ten countries.

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

The above graph shows the number of living languages spoken per country in 2021, including the number of languages spoken ❶ _____ (거주자들 백만 명당). Papua New Guinea is the most linguistically diverse country in the world, with 840 languages spoken. Second on the list is Indonesia, with 712 different languages spoken ❷ _____ (전국적으로), immediately followed by Nigeria with 522 living languages. Among the ten countries, there are only three where the number of living languages is ❸ _____ (~ 미만인) 300. ❹ _____ (~의 측면에서) the number of languages spoken per one million inhabitants, Papua New Guinea also tops the list, with 93.9 languages spoken, immediately followed by Australia with 12.2 languages. China has the smallest number of languages spoken per one million inhabitants among the ten countries.

**U.S. College Enrollment Rates of 18- to
24-year-olds, by Race/Ethnicity:
2000, 2010 and 2018**

Race/Ethnicity \ Year	2000	2010	2018
White	39%	43%	42%
Black	31%	38%	37%
Hispanic	22%	32%	36%
Asian	56%	64%	59%
American Indian / Alaska Native	16%	41%	24%

① The above table shows the college enrollment rates of 18- to 24-year-olds by race/ethnicity in 2000, 2010, and 2018 in the U.S. ② Among all the racial and ethnic groups listed in the table, Asians showed the highest college enrollment rate in all three years. ③ The college enrollment rates in 2010 were higher than in 2000 for both Whites (43 vs. 39 percent) and Blacks (38 vs. 31 percent). ④ But compared to 2010, in 2018, the college enrollment rates marked a decrease for both White and Black 18- to 24-year-olds. ⑤ For Hispanics, the college enrollment rate was 10 percentage points higher in 2010 than in 2000 and 4 percentage points higher in 2018 than in 2010. ⑥ Among all the groups in the table, American Indians / Alaska Natives showed the highest increase in the college enrollment rate from 2000 to 2010, but showed the highest decrease from 2010 to 2018.

① 위 표는 미국에서 2000년, 2010년 및 2018년의 18세에서 24세의 대학 등록률을 인종별/민족별로 보여 준다. ② 표에 나와 있는 모든 인종 및 민족 집단 중, 아시아인은 세 개 연도 모두에서 가장 높은 대학 등록률을 보였다. ③ 2010년의 대학 등록률은 백인 (43퍼센트 대 39퍼센트) 과 흑인 (38퍼센트 대 31퍼센트) 둘 다 2000년보다 더 높았다. ④ 그러나 2010년에 비해, 2018년에는 18세에서 24세의 백인과 흑인 둘 다 대학 등록률이 감소를 나타냈다. ⑤ 히스패닉의 경우, 대학 등록률이 2000년보다 2010년에 10퍼센트포인트 더 높았고, 2010년보다 2018년에 4퍼센트포인트 더 높았다. ⑥ 표에 있는 모든 집단 중, 아메리칸 인디언 / 알래스카 원주민이 2000년부터 2010년까지 대학 진학률이 가장 높은 증가율을 보였지만 2010년부터 2018년까지 가장 높은 감소율을 보였다.

The college enrollment rates in 2010 were higher than in 2000 for both Whites (43 vs. 39 percent) and Blacks (38 vs. 31 percent). But compared to 2010, in 2018, the college enrollment rates ❷ _____ (감소를 나타냈다) for both White and Black 18- to 24-year-olds. ❸ _____ (히스패닉의 경우에), the college enrollment rate was 10 percentage points higher in 2010 than in 2000 and 4 percentage points higher in 2018 than in 2010. ❹ _____ (모든 집단들 중에서) in the table, American Indians / Alaska Natives showed the highest increase in the college enrollment rate from 2000 to 2010, but showed the highest decrease from 2010 to 2018.

The Share of Women Across STEM Job Types in the U.S.

% of employed in each occupational group who are women

① The above graphs show the share of women employees in STEM (science, technology, engineering and math) job types between 1990 and 2019 in the U.S. ② In 2019, women comprised about three-quarters of health-related jobs, which was the largest occupational type for women, followed by life science and math in that order. ③ In 1990, the share of women employees in life science jobs was lower than that of women employees in math jobs, but this was reversed in 2019 by one percentage point. ④ Women have made significant gains in life science and physical science jobs, which showed a 14- and 18-percentage-point increase, respectively, between 1990 and 2019. ⑤ In 1990, the share of women employees in computer jobs was more than double that of women employees in engineering jobs. ⑥ The share of women employees in engineering jobs was the lowest among STEM job types, at 12 percent, in 1990, slightly inching up to 15 percent in 2019.

① 위 도표는 미국에서 1990년과 2019년 사이의 STEM(과학, 기술, 공학, 수학) 분야의 직업군에서 여성 근로자의 점유율을 보여 준다. ② 2019년에 여성은 건강 관련 직업의 약 3/4을 차지했는데, 이것은 가장 큰 여성 직종이며, 생명 과학과 수학이 차례로 그 뒤를 이었다. ③ 1990년에 생명 과학 직업에서 여성 근로자의 점유율은 수학 직업의 여성 근로자의 그것보다 낮았으나, 이것은 2019년에 1퍼센트포인트 차이로 역전되었다. ④ 여성은 생명 과학과 자연 과학 직업에서 상당한 진전을 보였는데, 1990년과 2019년 사이에 각각 14퍼센트포인트와 18퍼센트포인트의 증가를 나타냈다. ⑤ 1990년에, 컴퓨터 직업에서의 여성근로자의 점유율은 공학 직업의 여성 근로자 점유율의 두 배가 넘었다. ⑥ 공학 직업의 여성 근로자 점유율은 1990년 12퍼센트로 STEM 직업군에서 가장 낮았으며, 2019년 15퍼센트로 소폭 상승했다.

Word List

U.S. College Enrollment Rates of 18- to 24-year-olds, by Race/Ethnicity:
2000, 2010 and 2018

Race/Ethnicity \ Year	2000	2010	2018
White	39%	43%	42%
Black	31%	38%	37%
Hispanic	22%	32%	36%
Asian	56%	64%	59%
American Indian / Alaska Native	16%	41%	24%

The above table shows the college enrollment rates of 18- to 24-year-olds by race/ethnicity in 2000, 2010, and 2018 in the U.S. ① Among all the racial and ethnic groups listed in the table, Asians showed the highest college enrollment rate in all three years. ② The college enrollment rates in 2010 were higher than in 2000 for both Whites (43 vs. 39 percent) and Blacks (38 vs. 31 percent). ③ But compared to 2010, in 2018, the college enrollment rates marked a decrease for both White and Black 18- to 24-year-olds. ④ For Hispanics, the college enrollment rate was 10 percentage points higher in 2010 than in 2000 and 4 percentage points lower in 2018 than in 2010. ⑤ Among all the groups in the table, American Indians / Alaska Natives showed the highest increase in the college enrollment rate from 2000 to 2010, but showed the highest decrease from 2010 to 2018.

William Black was born in Glasgow, Scotland. His father, a successful merchant, sent him to the School of Art at Glasgow, but Black pursued journalism ❶ _____ (그림 대신에). As a teenager he began writing essays for the local Glasgow newspapers. Some of Black's early articles were on well-known 19th-century English writers and thinkers such as Thomas Carlyle and John Ruskin. His early novel *James Merle* (1864) ❷ _____ (별다른 인상을 주지 못했다). Black eventually left Glasgow for London, where he began to write for another paper, the *Morning Star*. In 1865, he married Augusta Wenzel, who ❸ _____ (출산 중 사망했다) the following year. Black then went to Europe as a foreign correspondent to cover the so-called Seven Weeks' War, a conflict between Austria and Prussia. After returning to London, he continued to work as a journalist but also began to ❹ _____ (소설가로서 성공을 거두다). Black set his novels in the Scottish countryside and used a great deal of local color, traditions, and dialect, often setting up ❺ _____ (극적인 긴장) between his rural and his city-bred characters.

- ① Pi Day has been celebrated annually on 14 March since 1988.
 ② The brainchild of Larry Shaw, a physicist at the San Francisco Exploratorium, the date 14 March was chosen because the American pattern of writing dates is to put the month before the day, so that 14 March is written as 3/14, corresponding to the pattern of the first three digits of π , 3.14 (three point one four).
 ③ In 2009, the US House of Representatives passed a resolution recognising 14 March as National Pi Day. ④ The date has attracted increasing worldwide publicity and is celebrated in a vast variety of ways, particularly in schools and colleges, and involves the inevitable consumption of all kinds of pies as well as competitions to memorise and recite as many of the digits of π as possible.
 ⑤ Pi Day in 2015 was particularly significant because the date corresponded to the first five digits of π , 3.1415.

- ① ‘파이의 날’은 1988년부터 해마다 3월 14일에 기념되어 왔다. ② San Francisco Exploratorium의 물리학자였던 Larry Shaw의 아이디어로 3월 14일이라는 날짜가 선택되었는데, 월일을 표기하는 미국 방식이 월을 일 앞에 놓는 것이어서, 3월 14일이 3/14로 표기되어 π 값의 처음 세 자리 숫자의 양식, 즉 3.14와 일치하기 때문이다. ③ 2009년에 미국 하원이 3월 14일을 ‘전국 파이의 날’로 인정하는 결의안을 통과시켰다. ④ 그 날짜는 점점 더 많은 전 세계적인 매스컴의 관심을 끌어 왔고, 특히 학교와 대학에서 매우 다양한 방법으로 기념되고 있으며, π 값의 자리 숫자를 가능한 한 많이 암기해서 암송하는 대회뿐만 아니라 온갖 종류의 파이의 필연적인 섭취도 또한 수반한다. ⑤ 2015년의 ‘파이의 날’은 특히 그 날짜가 π 값의 처음 다섯 자리 숫자인 3.1415와 일치했기 때문에 의미가 있었다.

① Central Square Summer Youth T-ball Camp

② Enroll your child in a fun summer camp to learn T-ball and make friends. ③ The camp focuses on teaching kids the fundamentals of throwing, catching, and batting skills.

④ General information:

- ⑤ The camp meets twice per week, on Mondays and Wednesdays.
- ⑥ There will be 4 teams, and each team will have a maximum of 13 players.
- ⑦ Each participant will receive a camp T-shirt and a hat.
- ⑧ Lunch will be provided along with snacks.

⑨ **When:** June 5th–July 12th, Monday/Wednesday, 10:00 a.m.–2:00 p.m.

⑩ **Where:** Central Square Park. In case of bad weather, the camp will be held in an indoor arena at Central Square.

⑪ **Registration:** Registration opens May 15th, in person at the Central Square Community Center or online at www.centralsquare.org. ⑫ Due to limited spaces, register early!

⑬ **Cost:** \$45 per child

⑭ Our camp needs parent volunteer coaches. ⑮ Please contact the community center if you are able to volunteer. ⑯ Training will be provided.

① Central Square 여름 청소년 티볼 캠프

② 여러분의 자녀를 티볼을 배우고 친구를 사귄 수 있는 재미있는 여름 캠프에 등록하세요. ③ 캠프는 아이들에게 던지기, 잡기, 치기 기술의 기초를 가르치는 데 초점을 맞추고 있습니다.

④ 일반 정보:

- ⑤ 캠프는 일주일에 두 번, 월요일과 수요일마다 모입니다.
- ⑥ 4팀이 있을 것이고 팀마다 최대 13명의 선수가 있게 됩니다.
- ⑦ 각 참가자는 캠프 티셔츠와 모자를 받게 됩니다.
- ⑧ 간식과 함께 점심이 제공됩니다.

⑨ **시간:** 6월 5일~7월 12일, 월요일/수요일, 오전 10시~오후 2시

⑩ **장소:** Central Square 공원. 날씨가 좋지 않은 경우, 캠프는 Central Square의 실내 경기장에서 개최됩니다.

⑪ **등록:** 등록은 5월 15일에 시작하는데, Central Square 주민 센터에서 직접 하거나, www.centralsquare.org에서 온라인으로 할 수 있습니다. ⑫ 자리가 한정되어 있으니, 서둘러 등록하십시오!

⑬ **비용:** 어린이 한 명당 45달러

⑭ 저희 캠프에는 부모 자원봉사 코치가 필요합니다. ⑮ 자원봉사가 가능하면, 주민 센터로 연락해 주십시오. ⑯ 교육이 제공됩니다.

Future Scientists Program

We are now inviting applicants for the 2023
Future Scientists Program!

미래 과학자 프로그램은 과학과 연구에 관심 있는 사람들이 우리 기관에서
연구 조교로 참여할 기회를 제공합니다. Research assistant
positions will last for three months.

Eligibility Requirements

- Current university or community college students,
or recent graduates
- Those who are able to dedicate at least 5 hours
per week for the duration of the program

Important Dates

- March 1: application period opens.
- April 15: application period closes.
- May 3: results of application process will be
announced.
- June 1: program begins.
- August 31: program ends.

Application Requirements

- Complete the online application form.
- Send two letters of recommendation to
fsp23_letters@institute.org.
- There is a \$20 USD application fee.

*eligibility 자격, 적격(성)

고난도

2023 Farmers' Market Scavenger Hunt

Bring your kids to the 2023 Farmers' Market Scavenger Hunt for a fun day at the farmers' market!

Date and time: Saturday, June 3rd (9 a.m. – 12:30 p.m.)

Place: Hillsdale County Farmers' Market outdoor parking lot

Participants should be children ages 5 to 12.

General information:

- Arrive at the market, get instructions and a list of items to find from any vendor, and start looking.
- The first ten scavenger hunt finishers each receive a \$5 coupon to anything at the market.
- All participants will be entered into a _____ for another chance to win a prize at 1:00 p.m.

For more information, email hcfm@freshhillsdale.com or call 375-288-0761.

*scavenger hunt 보물찾기 게임 **vendor 노점

- 15** 윗글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (35자 내외)

Q: What can the first ten finishers do with the coupons they receive?

A: _____

- 16** 윗글의 빈칸에 들어갈 단어를 영영 뜻을참고하여 쓰시오. (단, 주어진 글자로 시작하여 동명사 형태로 쓸 것)

an act of choosing something such as a winning ticket from a group without knowing which one you are choosing

d _____

① Sometimes it's important to disagree. ② All the great social reforms which took place in the eighteenth century, for instance, began with the dedicated campaigns of a handful of people who saw something wrong, and did not let it rest. ③ Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later. ④ Social psychologists Moscovici and Nemeth showed that if just a few people stick to a particular view, which they are convinced is right, then over time they can have a great deal of influence on a larger group. ⑤ The important thing, though, is that those people who are in the minority and trying to influence the majority should be seen to be genuine, consistent and resisting social pressure. ⑥ If we see people acting like that, over time we become curious about why they are doing it and so are likely to think more seriously about what they are saying.

① 때로는 의견이 다른 것이 중요하다. ② 예를 들어, 18세기에 일어난 모든 위대한 사회 개혁은 잘못된 것을 보고 그것을 그대로 두지 않은 몇 안 되는 사람들의 헌신적인 운동으로 시작되었다. ③ 노예제가 18세기에 유럽에서 널리 받아들여졌으나, 일관적인 운동의 결과로 노예 무역이 19세기 초 무렵에 불법화되었고, 노예 소유가 몇 년 후에 불법화되었다. ④ 사회 심리학자 Moscovici와 Nemeth는 단지 소수의 사람이라도 자신이 옳다고 확신하는 특정한 관점을 고수하면, 시간이 지남에 따라 그들은 더 큰 집단에 많은 영향을 미칠 수 있다는 것을 보여 주었다. ⑤ 그러나 중요한 것은 소수파에 속하면서 다수파에 영향을 미치려고 하고 있는 그런 사람들은 진실하고 일관적이며 사회적 압력에 저항하고 있다고 여겨져야 한다는 것이다. ⑥ 사람들이 그렇게 행동하고 있는 것을 본다면, 시간이 지남에 따라 우리는 그들이 왜 그것을 하고 있는지에 대해 궁금해지고, 그래서 그들이 말하고 있는 것에 대해 아마도 더 진지하게 생각할 것이다.

Word List

- disagree 의견이 다르다 □ reform 개혁 □ take place 일어나다, 발생하다 □ dedicated 헌신적인
 □ campaign (조직적인) 운동, 캠페인: 운동[캠페인]을 벌이다 □ a handful of 소수의 □ rest (문제가 처리되지 않고) 그대로 있다
 □ slavery 노예제 □ consistent 일관적인 □ illegal 불법적인 □ own 소유하다 □ psychologist 심리학자 □ stick to ~을 고수하다
 □ convince 확신시키다 □ a great deal of 많은, 다량의 □ influence 영향; 영향을 미치다 □ minority 소수 집단 □ majority 다수집단
 □ genuine 진실한, 진심 어린 □ consistent 일관된 □ resist 저항하다 □ pressure 압력

Sometimes it's important to ❶ agree/disagree. All the great social reforms which took place in the eighteenth century, for instance, began with the dedicated campaigns of a handful of people who saw something ❷ wrong/right, and did not let it rest. Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later. Social psychologists Moscovici and Nemeth showed that if just a few people stick to a particular view, ❸ what/which they are convinced is right, then over time they can have a great deal of influence on a larger group. The important thing, ❹ therefore/though, is that those people who are in the minority and trying to influence the majority should be seen to be genuine, consistent and resisting social pressure. If we see people acting like that, over time we become curious about why they are doing it and ❺ so/that are likely to think more seriously about what they are saying.

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Sometimes it's important to disagree. All the great social reforms which took place in the eighteenth century, for instance, ❶ _____ (begin) with the dedicated campaigns of a handful of people who saw something wrong, and did not let it ❷ _____ (rest). Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later. Social psychologists Moscovici and Nemeth showed that if just a few people stick to a particular view, which they ❸ _____ (convince) is right, then over time they can have a great deal of influence on a larger group. The important thing, though, is that those people who are in the minority and ❹ _____ (try) to influence the majority should be seen to be genuine, consistent and resisting social pressure. If we see people acting like that, over time we become curious about why they are doing it and so ❺ _____ (be) likely to think more seriously about what they are saying.

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

Sometimes it's important to disagree. All the great social reforms which took place in the eighteenth century, ❶ _____ (예를 들어), began with the dedicated campaigns of ❷ _____ (몇 안 되는 사람들) who saw something wrong, and did not let it rest. Slavery was widely accepted in Europe in the eighteenth century, but ❸ _____ (~의 결과로) consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later. Social psychologists Moscovici and Nemeth showed that if just a few people ❹ _____ (특정한 관점을 고수하다), which they are convinced is right, then over time they can have a great deal of influence on a larger group. The important thing, though, is that those ❺ _____ (소수파에 속하는 사람들) and trying to influence the majority should be seen to be genuine, consistent and resisting social pressure. If we see people acting like that, over time we become curious about why they are doing it and so are likely to think more seriously about what they are saying.

① Attention is selective. ② We cannot focus on everything, and the knowledge we bring to a given situation allows us to direct our attention to the most important elements and to ignore the rest. ③ The extent to which our schemas and expectations guide our attention was powerfully demonstrated by an experiment in which participants watched a videotape of two “teams” of three people, each passing a basketball back and forth. ④ The members of one team wore white shirts, and the members of the other team wore black shirts. ⑤ Each participant was asked to count the number of passes made by the members of one of the teams. ⑥ Forty-five seconds into the action, a person wearing a gorilla costume strolled into the middle of the action. ⑦ Although a large black gorilla might seem hard to miss, only half the participants noticed it! ⑧ The participants’ schemas about what is likely to happen in a game of catch directed their attention so intently to some parts of the videotape that they failed to see a rather dramatic stimulus they did not expect to see.

① 주의를 선택적이다. ② 우리는 모든 것에 다 집중할 수는 없으며, 어떤 특정한 상황에 끌여오는 지식 때문에 가장 중요한 요소로 주의를 돌리고 나머지는 무시할 수 있다. ③ 우리의 스키마와 기대가 주의를 이끄는 정도는 참가자들이 3명으로 구성된 두 ‘팀’이 각자 농구공을 주고받으며 패스하는 비디오테이프를 보는 실험으로 매우 효과적으로 입증되었다. ④ 한 팀의 구성원들은 흰색 셔츠를 입었고, 다른 팀 구성원들은 검은색 셔츠를 입었다. ⑤ 각 참가자는 한 팀의 구성원들이 한 패스의 횟수를 세어 보라는 요청을 받았다. ⑥ 활동이 시작되고 45초 후, 고릴라 의상을 입은 한 사람이 그 활동의 한가운데로 걸어 들어갔다. ⑦ 커다란 검은 고릴라는 놓치기 어려워 보일겠지만, 참가자의 절반만이 그것을 알아챘다! ⑧ 캐치볼 게임에서 일어날 가능성이 있는 일에 관한 스키마 때문에 참가자들은 비디오테이프의 일부분에 매우 열중하여 주의를 기울였으므로, 자신들이 볼 것으로 예상하지 못한 꽤 인상적인 자극물을 보지 못했다.

Word List

- attention 주의(력) □ selective 선택적인, 선별적인 □ direct 돌리다, 향하게 하다 □ element 요소 □ ignore 무시하다
 □ extent 정도, 규모 □ schema 스키마, 도식(과거의 경험과 지식에 의해 형성된 개인의 인지 구조) □ demonstrate 입증하다
 □ experiment 실험 □ back and forth 주고받으며, 왔다 갔다, 앞뒤로 □ costume 의상, 복장 □ stroll 거닐다 □ miss 놓치다
 □ intently 골몰히, 열중하여 □ dramatic 인상적인, 극적인 □ stimulus 자극, 자극물

Sometimes it's important to disagree. All the great social reforms which took place in the eighteenth century, for instance, began with the dedicated campaigns of a handful of people who saw something wrong, and did not let it rest. Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later. Social psychologists Moscovici and Nemeth showed that if just a few people stick to a particular view, which they are convinced is right, then over time they can have a great deal of influence on a larger group. The important thing, though, is that those people who are in the minority and trying to influence the majority should be seen to be genuine, consistent and resisting social pressure. If we see people acting like that, over time we become curious about why they are doing it and so are likely to think more seriously about what they are saying.

- ① difficulties of campaigning for minority rights
- ② the power of minorities to cause social change
- ③ policies that brought slavery to an end in Europe
- ④ effects disobedience has on a minority's social status
- ⑤ the impact of the overwhelming majority on legal issues

Attention is selective. We cannot focus on everything, and the knowledge we bring to a given situation allows us to direct our attention to the most important elements and to ignore the rest. The extent to which _____ was powerfully demonstrated by an experiment in which participants watched a videotape of two "teams" of three people, each passing a basketball back and forth. The members of one team wore white shirts, and the members of the other team wore black shirts. Each participant was asked to count the number of passes made by the members of one of the teams. Forty-five seconds into the action, a person wearing a gorilla costume strolled into the middle of the action. Although a large black gorilla might seem hard to miss, only half the participants noticed it! The participants' schemas about what is likely to happen in a game of catch directed their attention so intently to some parts of the videotape that they failed to see a rather dramatic stimulus they did not expect to see.

- ① our schemas and expectations guide our attention
- ② we ignore unexpected features that stray from the rules
- ③ we become attentive to what others ask during a game
- ④ our prior knowledge affects our actions as a group member
- ⑤ our expectations for our team encourage good sportsmanship

With the rise of modern science new habits of mind developed. The method of the sciences and the image of scientific narratives became unquestioned and reinforced the new habits of mind, becoming an accomplice to those that would best accommodate the new image. These habits of mind became a duplication in the classroom of what the sciences were supposed to be doing in the laboratory. They developed clear and distinct ideas imitating mathematical models that are hypothetical, abstract, ahistorical, and humanly disembodied. Descartes, Newton, Galileo, Locke, and Rousseau are the best examples. The mind was trained to repeat certain logical operations until a habit was developed of reading the world according to those skills. Even if the reading was supposed to be disembodied and therefore objective, the result was that the viewpoints and skills became embodied in those using them. For the older habits of mind, external cosmologies (now considered outdated) were substituted in all classrooms.

Marshall, a Yale-trained biologist with FWS in Arizona, was becoming disillusioned by the overall implementation of the Endangered Species Act. The FWS was highly politicized by powerful, moneyed interests that saw species listings and particularly habitat designations as ❹ _____ (사업에 대한 위협): if a species is listed but no critical habitat is designated, a now-common pattern, then restrictions on business are far fewer. This created an atmosphere in which it was extremely difficult for technical biological staff to maintain their integrity, says Marshall. For example, the process to list the flycatcher as endangered began in 1992, the proposed rule didn't come out until 1995, and it took until 1997 to produce ❺ _____ (최종 판결) to list it. The FWS only completed the listing because the watchdog organization Center for Biological Diversity sued them.

*willow flycatcher 버드나무 딱새 **implementation 시행, 이행 ***integrity 변함없는 원칙 고수, 무결함

① Translating theory into something that can be assessed in the physical environment means that phenomena are made measurable. ② It is often assumed that the phenomenon being measured is the same no matter how it is measured. ③ Translations of theory into practice may differ, but these do not alter the nature of the phenomenon being measured. ④ Without this assumption, measurement between different individuals made in different places or at different times could not be compared. ⑤ The assumption does not, however, mean that this viewpoint is correct. ⑥ Within quantum physics there is a view that the observer and the phenomenon cannot be separated. ⑦ The observer and phenomenon make up a single system, a measurement system. ⑧ In this context it is not possible to separate the measurement made from the measurement system within which it was made. ⑨ The measurement and the phenomenon become combined in an unbreakable link in the measurement system. ⑩ It is impossible to talk of a separate existence for the phenomenon and so also, therefore, to talk of an independent measurement of that phenomenon. ⑪ This means that within the supposedly objective, hard science of physics, it is accepted that reality and how it is measured form an inseparable whole.

① 이론을 물리적 환경에서 가능할 수 있는 어떤 것으로 고쳐 말하는 것은 현상의 측정이 가능하게 된다는 것을 의미한다. ② 측정되고 있는 현상은 그것이 어떻게 측정이 되든지 간에 동일하다고 가정하는 경우가 많다. ③ 이론을 실제로 고쳐 말한 것들이 다를 수도 있지만, 이것들이 측정되고 있는 현상의 본질을 바꾸지는 않는다. ④ 이러한 가정이 없다면, 서로 다른 장소 혹은 서로 다른 시간에 이루어진 서로 다른 개인 간의 측정은 비교될 수 없다. ⑤ 하지만 그 가정은 이 관점이 옳다는 것을 뜻하지는 않는다. ⑥ 양자 물리학에서는 관찰자와 현상이 분리될 수 없다는 견해가 있다. ⑦ 관찰자와 현상은 하나의 시스템, 즉 측정 시스템을 이룬다. ⑧ 이러한 환경에서는 이루어진 측정과 그것이 이루어진 측정 시스템을 분리하는 것은 가능하지 않다. ⑨ 측정과 현상은 측정 시스템 안에서 깨뜨릴 수 없는 고리로 결합된다. ⑩ 현상이 별개로 존재한다는 것에 대해 말하는 것이 불가능하므로, 따라서 그 현상의 독립된 측정에 대해 말하는 것 역시 불가능하다. ⑪ 이는 이른바 객관적이라는, 물리학이라는 자연 과학에서 현실과 그것이 측정되는 방법이 불가분의 총체를 형성한다는 것이 용인된다는 것을 의미한다.

Translating theory into something that can be assessed in the physical environment means that phenomena are made ❶ measurable/measured. It is often assumed that the phenomenon being measured is the same no matter ❷ how / what it is measured. Translations of theory into practice may differ, but these do not alter the nature of the phenomenon being measured. ❸ With/Without this assumption, measurement between different individuals made in different places or at different times could not be compared. The assumption does not, however, mean that this viewpoint is correct. Within quantum physics there is a view that the observer and the phenomenon cannot be separated. The observer and phenomenon make up a single system, a measurement system. In this context it is not possible to separate the measurement made from the measurement system ❹ for which / within which it was made. The measurement and the phenomenon become combined in an unbreakable link in the measurement system. It is impossible to talk of a separate existence for the phenomenon and so also, ❺ however/therefore, to talk of an independent measurement of that phenomenon. This means that within the supposedly objective, hard science of physics, it is accepted that reality and how it is measured form an inseparable whole.

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Translating theory into something that can be assessed in the physical environment ❶ _____ (mean) that phenomena are made measurable. It is often assumed that the phenomenon ❷ _____ (be) measured is the same no matter how it is measured. Translations of theory into practice may differ, but these do not alter the nature of the phenomenon being measured. Without this assumption, measurement between different individuals ❸ _____ (make) in different places or at different times could not be compared. The assumption does not, however, mean that this viewpoint is correct. Within quantum physics there is a view that the observer and the phenomenon cannot be separated. The observer and phenomenon make up a single system, a measurement system. In this context it is not possible to separate the measurement made from the measurement system within which it ❹ _____ (make). The measurement and the phenomenon become combined in an unbreakable link in the measurement system. It is impossible to talk of a separate existence for the phenomenon and so also, therefore, to talk of an independent measurement of that phenomenon. This means that within the supposedly objective, hard science of physics, it is accepted that reality and how it is measured ❺ _____ (form) an inseparable whole.

On April 12, 1955, the day that the US government announced that the new polio vaccine was safe and effective, its inventor, Jonas Salk, was asked on television who owned the vaccine. He famously replied, "Well, the people, I would say. There is no patent. Could you patent the sun?" The vaccine was common property; it belonged to the people who had donated money for the public interest. Salk was later pitied for his decision. He could have earned \$7 billion if his vaccine had been patented. His attitude to patenting, however, is not unique. Even in the era of excessive property protection, there is a new interest in open sources and access, global goods, and the notion of the commons. Elon Musk, CEO of Tesla Motors, decided in June 2014 to release all of his patents. Technological leadership is not defined by patents. The future of sustainable transport will be better served by openly sharing information and knowledge. "All our patents belong to you."

12강 4번

Why are certain languages mistakenly thought to be primitive? There are several reasons. Some people consider other languages ugly or “primitive sounding” if those languages make use of sounds or sound combinations they find unclear because the sounds are greatly different from (A) that of the languages they themselves speak. Such a view is based on the ethnocentric attitude that the characteristics of one’s own language are obviously superior. But words that seem unpronounceable to speakers of one language — and are therefore considered obscure or even grotesque — (B) is easily acquired by even the youngest native speakers of the language in which they occur. To a native speaker of English, the Czech word *scvrnkls* “you flicked off (something) with your finger” looks quite strange, and its pronunciation may sound odd and even impossible because there is no vowel among the eight consonants; for native speakers of Czech, of course, *scvrnkls* is just another word. Which speech sounds are used and how they are combined to form words and utterances vary from one language to the next, and speakers of (C) any language can claim that their language has done the selecting and combining better than another.

*obscure 불분명한, 이해하기 어려운 **grotesque 괴상한
***flick (손가락 등으로) 튀기다

15 윗글의 밑줄 친 부분을 어법상 알맞은 형태로 고쳐 쓰시오.

(A) that → _____

(B) is → _____

(C) any → _____

16 윗글의 내용을 한 문장으로 요약하려고 한다. 빈칸 (A)와 (B)에 들어갈 알맞은 말을 본문에서 찾아 쓰시오.

Attitudes that regard certain languages as primitive stem from a(n) ____ (A) ____ belief that one’s language is ____ (B) ____ to another

(A) _____ (B) _____

① When we bemoan the lack of originality in the world, we blame it on the absence of creativity. ② If only people could generate more novel ideas, we'd all be better off. ③ But in reality, the biggest barrier to originality is not idea generation — it's idea selection. ④ In one analysis, when over two hundred people dreamed up more than a thousand ideas for new ventures and products, 87 percent were completely unique. ⑤ Our companies, communities, and countries don't necessarily suffer from a shortage of novel ideas. ⑥ They're constrained by a shortage of people who excel at choosing the right novel ideas. ⑦ The Segway, a two-wheeled, self-balancing personal transporter, was a false positive: it was forecast as a hit but turned out to be a miss. ⑧ *Seinfeld*, an American sitcom television series, was a false negative: it was expected to fail but ultimately flourished.

*bemoan 한탄하다

① 우리가 세상에서의 독창성의 부재를 한탄할 때, 우리는 그것을 창의성의 부재 탓으로 돌린다. ② 사람들이 더 많은 참신한 아이디어를 만들어 낼 수만 있다면, 우리 모두의 형편은 더 나을 것이다. ③ 그러나 실제로는, 독창성의 가장 큰 장벽은 아이디어 생성이 아니고, 아이디어 선택이다. ④ 어떤 분석에서, 200명이 넘는 사람들이 새로운 벤처 사업과 제품에 관해 1,000개가 넘는 아이디어를 생각해 냈을 때, 87퍼센트는 완전히 독특했다. ⑤ 우리 회사, 지역 사회, 국가가 반드시 참신한 아이디어의 부족을 겪는 것은 아니다. ⑥ 그것들은 알맞은 참신한 아이디어를 선택하는 데 탁월한 사람들의 부족으로 인해 제약을 받는다. ⑦ 이론 자가 균형 개인 운송기인 Segway는 긍정 오류였는데, 그것은 인기 제품으로 예측되었지만 실책으로 판명되었다. ⑧ 미국의 시트콤 텔레비전 시리즈인 *Seinfeld*는 부정 오류였는데, 그것은 실패할 것이라고 예상되었지만 결국 매우 성공했다.

Word List

- originality 독창성 □ blame 탓하다 □ absence 부재 □ novel 참신한, 새로운 □ better off (형편이) 더 나은 □ barrier 장벽
- generation 생성 □ analysis 분석 □ dream up ~을 생각해 내다 □ venture 벤처 사업 □ unique 독특한
- suffer from ~을 겪다 □ shortage 부족 □ constrain 제약하다 □ excel 뛰어나다 □ transporter 운송기
- false positive 긍정 오류(거짓인 것이 참으로 잘못 판정되는 오류) □ forecast 예측하다 □ turn out ~으로 판명되다
- false negative 부정 오류(참인 것이 거짓으로 잘못 판정되는 오류) □ ultimately 결국 □ flourish 매우 성공하다, 번성하다

① Caregivers for the old do much more than simply perform tasks. ② They provide intellectual engagement, social interaction, and emotional support, key factors in long-term health and longevity. ③ As society has grown more urban and as family homes have become less multigenerational, greater numbers of the elderly now live alone. ④ This shift brings with it diminished opportunities for social interaction. ⑤ In the United States, a 2010 American Association of Retired Persons study found that over a third of respondents age forty-five and older were lonely as measured on the UCLA loneliness scale. ⑥ Interactions with robots offer an opportunity to counteract, if not entirely remedy, the effects of such social isolation. ⑦ Brain scan studies using fMRI have shown people have a measurable emotional response to robots similar to that measured when interacting with other people, at least in certain situations. ⑧ While robots and technology can't entirely fill our need for social interaction, they may be able to provide some level of engagement.

① 고령자를 돌보는 사람들은 단순히 업무를 수행하는 것보다 훨씬 더 많은 일을 한다. ② 그들은 지적 관여, 사회적 상호 작용, 정서적 지원을 제공하는데, 그것들은 장기간의 건강과 장수의 핵심 요소이다. ③ 사회가 더욱 도시화되고 가정이 덜 다세대화되면서, 더 많은 수의 고령자가 현재 혼자 살고 있다. ④ 이러한 변화는 사회적 상호 작용을 위한 기회의 감소를 수반한다. ⑤ 미국에서, 2010년 미국 은퇴자 협회의 한 연구는 UCLA 외로움 척도로 측정했을 때 45세 이상 의 응답자 중 3분의 1 넘는 사람들이 외로움을 느낀다는 것을 알아냈다. ⑥ 로봇과의 상호 작용은 그러한 사회적 고립의 영향을 완전히 치료하는 것까지는 아니더라도, 그에 대응할 기회를 제공한다. ⑦ 기능적 자기 공명 영상법(fMRI)을 이용한 뇌 스캔 연구는 사람들이 최소한 특정한 상황에서는 다른 사람과 상호 작용을 할 때 측정된 감정 반응과 유사한 주목할 만한 감정 반응을 로봇에게 보인다는 것을 보여 주었다. ⑧ 로봇과 기술이 사회적 상호 작용에 대한 우리의 필요를 완전히 충족시켜 줄 수는 없지만, 그것들이 어느 정도의 관여는 제공할 수 있을 것이다.

Caregivers for the old do much more than simply perform tasks. They provide intellectual engagement, social interaction, and emotional support, key factors in long-term health and longevity. As society has grown more urban and as family homes have become ❶ less / more multigenerational, greater numbers of the elderly now live alone. This shift brings with it diminished opportunities for social interaction. In the United States, a 2010 American Association of Retired Persons study found that over a third of respondents age forty-five and older were lonely as ❷ measured / measuring on the UCLA loneliness scale. Interactions with robots offer an opportunity to counteract, ❸ if / if not entirely remedy, the effects of such social isolation. Brain scan studies using fMRI have shown people have a measurable emotional response to robots similar to ❹ that / those measured when interacting with other people, at least in certain situations. While robots and technology can't entirely fill our need for social interaction, they may be able to provide some level of engagement.

① The word “entertainment” derives from the Latin *tenere*, which means “to hold or keep steady, busy, or amused.” ② The notion of making money by keeping an audience steady, busy, or amused remains central to those in the business of entertainment. ③ Media practitioners, then, define entertainment as material that grabs the audience’s attention and leaves agreeable feelings, as opposed to challenging their views of themselves and the world. ④ However, this doesn’t mean that people who work in the entertainment business always stay away from informing or persuading. ⑤ Many movies that are categorized under “entertainment” by their production firms have been written and produced with the intention of making a political point (think of *The Day After Tomorrow*, *Syriana*, or *Blood Diamond*) or an educational point (like *Schindler’s List*, *Crash*, or *Letters from Iwo Jima*). ⑥ When media practitioners label a product as “entertainment,” though, they are signaling to their audiences that their primary concern should be with enjoyment, not with any other messages that may be included.

*practitioner (전문직) 종사자

① ‘엔터테인먼트’라는 단어는 라틴어 *tenere*에서 유래하는데, 그 말은 ‘안정되거나, 열중하거나, 즐거운 상태를 지속하거나 유지하는 것’을 의미한다. ② 관객을 안정되거나, 열중하거나, 즐거운 상태로 있게 함으로써 돈을 번다는 개념은 엔터테인먼트 사업에 종사하는 사람들에게 여전히 가장 중요하다. ③ 그래서 미디어 종사자들은 엔터테인먼트를 청중이 자신과 세상에 대하여 가지는 견해에 이의를 제기하는 것이 아니라 그들의 관심을 붙들어 기분 좋은 감정을 남기는 재물로 정의한다. ④ 하지만, 이것이 엔터테인먼트 업계에서 일하는 사람들이 항상 정보를 제공하거나 설득하는 것을 멀리한다는 것을 의미하지는 않는다. ⑤ 제작사에 의해 ‘엔터테인먼트’로 분류되는 많은 영화가 정치적 논점(*The Day After Tomorrow*, *Syriana*, 또는 *Blood Diamond*를 생각해 보라)이나 교육적 논점(*Schindler’s List*, *Crash*, 또는 *Letters from Iwo Jima*와 같이)를 만들려는 의도에서 쓰이고 제작되었다. ⑥ 그러나 미디어 종사자들이 제작물을 ‘엔터테인먼트’라고 일컬을 때, 그들은 청중에게 자신들의 주 관심사가 아마도 즐거움에 있을 것이며, 포함될 수도 있는 어떤 다른 메시지에 있지는 않으리라는 신호를 보내고 있다.

Word List

다음 글에서 전체 흐름과 관계 없는 문장은?

When we bemoan the lack of originality in the world, we blame it on the absence of creativity. If only people could generate more novel ideas, we'd all be better off. But in reality, the biggest barrier to originality is not idea generation — it's idea selection. In one analysis, when over two hundred people dreamed up more than a thousand ideas for new ventures and products, 87 percent were completely unique. ① This disproves the idea that uniqueness and originality are more distinct than similar. ② Our companies, communities, and countries don't necessarily suffer from a shortage of novel ideas. ③ They're constrained by a shortage of people who excel at choosing the right novel ideas. ④ The Segway, a two-wheeled, self-balancing personal transporter, was a false positive: it was forecast as a hit but turned out to be a miss. ⑤ *Seinfeld*, an American sitcom television series, was a false negative: it was expected to fail but ultimately flourished.

cultural tradition에 관한 다음 글의 내용과 일치하지 않는 것은?

A striking experiment was performed accidentally by Japanese anthropologists attempting to relieve an overpopulation and hunger problem in a community of monkeys on an island in south Japan. The anthropologists threw grains of wheat on a sandy beach. Now it is very difficult to separate wheat grains one by one from sand grains; such an effort might even expend more energy than eating the collected wheat would provide. But one brilliant monkey, Imo, perhaps by accident or out of pique, threw handfuls of the mixture into the water. Wheat floats; sand sinks, a fact that Imo clearly noted. Through the sifting process she was able to eat well. While older monkeys, set in their ways, ignored her, the younger monkeys appeared to grasp the importance of her discovery, and imitated it. In the next generation, the practice was more widespread; today all monkeys on the island are competent at water sifting, an example of a cultural tradition among the monkeys.

*expend (에너지·시간 등을) 쓰다[들이다] **out of pique 옥해서

- ① 실험으로서 의도한 것이 아닌 인류학자의 행동이 원숭이 집단에 관한 연구로 이어졌다.
- ② 모래알과 밀알을 분리할 때의 소모 에너지가 밀알 섭취로 얻는 것보다 더 클 수도 있다.
- ③ 밀알을 물에 띄우기 위해 원숭이 Imo는 모래와 밀알 혼합물을 물속에 던졌다.
- ④ 모든 원숭이가 Imo의 방식을 따라 밀알과 모래알을 구분한 것은 아니다.
- ⑤ 물로 걸러내는 이 지식이 세대를 거쳐 전파되어 원숭이들의 문화적 전통이 되었다.

밑줄 친 All such attitudes, of course, reveal more about social dominance and convention than they do about aptitude.가 다음 글에서 의미하는 바로 가장 적절한 것은?

The fact that a majority of the global population has at least some level of multilingual competence surely indicates that adding a second language is not a particularly remarkable feat. And yet, especially within powerful linguistic groups, it is common to find references to the difficulties involved or to the peculiar lack of language talents supposedly possessed. In the modern world, for example, English and American monolinguals often complain that they have no aptitude for foreign-language learning. This is usually accompanied by expressions of envy for those multilingual Europeans, and sometimes (more subtly) by a linguistic smugness reflecting a deeply held conviction that, after all, those clever “others” who don’t already know English will have to accommodate in a world made increasingly safe for anglophones. All such attitudes, of course, reveal more about social dominance and convention than they do about aptitude.

*feat 재주 **smugness 우쭐거림 ***anglophone 영어 사용자

- ① English speakers are safer in more places than multilingual people.
- ② A person’s ability is determined by how many languages he or she uses.
- ③ Those who are not good at language learning boast of their social status.
- ④ It is better to speak one important language than to speak multiple languages.
- ⑤ One’s attitude toward language acquisition and its necessity reflects the position of their society.

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

It was almost as if the unstated goal of his life was to analyse it and to give his opinions on how various things affected him.

A gentleman came into my stress-management office and said, ‘I’m mad at my boss. I don’t like my job. I don’t like the people that work with me. No one appreciates my work. I’m really angry.’ When I began teaching him about how his own thinking creates his angry feelings he said, ‘With all due respect, Dr. Carlson, I’m angry almost all the time, but I almost never think angry thoughts.’ Do you see where he was being fooled? (①) Until that moment, he believed that ‘thinking’ meant the same thing as ‘pondering.’ (②) Even though he may not have dwelled on his misery for hours at a time, he was nevertheless continually thinking negatively, a moment here and a moment there. (③) He spent nearly all of his time thinking about the little things that irritated and annoyed him. (④) His negative thoughts were creating his negative feelings and emotions and he didn’t even know he was thinking them. (⑤) He was a victim of his own thinking.

*ponder 심사숙고하다

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Caregivers for the old do much more than simply perform tasks. They provide intellectual engagement, social interaction, and emotional support, key factors in long-term health and longevity. As society has grown more urban and as family homes have become less multigenerational, greater numbers of the elderly now live alone. This shift brings with it diminished opportunities for social interaction. In the United States, a 2010 American Association of Retired Persons study found that over a third of respondents age forty-five and older were lonely as measured on the UCLA loneliness scale. Interactions with robots offer an opportunity to counteract, if not entirely remedy, the effects of such social isolation. Brain scan studies using fMRI have shown people have a measurable emotional response to robots similar to that measured when interacting with other people, at least in certain situations. While robots and technology can't entirely fill our need for social interaction, they may be able to provide some level of engagement.

Modern changes in society and families are making more elderly people socially _____ (A), but the development of robot technology is expected to have a(n) _____ (B) role in solving the problem.

(A)

(B)

- ① troublesome important
- ② isolated considerable
- ③ dependent imaginary
- ④ active leading
- ⑤ lonely insignificant

films에 관한 다음 글의 내용과 일치하지 않는 것은?

How are films made and produced? A news item, an event, a novel or the biography of an important person might suggest suitable themes. The film director's first job is to write a short account of the subject and to present it for a producer. This simple, untechnical plan is called a *treatment*. Movie director Jean Renoir and his scriptwriter wrote several unused treatments for *La Grande Illusion*. One of them is easy to get hold of; it is quite different from the final film. If a producer and a group of actors are interested in the scheme, the director or the scriptwriter rewrites the text in order to give a full list of shots, described in their order, with stage directions and technical terms clearly marked; this is the scenario. There is a good scenario of *October (Ten Days That Shook the World)* written by Eisenstein himself but, once again, it is far removed from the three finished versions of the film we can see today. It is difficult to put into practice what was decided beforehand, and important alterations occur in the course of production.

- ① 영화감독은 적절성을 따져 선정한 주제를 초안으로 만들어 제작자에게 보여 준다.
- ② ‘트리트먼트’라고 불리는 초안은 완성본 영화와는 매우 다르다.
- ③ 관계자들에 의해 선택되지 않은 대부분의 ‘트리트먼트’는 구하기 쉽다.
- ④ ‘트리트먼트’를 토대로 순서, 무대 지시, 전문 용어 등을 세밀하게 기술하여 시나리오를 다시 작성한다.
- ⑤ 최종적으로 작성된 시나리오에는 제작 과정에서 내용이 변경될 가능성이 있다.

밑줄 친 a dwarf sitting underneath who was a chess master, and controlled the puppet가 다음 글에서 의미하는 바로 가장 적절한 것은?

Our present-day thinking is based on a succession of historically evolved mentalities; on mental edifices which previous generations have constructed, pulled down, renovated and extended. Past events are compressed in images and metaphors which determine our present thinking even if we are not always aware of them. Common sense is the thickly viscous form of the past, the reflex of history which, like the story about a puppet and a chess-playing machine, always triumphs. The puppet dressed in Turkish garb was sitting in front of a chessboard on a large table. A cunning arrangement of mirrors created the impression of being able to see underneath the table. In actual fact, there was a dwarf sitting underneath who was a chess master, and controlled the puppet. We can imagine the continuous effect of historical experience acting like an ugly, unloved and happily forgotten dwarf, moving the pieces in the chess game of our everyday life.

*edifice (사고의) 체계 **viscous 끈적이는 ***garb 복장

- ① a group who turns a blind eye to reality and tries to write a new history
- ② a person who works for his or her own gain by deceiving others
- ③ a historical system of thought that implicitly influences current thinking
- ④ a person who manipulates others to distort their perception of reality
- ⑤ a thing that is disappearing from people's memories every day

08 13강 8번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The word “entertainment” derives from the Latin *tenere*, which means “to hold or keep steady, busy, or amused.” The notion of making money by keeping an audience steady, busy, or amused remains central to those in the business of entertainment. Media practitioners, then, define entertainment as material that grabs the audience’s attention and leaves agreeable feelings, as opposed to challenging their views of themselves and the world. However, this doesn’t mean that people who work in the entertainment business always stay away from informing or persuading. Many movies that are categorized under “entertainment” by their production firms have been written and produced with the intention of making a political point (think of *The Day After Tomorrow*, *Syriana*, or *Blood Diamond*) or an educational point (like *Schindler’s List*, *Crash*, or *Letters from Iwo Jima*). When media practitioners label a product as “entertainment,” though, they are signaling to their audiences that their primary concern should be with enjoyment, not with any other messages that may be included.

*practitioner (전문직) 종사자

Since the essence of the entertainment industry is to make the audience ____ (A) ____, even if an informative or persuasive work is made, its focus is ultimately on creating ____ (B) ____.

(A) (B)

- ① sincere greed
- ② happy pleasure
- ③ political intention
- ④ educational joy
- ⑤ doubtful heroism

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

In these animals ritual is triggered by certain messages or symbols in response to chemical messages from the genes.

Ritual is a set of catalytic messages, effecting transformation of state from one season of the year or one stage of the life cycle to another. (①) State refers either to a social and biological stage in life — adolescence or adulthood, for example — or to social status, such as graduate student or doctor of philosophy. (②) Many vertebrate species — especially birds but fish and mammals, too — have ritual. (③) For example, among the three-spined stickleback fish, the male's zigzag courtship dance, whereby he entices a prospective mate to his nest, is triggered by the sight of her red belly, which is the signal that she is biologically ready to lay eggs. (④) We assume, further, that the form of the zigzag dance itself is genetically programmed in the male's nervous system. (⑤) In any case, the ritual effects his transformation into a parent that tends the eggs in his nest.

There is a common misconception that the reason we have hunger is because the earth is straining to feed an ever-growing population. This is not the case. The world uses only about a third of its arable land for crop production. And even that third we use inefficiently. China, for instance, has dramatically higher crop yields per acre than the United States, primarily because, even though the two countries are comparable in size, China has three times the population of the United States and only one-sixth the arable land, so its population has to grow crops more efficiently. Planet earth is in fact such a prodigious producer of food that in the United States, enough food is thrown away to keep all of the hungry people in the world fed.

*arable 경작할 수 있는 **prodigious 거대한

- ① the truth behind the hunger problem
- ② the benefits of efficient farming practices
- ③ the relationship between hunger and population
- ④ the actual food production capacity of Earth
- ⑤ debating the problem of hunger and abandoned food

밑줄 친 the concept of free lunches가 다음 글에서 의미하는 바로 가장 적절한 것은?

There is a saying made famous by the Nobel memorial prize-winning economist Milton Friedman that ‘There’s no such thing as a free lunch’ — that we can’t magic wealth out of nothing (say, by printing money) or shift costs into the ether. Friedman’s view was that if we legislate to reduce a burden on some citizens, or to increase the advantages they may enjoy, there will be repercussions somewhere down the line that will involve a cost for others and might even ultimately mean the measure is counterproductive. So even if a meal is priced at zero, someone, somewhere is paying for it. Modern economics may disparage the concept of free lunches, yet, today, one often gets a sense from key economists and policy-makers that a free lunch isn’t that far away. Economics aims to show how we can generate growth by identifying more efficient ways of organising society, thereby making us richer and, hopefully, happier, with the least amount of sacrifice on our part. Such a utopia is achievable, economists believe, because they understand the mechanisms that drive everything from business investment and production decisions to consumer purchase choices, to individual attitudes to saving.

*ether 하늘, 창공 **repercussion 반향 ***disparage 폄하하다

- ① a free meal given to someone lawfully
- ② enjoying the benefits of burdening others
- ③ providing something for free by minimizing social costs
- ④ organizing society more efficiently to bring about growth
- ⑤ data on the core policies of economists and policymakers

다음 글의 요지로 가장 적절한 것은?

When we bemoan the lack of originality in the world, we blame it on the absence of creativity. If only people could generate more novel ideas, we’d all be better off. But in reality, the biggest barrier to originality is not idea generation — it’s idea selection. In one analysis, when over two hundred people dreamed up more than a thousand ideas for new ventures and products, 87 percent were completely unique. Our companies, communities, and countries don’t necessarily suffer from a shortage of novel ideas. They’re constrained by a shortage of people who excel at choosing the right novel ideas. The Segway, a two-wheeled, self-balancing personal transporter, was a false positive: it was forecast as a hit but turned out to be a miss. *Seinfeld*, an American sitcom television series, was a false negative: it was expected to fail but ultimately flourished.

The fact that a majority of the global population has at least some level of multilingual competence surely indicates that adding a second language is not a particularly remarkable feat. And yet, especially within powerful linguistic groups, it is common to find references to the difficulties involved or to the peculiar lack of language talents supposedly possessed. In the modern world, for example, English and American monolinguals often complain that they have no aptitude for foreign-language learning. This is usually accompanied by expressions of envy for

those multilingual Europeans, and sometimes (more subtly) by a linguistic smugness reflecting a deeply held conviction that, after all, those clever “others” who don’t already know English will have to accommodate in a world made increasingly safe for anglophones. All such attitudes, of course, reveal more about social dominance and convention than they do about aptitude.

*feat 재주 **smugness 우쭐거림 ***anglophone 영어 사용자

The word “entertainment” derives from the Latin *tenere*, which means “to hold or keep steady, busy, or amused.” The notion of making money by keeping an audience steady, busy, or amused remains central to those in the business of entertainment. Media practitioners, then, define entertainment as material that grabs the audience’s attention and leaves agreeable feelings, as opposed to challenging their views of themselves and the world. However, this doesn’t mean that people who work in the entertainment business always stay away from informing or persuading. Many movies that are categorized under “entertainment” by their production firms have been written and produced with the intention of making a political point (think of *The Day After Tomorrow*, *Syriana*, or *Blood Diamond*) or an educational point (like *Schindler’s List*, *Crash*, or *Letters from Iwo Jima*). When media practitioners label a product as “entertainment,” though, they are signaling to their audiences that their primary concern should be with enjoyment, not with any other messages that may be included.

ritual에 관한 다음 글의 내용과 일치하지 않는 것은?

Ritual is a set of catalytic messages, effecting transformation of state from one season of the year or one stage of the life cycle to another. *State* refers either to a social and biological stage in life — adolescence or adulthood, for example — or to social status, such as graduate student or doctor of philosophy. Many vertebrate species — especially birds but fish and mammals, too — have ritual. In these animals ritual is triggered by certain messages or symbols in response to chemical messages from the genes. For example, among the three-spined stickleback fish, the male's zigzag courtship dance, whereby he entices a prospective mate to his nest, is triggered by the sight of her red belly, which is the signal that she is biologically ready to lay eggs. We assume, further, that the form of the zigzag dance itself is genetically programmed in the male's nervous system. In any case, the ritual effects his transformation into a parent that tends the eggs in his nest.

13강 9번

Ritual is a set of catalytic messages, effecting _____ (A) _____ of state from one season of the year or one stage of the life cycle to another. *State* refers either to a social and biological stage in life — adolescence or adulthood, for example — or to social status, such as graduate student or doctor of philosophy. Many vertebrate species — especially birds but fish and mammals, too — have ritual. In these animals ritual is triggered by certain messages or symbols in response to chemical messages from the genes. For example, among the three-spined stickleback fish, the male’s zigzag courtship dance, whereby he entices a prospective mate to his nest, is triggered by the sight of her red belly, which is the signal that she is biologically ready to lay eggs. We assume, further, that the form of the zigzag dance itself is genetically programmed in the male’s nervous system. In any case, the ritual effects his _____ (B) _____ into a parent that tends the eggs in his nest.

*catalytic 촉매(작용)의 **vertebrate 척추동물(의) ***entice 유인하다

41

윗글을 읽고 다음 질문에 영어로 답하십시오. (5단어)

Q: What is the ritual of the three-spined stickleback fish that enables the male fish to attract a mate to his nest?

A: The ritual of the male three-spined stickleback fish is _____.

42

윗글의 빈칸 (A), (B)에 공통으로 들어갈 단어를 영영 뜻 풀이를 참고하여 쓰시오. (단, 주어진 글자로 시작할 것)

a change into someone or something completely different, or the process by which this happens

t _____

13강 10번

Post-traumatic stress syndrome became common knowledge but not the concept of post-traumatic growth, which is actually ① far more widespread. Most people who undergo trauma ultimately feel that the experience has made them stronger, wiser, more mature, more ② tolerant and understanding, or in some other way better people. The influential psychologist Martin Seligman has often lamented that so much attention is lavished on post-traumatic stress syndrome rather than post-traumatic growth because it causes people ③ mistakenly expect that bad events will have mainly negative effects. After ④ exposing to a terrifying event, at least 80 percent of people do not experience post-traumatic stress syndrome. Even though a single bad event is more powerful than a good event, over time people respond in so many constructive ways ⑤ which they typically emerge more capable than ever of confronting life's challenges. Bad can make us stronger in the end.

*post-traumatic (정신적) 외상(外傷) 후의 **lament 한탄하다
***lavish 낭비하다

고난도

(A) _____ trauma after experiencing a terrible
event, however, they actually end up becoming
stronger against the (B) _____ of life.

(A) _____ (B) _____

13강 11번

There is a common misconception that the reason we have hunger is because the earth is straining to feed an ever-growing population. This is not the case. The world uses only about a third of its arable land for crop production. And even that third we use inefficiently. China, for instance, has dramatically higher crop yields per acre than the United States, primarily because, even though the two countries are comparable in size, China has three times the population of the United States and only one-sixth the arable land, so its population has to grow crops more efficiently. Planet earth is in fact such a prodigious producer of food that in the United States, 전 세계의 모든 굶주린 사람들을 먹여 살리기에 충분한 양의 음식이 버려진다.

*arable 경작할 수 있는 **prodigious 거대한

45 윗글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (60자 내외)

Q: Although the size of China and the United States is almost the same, why does China have much higher crop yields than the United States?

13강 12번

There is a saying made famous by the Nobel memorial prize-winning economist Milton Friedman that 'There's no such thing as a free lunch' — that we can't magic wealth out of nothing (say, by printing money) or shift costs into the ether. Friedman's view was that if we legislate to reduce a burden on some citizens, or to increase the advantages they may enjoy, there will be repercussions somewhere down the line that will involve a cost for others and might even ultimately mean the measure is _____. So even if a meal is priced at zero, someone, somewhere is paying for it. Modern economics may disparage the concept of free lunches, yet, today, one often gets a sense from key economists and policy-makers that a free lunch isn't that far away. Economics aims to show how we can generate growth by identifying more efficient ways of organising society, thereby making us richer and, hopefully, happier, with the least amount of sacrifice on our part. Such a utopia is achievable, economists believe, because they understand the mechanisms that drive everything from business investment and production decisions to consumer purchase choices, to individual attitudes to saving.

*ether 하늘, 창공 **repercussion 반향 ***disparage 폄하하다

Random sampling doesn't mean just choosing the people to participate in the study haphazardly — there's a ❶ difference/similarity between the meaning of the word 'random' in everyday use and its meaning in statistics and research methods. A random sample is a sample ❷ that/in which every member of the population has an equally likely chance of being selected for the study — and that isn't as easy as it sounds. Most sampling methods will ❸ consciously/unconsciously favour some people, and not others. Picking names at random out of a telephone directory means that people who are ex-directory or who don't use landlines are not going to be included. In a psychological study, that could introduce a bias, because those people may be ❹ different from / similar to others in some important way — for example, by being younger, or more suspicious of strangers.

*haphazardly 되는 대로

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Random sampling doesn't mean just choosing the people ❶ _____ (participate) in the study haphazardly — there's a difference between the meaning of the word 'random' in everyday use and its meaning in statistics and research methods. A random sample is a sample in which every member of the population has an equally likely chance of ❷ _____ (select) for the study — and that isn't as easy as it ❸ _____ (sound). Most sampling methods will unconsciously favour some people, and not others. Picking names at random out of a telephone directory means that people who are ex-directory or who don't use landlines are not going to ❹ _____ (include). In a psychological study, that could introduce a bias, because those people may be different from others in some important way — for example, by ❺ _____ (be) younger, or more suspicious of strangers.

*haphazardly 되는 대로

The desire for esteem can be used effectively by society to influence how people act. Systems of prestige are found in all cultures, and in general prestige is used to recognize and reward people who do what is most useful to the culture. People will labor for years, even decades, in the hope of securing the esteem of their fellows and the accompanying right to think well of themselves. By linking prestige and esteem to particular activities or accomplishments, a culture can _____. It is no accident that in small societies struggling for survival, prestige comes with bringing in large amounts of protein (hunting) or defeating the most dangerous enemies (fighting). By the same token, the prestige of motherhood probably rises and falls with the society’s need to increase population, and the prestige of entertainers rises and falls with how much time and money the population can devote to leisure activities.

- ① order people to accomplish tasks for a particular authority
- ② direct many people to devote their energies in those directions
- ③ keep people from indulging in basic human physiological needs
- ④ redirect people’s energies to dull them in an immediate crisis
- ⑤ ease survival competition among its active participants

Random sampling doesn't mean just choosing the people to participate in the study haphazardly — there's a difference between the meaning of the word 'random' in everyday use and its meaning in statistics and research methods. A random sample is a sample in which every member of the population has an equally likely chance of being selected for the study — and that isn't as easy as it sounds. Most sampling methods will unconsciously favour some people, and not others. Picking names at random out of a telephone directory means that people who are ex-directory or who don't use landlines are not going to be included. In a psychological study, that could introduce a bias, because those people may be different from others in some important way — for example, by being younger, or more suspicious of strangers.

Within travel destinations, it is not uncommon to see higher sticker prices in areas most frequented by tourists; prices are much lower elsewhere where locals shop. A few smart tourists soon learn to get away from these “tourist traps” to find better deals where there are not as many tourists. Most tourists will not, because it doesn’t pay to spend their scarce vacation time attempting to find cheaper restaurants, souvenirs, and so on outside the tourist areas. If the time spent in searching and shopping for the best deals is included as part of the prices of the purchases, “prices” are actually lower in the tourist areas for most tourists. In sum, locational price differences are generally not considered price discrimination.

What do we want to hear when asking the question why John slammed the door? Probably not that John put more than average energy into his act, giving the door more speed (which resulted in a heavy ❶ collision/collapse of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of the chain of causes and effects leading up ❷ to/for the slamming. ❸ Neither/Whether do we expect to hear a report about micro-processes in John's body causing his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind ❹ which/that the state of being offended can be traced in John's brain, we usually will not be interested in an answer in neurological terms. So, ❺ normally/relatively, in our day-to-day why-questions about people's actions we expect to hear about their reasons.

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

What do we want to hear when ❶ _____ (ask) the question why John slammed the door? Probably not that John put more than average energy into his act, ❷ _____ (give) the door more speed (which resulted in a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of the chain of causes and effects ❸ _____ (lead) up to the slamming. Neither do we expect to hear a report about micro-processes in John's body ❹ _____ (cause) his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind that the state of ❺ _____ (offend) can trace in John's brain, we usually will not be interested in an answer in neurological terms. So, normally, in our day-to-day why-questions about people's actions we expect to hear about their reasons.

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

What do we want to hear when asking the question why John slammed the door? Probably not that John put more than average energy into his act, giving the door more speed (which ❶ _____ (결과적으로 ~하게 했다) a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of ❷ _____ (일련의 원인들과 결과들) leading up to the slamming. Neither do we expect to hear a report about micro-processes in John's body causing his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind that ❸ _____ (화가 난 상태) can be traced in John's brain, we usually will not be interested in an answer ❹ _____ (신경학 용어들로 된). So, normally, in our day-to-day why-questions about people's actions we expect to hear about their reasons.

① We can presume that the components of love proposed by Sternberg can be found in all cultures. ② Intimacy, passion, and commitment are most likely cultural universals. ③ Evidence of this comes from many sources, including cultural anthropology, psychological research, and love poetry from across the world. ④ What does appear to vary across cultures, however, is the emphasis placed on the different components of love and on different types of relationships. ⑤ In collectivist cultures like those found in Asia and Africa, relationships with family may take priority over relationships with lovers and friends. ⑥ In individualistic cultures, like those of Northern Europe and North America, friendships and romantic relationships compete with family for priority (and often win). ⑦ Likewise, the concept of duty (similar to Sternberg's concept of commitment) is absolutely central to Chinese Confucianism. ⑧ In contrast, judging by the mountains of romance novels, love songs, and beauty products found in North America, it is the passionate side of love that is prized in this culture.

① 우리는 Sternberg가 제안한 사랑의 구성 요소가 모든 문화에서 발견될 수 있다고 추정할 수 있다. ② 친밀감, 열정, 헌신은 문화적으로 보편적 특성일 가능성이 매우 크다. ③ 이것의 증거는 문화 인류학, 심리학적 연구, 그리고 전 세계의 사랑의 시를 포함한 많은 출처에서 나온다. ④ 그러나 정말 문화에 따라 다르게 보이는 것은 사랑의 서로 다른 구성 요소를 어떻게 강조하고 서로 다른 관계 유형을 어떻게 강조하는지이다. ⑤ 아시아와 아프리카에서 보이는 것과 같은 집단주의 문화에서는, 가족과의 관계가 연인이나 친구와의 관계보다 우선할 수 있다. ⑥ 북유럽과 북미의 문화와 같은 개인주의 문화에서는, 우정과 연인 관계가 우선순위를 두고 가족과 경쟁한다(그리고 흔히 이긴다). ⑦ 마찬가지로, (Sternberg의 헌신 개념과 유사한) 의무라는 개념은 중국 유교에 절대적으로 중요하다. ⑧ 이와 대조적으로, 북미에서 보이는 산더미처럼 많은 로맨스 소설, 사랑의 노래, 미용 제품으로 판단해 보면, 이 문화에서 소중히 여겨지는 것은 바로 사랑의 열정적인 면이다.

Word List

- presume 추정하다 □ component 구성요소 □ propose 제안하다 □ intimacy 친밀감 □ passion 열정 □ commitment 헌신
 □ universal 보편적 특성 □ evidence 증거 □ anthropology 인류학 □ emphasis 강조, 중점 □ collectivist culture 집단주의 문화
 □ priority 우선순위 □ individualistic 개인주의적인 □ concept 개념 □ Confucianism 유교 □ in contrast 대조적으로
 □ passionate 열정적인 □ prize 소중히 여기다

What do we want to hear when asking the question why John slammed the door? Probably not that John put more than average energy into his act, giving the door more speed (which resulted in a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of the chain of causes and effects leading up to the slamming. Neither do we expect to hear a report about micro-processes in John's body causing his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind that the state of being offended can be traced in John's brain, we usually will not be interested in an answer in neurological terms. So, normally, in our day-to-day why-questions about people's actions we expect to hear about their reasons.

- ① The True Aim of the Question Why
- ② Wonder: The Main Cause of Behavior
- ③ How to Know the Exact Intent of a Question
- ④ The Need to Always Ask Why in Everyday Life
- ⑤ The Importance of Identifying Cause and Effect

It could be argued that the ‘processual’ nature of personhood means that one becomes a person as one ‘goes along’ in society. Indeed, the African philosopher Ifeanyi Menkiti takes this position. He maintains that children are not fully human. Following Kwame Gyekye, a Ghanaian philosopher, however, I would argue that the fact that personhood must be earned is not a denial of personhood to children. It is an affirmation of the view that *personhood is an ongoing process* attained through interactions with others and one’s community. It requires one to affirm ideals and standards thought to be constitutive of the life of a community. These are standards such as generosity, benevolence and respect. A number of sayings in some African societies refer to people who have failed to meet standards expected of a fully human person. These are sayings such as *ga e se motho* (Tswana) or *a ku si muntu* (Nguni), literally meaning ‘he or she is not a person’. Because one can fall short of these standards at any stage in the life cycle, personhood could be regarded as a *becoming*. It is an unpredictable, open-ended process during which personhood may be achieved, lost, and regained, depending on a person’s circumstances.

*affirmation 지지. 확인 **benevolence 자비심

- ① 아이들을 완전한 존재로 바라보는 관점은 한계가 있다.
- ② 사람은 공동체의 이상에 도달되어야만 인정받을 수 있다.
- ③ 사람이 공동체 규범에서 벗어나서 사는 것은 힘든 일이다.
- ④ 사람다움이란 이상과 규범을 통해 성취되어가는 과정이다.
- ⑤ 사회의 일원으로 인정받는 생애주기는 공동체마다 다르다.

Some countries grow cash crops. These are crops that are in high demand and can be grown in

large quantities in specific areas of the world. For example, sugar needs a hot, damp climate; coffee needs a hot climate, rainfall, and higher mountain elevations. Tea needs to grow on hillsides in rainy areas. Bananas grow well in tropical environments. Because there is a worldwide demand for specific items such as these, the farmers in tropical countries grow as much of these commodities as they can. These cash crops are sold all around the world and bring in a lot of money, but there are risks to specializing in just one commodity for trade. If these farmers grow too much of a particular cash crop, that creates more supply than demand, which drops the price of the commodity. If the climate is bad, and the cash crop does not grow well one year, that hurts the country selling it because that crop may be the only one the country provides in large enough quantities to make a living from.

*cash crop 환금 작물(시장에 내다 팔기 위하여 재배하는 농작물)

- ① 환금 작물은 많은 수요를 충족하기 위해 특정 지역에서 대량으로 재배된다.
- ② 환금 작물의 재배를 위해서 각 작물에 맞는 기후와 지형이 필요하다.
- ③ 특정 지역의 환금 작물 수요를 충족하기 위해 주로 열대지역에서 재배한다.
- ④ 특정 작물이 과도하게 재배되는 경우 가격의 하락을 초래하기도 한다.
- ⑤ 기후 탓으로 재배가 어려워진 환금 작물은 국가 경제에도 영향을 끼친다.

It could be argued that the 'processual' nature of personhood means that one becomes a person as one 'goes along' in society. Indeed, the African philosopher Ifeanyi Menkiti takes this position. He maintains that children are not fully human. Following Kwame Gyekye, a Ghanaian philosopher, however, I would argue that the fact

that personhood must be earned is not a denial of personhood to children. It is an affirmation of the view that *personhood* is _____ attained through interactions with others and one's community. It requires one to affirm ideals and standards thought to be constitutive of the life of a community. These are standards such as generosity, benevolence and respect. A number of sayings in some African societies refer to people who have failed to meet standards expected of a fully human person. These are sayings such as *ga e se motho* (Tswana) or *a ku si muntu* (Nguni), literally meaning 'he or she is not a person'. Because one can fall short of these standards at any stage in the life cycle, personhood could be regarded as a *becoming*. It is an unpredictable, open-ended process during which personhood may be achieved, lost, and regained, depending on a person's circumstances.

*affirmation 지지. 확인 **benevolence 자비심

- ① an ongoing process
- ② an unattainable goal
- ③ a voluntary acquisition
- ④ a dependent performance
- ⑤ an unavoidable procedure

Some might have had the impression that early scientists like Newton and Galileo belonged to a small sect that conjured science out of the blue as a result of mystical investigation. This wasn't so. Their work did not take place in a cultural vacuum: it was the product of many ancient traditions. One of these was Greek philosophy, which ① encouraged the belief that the world could be explained by logic, reasoning, and mathematics. Another was agriculture, from which people learned about order and chaos by observing the cycles and rhythms of nature, ② interrupted periodically by sudden and unpredictable disasters. And then there were religions which encouraged belief in a created world order. The founding assumption of science is that the physical universe is neither random nor absurd; it is not just a ③ meaningless jumble of objects and phenomena randomly placed side by side. Rather, there is a ④ incoherent scheme of things. This is often expressed by the simple saying that there is order in nature. But scientists have gone beyond this ⑤ vague notion to formulate a system of well-defined laws.

In English, many spelling errors could be avoided if we systematically transcribed each sound with a fixed letter. For instance, if we were to avoid writing the sound *f* with both the letter “f” and with “ph,” life would be much simpler. There is little doubt that we could easily get rid of this and many other useless redundancies whose acquisition eats up many years of childhood. In fact, this is the timid direction that American spelling reform took when it simplified the irregular British spellings of “behaviour” or “analyse” into “behavior” and “analyze.” Many more steps could have been taken along the same lines. As expert readers, we cease to be aware of the absurdity of our spelling. Even a letter as simple as “x” is unnecessary, as it stands for two phonemes *ks* that already have their own spelling. In Tiirkiye, one takes a “taksi.” That country, which in the space of one year adopted the Roman alphabet, drastically simplified its spelling, and taught three million people how to read, sets a beautiful example of the feasibility of spelling reform.

What do we want to hear when asking the question why John slammed the door? Probably not ① that John put more than average energy into his act, ② gives the door more speed (which resulted in a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of the chain of causes and effects ③ leading up to the slamming. 또한 우리는 John의 움직임을 유발한 그의 몸속의 미세한 과정에 대한 보고를 듣는 것도 기대하지 않는다. The why-question asks for reasons — ‘He felt offended’, for instance. Even when we think in a materialistic frame of mind ④ that the state of ⑤ offending can be traced in John’s brain, we usually will not be interested in an answer in neurological terms. So, normally, in our day-to-day why-questions about people’s actions we expect to hear about their reasons.

We can presume that the components of love proposed by Sternberg can be found in all cultures. Intimacy, passion, and commitment are most likely cultural universals. Evidence of this comes from many sources, including cultural anthropology, psychological research, and love poetry from across the world. What does appear to vary across cultures, however, is the emphasis placed on the different components of love and on different types of relationships. In collectivist cultures like those found in Asia and Africa, relationships with family may take priority over relationships with lovers and friends. In individualistic cultures, like those of Northern Europe and North America, friendships and romantic relationships compete with family for priority (and often win). Likewise, the concept of duty (similar to Sternberg’s concept of commitment) is absolutely central to Chinese Confucianism. In contrast, judging by the mountains of romance novels, love songs, and beauty products found in North America, 이 문화에서 소중히 여겨지는 것은 바로 사랑의 열정적인 면이다.

① Insects attract collectors' attention because they are extremely diverse and often bear spectacular colors. ② To biologists, however, bright coloration has been a constantly renewed puzzle because it makes an insect a highly visible prey to prospective predators. ③ Charles Darwin understood that bright colors or exaggerated forms could evolve via sexual selection, the process by which individuals compete for access to mates and fertilization opportunities. ④ However, he felt sexual selection could not account for the striking color pattern of nonreproductive larvae in, for example, *Pseudosphinx* hawk moth caterpillars. ⑤ In a reply to Darwin about this puzzle, Alfred R. Wallace proposed that bright colors could advertise the distastefulness of the caterpillars to experienced predators. ⑥ Indeed, prey that are not edible to predators are predicted to gain by exhibiting very recognizable colors; experienced predators can then correctly identify and subsequently avoid attacking such prey. ⑦ E. B. Poulton later developed this idea, expanded it to other warning signals (i.e., sounds or smells), and coined the term aposematism to describe this phenomenon (from the Greek "away" and "sign").

*larva 유충, 애벌레 (pl. larvae)

***Pseudosphinx* hawk moth *Pseudosphinx* 속(屬) 박각시나방 ***caterpillar 애벌레

① 곤충은 매우 다양하고 흔히 화려한 색깔을 띠기 때문에 수집가의 관심을 끈다. ② 그러나 생물학자에게 강렬한 천연색은 끊임없이 다시 등장하는 난제가 되어 왔는데, 그것 때문에 곤충은 (자신의) 포식자가 될 가능성이 있는 동물의 눈에 아주 잘 띄는 먹이가 되기 때문이다. ③ Charles Darwin은 강렬한 색이나 과장된 형태가 성 선택, 즉 개체들이 짝에 접근하여 수정할 기회를 얻으려고 경쟁하는 과정을 통해 진화할 수 있다고 여겼다. ④ 그러나 그는 성선택이 가령 '*Pseudosphinx*' 속(屬) 박각시나방 애벌레에 속하는 비생식 유충의 눈에 띄는 색깔 패턴을 설명할 수 없다고 생각했다. ⑤ 이 난제에 대해 Darwin에게 보낸 답장에서 Alfred R. Wallace는 강렬한 색깔이 경험 많은 포식자에게 애벌레의 맛이 고약하다는 것을 짐짓 드러낼 수 있다는 의견을 제시했다. ⑥ 정말로, 포식자가 먹을 수 없는 먹이는 매우 잘 알아볼 수 있는 색깔을 보임으로써 이득을 얻을 것으로 예측되는데, 그러면 경험 많은 포식자는 그런 먹이를 정확히 식별한 후에 공격하지 않을 수 있다. ⑦ E. B. Poulton은 나중에 이 생각을 발전시켜 그것을 다른 경고 신호(즉, 소리나 냄새)로 확장했고, 이 현상을 기술하기 위해(그리스어 '떨어져'와 '신호'라는 말로부터) aposematism(경계색)이라는 용어를 만들어 냈다.

When we are in groups, we tend to feel that we, personally, aren't as responsible as we would be if we were acting on our own. So the decisions that the group makes can easily become extreme. Occasionally, groups reach riskier decisions — they decide to take actions which are more challenging or unsafe than they should be. Sometimes, though, they make choices that are too cautious. It's known as group polarization: a tendency towards extremes. A lot depends on how the discussions in the group develop. If one person is advocating a risky strategy early on, others may begin to think of even more challenging examples, and that leads the discussion towards reaching a riskier decision. But if someone advocates more cautious approaches at an early stage, this too can influence the direction of the discussion, resulting in a more cautious decision than the group members might have made individually.

The extent to which decision making is shared with subordinates or concentrated at the top of the hierarchy differs across organizations. Thus, organizations can vary from strongly centralized decision-making practices to highly participatory decision-making practices. In participatory decision making, subordinates have much more input into how decisions are made. Research shows that greater participation in decision making improves employees' satisfaction with the decisions, but does not necessarily translate into better group performance. Therefore, research has investigated when participatory decision making is most useful, and when it is less important. When the workers are highly educated, intelligent, and have considerable expertise in their areas, participatory decision making is more effective. Additionally, when the task at hand is highly complex and knowledge about local conditions is important to the decision, participatory decision making is important. Finally, in times of crisis, when the decisions have very strong impact, participatory decision making is useful.

*subordinate 하급자 **hierarchy 위계, 계층

- ① the problems that occur when decision-making is overly centralized
- ② a decision-making method driven by workers' inclinations
- ③ the features and effective uses of participatory decision-making
- ④ the effects of decision-making methods on corporate profitability
- ⑤ ways to increase employees' satisfaction with an organization

Insects attract collectors' attention because they are extremely diverse and often bear spectacular colors. To biologists, however, bright coloration has been a constantly renewed puzzle because it makes an insect a highly visible prey to prospective predators. Charles Darwin understood that bright colors or exaggerated forms could evolve via sexual selection, the process by which individuals compete for access to mates and fertilization opportunities. However, he felt sexual selection could not account for the striking color pattern of nonreproductive larvae in, for example, *Pseudosphinx* hawk moth caterpillars. In a reply to Darwin about this puzzle, Alfred R. Wallace proposed that bright colors could advertise the distastefulness of the caterpillars to experienced predators. Indeed, prey that are not edible to predators are predicted to gain by exhibiting very recognizable colors; experienced predators can then correctly identify and subsequently avoid attacking such prey. E. B. Poulton later developed this idea, expanded it to other warning signals (i.e., sounds or smells), and coined the term aposematism to describe this phenomenon (from the Greek "away" and "sign").

When we are in groups, we tend to feel that we, personally, aren't as responsible as we would be if we were acting on our own. So the decisions that the group makes can easily become extreme. Occasionally, groups reach riskier decisions — they decide to take actions which are more challenging or unsafe than they should be. Sometimes, though, they make choices that are too cautious. It's known as group polarization: a tendency towards extremes. A lot depends on how the discussions in the group develop. If one person is advocating a risky strategy early on, others may begin to think of even more challenging examples, and that leads the discussion towards reaching a riskier decision. But if someone advocates more cautious approaches at an early stage, this too can influence the direction of the discussion, resulting in a more cautious decision than the group members might have made individually.

Others have emphasized the fact that, in a ten-year span, younger people encounter more “turning points” than older people.

There are several theories about why older people experience “long-term” time compression so much more acutely than young people. (①) It has been observed, for example, that for a twenty-year-old, ten years is half a lifetime, but for a fifty-year-old, the same span represents just 20 percent of one’s life. (②) As we age, a decade becomes an ever-smaller proportion of our life experience. (③) In just ten years, a younger person is likely to graduate from college, woo and win a mate, start a family, and buy a house. (④) Older people, in contrast, can easily pass a decade doing the same job and living in the same house with the same spouse. (⑤) The absence of frequent life-changing events may partly explain why older people feel that the later decades seem to pass so quickly.

Social mobility is upward or downward movement in social position over time in a society. That movement can be specific to individuals who change social positions or to categories of people, such as racial or ethnic groups. Social mobility between generations is referred to as intergenerational mobility. The self-made myth suggests that social position in the United States is _____, implying that mobility is quite common and easy to achieve for those who apply themselves. However, what people believe and what is fact are often not the same. A recent experimental study found that Americans substantially and consistently overestimate the amount of income mobility and educational access in society. The higher one’s social class, the more likely they are to overestimate social mobility. In other words, wealthy Americans tend to subscribe to the belief that pulling oneself out of poverty is easier than it actually is and that one’s wealth is a result of hard work and initiative, rather than luck or birth.

- ① largely up to the individual
- ② preceded by personal happiness
- ③ too difficult to achieve personally
- ④ something everyone wants to occupy
- ⑤ what people want to aim for in their lives

The development psychologist Jerome Kagan measured changes in children's temperament between the ages of 4 months and 7 years. He classified several healthy 4-month-old infants as high reactors (easily excited or fearful) or low reactors (relaxed and unafraid), 낯선 자극에 대한 그들의 반응에 따라. Kagan waved colorful mobiles in front of a baby, played a tape saying, "Hello baby, how are you doing today?" and popped a balloon behind the baby's head. High reactors moved around violently and cried, while low reactors rested or even laughed during the tests. By the time these infants were 4 years old, some of the high reactors were quite shy, subdued, and quiet, while others had moved toward the center of Kagan's "shy-bold" continuum. By the age of 7, only 15 percent of the initially low reactors were enthusiastic, fearless, and highly sociable kids, and the rest had moved closer to the center. None of the high reactors became (A), and none of the low reactors became (B); in other words, environment only moderately affected the final outcome.

① We do know that the ability to question, whether verbally or through other means, is one of the things that separates us from lower primates. ② Paul Harris, an education professor at Harvard University who has studied questioning in children, observes, “Unlike other primates, we humans are designed so that the young look to the old for cultural information.” ③ He sees this as an important “evolutionary divide” — that from an early age, even before speech, humans will use some form of questioning to try to gain information. ④ A child may pick up a kiwi fruit and indicate, through a look or gesture directed at a nearby adult, a desire to know more. ⑤ Chimpanzees don’t do this; they may “ask” for a treat through signaling, but it’s a simple request for food, as opposed to an information-seeking question.

⑥ So then, one of the primary drivers of questioning is an awareness of what we don’t know — which is a form of higher awareness that separates not only man from monkey but also the smart and curious person from the dullard who doesn’t know or care. ⑦ Good questioners tend to be aware of, and quite comfortable with, their own ignorance ⑧ (Richard Saul Wurman, the founder of the TED Conferences, has been known to brag, “I know more about my ignorance than you know about yours”). ⑨ But they constantly examine that vast ignorance using the question flashlight — or, if you prefer, they attack it with the question spade.

*primate 영장류 **brag 호언장담하다 ***spade 삽

① 말로든 아니면 다른 수단을 통해서든 질문을 하는 능력이 우리와 하등 영장류를 구분 짓는 것들 중 하나라는 것을 우리는 정말이지 알고 있다.

② 아이들에게 질문하는 것을 연구해 온 Paul Harris 하버드 대학교 교육학 교수는 “우리 인간은 다른 영장류와 달리 어린 사람은 연장자가 문화적 정보를 주리라고 기대하도록 설계되어 있다.”라고 말한다. ③ 그는 이것을 중요한 ‘진화의 경계선’으로 보는데, 즉 어린 나이부터 심지어 말을 하기 전에도 인간은 정보를 얻고자 어떤 형태의 질문을 (으레) 사용할 거라는 것이다. ④ 어린이는 키위를 집어서 가까이 있는 어른을 향한 시선이나 몸짓을 통해 더 많은 것을 알고 싶다는 욕구를 나타낼 수도 있다. ⑤ 침팬지들은 이것을 하지 않는데, 즉 그들은 신호 보내기를 통해 맛있는 것을 ‘요구할’ 수 있지만, 그것은 정보를 찾는 질문이 아니라, 음식을 달라는 단순한 요청이다.

⑥ 그렇다면 질문하기의 주요한 동인(動因) 중 하나는 우리가 모르는 것에 대한 인식이라는 것인데, 그것은 인간과 원숭이뿐만 아니라 똑똑하고 호기심 많은 사람과 모르거나 신경 쓰지 않는 둔한 사람을 구분 짓는 더 수준 높은 인식의 한 형태이다. ⑦ 훌륭한 질문자들은 자신들의 무지를 인식하고 그것에 대해 꽤 편안하게 느끼는 경향이 있다. ⑧ (TED 콘퍼런스의 창시자인 Richard Saul Wurman은 “여러분이 여러분 자신의 무지에 대해 아는 것보다 제가 저의 무지에 대해 더 많이 알고 있습니다”라고 호언장담한다고 알려졌다). ⑨ 그러나 그들은 질문이라는 손전등을 사용하여 그 방대한 무지를 끊임없이 조사하는데, 여러분이 이 말이 더 좋다면, 질문이라는 삽으로 그것을 공격하는 것이다.

• 유형 1 네모 안에서 옳은 어법·어휘를 고르시오.

We do know that the ability to question, whether verbally or through other means, is one of the things that separates us ❶ to / from lower primates. Paul Harris, an education professor at Harvard University who has studied questioning in children, observes, “❷ Like / Unlike other primates, we humans are designed so that the young look to the old for cultural information.” He sees this as an important “evolutionary divide” — that from an early age, even before speech, humans will use some form of questioning to try to gain information. A child may pick up a kiwi fruit and ❸ ensure / indicate, through a look or gesture directed at a nearby adult, a desire to know more. Chimpanzees don’t do this; they may “ask” for a treat through signaling, but it’s a simple request for food, as opposed to an information-seeking question.

So then, one of the primary drivers of questioning is an awareness of what we don’t know — which is a form of higher awareness that separates not only man from monkey but also the smart and curious person from the dullard ❹ which / who doesn’t know or care. Good questioners tend to be aware of, and quite ❺ embarrassed / comfortable with, their own ignorance (Richard Saul Wurman, the founder of the TED Conferences, has been known to brag, “I know more about my ignorance than you know about yours”). But they constantly examine that vast ignorance using the question flashlight — or, if you prefer, they attack it with the question spade.

• 유형 1 네모 안에서 옳은 어법·어휘를 고르시오.

You attract ❶ whatever/whenever you spend time pondering, including whatever you love and whatever you fear. Your soul will rise to achieve your highest hope and will also fall to the depths of your basest appetite and your life will be a direct ❷ meditation/reflection of all your desires. This holds true for both your conscious and unconscious thoughts, ❸ that/which may seem a bit confusing at first. For example, you may want prosperity and believe that you're working toward bringing more of it into your life. Your savings account, however, remains empty. This is because unconsciously you're thinking, *I'm afraid of poverty, and I don't think I'll ever be rich.* Even though you've made an effort to increase your wealth, your pessimistic thinking with respect to money is so ❹ ingrained/transient that it actually cancels out your positive steps. Yet with continued effort and vigilance against negative self-talk, you can turn around and create a prosperous life.

The outer world of your circumstances is shaped by the inner world of your thoughts. Every ❺ seed/seeds of thought that you sow or allow to fall into your mind and take root eventually blossoms into action. And once again, good thoughts bear sweet fruit, ❻ since/while bad ones bear rotten fruit. A person doesn't end up homeless or in jail by the tyranny of fate or by chance, but as the direct result of cynical thinking and corrupt desires. Similarly, a model citizen doesn't suddenly ❼ commit/prevent a crime due to a chance occurrence, but because he or she secretly fostered the criminal thought for a long time.

We do know that the ability to question, whether verbally or through other means, is one of the things that separates us from lower primates. Paul Harris, an education professor at Harvard University who has studied questioning in children, observes, “Unlike other primates, we humans are designed so that the young look to the old for cultural information.” He sees this as an important “evolutionary divide” — that from an early age, even before speech, humans will use some form of questioning to try to (a) gain information. A child may pick up a kiwi fruit and indicate, through a look or gesture directed at a nearby adult, a desire to (b) know more. Chimpanzees don’t do this; they may “ask” for a treat through signaling, but it’s a simple (c) request for food, as opposed to an information-seeking question.

So then, one of the primary drivers of questioning is an awareness of what we don’t know — which is a form of higher awareness that separates not only man from monkey but also the smart and curious person from the dullard who doesn’t know or care. Good questioners tend to be (d) unaware of, and quite comfortable with, their own ignorance (Richard Saul Wurman, the founder of the TED Conferences, has been known to brag, “I know more about my ignorance than you know about yours”). But they constantly examine that vast (e) ignorance using the question flashlight — or, if you prefer, they attack it with the question spade.

You attract whatever you spend time (a) pondering, including whatever you love and whatever you fear. Your soul will rise to achieve your highest hope and will also fall to the depths of your basest appetite and your life will be a direct reflection of all your desires. This holds true for both your conscious and unconscious thoughts, which may seem a bit confusing at first. For example, you may want prosperity and believe that you’re working toward bringing more of it into your life. Your savings account, however, remains empty. This is because unconsciously you’re thinking, *I’m (b) afraid of poverty, and I don’t think I’ll ever be rich*. Even though you’ve made an effort to increase your wealth, your (c) optimistic thinking with respect to money is so ingrained that it actually cancels out your positive steps. Yet with continued effort and vigilance against (d) negative self-talk, you can turn around and create a prosperous life. The outer world of your circumstances is shaped by the inner world of your thoughts. Every seed of thought that you sow or allow to fall into your mind and take root eventually blossoms into action. And once again, good thoughts bear sweet fruit, while bad ones bear rotten fruit. A person doesn’t end up homeless or in jail by the tyranny of fate or by chance, but as the direct result of cynical thinking and corrupt desires. Similarly, a model citizen doesn’t (e) suddenly commit a crime due to a chance occurrence, but because he or she secretly fostered the criminal thought for a long time.

[05~06] 다음 글을 읽고, 물음에 답하십시오.

Humans are motivated, at least in part, by empathy and concern for the welfare of others. We donate blood for strangers, contribute to charity, and punish violators of social norms. Chimpanzees are, together with bonobos, our closest relatives, and they similarly engage in cooperative hunting, comfort victims of aggression, and perform other collective activities. Would they show concern for the welfare of unrelated, familiar chimps if the (a) benefits were at no cost to themselves?

Researcher Joan Silk and her collaborators conducted an experiment with chimps that had lived together for fifteen years or more. Eighteen chimps were studied, from two different populations with different life histories and exposures to experiments. Pairs of chimps faced each other in opposing enclosures or sat side by side, and could see and hear each other. One chimp, the actor, was given the choice to pull one of two handles: if the actor pulled the “nice” handle, both the actor and the other chimp got food, and exactly the same portion. If the actor pulled the “nasty” handle, only the actor received food, and the other

chimp got nothing. In a control test, only the actor was present. Which handle did the chimps pull? When no other chimp was present, the actors chose both options about (b) equally frequently. The chimps didn't care, and why should they? Yet even when a second chimp arrived, the chimps didn't choose the (c) “nasty” option more often. Although they could clearly see the other one displaying desperate begging gestures, or happily eating the food when it was dispensed, the chimps showed no sign of (d) empathy. It should be noted that they showed no spitefulness either. What mattered to the actors more than the other chimp was whether the handle for the nice option was placed on their right or left side. They had a much stronger preference for the (e) right side than for the happiness of their partner. Chimps simply did not seem to care about the welfare of unrelated group members.

Recognizing the fact that we don't see _____ is an important thinking skill because it can lead to a(n) _____ about what we really see and remember, and therefore prevent us from having _____ of events.

① Although my family weren't really all that excited about having animals in the house, they'd been persuaded to take on a two-year-old dog called Sally, a Bull Terrier-Boxer cross. ② She was very attractive, being smooth-haired, mostly black with a white chest and reddish-brown eyebrows and rings around her legs, and a thin reddish-brown line around her white chest, dividing it from the rest of her black coat. ③ Mum had been assured she was well-behaved and non-aggressive, but she didn't suspect just how thoroughly I was going to test that guarantee out!

④ On the day of her arrival, Sally was given a big bone and let into the garden with it, where she soon settled down and started chewing contentedly. ⑤ A few minutes later Mum was distracted by the arrival of a neighbour, and when she came back into the kitchen and looked out of the window, she saw, to her horror, her two-year-old (me) tottering across the grass to the dog and bending down to grab the bone from her jaws.

⑥ Not having time to do anything more than yell out of the window, which might have triggered a bad reaction from the dog, my mother could only watch in fear at what might happen next.

⑦ Apparently, after I'd casually reached down and grabbed the bone, I walked off with it, with poor Sally following along behind me. ⑧ That moment was the start of a lifelong friendship.

⑨ Because Sally was two and I was two when she came to the family, we grew up together. ⑩ She was my constant escort and guardian.

⑪ I remember my Uncle Phil, who was a very kindly soul, waving an arm around my head once as he tried to swat a fly away from me. ⑫ Thinking he was going to hit me, Sally leapt between us and grabbed and held his arm. ⑬ She didn't bite him — she never bit — but she held him tight all the same. ⑭ From quite a young age I was completely safe to wander around the countryside, so long as I had my guardian with me. ⑮ She was my playmate and my best friend for 12 years, and we went everywhere together.

*totter 아장아장 걷다 **swat (파리 등을 잡기 위해) 찔쩍 때리다

① 우리 가족은 집에서 동물을 기르는 것에 대해 사실 그렇게 신나지는 않았지만, 불테리어와 복서가 섞인 잡종인 Sally라고 불리는 2살 된 개를 맡도록 설득되었다. ② 그것은 털이 부드럽고 전반적으로 까만색이면서, 하얀색의 가슴과 적갈색 눈썹과 다리 주위에 고리 모양의 털을 갖고 있었고, 하얀색 가슴 주변의 가는 적갈색 선이 그것의 하얀색 가슴을 나머지 까만색 털과 구분 짓고 있어서 매우 매력적인 모습이었다. ③ 엄마는 그것이 말을 잘 듣고 공격적이지 않다고 확신했지만, 내가 그 확신을 정말 철저하게 시험해 보리라는 것을 짐작도 하지 못했다!

④ 그것이 도착한 날, Sally는 큰 뼈를 받아 그것을 가지고 정원으로 가게 되었는데, 그곳에서 그것은 곧 편안히 앉아 만족스럽게 (뼈를) 씹기 시작했다. ⑤ 몇 분 후 엄마가 이웃의 방문에 정신이 딴 데 가 있었는데, 그녀가 부엌으로 돌아와 창밖을 내다보았을 때, 경악스럽게도 자신의 두 살배기 아기(내)가 잔디밭을 가로질러 개에게로 아장아장 걸어가 그것의 입에서 뼈를 움켜쥐기 위해 허리를 숙이는 것을 보았다.

⑥ 창밖으로 소리를 지르는 것 말고는 다른 어떤 것도 할 겨를이 없었지만, 그것이 그 개에게서 나쁜 반응을 촉발할지도 몰라, 엄마는 다음에 일어날지도 모를 일을 두려워하며 그저 지켜볼 수밖에 없었다. ⑦ 보아하니, 나는 태연하게 손을 뻗어 뼈를 움켜쥐면, 그것을 가지고 걸어가 버렸고, 불쌍한 Sally는 내 뒤를 따라왔던 것 같다. ⑧ 그 순간이 평생의 우정이 시작하는 순간이었다. ⑨ Sally가 두 살이었고 그것이 집에 왔을 때 나도 두 살이었기 때문에, 우리는 함께 자랐다. ⑩ 그것은 나의 변함 없는 호위대원이자 보호자였다.

⑪ 매우 다정한 분이셨던 Phil 삼촌이 파리를 찔쩍 때려 나에게서 쫓아내려고 하면서 내 머리 주위로 팔을 한 번 휘둘렀던 것을 나는 기억한다. ⑫ 그가 나를 때릴 것으로 생각한 Sally는 우리 사이에 뛰어들어 그의 팔을 붙들고 늘어졌다. ⑬ 그것은 절대 물지 않기에 그를 물지는 않았지만, 그것은 여전히 삼촌을 단단히 잡고 있었다. ⑭ 꽤 어린 나이부터 나는 시골 주변을 돌아다녀도 내 보호자가 있는 한 안전했다. ⑮ 그것은 12년 동안 나의 놀이 친구이자 가장 친한 친구였고, 우리는 어디든 함께 다녔다.

Although my family weren't really all that excited about having animals in the house, they'd been persuaded to take on a two-year-old dog called Sally, a Bull Terrier-Boxer cross. She was very attractive, being smooth-haired, mostly black with a white chest and reddish-brown eyebrows and rings around her legs, and a thin reddish-brown line around her white chest, dividing it from the rest of her black coat. Mum had been assured she was ❶ _____ (말을 잘 듣고 공격적이지 않은), but she didn't suspect just how thoroughly I was going to test that guarantee out!

On the day of her arrival, Sally was given a big bone and let into the garden with it, where she soon ❷ _____ (편안히 앉았다) and started chewing contentedly. A few minutes later Mum was distracted by the arrival of a neighbour, and when she came back into the kitchen and looked out of the window, she saw, to her horror, her two-year-old (me) tottering across the grass to the dog and bending down to grab the bone from her jaws.

❸ _____ (다른 어떤 것도 할 겨를이 없었지만) more than yell out of the window, which might have triggered a bad reaction from the dog, my mother could only watch in fear at ❹ _____ (다음에 일어날지도 모를 일). Apparently, after I'd casually reached down and grabbed the bone, I walked off with it, with poor Sally following along behind me. That moment was the start of a lifelong friendship. Because Sally was two and I was two when she came to the family, we grew up together. She was my constant escort and guardian.

I remember my Uncle Phil, who was a very kindly soul, waving an arm around my head once as he tried to swat a fly away from me. Thinking he was going to hit me, Sally leapt between us and grabbed and held his arm. She didn't bite him — she never bit — but she held him tight ❺ _____

(여전히). From quite a young age I was completely safe to wander around the countryside, ❻ _____ (~하는 한) I had my guardian with me. She was my playmate and my best friend for 12 years, and we went everywhere together.

*totter 아장아장 걷다 **swat (파리 등을 잡기 위해) 찰싹 때리다

① Mr. Johnson's three sons worked together in a local trading company. ② One Monday, Mr. Johnson went down to the company to speak to his sons' manager. ③ The manager came out of his office and introduced himself. ④ "Please come into my office," he said, and he motioned for Mr. Johnson to go first. ⑤ As they walked into the office, the manager invited him to take a seat in the chair in front of the desk. ⑥ Mr. Johnson sat down, but he seemed to be somewhat displeased.

⑦ The manager asked him what he could help him with. ⑧ "Well, all three of my boys got hired here the same day. All of them have been here the same amount of time, work the same number of hours and even have the same position," Mr. Johnson began. ⑨ "That's a problem for you?" asked the manager. ⑩ "No, it's not that," Mr. Johnson continued to explain. ⑪ "What I don't understand is, if they all have the same position and do the same amount of work, why do they all make different amounts of money?"

⑫ The manager listened to him quietly and fully understood his concerns. ⑬ He wanted to explain everything to Mr. Johnson, but then decided that it would be easier to show him why there was a significant difference in the salaries. ⑭ He called down to the warehouse and asked for the first son. ⑮ When he answered, the manager asked him about the shipment that was supposed to have arrived that morning. ⑯ The first son said he knew nothing about any shipment. ⑰ Then the manager called down for the second son, and also asked him about the shipment.

⑱ This son at least knew of the shipment, but he couldn't confirm whether it had arrived or not. ⑲ But he was going to find out and later inform the manager. ⑳ Then, the manager called down for the third son. ㉑ When the manager asked him about the shipment, he seemed to know all about it. ㉒ "Yes, sir, it arrived this morning. I did inventory on it and found that it's a crate short. But don't worry sir. I already sent a fax to the company's office and they are replacing the crate in the next shipment."

㉓ The manager turned to Mr. Johnson and said, "Now do you see why they make different amounts of money?"

① Johnson씨의 세 아들이 지역의 어느 무역 회사에서 함께 일했다. ② 어느 월요일에 Johnson 씨는 아들들의 부장과 이야기를 나누기 위해 그 회사로 갔다. ③ 부장이 자기 사무실에서 나와 자신을 소개했다. ④ 그는 "제 사무실로 들어오시죠."라고 말하며, Johnson 씨에게 먼저 들어가라고 몸짓을 했다. ⑤ 그들이 사무실로 들어가자, 부장은 그에게 책상 앞 의자에 앉으라고 권했다. ⑥ Johnson 씨는 자리에 앉았지만, 다소 불만스러운 듯 보였다.

⑦ 부장은 그에게 자신이 무엇을 도와줄지 물었다. ⑧ "음, 제 아이들 셋이 모두 같은 날 이곳에 고용되었습니다. 그들은 모두 여기에서 근무한 기간이 같고, 근무 시간이 같고, 심지어 직위도 같습니다."라고 Johnson 씨가 말을 시작했다. ⑨ "그게 아버님께 문제가 되는지요?"라고 부장이 물었다. ⑩ "아니요, 그런 게 아닙니다." Johnson 씨가 계속해서 설명했다. ⑪ "제가 이해하지 못하는 것이 하나 있는데요, 그 아이들이 모두 직위가 같고 근무량이 같다면, 왜 그 아이들이 모두 서로 다른 액수의 봉급을 받을까요?"

⑫ 부장은 그의 말을 조용히 들었고 충분히 그의 염려를 이해했다. ⑬ 그는 Johnson 씨에게 모든 것을 설명해 주고 싶었지만, 왜 봉급에 상당한 차이가 있는지 그에게 보여 주는 것이 더 쉬우리라고 판단했다. ⑭ 그는 창고로 전화를 걸어 첫째 아들을 찾았다. ⑮ 그가 응답하자, 부장은 그에게 그 날 아침에 도착하기로 되어 있었던 화물에 관해 물었다. ⑯ 첫째 아들은 어떤 화물에 대해서도 전혀 모른다고 말했다. ⑰ 그다음에 부장은 전화로 둘째 아들을 찾아서, 역시 그에게도 그 화물에 관해 물었다.

⑱ 이 아들은 적어도 그 화물에 대해 알고 있기는 했지만, 그는 그것이 도착했는지 도착하지 않았는지 확인해 줄 수 없었다. ⑲ 하지만 그는 알아보고 나서 나중에 부장에게 알려 주겠다고 했다. ⑳ 그다음에, 부장은 전화로 셋째 아들을 찾았다. ㉑ 부장이 그에게 그 화물에 관해 물었을 때, 그는 그것에 대해 모두 알고 있는 것 같았다. ㉒ "네, 부장님, 그것은 오늘 아침에 도착했습니다. 제가 그것의 물품 목록을 만들어 보니 한 상자가 부족하다는 것을 알게 되었습니다. 하지만 걱정하지 마십시오. 제가 이미 그 회사 사무실로 팩스를 보냈으며, 그들은 다음 택배분에 그 한 상자를 돌려줄 예정입니다."

㉓ 부장은 Johnson 씨를 향해 몸을 돌려 "이제 아버님께서는 그들이 왜 서로 다른 액수의 봉급을 받는지 아시겠습니까?"라고 말했다.

① While working for the state parks management department in Michigan, Rob was told from his boss that the state had been very concerned recently with the large number of boating accidents that occur on state lakes and wished to reduce this number. ② The boss asked him to help determine some ways to reduce the number of boating accidents in the state. ③ Rob was excited about this assignment. ④ This was a chance for him to impress his boss by solving a serious problem.

⑤ Rob started the project by looking at a lot of data. ⑥ He wanted to see what events were associated with boating accidents and he used his knowledge of statistics to calculate correlations. ⑦ Other governmental agencies and departments were generous in sharing data with Rob, and he found many interesting correlations. ⑧ The most fascinating thing, though, was that there was a very high correlation, in the state of Michigan, between ice-cream consumption and boating accidents.

⑨ Rob was quite excited about finding this correlation. ⑩ First, it was a strong correlation. ⑪ Second, it seemed like an event the state might be able to do something about. ⑫ There were other strong correlations with boating accidents, such as the correlation between boating accidents and temperature, but most of these were things the state had no control over. ⑬ Rob realized the state might have some control over ice-cream consumption. ⑭ Just one short week after receiving the assignment, he marched into his boss's office with a plan to reduce boating accidents in the state.

⑮ Rob proposed to his boss that there be no ice-cream sales at all state beaches and all state parks that include a lake. ⑯ To make doubly sure that there would be no ice-cream consumption on state lakes, he proposed banning ice-cream sales in all stores within two miles of any Michigan lake. ⑰ The potential impact of this proposal was large, since no person in Michigan is ever more than six miles from an inland lake. ⑱ Rob knew the Michigan dairy industry would not be happy with the proposal and his boss would likely reject it, but he presented it to him anyway. ... ⑲ Rob still has his job with the parks management department, but his ice-cream proposal did not go over well. ⑳ The boss laughed at him and dismissed him from his office.

① 미시간주 주립 공원 관리부에서 일하면서, Rob은 자기 상사로부터 주 정부가 최근 주 호수에서 발생하는 많은 수의 뱃놀이 사고에 대해 매우 우려해 왔고, 이 수를 줄이기를 바라고 있다는 말을 들었다. ② 상사는 그에게 주에서의 뱃놀이 사고 수를 줄이기 위한 몇 가지 방법을 결정하는데 도움을 달라고 요청했다. ③ Rob은 이 임무에 신이 났다. ④ 이것은 그가 심각한 문제를 해결함으로써 그의 상사에게 깊은 인상을 줄 기회였다.

⑤ Rob은 많은 자료를 살펴보는 것으로 그 작업을 시작했다. ⑥ 그는 어떤 사건들이 뱃놀이 사고와 연관이 있는지를 알고 싶었고, 상관관계를 계산하기 위해 자신의 통계학 지식을 사용했다. ⑦ 다른 정부 기관들과 부서들은 Rob과의 자료 공유에 관대했고, 그는 많은 흥미로운 상관관계를 발견했다. ⑧ 하지만 가장 흥미로운 것은 미시간주에서 아이스크림 소비와 뱃놀이 사고 사이에 매우 높은 상관관계가 있다는 것이었다.

⑨ Rob은 이 상관관계를 찾은 것에 매우 흥분했다. ⑩ 첫째, 그것은 강력한 상관관계였다. ⑪ 둘째, 그것은 주 정부가 (그것에 대해) 뭔가를 할 수도 있을 것 같은 일처럼 보였다. ⑫ 뱃놀이 사고와 기온 사이의 상관관계처럼, 뱃놀이 사고와 강력한 상관관계를 가지는 다른 것들이 있었지만, 이것들 대부분은 주 정부가 통제할 수 없는 것들이었다. ⑬ Rob은 주 정부가 아이스크림 소비를 어느 정도 통제할 수도 있을 거라고 이해했다. ⑭ 그 임무를 받은 지 불과 일주일 만에, 그는 주의 뱃놀이 사고를 줄이기 위한 계획을 갖고 상사의 사무실로 당당하게 걸어 들어갔다.

⑮ Rob은 상사에게 주의 모든 해변과, 호수를 포함하고 있는 모든 주립 공원에서 아이스크림 판매를 하지 말 것을 제안했다. ⑯ 주 호수에서 아이스크림 소비가 없도록 이중으로 확실히 하기 위해, 그는 어떤 미시간주의 호수라도 그 호수의 2마일 내에 있는 모든 상점에서 아이스크림 판매를 금지할 것을 제안했다. ⑰ 이 제안의 잠재적 영향은 컸는데, 왜냐하면 미시간에서는 어떤 사람도 내륙 호수로부터 6마일이 넘는 거리에 있지 않기 때문이다. ⑱ Rob은 미시간 낙농업계가 그 제안을 좋아하지 않으리라는 것과 자기 상사가 그것을 아마도 거부하리라는 것을 알았지만, 어쨌든 그는 그것을 그에게 제시했다. ... ⑲ Rob은 여전히 공원 관리부에서 자기 일을 하고 있지만, 그의 아이스크림 제안은 잘 받아들여지지 않았다. ⑳ 그 상사는 그를 비웃고는 자기 사무실에서 그를 내보냈다.

While working for the state parks management department in Michigan, Rob was told from his boss ❶ that/who the state had been very concerned recently with the large number of boating accidents that occur on state lakes and wished to reduce this number. The boss asked him to help ❷ determine/facilitate some ways to reduce the number of boating accidents in the state. Rob was excited about this assignment. This was a chance for him to impress his boss by solving a serious problem. Rob started the project by looking at a lot of data. He wanted to see ❸ what/that events were associated with boating accidents and he used his knowledge of statistics to calculate correlations. Other governmental agencies and departments were generous in sharing data with Rob, and he found many interesting correlations. The most fascinating thing, ❹ though/however, was that there was a very high correlation, in the state of Michigan, between ice-cream consumption and boating accidents. Rob was quite excited about finding this correlation. First, it was a strong correlation. Second, it seemed like an event the state might be able to do something about. There were other strong correlations with boating accidents, such as the correlation between boating accidents and temperature, but most of these were things the state had ❺ no/some control over. Rob realized the state might have some control over ice-cream consumption. Just one short week after receiving the assignment, he marched into his boss's office with a plan to reduce boating accidents in the state.

Rob proposed to his boss that there be no ice-cream sales at all state beaches and all state parks that include a lake. To make doubly sure that there would be no ice-cream consumption on state lakes, he proposed ❻ banning/permitting ice-cream sales in all stores within two miles of any Michigan lake. The potential impact of this proposal was large, since no person in Michigan is ever more than six miles from an inland lake. Rob knew the Michigan dairy industry would not be happy with the proposal and his boss would likely reject it, but he presented it to him anyway. ... Rob still has his job with the parks management department, but his ice-cream proposal did not go over well. The boss laughed at him and ❼ accused/dismissed him from his office.

While ❶ _____ (work) for the state parks management department in Michigan, Rob ❷ _____ (tell) from his boss that the state had been very concerned recently with the large number of boating accidents that occur on state lakes and wished to reduce this number. The boss asked him to help determine some ways to reduce the number of boating accidents in the state. Rob was excited about this assignment. This was a chance for him ❸ _____ (impress) his boss by solving a serious problem.

Rob started the project by looking at a lot of data. He wanted to see what events were associated with boating accidents and he used his knowledge of statistics to calculate correlations. Other governmental agencies and departments were generous in sharing data with Rob, and he found many interesting correlations. The most fascinating thing, though, was that there was a very high correlation, in the state of Michigan, between ice-cream consumption and boating accidents.

Rob was quite excited about finding this correlation. First, it was a strong correlation. Second, it seemed like an event the state might be able to do something about. There were other strong correlations with boating accidents, such as the correlation between boating accidents and temperature, but most of these were things the state had no control over. Rob realized the state might have some control over ice-cream consumption. Just one short week after ❹ _____ (receive) the assignment, he marched into his boss's office with a plan to reduce boating accidents in the state.

Rob proposed to his boss that there ❺ _____ (be) no ice-cream sales at all state beaches and all state parks that include a lake. To make doubly sure that there would be no ice-cream consumption on state lakes, he proposed banning ice-cream sales in all stores within two miles of any Michigan lake. The potential impact of this proposal was large, since no person in Michigan ❻ _____ (be) ever more than six miles from an inland lake. Rob knew the Michigan dairy industry would not be happy with the proposal and his boss would likely reject it, but he presented it to him anyway. ... Rob still has his job with the parks management department, but his ice-cream proposal did not go over well. The boss laughed at him and dismissed him from his office.

While working for the state parks management department in Michigan, Rob was told from his boss that the state had been very concerned recently with ❶ _____ (많은 수의) boating accidents that occur on state lakes and wished to reduce this number. The boss asked him to help determine some ways to reduce the number of boating accidents in the state. Rob was excited about this assignment. This was a chance for him to impress his boss by solving a serious problem.

Rob started the project by looking at a lot of data. He wanted to see what events were ❷ _____ (~와 연관이 있는) boating accidents and he used his knowledge of statistics to calculate correlations. Other governmental agencies and departments were ❸ _____ (자료 공유에 관대한) with Rob, and he found many interesting correlations. The most fascinating thing, though, was that there was a very high correlation, in the state of Michigan, between ice-cream consumption and boating accidents.

Rob was quite excited about finding this correlation. First, it was a strong correlation. Second, it seemed like an event the state might be able to do something about. There were other strong correlations with boating accidents, such as the correlation between boating accidents and temperature, but most of these were things the state had no control over. Rob realized the state might have some control over ice-cream consumption. ❹ _____ (불과 일주일 만에) after receiving the assignment, he marched into his boss's office with a plan to reduce boating accidents in the state.

Rob proposed to his boss that there be no ice-cream sales at all state beaches and all state parks that include a lake. ❺ _____ (이중으로 확실히 하기 위해) that there would be no ice-cream consumption on state lakes, he proposed banning ice-cream sales in all stores within two miles of any Michigan lake. The potential impact of this proposal was large, since no person in Michigan is ever more than six miles from an inland lake. Rob knew the Michigan dairy industry would not be happy with the proposal and his boss would likely reject it, but he presented it to him anyway. ... Rob still has his job with the parks management department, but his ice-cream proposal ❻ _____ (잘 받아들여지지 않았다). The boss laughed at him and dismissed him from his office.

(A)

Although my family weren't really all that excited about having animals in the house, they'd been persuaded to take on a two-year-old dog called Sally, a Bull Terrier-Boxer cross. She was very attractive, being smooth-haired, mostly black with a white chest and reddish-brown eyebrows and rings around her legs, and a thin reddish-brown line around her white chest, dividing it from the rest of (a) her black coat. Mum had been assured she was well-behaved and non-aggressive, but she didn't suspect just how thoroughly I was going to test that guarantee out!

(B)

Not having time to do anything more than yell out of the window, which might have triggered a bad reaction from the dog, my mother could only watch in fear at what might happen next. Apparently, after I'd casually reached down and grabbed the bone, I walked off with it, with poor Sally following along behind me. That moment was the start of a lifelong friendship. Because Sally was two and I was two when she came to the family, we grew up together. (b) She was my constant escort and guardian.

(C)

I remember my Uncle Phil, who was a very kindly soul, waving an arm around my head once as he tried to swat a fly away from me. Thinking he was going to hit me, Sally leapt between us and grabbed and held his arm. She didn't bite him — she never bit — but (c) she held him tight all the same. From quite a young age I was completely safe to wander around the countryside, so long as I had my guardian with me. She was my playmate and my best friend for 12 years, and we went everywhere together.

(D)

On the day of her arrival, Sally was given a big bone and let into the garden with it, where (d) she soon settled down and started chewing contentedly. A few minutes later Mum was distracted by the arrival of a neighbour, and when she came back into the kitchen and looked out of the window, she saw, to (e) her horror, her two-year-old (me) tottering across the grass to the dog and bending down to grab the bone from her jaws.

*totter 아장아장 걸다 **swat (파리 등을 잡기 위해) 찔쩍 때리다

(A)

Mr. Johnson's three sons worked together in a local trading company. One Monday, Mr. Johnson went down to the company to speak to his sons' manager. The manager came out of his office and introduced himself. "Please come into (a) my office," he said, and he motioned for Mr. Johnson to go first. As they walked into the office, the manager invited him to take a seat in the chair in front of the desk. Mr. Johnson sat down, but he seemed to be somewhat displeased.

(B)

This son at least knew of the shipment, but he couldn't confirm whether it had arrived or not. But he was going to find out and later inform the manager. Then, the manager called down for the third son. When the manager asked him about the shipment, he seemed to know all about it. "Yes, sir, it arrived this morning. I did inventory on it and found that it's a crate short. But don't worry (b) sir. I already sent a fax to the company's office and they are replacing the crate in the next shipment." The manager turned to Mr. Johnson and said, "Now do you see why they make different amounts of money?"

(C)

The manager listened to him quietly and fully understood his concerns. (c) He wanted to explain everything to Mr. Johnson, but then decided that it would be easier to show him why there was a significant difference in the salaries. (d) He called down to the warehouse and asked for the first son. When he answered, the manager asked him about the shipment that was supposed to have arrived that morning. The first son said he knew nothing about any shipment. Then the manager called down for the second son, and also asked him about the shipment.

(D)

The manager asked him what he could help him with. "Well, all three of my boys got hired here the same day. All of them have been here the same amount of time, work the same number of hours and even have the same position," Mr. Johnson began. "That's a problem for (e) you?" asked the manager. "No, it's not that," Mr. Johnson continued to explain. "What I don't understand is, if they all have the same position and do the same amount of work, why do they all make different amounts of money?"

(A)

Dhira was a shoeshine boy. He lost his father when he was very young and now lived with his mother and sister. He was a hard-working boy. After school, he would sit near a cinema hall and polish shoes for a living. One day it was very hot. Dhira sat under a tree counting his day's earnings when he overheard a passerby. "A thief has just escaped from the jewellery shop." Dhira stopped counting. He quickly put his money back in (a) his pocket and asked the passerby, "When? Where?" "Just now. He stole a gold necklace and managed to run away. They say he has a beard."

(B)

"What can it be?" Dhira wondered. He bent his head to take a closer look. "My goodness! "That'll do, boy. It's time," the man said taking his foot off the stand. Dhira quickly tied the ends of the laces of the two shoes and got up without taking the coin the man held out. He rushed to the policemen. The man fell flat on his face when he tried to walk. While he was struggling to get up, Dhira was back with the two policemen. They caught hold of (b) him. Yes, he was the jewel thief! The gold necklace was found in his shoe and his 'beard' in his pocket. He was taken to the police station. Dhira was rewarded by the police and by the jeweller. His school, too, honoured him with a medal for his bravery.

(C)

So saying the passerby went on his way. Dhira was about to go towards the jewellery shop to find out more details when a customer accosted him. "Boy, polish my shoes nicely. There's no hurry," he said looking at his wristwatch. The customer was wearing a blue suit and a red tie. He looked like a rich man. Dhira sat down immediately to polish his shoes, though his

mind was still on the theft. Through the corner of (c) his eye, Dhira saw two policemen approaching.

(D)

He was eager to ask them about the theft, but the customer seemed to have lost his temper. "You, silly boy! (d) You're not doing your job well," he cried glancing quickly at the policemen. So Dhira concentrated his attention on polishing the shoe. He said, "The other shoe, sir." The man said, "Hurry up, there are only two minutes for the show to begin." 'Funny!' Dhira said to himself. 'A moment ago he was in no hurry, but now he is in a great hurry.' As Dhira was about to shine it with a cloth, (e) he found something sticking out of it at the back.

Even though all of Mr. Johnson's three sons have worked in a trading company for the same period, have the same position, and do the same hours, the reason each of them _____ is that they have different _____.

19강 7-9번

Dhira was a shoeshine boy. He lost his father when he was very young and now lived with his mother and sister. He was a hard-working boy. After school, he would sit near a cinema hall and polish shoes for a living. One day it was very hot. Dhira sat under a tree counting his day's earnings when he overheard a passerby. "A thief has just escaped from the jewellery shop." Dhira stopped counting. He quickly put his money back in his pocket and asked the passerby, "When? Where?" "Just now. He stole a gold necklace and managed (A) run away. They say he has a beard."

So saying the passerby went on his way. Dhira was about to go towards the jewellery shop to find out more details when a customer accosted him. "Boy, polish my shoes nicely. There's no hurry," he said looking at his wristwatch. The customer was wearing a blue suit and a red tie. He looked like a rich man. Dhira sat down immediately to polish his shoes, though his mind was still on the theft. Through the corner of his eye, Dhira saw two policemen (B) approached.

He was eager to ask them about the theft, but the customer seemed to have lost his temper. "You, silly boy! You're not doing your job well," he cried glancing quickly at the policemen. So Dhira concentrated his attention on polishing the shoe. He said, "The other shoe, sir." The man said, "Hurry up, there are only two minutes for the show to begin." 'Funny!' Dhira said to himself. 'A moment ago he was in no hurry, but now he is in a great hurry.' Dhira가 막 천으로 광을 내려다가, 그는 구두 뒤쪽에 무언가 빠져나와 있는 것을 발견했다.

'What can it be?' Dhira wondered. He bent his head to take a closer look. 'My goodness!' "That'll do, boy. It's time," the man said taking his foot off the stand.

Dhira quickly tied the ends of the laces of the two shoes and got up without taking the coin the man held out. He rushed to the policemen. The man fell flat on his face when he tried to walk. While he was struggling to get up, Dhira was back with the

two policemen. They caught hold of him. Yes, he was the jewel thief! The gold necklace was found in his shoe and his 'beard' in his pocket. He was taken to the police station. Dhira (C) rewarded by the police and by the jeweller. His school, too, honoured him with a medal for his bravery.

*accost 다가와 말을 걸다

17 윗글의 밑줄 친 부분을 어법상 알맞은 형태로 고쳐 쓰시오.

- (A) run → _____
(B) approached → _____
(C) rewarded → _____

18 윗글의 밑줄 친 우리말 의미와 일치하도록 보기 의 단어를 활용하여 문장을 완성하십시오. (단, 필요시 어형을 바꿔 쓸 것)

보기 a cloth / out of it / be about to / sticking / find / at the back / shine / something / it / he / with

As Dhira _____

19강 10-12번

While working for the state parks management department in Michigan, Rob was told from his boss that ① the state had been very concerned recently with the large number of boating accidents that occur on state lakes and wished to reduce this number. The boss asked him to help determine some ways to reduce the number of boating accidents in the state. Rob was excited about (A) this assignment. ② This was a chance him to impress his boss by solving a serious problem.

Rob started the project by looking at a lot of data. He wanted to see what events were associated with boating accidents and he used his knowledge of statistics to calculate correlations. Other governmental agencies and departments were generous in sharing data with Rob, and he found many interesting correlations. ③ The most fascinating thing, though, was what there was a very high correlation, in the state of Michigan, between ice-cream consumption and boating accidents.

Rob was quite excited about finding this correlation. First, it was a strong correlation. Second, ④ it seemed like an event the state might be able to do something about. There were other strong correlations with boating accidents, such as the correlation between boating accidents and temperature, but most of these were things the state had no control over. Rob realized the state might have some control over ice-cream consumption. Just one short week after receiving the assignment, he marched into his boss's office with a plan to reduce boating accidents in the state.

⑤ Rob proposed to his boss that there are no ice-cream sales at all state beaches and all state parks that include a lake. To make doubly sure that there would be no ice-cream consumption on state lakes, he proposed banning ice-cream sales in all stores within two miles of any Michigan lake. The potential impact of this proposal was large,

since no person in Michigan is ever more than six miles from an inland lake. Rob knew the Michigan dairy industry would not be happy with (B) the proposal and his boss would likely reject it, but he presented it to him anyway. ... Rob still has his job with the parks management department, but his ice-cream proposal did not go over well. The boss laughed at him and dismissed him from his office.

19 윗글의 밑줄 친 ①~⑤ 중 어법상 틀린 것을 3개 찾아 그 번호를 쓰고 고쳐 쓰시오. (틀린 부분의 번호, 틀린 부분, 알맞게 고친 정답을 차례대로 쓸 것)

- (1) _____,
→ _____
- (2) _____,
→ _____
- (3) _____,
→ _____

20 윗글의 밑줄 친 (A), (B)가 각각 가리키는 것을 본문에서 찾아 우리말로 쓰시오. ((A), (B) 각각 40자 내외)

- (A) _____

- (B) _____
