20강 1번
소재: 동화 작가이자 삽화가인 Leo Lionni
정답: 모범답안 20

Leo Lionni, an internationally known designer, illustrator, and graphic artist, was born in Holland and lived in Italy until he came to the United States in 1939. As a little boy, he would go into the museums in Amsterdam, and that's how he taught himself how to draw. He got into writing and illustrating children's books almost by accident. Lionni tore out bits of paper from a magazine and used them as characters and made up a story to entertain his grandchildren on a train ride. This story became what we now know as the children's book titled *Little Blue and Little Yellow*. He became the first children's author/illustrator to use collage as the main medium for his illustrations. Lionni wrote and illustrated more than 40 children's books. In 1982, Lionni was diagnosed with Parkinson's disease, but he kept working in drawing, illustrating and teaching. He passed away in October 1999 in Italy.

국제적으로 알려진 디자이너이자 삽화가이자 그래픽 아티스트였던 Leo Lionni는 네덜란드에서 태어나 1939년 미국에 올 때까지 암스테르담에서 살았다. 그는 어린 소년으로 볼 때 그는 암스테르담의 박물관에 들어가곤 했는데, 그곳이 그가 그림 그리는 법을 익히게 한 곳이었다. 그는 여러 어린이 책을 도서를 쓰고 그것에 삽화를 그리게 되었다. Lionni는 기차를 타고 가족의 손자들을 즐겁게 하기 위해 잡지에서 종이조각들을 잘라내어 그것들을 캐릭터로 사용하고 이야기를 구상했다. 이 이야기가 우리가 현재 *Little Blue and Little Yellow*라는 제목의 주요 도서로 알고 있는 것이 되었다. 그는 자신의 삽화의 주요 표현 수단으로 콜라주를 사용했다. Lionni는 40여 권의 책을 그렸다. 1982년, Lionni는 파킨슨병을 진단받았지만 그는 그림을, 삽화를 그리며, 그리고 가르치는 일을 계속했다. 그는 1999년 10월 이탈리아에서 사망했다.

Word List

- internationally 국제적으로
- illustrator 삽화가
- teach oneself 독학하다
- by accident 우연히
- tear out ~을 뜯어내다
- bits of ~의 조각들
- make up ~을 구성하다(만들다)
- entertain 즐겁게 해 주다
- author 작가
- collage 콜라주
- main 주요한
- medium 표현 수단, 도구
- illustration 삽화
- diagnose 진단하다
- disease 병
- pass away 사망하다, 죽다

① While both history and geography could serve to develop nationalistic sentiments, the relative position of these two subjects in the educational system largely came to depend on the degree to which either seemed more useful in building up the idea of a national identity. ② In Germany, with its long history of shifting borders and divisions into small states, geographical patterns associated with the German-speaking lands seemed very significant, and so geography was seen as very important. ③ Norway, on the other hand, had developed its educational system during the union of the crowns with Sweden(1814-1905) and it had no disputed borders. ④ Under these circumstances, Norway's national awakening was fostered by teaching about the glorious history of Viking times and about the precious liberal constitution of 1814. ⑤ Hence, history predominated over geography. ⑥ Finland, however, which had also experienced a union of crowns (in this case with Tsarist Russia), lacked a clearly discernible glorious past and so geography developed as a relatively more important subject. ⑦ A pioneering research work of great political importance in the Finnish liberation process, the *Atlas of Finland*, stressed the uniqueness of the Finnish lands.

*Tsarist Russia 제정 러시아 **discernible 뚜렷한, 분간할 만한

① 역사학과 지리학 모두 국가주의적 정서를 발달시키는 데 도움이 될 수 있었지만, 교육 제도에서 이 두 과목의 상대적 위치는 국가 정체성의 개념을 형성하는 데 어느 쪽이 더 유용해 보이는지의 정도에 따라 대체로 달라지게 되었다. ② 독일에서는, 변경되는 국경과 소국으로 분할되는 오랜 역사를 가지고 있어, 독일어권 영토와 관련된 지리적 양상이 매우 중요해 보였고, 따라서 지리학이 매우 중요하게 여겨졌다. ③ 반면, 노르웨이는 스웨덴과의 왕위 통합 기간(1814~1905년) 동안 교육 제도를 발전시켜 왔었고, 분쟁 중인 국경이 없었다. ④ 이러한 상황에서 노르웨이의 국가적 자각은 바이킹 시대의 영광스러운 역사와 1814년의 고귀한 자유 헌법에 대한 교육에 의해 촉진되었다. ⑤ 그리하여 역사학이 지리학보다 우위를 차지했다. ⑥ 그러나 마찬가지로 왕위 통합(이 경우에는 제정 러시아와의)을 경험했었던 핀란드는 명백하게 뚜렷한 영광스러운 과거를 가지지 못했고, 그래서 지리학이 상대적으로 더 중요한 과목으로 발전했다. ⑦ 핀란드의 해방 과정에서 정치적으로 매우 중요한 선구적 연구 저술인 *Atlas of Finland*는 핀란드 땅의 고유성을 강조했다.

While both history and geography could serve to develop nationalistic sentiments, the relative position of these two subjects in the educational system largely came to depend on the degree to which either seemed _____. In Germany, with its long history of shifting borders and divisions into small states, geographical patterns associated with the German-speaking lands seemed very significant, and so geography was seen as very important. Norway, on the other hand, had developed its educational system during the union of the crowns with Sweden(1814–1905) and it had no disputed borders. Under these circumstances, Norway's national awakening was fostered by teaching about the glorious history of Viking times and about the precious liberal constitution of 1814. Hence, history predominated over geography. Finland, however, which had also experienced a union of crowns (in this case with Tsarist Russia), lacked a clearly discernible glorious past and so geography developed as a relatively more important subject. A pioneering research work of great political importance in the Finnish liberation process, the *Atlas of Finland*, stressed the uniqueness of the Finnish lands.

One dimension of ethical theory that needs mentioning is the issue of autonomy of ethics in relation to religion. Many ethical works are written from a religious point of view, and many concrete moral judgments are influenced by religion. A question in ethical theory is whether ethics has some kind of evidential dependence on religion. Consider the question whether moral knowledge — say, that lying is (with certain exceptions) wrong — requires knowing any religious truth. This does not seem so. To say this is not to claim (as some would) that we can know moral truths even if there *are* no theological or religious truths. The point is theologically neutral on this matter. It is that *knowledge* of moral truths does not depend on *knowledge* of God or of religious truths. This view that moral knowledge is possible independently of religion is not antireligious, and indeed it has often been held by religiously committed philosophers and by theologians.

① Today we are using some 400 million plus tonnes of paper per annum in a global population of about seven billion, but if we look at the anticipated population figure in 2045 of nine billion, just on that basis alone paper production will need to increase by 30 per cent. ② On top of that within our current population not everybody is able to get a newspaper or has a book to read, or has enough exercise books to write on at school. ③ As their percentage increases the demand for paper will also increase. ④ We have limited land and a limited number of trees, and if we don't recycle we will not be able to supply the 400 million tonnes we need today or meet the demands of an increasing population. ⑤ Remember of course that within the 400 million tonnes we use today about 200 million tonnes of waste paper is used in its manufacturing; 200 million tonnes of waste paper generates roughly 160 million tonnes of recycled paper. ⑥ Therefore if we didn't recycle we would only have 240 million tonnes of paper so there would be a shortfall or we would have to use more pulp.

*per annum 1년에

① 오늘날 우리는 약 70억 명의 전 세계 인구 내에서 1년에 약 4억 톤 이상의 종이를 사용하고 있지만, 만약 우리가 2045년에 90억 명으로 예상되는 인구 수치를 본다면, 단지 그것에만 근거해도 종이 생산량을 30퍼센트 늘려야 할 것이다. ② 게다가 현재 우리의 인구 내에서 모든 사람이 신문을 구할 수 있거나 읽을 책을 가지고 있거나, 학교에서 쓸 수 있는 충분한 연습장을 가지고 있는 것은 아니다. ③ 그들의 비율이 늘어남에 따라 종이에 대한 수요 역시 늘어날 것이다. ④ 우리는 제한된 땅과 제한된 수의 나무를 가지고 있으며, 만약 우리가 재활용을 하지 않는다면 우리는 오늘날 필요로 하는 4억 톤의 종이를 공급하거나 늘어나는 인구의 수요를 충족시킬 수 없을 것이다. ⑤ 오늘날 우리가 사용하는 4억 톤의 종이 내에서 그것을 제조하는 데 약 2억 톤의 폐지가 사용되는데, 2억 톤의 폐지는 대략 1억 6천만 톤의 재생지를 만들어 낸다는 것을 물론 명심하라. ⑥ 그러므로 만약 우리가 재활용을 하지 않는다면 우리는 2억 4천만 톤의 종이만 가지게 될 것이므로, 부족한 종이 생길 것인데, 다시 말하면, 우리가 더 많은 펄프를 사용해야 할 것이다.

The effects of climate change will fall most heavily upon the poor of the world. Regions such as Africa could face ❶ severe/severely compromised food production and water shortages, while coastal areas in South, East, and Southeast Asia will be at great risk of flooding. Tropical Latin America will see damage to forests and agricultural areas ❷ due to / on behalf of drier climate, while in South America changes in precipitation patterns and the disappearance of glaciers will significantly affect water availability. While the richer countries may have the economic resources to ❸ adapt / adopt to many of the effects of climate change, without significant aid poorer countries will be unable to implement preventive measures, especially those ❹ that / what rely on the newest technologies. This raises fundamental issues of environmental justice in relation to the impact of economic and political power on environmental policy on a global scale. The concept of climate justice is a term used for framing global warming as an ethical and political issue, rather than one that is ❺ pure / purely environmental or physical in nature. The principles of climate justice imply an equitable sharing both of the burdens of climate change and the costs of developing policy responses.

Today we are using some 400 million plus tonnes of paper per annum in a global population of about seven billion, but if we look at the anticipated population figure in 2045 of nine billion, just on that basis alone paper production will need to increase by 30 per cent. On top of that within our current population not everybody is able to get a newspaper or has a book to read, or has enough exercise books to write on at school. As their percentage increases the demand for paper will also increase. We have limited land and a limited number of trees, and if we don't recycle we will not be able to supply the 400 million tonnes we need today or meet the demands of an increasing population. Remember of course that within the 400 million tonnes we use today about 200 million tonnes of waste paper is used in its manufacturing; 200 million tonnes of waste paper generates roughly 160 million tonnes of recycled paper. Therefore if we didn't recycle we would only have 240 million tonnes of paper so there would be a shortfall or we would have to use more pulp.

밑줄 친 a war over the periodic table이 다음 글에서 의미하는 바로 가장 적절한 것은?

For years, companies and countries took their rare metal supply lines for granted, unaware of the material makeup of their products. In fact, in 2011, Congress forced the U.S. military to research its supply chains because the Pentagon was having difficulty determining which advanced metals it needed. As the materials that make up product components have become more varied and complex, those who rely on sophisticated hardware can no longer afford to remain in the dark. Now, corporate and government leaders are realizing how important rare metals are. Indeed, efforts to secure rare metals have sparked a war over the periodic table. In offices from Tokyo to Washington, D.C., in research and development labs from Cambridge, Massachusetts, to Baotou, China, and in strategic command centers the world over, new policies and the launching of research programs are ensuring that nations have access. The struggle for minor metals isn't imminent; it's already here and is shaping the relationship between countries as conflicts over other resources did in the past.

The term *common pool resources* refers to resources that are available to all, but owned by no one. Nature-based examples include forests, oceans, and vistas, whereas common pool cultural resources can include a community's song, dance, and traditions. Many tourism products and experiences rely on common pool resources. The extent and accessibility of these resources has led McKean to suggest that common pool resources, in addition to being available to anyone, are difficult to protect and easy to deplete. Hardin presented the initial illustration of this concept in his influential article titled "The Tragedy of the Commons." In this article, he described a community that thrives on the growth of its cattle, which graze on communal pastureland. As demand grows, residents are inclined to maximize their benefits by ignoring the cumulative effect of each person grazing an additional head of cattle on the communal lands. Hardin asserted that the ignorance of individuals using common pool resources will lead to eventual depletion of the resource. The potential combined impact of individual use of common pool resources is an important element of tourism's sustainable development.

In the field of musical expertise, there is a dichotomy of thinking. On the one hand, ❶ _____ (널리 퍼져 있는 인식이 있다) in the general population that expert musicians have innate talent, or giftedness, beyond ordinary abilities. Talent, as part of the vernacular ❷ _____ (음악 분야에서), is usually assumed to be a stable trait — one is either born with musical talent or not. Music aptitude tests popular in the early to mid-twentieth century, such as the *Seashore Tests of Musical Talent* and the *Music Aptitude Profile*, attempted to find children who had this musical talent. ❸ _____ (다른 한편으로는), there is a very real feeling that ability in music comes from a disciplined work ethic. It would be unacceptable, even for those considered talented, not to practice. In fact, ❹ _____ (재능이 있다고 여겨지는 사람들) are expected to practice all the more.

*dichotomy (의견 따위의) 양분, 이분 **vernacular (특정 지역·집단이 쓰는) 말

① For a long time photographs were understood to be visible traces, as irrefutable evidence of the existence of the presented, its “it has been.” ② Therefore, photographs were initially classified as documents, whether used in the media, in the family album, in books, archives or collections. ③ As digitization began to feed into the realm of photography, and the end of the photographic era was proclaimed, it was its documentary qualities, its “ontology” as a chemical-physical symbol, that suddenly lost its persuasive powers. ④ But even if the sting of digital doubt seems deeply ingrained within the photographic authenticity and evidence, many of its tasks and uses have hardly changed. ⑤ When we look at a family album created with digital images, closely inspect the X-rays of a broken foot together with the doctor, or view the image of the finish of the 100-meter finals at the Olympic Games, our trust in photography remains. ⑥ If we trust the use of the images, or more precisely, if we assign them persuasive powers via their use, it does not matter whether they are analog or digital. ⑦ In other words: We doubt photography, but still use certain photographs to dispel doubt and produce evidence.

*irrefutable 반박할 수 없는 **ontology 존재론 ***dispel 떨쳐 버리다

① 오랫동안 사진은, 제시된 것의 존재에 대한 반박할 수 없는 명백함, 곧 그것의 “그것이 있었다”로서, 눈에 보이는 흔적인 것으로 이해되었다. ② 따라서, 사진은 매체, 가족 앨범, 서적, 기록, 수집품 어느 것에 쓰이든 간에, 처음에는 문서로 분류되었다. ③ 디지털화가 사진 영역에 영향을 미치기 시작하고, 사진 시대의 끝이 선포되었을 때, 돌연 그것의 설득력을 잃은 것은 바로 그것의 사실을 기록하는 본질, 즉 화학적, 물리적 상징으로서의 그것의 ‘존재론’이었다. ④ 그러나 비록 디지털 불신의 아픔이 사진의 신뢰성과 명백함 속에 깊이 배어든 것 같지만, 사진의 임무와 용도 가운데 많은 것들은 거의 변한 적이 없다. ⑤ 디지털 화상으로 만들어진 가족 앨범을 보거나, 골절된 발의 엑스선 사진을 의사와 함께 면밀하게 살펴거나, 혹은 올림픽 경기에서 100m 결승전의 결승선 사진을 볼 때, 사진에 대한 우리의 신뢰는 남아 있다. ⑥ 우리가 이미지의 사용을 신뢰하거나, 더 정확하게는, 우리가 그것의 사용을 통해 그것에 설득력을 부여한다면, 그것이 아날로그인지, 디지털인지는 중요하지 않다. ⑦ 다시 말해서, 우리는 사진을 불신하지만, 불신을 떨쳐 버리고 명백성을 제시하기 위해 특정한 사진을 여전히 사용한다.

Word List

- visible (눈에) 보이는 □ evidence 명백함, 증거 □ existence 존재 □ initially 처음에 □ classify 분류하다, 구분하다
- archive 기록, 자료 수집 □ digitization 디지털화 □ feed into ~에 영향을 미치다 □ realm 영역, 범주
- proclaim 선포하다, 선언하다 □ persuasive 설득하는 □ sting 아픔, 상처, 날카로움 □ doubt 불신; 의심하다
- ingrained 깊이 배어든 □ authenticity 신뢰성 □ inspect 면밀하게 살펴다 □ precisely 정확하게 □ assign 부여하다, 할당하다

For a long time photographs were understood to be visible traces, as irrefutable evidence of the existence of the presented, its “it has been.” Therefore, photographs were initially classified as documents, ❶ likewise/whether used in the media, in the family album, in books, archives or collections. As digitization began to feed into the realm of photography, and the ❷ end/beginning of the photographic era was proclaimed, it was its documentary qualities, its “ontology” as a chemical-physical symbol, ❸ what/that suddenly lost its persuasive powers. But even if the sting of digital doubt seems deeply ingrained within the photographic authenticity and evidence, many of its tasks and uses have hardly changed. When we look at a family album created with digital images, closely inspect the X-rays of a broken foot together with the doctor, or view the image of the finish of the 100-meter finals at the Olympic Games, our trust in photography ❹ changes/remains. If we trust the use of the images, or more precisely, if we assign them persuasive powers via their use, it ❺ matters/does not matter whether they are analog or digital. In other words: We doubt photography, but still use certain photographs to dispel doubt and produce evidence.

① Predicting whether a movie will be a success is perhaps the “Holy Grail” of most film-makers and especially the big movie studios. ② While critical acclaim is always welcome, in the end it is important that a movie makes money. ③ For the big studios — now increasingly owned by massive global corporations — making movies that deliver wide profit margins is the ultimate metric of performance. ④ Movies increasingly depend on non-theatrical sources for revenues. ⑤ This fact does not diminish the continuing significance of solid box office performance. ⑥ When a movie hits top spot at the box office, not only does this deliver direct revenue yield, it can further promote other income sources over time. ⑦ A high public profile means not only that its potential as an attractive choice for repeat viewing on other platforms increases but that its potential to yield sequels might increase, too. ⑧ In the end, nothing breeds success like success. ⑨ This maxim is probably the main reason why the major movie studios really like making sequels to highly successful movies and really like to hire star actors with a track record of appearing in blockbuster films that generally do well at the box office.

*Holy Grail 성배(간절히 원하는 것) **acclaim 찬사, 호평 ***metric 측정 기준

① 영화가 성공작이 될지를 예측하는 것은 아마도 대부분의 영화 제작자와 특히 대규모 영화 제작소의 ‘성배(간절히 원하는 것)’일 것이다. ② 비평가의 찬사는 늘 반가운 것이지만, 결국 영화는 돈을 버는 것이 중요하다. ③ 대규모 영화사의 경우, 지금은 점점 더 대규모의 글로벌 기업이 소유하고 있는데, 많은 수익을 내는 영화를 제작하는 것이 성과의 궁극적인 측정 기준이다. ④ 영화는 점점 더 영화관 외의 수입원에 의존한다. ⑤ 이러한 사실이 견실한 박스 오피스 성과의 지속적인 중요성을 깎아내리지는 않는다. ⑥ 영화가 박스 오피스에서 정상을 차지하면, 이것은 직접적인 수익 산출을 낼 뿐만 아니라, 시간이 지나면서 다른 수입원을 더욱더 활성화할 수 있다. ⑦ 높은 대중의 관심은 다른 플랫폼에서 반복 시청을 위한 매력적인 선택으로서 그것의 잠재적 가능성이 증가한다는 것뿐만 아니라, 속편을 제작할 가능성도 증가할 수 있다는 것을 의미한다. ⑧ 결국, 성공만큼 성공을 낳는 것은 아무것도 없다. ⑨ 이 격언이 아마도 주요 영화 제작소가 매우 성공적인 영화의 속편을 진정 만들고 싶어 하고 박스 오피스에서 전반적으로 성공하는 블록버스터 영화에 나오는 실적이 있는 인기 배우를 진정으로 캐스팅하고 싶어 하는 주요 이유일 것이다.

Word List

- critical 비평가의, 비판적인 □ massive 대규모의 □ profit margin 수익 □ ultimate 궁극적인, 최종의 □ revenue 수입, 수익
 □ diminish (중요성을) 깎아내리다, 폄하하다 □ significance 중요 □ solid 견실한 □ revenue 수익, 매출 □ yield 산출(액)
 □ income 수입 □ profile(대중의) 관심, 인지도 □ potential 잠재적인 □ attractive 매력적인 □ sequel 속편, 후속 □ breed 낳다
 □ maxim 격언, 금언 □ track record 실적, 업적

Learners can improve the effectiveness of their attributions through training. In a pioneering study, Carol Susan Dweck, an American psychologist, provided students who demonstrated learned helplessness with both successful and unsuccessful experiences. When the students were unsuccessful, the experimenter specifically stated that the failure was caused by lack of effort or ineffective strategies. Comparable students were given similar experiences but no training. After 25 sessions, the learners who were counseled about their effort and strategies responded more appropriately to failure by persisting longer and adapting their strategies more effectively. Additional research has corroborated Dweck's findings. Strategy instruction was most effective for students who believed that they were already trying hard. This research suggests that teachers can increase students' motivation to learn by teaching them learning strategies and encouraging them to attribute successes to effort.

① *Social validation* means that certain beliefs and values are confirmed only by the shared social experience of a group. ② For example, any given culture cannot prove that its religion and moral system are superior to another culture's religion and moral system, but if the members reinforce each other's beliefs and values, they come to be taken for granted. ③ Those who fail to accept such beliefs and values run the risk of "excommunication," of being thrown out of the group. ④ The test of whether they work or not is how comfortable and anxiety-free members are when they abide by them. ⑤ In these realms, the group learns that certain beliefs and values, as initially promulgated by prophets, founders, and leaders, "work" in the sense of reducing uncertainty in critical areas of the group's functioning. ⑥ Moreover, as they continue to provide meaning and comfort to group members, they also become transformed into non-discussible assumptions even though they may not be correlated with actual performance.

① '사회적 확인'이란 특정 신념과 가치가 한 집단의 공유된 사회적 경험에 의해서만 확인된다는 것을 의미한다. ② 예를 들자면, 어떤 특정한 문화도 자신의 종교와 도덕 체계가 다른 문화의 종교와 도덕 체계보다 우월하다는 것을 증명할 수는 없지만, 구성원들이 서로의 신념과 가치를 강화한다면, 그것들은 당연하게 받아들여지게 된다. ③ 그러한 신념과 가치를 받아들이지 못하는 사람들은 '제명', 즉 집단에서 쫓겨나는 위험에 처하게 된다. ④ 그것들(신념과 가치)이 효과가 있는지 없는지에 대한 시험은 구성원들이 그것들을 준수할 때 얼마나 편안하고 불안함이 없는가 하는 것이다. ⑤ 이러한 영역에서 그 집단은 예언자, 설립자, 지도자에 의해 처음 전파된 대로 특정 신념과 가치가 집단의 기능 중 중요한 영역에서 불확실성을 감소시킨다는 의미에서 '효과가 있다'는 것을 배운다. ⑥ 더욱이, 그것들이 집단 구성원들에게 의미와 편안함을 계속 제공함에 따라, 그것들은 또한 실제의 행위와 서로 상관관계가 없을 수 있을지라도 논할 수 없는 전제로 변형된다.

Word List

- validation 확인, 검증 □ confirm 확인하다, 확증하다 □ prove 증명하다 □ superior 우월한 □ reinforce 강화하다
- be taken for granted 당연시되다 □ excommunication 제명, 추방 □ throw out 버리다, 내던지다 □ abide by ~에 따라, 준수하다
- realm 영역, 범위 □ initially 처음에 □ prophet 예언자 □ uncertainty 불확실성 □ critical 중요한, 중대한
- transform 변형시키다, 바꾸다 □ non-discussible 논할 수 없는 □ assumption 전제, 가정, (증거도 없이) 사실이라고 생각함
- correlate 상관관계를 보여 주다, 연관시키다

The evolution of digital device ownership in the UK

Percentages of adults (16+) owning one of the following in 2008 and 2018

① The above graph shows the percentages of UK adults owning digital devices in 2008 and 2018. ② Among the 10 devices surveyed, smartphones showed the highest percentage of ownership in 2018, with nearly 8 out of every 10 UK adults owning one. ③ In 2008, DVD players had the highest percentage of ownership, immediately followed by desktop PCs. ④ As to the ownership rate in 2018, DAB radios and DVD players came second on the list, at 64% each. ⑤ Tablets, smart TVs, wearables, and smart speakers had 0% ownership rates in 2008, but they all showed increases in 2018. ⑥ Three devices — DVD players, desktop PCs and MP3 players — experienced a decrease in their ownership rates during the period from 2008 to 2018.

① 위 도표는 2008년과 2018년에 디지털 기기를 보유한 영국 성인의 비율을 보여 준다. ② 조사된 10개의 기기 중에, 스마트폰이 2018년에 가장 높은 보유율을 보여 주었는데, 영국 성인 10 명당 거의 8명이 스마트폰을 보유했다. ③ 2008년에는 DVD 플레이어의 보유율이 가장 높았고, 데스크톱 PC가 바로 그 뒤를 이었다. ④ 2018년의 보유율에 관해서는, DAB 라디오와 DVD 플레이어가 각각 64퍼센트로 목록에서 2위를 차지했다. ⑤ 태블릿, 스마트 TV, 웨어러블 기기, 스마트 스피커는 2008년에 보유율이 0퍼센트였으나, 2018년에는 그것들이 모두 증가한 것을 보여 주었다. ⑥ 3개의 기기, 즉 DVD 플레이어, 데스크톱 PC, MP3 플레이어는 2008년부터 2018년까지의 기간 동안 보유율이 감소했다.

Word List

Unless you're one of those lucky people who only drive new cars, on at least one occasion you've probably experienced the painful realization that your car is too old and no longer worth repairing any more. As a car ages, more and more things can go wrong and need fixing. At some point, the owner needs to decide: is it worth getting this latest issue looked at or is it time to give up on this car and find another? The problem is that a lot of money has already been spent on the car, and scrapping it makes it seem as if that money has just been wasted, which makes it very difficult to choose the best option. It's a problem known as *entrapment*, when a person gets trapped into making the wrong decision just because they've previously invested so much.

① The relationship between crisis and social change is a bit like the relationship between a rainstorm and a mudslide. ② The rain doesn't give the mudslide its power — that comes from the weight of earth, built up over decades. ③ What the rain *can* do is loosen things up, creating the conditions for change. ④ Britain's post-Second World War settlement didn't solve the problems of the war: it addressed the pent-up problems of the 1930s, and its intellectual ingredients dated back further, to the opening years of the 1900s. ⑤ Likewise, America's New Deal of the 1930s was triggered by the Great Depression, but the issues it addressed and the approaches it applied emerged decades before, in the progressive and populist movements of the 1890s and 1900s. ⑥ So, if the 2020 pandemic does lead to a radical social renewal, then the main elements of that renewal will be visible already today.

*pent-up 억눌려 있는

① 위기와 사회 변화의 관계는 호우와 진흙 사태의 관계와 다소 비슷하다. ② 비가 진흙 사태에 그것의 힘을 가하는 것이 아니라, 그것은 수십 년 동안 쌓인 흙의 무게에서 비롯되는 것이다. ③ 비가 '할 수' 있는 것은 상태를 느슨하게 만들어, 변화를 위한 여건을 만드는 것이다. ④ 영국의 제2차 세계 대전 이후 합의는 전쟁의 문제들을 해결한 것이 아니었다. 그것은 1930년대의 억눌려 있던 문제를 다루었고, 그것의 지적 요소들은 역사가 1900년대 초반까지 더 거슬러 올라갔다. ⑤ 마찬가지로, 1930년대의 미국의 뉴딜 정책은 대공황에 의해 촉발되었지만, 그것이 다룬 문제와 그것이 사용한 접근 방식은 수십 년 전, 1890년대와 1900년대의 진보 운동과 인민주의 운동에서 나타났다. ⑥ 따라서 만약 2020년의 전 세계적인 유행병이 진정한 급격한 사회 개선을 가져온다면, 그러면 그 개선의 주요 요소들은 오늘날 이미 눈에 보일 것이다.

Word List

- crisis 위기 □ rainstorm 호우 □ mudslide 진흙 사태, 이류(泥流) □ decade 십년간 □ loosen up ~을 느슨하게 만들다
- settlement 합의, 협정 □ address 다루다, 고심하다 □ intellectual 지적인 □ ingredient 요소, 성분
- date back to (역사가) ~까지 거슬러 올라가다 □ New Deal 뉴딜 정책(미국이 1930년대의 대공황기에 실시한 경제 부흥과 사회 보장 증진 정책)
- trigger 촉발하다 □ the Great Depression (1929년 미국에서 시작한) 대공황 □ emerge 나타나다, 출현하다
- progressive 진보주의의 □ populist 인민주의의, 인민당의; 포퓰리스트, 인민주의자 □ pandemic 전 세계적인 유행병
- radical 급격한 □ renewal 개선, 재생 □ visible 보이는

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Less obviously perhaps, there is strong evidence that people enjoying high self-esteem are less willing to tolerate dissonance and more likely to take rational action to reduce that dissonance, by, for example, rejecting unhealthy behaviour.

It is evident that self-esteem has a significant effect on health — both directly and indirectly. (①) For instance, self-esteem is typically considered a key feature of mental health and therefore worth pursuing in its own right. (②) It may also have an indirect influence through its contribution to intentions to undertake healthy or unhealthy actions. (③) For instance, at a commonsense level, individuals who respect and value themselves will, other things being equal, seek to look after themselves by adopting courses of action that prevent disease. (④) Those having low self-esteem are more likely to conform to interpersonal pressures than those enjoying high self-esteem with unfortunate consequences when such social pressure results in ‘unhealthy behaviour’. (⑤) In terms of empowerment, though, any unthinking yielding to social pressure would be considered unhealthy!

소재: 선생님의 자상한 피드백

정답 및 해설 p.29

① Ms. Carter was a teacher who everyone said was so hard in her grading. ② She kept telling us in class that she was willing to go over our papers beforehand with us during her office hours. ③ At the time I thought, "Well, I don't think I'll go to your office and have you chop up my paper." ④ Then I tried to actually write the paper over the weekend, but I found that I was clueless. ⑤ I hesitantly decided that I would swallow my pride and go to her with my first draft. ⑥ Contrary to my expectation, when I sat down with her, she was actually really encouraging about it. ⑦ She looked over my entire paper quickly, then sat and discussed with me my strong ideas and areas that needed more work. ⑧ She even helped me with the format so I wouldn't get docked points on that. ⑨ Though it took a lot of courage and guts for me to enter that office, I'm so glad I did.

*get docked points 점수를 깎이다

① Carter 선생님은 점수를 주는 데 너무 간간하다고 누구나 말하는 교사였다. ② 그녀는 우리에게 자신의 근무 시간 중에 우리와 함께 우리의 리포트를 미리 검토할 용의가 있다고 수업 시간에 계속 말했다. ③ 그때 나는 "음, 교무실에 가서 선생님이 제 리포트를 잘게 자르시도록(날날이 분석하시도록) 하지는 않을 것 같네요."라고 생각했다. ④ 그러고서 나는 주말에 실제로 그 리포트를 쓰려고 노력했지만, 나는 내가 리포트를 쓸 줄 모른다는 것을 알게 되었다. ⑤ 나는 주저하며 자존심을 굽히고 초고를 들고 그녀에게 가기로 결정했다. ⑥ 내 예상과는 달리, 함께 앉자, 그녀는 실제로 그것에 관해 진정으로 격려하고 있었다. ⑦ 그녀는 내 리포트 전체를 재빨리 훑어본 다음, 앉아서 나와 함께 나의 강력한 아이디어와 더 많은 작업이 필요한 부분에 관해 논의했다. ⑧ 그녀는 심지어 내가 구성 형식에서 점수를 깎이지 않도록 그것도 도와주었다. ⑨ 비록 그 교무실에 들어가는 데 많은 용기와 배짱이 필요했지만, 나는 그렇게 해서 정말 기쁘다.

Test 1

6번

소재: '생태계 관리'라는 용어의 정의에 관한 서로 다른 관점

정답 및 해설 p.30

① While the term “ecosystem management” began appearing ever more frequently in scientific journals and government reports, it seemed that no two people could agree on what it meant, as definitions of ecosystem management and practitioners or advocates of its use occurred in roughly equal numbers. ② So it seems strange that nearly everyone agreed that ecosystem management was a good thing. ③ When ecosystem management became part of the process of deciding how to use public land, both the environmental community and those concerned with maintaining resource flows took a keen interest in defining ecosystem management in their own terms. ④ Indeed, one observer suggested that when environmental groups heard the term “ecosystem management” they mainly heard “ecosystem,” while industry groups heard “management.” ⑤ This led to the unsettling phenomenon of resource management agencies, conservationists, and industry representatives, who generally couldn’t agree on what time it was, singing in unison the praises of ecosystem management at congressional hearings in the early 1990s.

*in unison 한목소리로

① ‘생태계 관리’라는 용어는 과학 분야의 학술지와 정부 보고서에 더욱더 자주 등장하기 시작했지만, 그것이 무엇을 의미하는지에 대해 어떤 두 사람도 의견이 일치하지 않는 것처럼 보였는데, 생태계 관리의 정의와 그것의 이용에 관한 실무자 또는 옹호자가 거의 동일한 수로 발생했기 때문이었다. ② 그래서 거의 모든 사람이 생태계 관리가 좋은 것이라는 데 동의했다는 것은 이상해 보인다. ③ 생태계 관리가 공유지 활용 방법을 결정하는 과정의 일부가 되자, 환경 공동체와 자원 흐름 유지에 관련된 사람들은 모두 자신들의 용어로 생태계 관리를 정의하는 데 깊은 관심을 가졌다. ④ 실제로, 한 논평가는 환경 단체가 ‘생태계 관리’라는 용어를 들을 때 그들은 주로 ‘생태계’를 듣는 데 반해, 산업 단체는 ‘관리’를 듣는다고 말했다. ⑤ 이는 지금이 몇 시인지에 관해서 대개 의견 일치를 볼 수 없던 자원 관리 단체, 환경 보호론자 및 산업계 대표자들이 1990년대 초 의회 청문회에서 한목소리로 생태계 관리를 칭송하는 심란한 현상을 낳았다.

Test 1

7번

소재: 야생 동물의 소유와 거래에 대한 허가

정답 및 해설 p.30

① Namibian communities have been receiving nearly \$10 million a year from wildlife, says Fred Nelson, a wildlife expert who spent 11 years in Africa developing wildlife management partnerships. ② Since the revenues come primarily from trophy hunting and tourism ventures, local communities had a strong incentive to protect the animals and their habitat. ③ These new incentives led to a natural resurgence in wildlife numbers. ④ Even the number of black rhinos in Namibia rose from 707 in 1997 to 1,134 in 2004. ⑤ Clearly, property rights to ownership or use and freedom to trade are among the keys to conservation. ⑥ These incentives can encourage protection, care, and increased numbers, just as they do with cattle. ⑦ Indeed, after legal action by private rhino holders, a judge in South Africa lifted the ban on domestic trade in rhino horn. ⑧ Trade will give those farmers and communities that own rhinos an incentive to protect them. ⑨ But where ownership and trade are prohibited, the protection will be missing and poaching will probably continue.

*trophy hunting 오락용 야생 동물 사냥 **resurgence 재증가 ***poach 밀렵하다

① 야생 동물 관리 협력 관계를 발전시키면서 아프리카에서 11년을 보낸 야생 동물 전문가인 Fred Nelson의 말에 따르면, 나미비아의 지역 사회는 야생 동물로 한 해에 거의 1천만 달러를 벌어들여 오고 있다. ② 수익이 주로 오락용 야생 동물 사냥과 관광 벤처 사업에서 나오기 때문에, 지역 사회에는 동물과 그것들의 서식지를 보호할 강력한 유인이 있었다. ③ 이런 새로운 유인은 야생 동물 개체 수의 자연적인 재증가를 가져왔다. ④ 심지어 나미비아의 검은코뿔소 수까지도 1997년에 707마리에서 2004년에 1,134 마리로 증가했다. ⑤ 분명히, 소유나 이용에 대한 재산권과 거래의 자유는 보존의 비결에 속한다. ⑥ 이런 유인은 마치 그것이 소에 대해 그러는 것처럼 보호, 관리, 개체 수 증가를 촉진할 수 있다. ⑦ 실은, 사적으로 코뿔소를 소유한 사람들의 소송 이후, 남아프리카 공화국의 한 판사는 코뿔소 뿔의 국내 거래에 대한 금지를 해제했다. ⑧ 거래는 코뿔소를 소유한 그 농부들과 지역 사회에 그것들을 보호하려는 유인을 제공할 것이다. ⑨ 하지만 소유와 거래가 금지되는 경우에는, 그(코뿔소) 보호가 없어질 것이고 밀렵이 아마도 계속될 것이다.

Word List

Americans' views on the federal Government's Role in Energy Activities in 2022

% of U.S. adults who say that the federal government should _____ each of the following activities

Note: Percentages may not sum to 100% due to rounding.

① The above graph shows Americans' views on the federal government's role in energy activities in 2022. ② While 72% of the respondents believe the federal government should encourage the production of wind and solar power, just 5% say the federal government should discourage this. ③ More say the federal government should encourage than discourage the use of electric vehicles (51% vs. 10%), and 39% say the federal government should neither encourage nor discourage this. ④ In views on how the federal government should engage with nuclear power production, less say the government should discourage than encourage the production of nuclear power, while 37% say it should do neither. ⑤ Views about oil and gas drilling are evenly divided; equal shares say the federal government should encourage, discourage and neither encourage nor discourage this. ⑥ Opinion is more negative toward a governmental role in coal mining, with only one-fifth thinking the federal government should encourage this activity.

① 위 도표는 2022년에 에너지 활동에서 연방 정부의 역할에 대한 미국인들의 견해를 보여 준다. ② 72퍼센트의 응답자들이 연방 정부가 풍력과 태양 에너지의 생산을 장려해야 한다고 믿는 한편, 단지 5퍼센트만이 연방 정부가 이를 막아야 한다고 말한다. ③ 더 많은 사람이 연방 정부가 전기 자동차 사용을 막기보다는 장려해야 한다고 말하고(51퍼센트 대 10퍼센트), 39퍼센트는 연방 정부가 이것을 장려하거나 막아서는 안 된다고 말한다. ④ 연방 정부가 원자력 생산에 어떻게 관여해야 하는지에 대한 견해에 있어서, 더 적은 사람들이 정부가 원자력 생산을 장려하기보다는 억제해야 한다고 말하는 한편, 37퍼센트는 정부가 둘 다 해서는 안 된다고 말한다. ⑤ 석유와 가스 시추에 대한 견해는 대등하게[균등하게] 나누어져 있는데, 동일한 비율의 사람들이 연방 정부가 이것을 장려해야 하고, 막아야 하며, 장려하거나 막지 말아야 한다고 말한다. ⑥ 석탄 채굴에 있어 정부의 역할에 관한 의견은 더 부정적이며, 연방 정부가 이러한 활동을 장려해야 한다고 생각하는 사람은 5분의 1에 불과하다.

Word List

□ federal government 연방 정부 □ role 역할 □ encourage 장려하다 □ discourage 막다, 억제하다 □ solar 태양의
□ electric vehicle 전기 자동차 □ nuclear 원자력의, 핵의 □ drilling 시추 □ mining 채굴 □ respondent 응답자
□ engage with ~에 관여하다 □ evenly 대등하게, 고르게 □ share 비율 □ negative 부정적인

• Word Test

1 Riverside High School 식품 기부 운동 대회

2 우리는 지역 사회의 어려운 가족들을 돕기 위해 통조림과 상자에 포장된 식품을 모읍니다!

◆ 3 필요한 품목은 다음과 같음 (하지만 이에 국한되지 않음):

- 4 나트륨이 적게 든 통조림 식품 / 상자에 포장된 정식 / 견과류
- 5 모든 여타의 통조림 식품 / 분유 / 상자에 포장된 치즈
- 6 파스타와 쌀 / 설탕이 적게 든 시리얼 / 통조림 콩 및 말린 콩
- 7 '절대 금지': 유리나 셀로판 용기에 담긴 모든 것

◆ 8 대회 규칙

1. 9 팀(3명 이상의 구성원)으로 참가하고 (가령, '그래 우리는 할 수 있다!' 같은) 여러분 자신의 팀명을 정하세요.
2. 10 대회에 참가하려면, 2023년 5월 26일까지 학교 행정실에서 등록해야 합니다.
3. 11 식품 모으기는 2023년 6월 1일부터 30일까지 진행될 예정입니다.

◆ 12 상

- 13 상은 기부 품목의 개수로 결정될 것입니다.
- 14 1위 팀에게 300달러
- 15 2위 팀에게 200달러
- 16 3위 팀에게 100달러
- 17 수상 팀은 2023년 7월 7일 금요일 오후 4시에 우리 학교 웹사이트에 공지될 것입니다.

Word List

- drive (조직적인) 운동 □ collect 수집하다, 모으다 □ canned 통조림 한 □ boxed 상자에 담은 □ in need 어려운, 궁핍한

Test 1

11번

소재: 여름 댄스 캠프

정답 및 해설 p.30

1 South Bay Dance Center Summer Camps

2 Ages 5–10 years

3 May 22–June 2

4 Monday–Friday, 9:00 AM–2:00 PM

5 All campers should bring bottled water, a healthy snack and lunch.

6 SUMMER FUN

7 Come dance to a different theme each day.

8 You will learn ballet, jazz and hip hop technique.

9 PRIMA BALLERINA

10 One year of ballet is required.

11 Refine your ballet technique.

12 You will also learn some jazz technique.

13 MOVIE MANIA

14 Come dance to a different animated movie theme each day.

15 \$350 per week per camper

16 Early registration discount until May 5, 2023: \$300 per week per camper

17 Camps with less than 10 campers may be subject to cancellation one week prior to the start of the camp.

1 South Bay 댄스 센터 여름 캠프

2 5~10세

3 5월 22일~6월 2일

4 월요일~금요일, 오전 9시~오후 2시

5 모든 캠프 참가자들은 병에 든 생수와 건강에 좋은 간식, 점심을 가져와야 합니다.

6 SUMMER FUN

7 와서 매일 다른 주제에 맞춰 춤을 추세요.

8 여러분은 발레, 재즈, 힙합 기술을 배울 것입니다.

9 PRIMA BALLERINA

10 1년의 발레 경력이 요구됩니다.

11 여러분의 발레 기술을 다듬으세요.

12 여러분은 또한 약간의 재즈 기술도 배울 것입니다.

13 MOVIE MANIA

14 와서 매일 다른 애니메이션 영화 주제곡에 맞춰 춤을 추세요.

15 캠프 참가자 1 인당 한 주에 350달러

16 2023년 5월 5일까지 조기 등록 할인: 캠프 참가자 1 인당 한 주에 300달러

17 캠프 참가자가 10명 미만인 캠프는 캠프 시작 1주일 전에 취소될 수도 있습니다.

South Bay Dance Center Summer Camps

Ages 5–10 years

May 22–June 2

Monday–Friday, 9:00 AM–2:00 PM

All campers should bring bottled water, a ❶ health / healthy snack and lunch.

SUMMER FUN

Come dance to a different theme each ❷ day / days.

You will learn ballet, jazz and hip hop technique.

PRIMA BALLERINA

One year of ballet is required.

❸ Apply / Refine your ballet technique.

You will also learn some jazz technique.

MOVIE MANIA

Come dance to a different animated movie theme each day.

\$350 per week per camper

Early registration discount ❹ by / until May 5, 2023: \$300 per week per camper

Camps with less than 10 campers may be subject to cancellation one week prior to the start of the camp.

- 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Test 1

12번

소재: 권력 거리의 차이가 학습자에게 미치는 영향

정답 및 해설 p.31

① Differences in power distance can have an impact on learners' perceived position in the course and may result in some learners not being able to interact as equals with other learners. ② Tony Bates, an author and educator, describes how culture influences critical thinking skills, debate, and discussion. ③ In an online environment, learners are often encouraged to critically evaluate and debate the content being presented and share their ideas and knowledge in discussion. ④ Cultural differences may affect the degree to which individual learners interact and can interfere with their ability to challenge ideas or express opinions contrary to those of the instructor or other learners in the class. ⑤ Cultural differences can also affect learners who consider the instructor a higher power. ⑥ If you participate in discussions and other activities by offering opinions on a topic or issue, a learner who views you as a higher power may find it difficult to offer opinions or ideas that are contrary to your opinions. ⑦ Instructional activities that are teacher-directed tend to be best for learners from cultures with higher power distance, whereas lower power distance cultures prefer more learner-directed learning strategies.

① 권력 거리의 차이는 과정에서 학습자가 인지하는 위치에 영향을 미칠 수 있으며, 일부 학습자가 다른 학습자와 동등하게 상호 작용을 할 수 없게 하는 결과를 초래할지도 모른다. ② 작가이자 교육자인 Tony Bates는 문화가 비판적 사고 기술, 논쟁, 토론에 어떻게 영향을 미치는지를 설명한다. ③ 온라인 환경에서는 흔히 학습자가 제시되고 있는 내용에 대해 비판적으로 평가하고 논쟁하고 자기 생각과 지식을 토론에서 공유하도록 장려된다. ④ 문화적 차이는 개별 학습자들이 상호 작용을 하는 정도에 영향을 미칠지도 모르고, 생각에 이의를 제기하거나 교실에서 교사나 다른 학습자의 것과 상반된 의견을 표현하는 능력을 방해할 수도 있다. ⑤ 문화적 차이는 또한 교사를 더 높은 권력자로 생각하는 학습자에게 영향을 미칠 수 있다. ⑥ 만약 여러분이 어떤 주제나 문제에 관한 의견을 제시함으로써 토론과 다른 활동에 참여한다면, 여러분을 더 높은 권력자로 여기는 학습자는 여러분의 의견과 상반된 의견이나 아이디어를 내는 것을 어려워할 수도 있다. ⑦ 교사 주도의 교육 활동은 더 높은 권력 거리를 가진 문화 출신의 학습자에게는 최상인 편이지만, 더 낮은 권력 거리 문화는 더 학습자 주도적인 학습 전략을 선호한다.

Word List

Test 1

15번

소재: 이기적인 행동을 완화하는 자기 주목

정답 및 해설 p.31

① There are a number of ways our selfish behaviour can be moderated, especially when attention is drawn to us. ② For example, simply looking in a mirror forces adults literally to self-reflect, which studies have shown reduces cheating on a test. ③ This effect of mirrored self-focus on morality is consistent with recent studies demonstrating that merely hanging up posters of staring human eyes doubled the number of diners that cleaned up after themselves after they had finished their meals. ④ When we think we are being watched, we tend to behave ourselves. ⑤ If the fear of exposure regulates our transgressions, then religions with an all-seeing God may operate to foster moral behaviour precisely because followers think that they are constantly observed. ⑥ Most of the world's religions promote prosociality in their teachings and practices. ⑦ There is a common assumption that religions foster kindness and generosity, as epitomized by the parable of the Good Samaritan in Christianity.

*transgression 위반(행위) **epitomize 전형적으로 보여 주다 ***parable 비유(담), 우화

① 우리의 이기적인 행동이 완화될 수 있는 방법이 많이 있는데, 특히 이목이 우리에게 쏠리는 경우에 그러하다. ② 예를 들어, 단순히 거울을 들여다보는 것이 성인들로 하여금 말 그대로 자신을 돌아보지 않을 수 없게 하는데, 연구는 그것이 시험에서의 부정행위를 감소시킨다는 것을 보여 주었다. ③ 거울에 의한 자기 주목이 도덕성에 미치는 이런 영향은 응시하는 인간 눈의 포스터를 그저 걸기만 해도 식사를 마친 후에 자기 뒷자리를 치우는 식사하는 사람의 수가 두 배 늘었다는 것을 보여 주는 최근의 연구들과 일치한다. ④ 누군가가 우리를 지켜보고 있다고 생각하면, 우리는 바르게 행동하는 경향이 있다. ⑤ 드러남에 대한 두려움이 우리의 위반 행위를 규제한다면, 만물을 꿰뚫어 보는 신이 있는 종교는 신도들이 자신들이 끊임없이 관찰된다고 생각한다는 바로 그 이유로 도덕적인 행동을 육성하도록 작용할 수도 있다. ⑥ 대부분의 세계 종교는 자신들의 가르침과 관례에서 친사회성을 장려한다. ⑦ 기독교의 '선한 사마리아인'의 비유가 전형적으로 보여 주는 것처럼 종교는 친절함과 관대함을 육성한다는 일반적인 가정이 있다.

Word List

- ☐ selfish 이기적인 ☐ moderate 완화하다 ☐ self-reflect 자신을 돌아보다 ☐ cheat 부정행위하다, 속이다 ☐ morality 도덕(성)
- ☐ consistent 일치하는 ☐ double 배가하다, 곱절이 되다 ☐ behave oneself 바르게 행동하다, 행동을 삼가다 ☐ exposure 드러남, 노출
- ☐ regulate 규제하다, 통제하다 ☐ operate 작용하다 ☐ foster 육성하다, 조성하다 ☐ precisely 정확히 ☐ observe 관찰하다
- ☐ prosociality 친사회성 ☐ assumption 가정 ☐ generosity 관대함 ☐ Christianity 기독교

16번

소재: 어설픈 지식의 위험성

정답 및 해설 p.31

① Consider the old saying “A little learning is a dangerous thing.”
 ② As individuals, we are quick to access information that helps us.
 ③ But we often lack the ability to make sense of it, or to use it appropriately.
 ④ One of us has a brother who is a medical doctor. ⑤ He encounters this problem on a daily basis (and we might add, he is not too happy about it). ⑥ Patients show up with (often incorrect) self-diagnoses derived from spending a couple of hours on the Internet. ⑦ It is the same in business: senior executives second-guess their subordinates because their corporate IT system gives them line of sight down to detailed plant-level data. ⑧ At a societal level, people believe they have the right to information that is in the public interest (think Wikileaks), but they are rarely capable of interpreting and using it in a sensible way.

*line of sight 시선

① “어설픈 지식은 위험한 것이다[선무당이 사람 잡는다].”라는 속담을 생각해 보라.
 ② 개인으로서, 우리는 우리에게 도움이 되는 정보를 입수하는 데 빠르다. ③ 하지만 우리는 그것을 이해하거나 적절하게 그것을 이용하는 능력이 부족한 경우가 많다.
 ④ 우리 중 한 명에게 의사인 형제가 있다고 하자. ⑤ 그는 매일 이 문제와 마주친다. (그리고 덧붙이자면, 그는 그것에 대해 그다지 달가워하지 않는다.) ⑥ 환자들은 인터넷에서 두서너 시간을 보내고 나서 얻은 (흔히 부정확한) 자가 진단을 들고 나타난다. ⑦ 그것은 비즈니스에서도 마찬가지인데, 고위 경영진은 회사의 IT 시스템이 그들에게 세부적인 공장 수준의 데이터까지 살펴보게 해 주기 때문에 자신의 부하 직원을 사후에 비판한다. ⑧ 사회의 수준에서, 사람들은 자신이 공익을 위한 정보에 대한 권리를 가진다고 생각하지만 (Wikileaks를 생각하라), 그들은 그것을 분별 있는 방식으로 해석하고 이용할 수 있는 능력이 거의 없다.

Word List

- ☐ saying 속담, 격언 ☐ individual 개인 ☐ access 입수하다, 접근하다 ☐ lack ~이 부족하다, ~이 없다 ☐ appropriately 적절하게
- ☐ medical 의료의, 의학의 ☐ encounter 마주치다 ☐ self-diagnosis 자가 진단 (pl, self-diagnoses) ☐ derive 얻다

Test 1

19번

소재: 사회 과학에서의 인과 관계 설명의 어려움

정답 및 해설 p.32

① In our everyday lives we constantly use causal language. ② Sometimes this employs the word 'cause' (or its derivatives), for example 'She went through a red light and caused an accident', or language that implies that something was caused, 'I arrived late because I missed my flight'. ③ In common speech we do not distinguish between things caused by human behaviour or non-human events (e.g. the brakes failed and this caused the car to crash). ④ Our everyday causal language is good enough for everyday events. ⑤ However, in the sciences we require more precision. ⑥ Pharmacologists must specify a precise dosage of a drug that will cause the desired effect, or indeed the maximum safe dosage; similarly accident investigators are required to closely specify the circumstances that caused a crash. ⑦ Though in the social sciences such precision is not required, or indeed possible, a causal explanation is expected to go beyond common sense. ⑧ Indeed causal explanation is a central feature of social science because many, if not most, questions are about why something is the case. ⑨ Yet specifying what a 'cause' is that goes beyond common sense is not straightforward.

*derivative 파생어 **pharmacologist 약리학자

① 우리의 일상생활에서 우리는 끊임없이 인과 관계의 언어를 사용한다. ② 때로 이것은, 가령 '그녀는 정지 신호를 무시하고 가다가 사고를 일으켰다' 같은 '일으키다'라는 단어(또는 그것의 파생어)나 어떤 일에 원인이 있었다는 것을 함축하는 언어, 즉 '나는 내 항공편을 놓쳤기 때문에 늦게 도착했다'라는 말을 사용한다. ③ 일상의 말에서 우리는 인간 행동에 의해 유발된 일이나 인간에 의하지 않은 사건(가령 브레이크가 고장 나서 이것이 차가 충돌하게 했다)을 구분하지 않는다. ④ 우리의 일상적인 인과 관계의 언어는 일상적인 사건에 충분히 효과적이다. ⑤ 그러나 과학에서 우리는 더 정밀함을 필요로 한다. ⑥ 약리학자들은 원하는 효과를 발생시킬 약의 정확한 복용량이나 정말이지 안전한 최대 복용량을 명시해야 하고, 마찬가지로 사고 조사관들은 충돌 사고를 유발한 상황을 면밀하게 명시해야 한다. ⑦ 사회 과학에서는 그런 정밀함이 요구되지도 않고 정말로 가능하지도 않지만, 인과 관계 설명은 상식을 넘어서리라는 기대를 받는다. ⑧ 사실 인과 관계 설명은 사회 과학의 주요한 특징인데, 대부분은 아니더라도 많은 질문이 어떤 것이 왜 그러한지에 관한 것이기 때문이다. ⑨ 그러나 상식을 넘어서는 '원인'이 무엇인지 명시하는 것은 간단하지 않다.

Word List

- ☐ constantly 끊임없이 ☐ causal 인과 관계의, 원인의 ☐ employ 사용하다 ☐ cause 일으키다; 원인 ☐ imply 함축하다, 내포하다
- ☐ distinguish 구분하다 ☐ brake 브레이크, 제동 장치 ☐ precision 정밀(함) ☐ specify 명시하다 ☐ precise 정확한
- ☐ dosage 복용량 ☐ maximum 최대 ☐ similarly 마찬가지로 ☐ investigator 조사관 ☐ circumstance 상황
- ☐ common sense 상식 ☐ feature 특징 ☐ straightforward 간단한

Test 1

21번

소재: 인간과 인터넷의 신체적 결합

정답 및 해설 p.33

① To be sure, the Internet is a human invention reflecting human choices and values. ② However, it often looks *as if* it is a separate species with an internal logic of its own. ③ The 1987 stock market crash has been blamed on program trading — computers that started selling frantically because every *other* computer was selling. ④ The ceaseless war between viruses and antivirus programs looks eerily like the workings of a biological ecosystem. ⑤ However, even if one posits that the Internet is comparable to a biological species, it's obvious that it's not very intelligent. ⑥ It has primitive ways of “sensing” and “reacting,” but it has no self-awareness and no ability to formulate its own goals. ⑦ Nor could it ever reach such a state on its own. ⑧ It could, however, be the backbone of a sophisticated new organism if physically integrated with humanity. ⑨ The Internet would become a new nervous system for humanity, and humanity would become a new body and executive brain for the Internet.

*frantically 미친 듯이 **eerily 섬뜩하게 ***posit 단정하다

① 확실히, 인터넷은 인간의 선택과 가치를 반영하는 인간의 발명품이다. ② 그러나 그것은 흔히 그것 자체의 내부 논리를 가진 별개의 종 ‘처럼’ 보인다. ③ 1987년 주식 시장의 붕괴는 프로그램 매매, 즉 ‘다른’ 모든 컴퓨터가 (주식을) 팔고 있었기 때문에 미친 듯이 (주식을) 팔기 시작한 컴퓨터에 그 책임이 전가되었다. ④ 바이러스와 바이러스 퇴치용 프로그램 간의 끊임없는 전쟁은 섬뜩하게도 생물 생태계의 작용 방식처럼 보인다. ⑤ 하지만, 설령 어떤 사람은 인터넷이 생물학적 종에 비길 만하다고 단정할지라도, 그것이 그다지 지능적이지 않다는 것은 명백하다. ⑥ 그것은 원시적인 ‘감지’와 ‘반응’의 방식을 가지고 있지만, 자기 인식이 없고 스스로의 목표를 만들어 내는 능력도 없다. ⑦ 또한 그것은 절대 스스로 그런 상태에 도달할 수도 없다. ⑧ 그러나 인간과 신체적으로 통합된다면 그것은 정교한 새로운 유기체의 중추가 될 수 있을 것이다. ⑨ 인터넷은 인간에게 새로운 신경계가 될 것이고 인간은 인터넷의 새로운 몸이자 집행 두뇌가 될 것이다.

Test 1

22번

소재: 손실과 이득을 결정하는 주관적인 기준점

정답 및 해설 p.33

- ① We frame losses and gains relative to a subjective reference point.
- ② This means that we are concerned not so much about absolute wealth, but about our relative wealth.
- ③ For example, if I have bought a house for £150,000, then this is likely to become my reference point, and it is against this value that I measure any gains or losses.
- ④ If I sell the house for more than £150,000, then I view this as a gain; if I sell the house for less than £150,000, then I view this as a loss.
- ⑤ But note that my reference point may not remain static over time.
- ⑥ If I hear that, on average, house prices have increased by 10 per cent in the period since I purchased the property, then I may shift my reference point and judge whether I have made a gain or loss relative to a reference value of £165,000.
- ⑦ A parallel situation can occur in stock markets where I set the initial reference value according to the purchase price I paid for the shares, but I may shift the reference value in the future according to how the stock market has performed overall.

*static 고정된

- ① 우리는 주관적인 기준점과 비교해서 손실과 이득을 따 맞춘다.
- ② 이것은 우리가 절대적인 부보다는 오히려 우리의 상대적 부에 관심이 있다는 것을 의미한다.
- ③ 예를 들어, 내가 15만 파운드에 집을 샀다면, 이것은 나의 기준점이 될 것이고, 나는 어떤 이득이나 손실이라도 바로 이 가격에 견주어 따진다.
- ④ 내가 15만 파운드가 넘는 가격에 그 집을 팔면, 나는 이것을 이득으로 여기지만, 내가 15만 파운드가 안 되는 가격에 그 집을 팔면, 나는 이것을 손실로 여긴다.
- ⑤ 그러나 나의 기준점이 시간이 지남에 따라 고정되어 있지 않을 수도 있다는 것을 유의하라.
- ⑥ 내가 그 부동산을 구매한 이래로 그 기간에 집값이 평균적으로 10퍼센트 올랐다는 말을 듣는다면, 나는 나의 기준점을 옮겨서 16만 5천 파운드라는 기준값과 비교해서 내가 이득을 얻었는지 혹은 손실을 보았는지 판단할 수도 있다.
- ⑦ 내가 주식을 사는 데 지불한 매입 가격에 따라 최초 기준값을 설정했지만, 주식 시장의 전반적인 실적이 어떻게 왔는지에 따라 내가 미래에 기준값을 옮길 수도 있는 주식 시장에서 유사한 상황이 발생할 수 있다.

Word List

- frame 따 맞추다, 따 넣다, 틀 속에서 정리하다 □ loss 손실 □ gain 이득 □ relative to ~과 비교해서 □ subjective 주관적인
- reference point 기준점 □ absolute 절대적인 □ against ~과 견주어(비교하여) □ measure 따지다, 판단하다, 측정하다
- purchase 구매하다; 매입, 구입 □ property 부동산 □ shift 옮기다, 바꾸다 □ parallel 유사한 □ stock market 주식 시장
- initial 최초의 □ share 주식

In Europe, it was not until the end of the eighteenth century that the musicians' guilds, which had regulated ❶ _____ (직업적인 음악 활동들) since the early Middle Ages, were replaced by specific trade regulations that allowed and, indeed, forced musicians to offer their services to the general public for regular payment. ❷ _____ (그 결과), a type of 'all-around musician' emerged, characterized by the ability to cover a broad repertoire, from dance music to folk song, from parlor song to the music of the vaudeville theater. This type of all-around musicianship became a major force in the development of ❸ _____ (대중적인 음악). The changes and uncertainties of the market and the demands of the consuming audience (소비 청중) did not permit a strict ❹ _____ (분업) among musicians. Songwriters acted customarily as band leaders, and performing musicians frequently played more than one instrument. Many musicians were forced into an existence that hovered uneasily between that of the professional and that of the semiprofessional. However, with the growth of ❺ _____ (도시화와 산업화), an increasing specialization occurred. Toward ❻ _____ (19세기 말), popular musicians had clearly defined areas of work in dance music, in public entertainment and in music halls or musical theaters. These musicians frequently ❼ _____ (~에 의존했다) a formal training — graduating from one of the conservatories and then leaving the world of classical music, or taking lessons from one of the many popular musicians who supported themselves by giving lessons ❽ _____ (공연 이외에).

*vaudeville 보드빌(춤과 노래 따위를 결들인 가볍고 풍자적인 통속 희극) **hover 맴돌다 ***conservatory 음악 학교

① Some years ago, I was the Director of Admission at a small private college. ② I will never forget the time when an applicant named John Graham rejected our rejection. ③ The college was not particularly selective, but there were some minimum requirements for admission and John fell short on one or two key measures. ④ A week after we sent out our admission decisions, I received a note from him asking us to reconsider. ⑤ He stated that he had not done well in high school because he had to work to help to support his family. ⑥ I looked at his application again, but I did not believe he could succeed at our college with his low grades. ⑦ I wrote "Young man, your goal of attending college is commendable, but there are many other options for you beyond our institution. ⑧ For example, you might attend a community college and strengthen your academic foundation and then apply to transfer to our college later." ⑨ Weeks went by and then I received another note from him: "Dear Sir, I asked that you reconsider your decision not to admit me to your college. ⑩ I failed to mention that your college is my first choice school and I have not applied anywhere else. ⑪ For these reasons and others, I must inform you that I cannot accept your rejection. ⑫ I do hope that it does not inconvenience the college too much but please expect to see me at the school opening in the fall." ⑬ The next time I encountered the young man, he was in the group at freshman orientation. ⑭ He had found his way to campus and met with some of the staff in the Counseling Office. ⑮ They were so impressed with his story and his determination that they walked him over to the admission office and personally advocated for his acceptance. ⑯ How could I stand in the way of a young person with that much drive and commitment to reach his goal? ⑰ He got in! ⑱ His admission was conditional and he had to work harder than most students, but he succeeded.

① 몇 년 전, 나는 작은 사립 대학의 입학처장이었다. ② 나는 John Graham이라는 지원자가 우리의 거절을 거절했을 때를 결코 잊지 못할 것이다. ③ 그 대학이 특별히 까다롭지는 않았지만, 입학을 위한 최소한의 몇몇 요구 사항이 있었는데, John은 한 두 개의 주요 기준에 미치지 못했다. ④ 우리가 입학에 관한 우리의 결정 사항을 보낸 일주일 후, 나는 그로부터 재고를 요청하는 편지를 받았다. ⑤ 그는 자신의 가족을 부양하는 것을 돕느라 일을 해야 했기 때문에 고등학교에서 잘하지 못했다고 말했다. ⑥ 나는 그의 지원서를 다시 봤지만, 그의 낮은 성적으로 우리 대학에서 잘할 수 있으리라 생각하지 않았다. ⑦ "젊은이, 자네가 대학에 입학하고자 하는 목표는 칭찬할 만하지만, 우리 기관 이외 자네를 위한 많은 다른 선택이 있네. ⑧ 예를 들면, 자네는 지역 전문대에 입학해서 자네의 학문적 기초를 튼튼히 하고 그다음에 나중에 우리 대학으로 옮기도록 지원할 수도 있네."라고 나는 썼다. ⑨ 몇 주가 지나고 나는 그로부터 또 다른 편지를 받았다. "선생님께, 저는 귀 대학에 저의 입학을 허락하지 않기로 하신 결정을 재고해 달라고 부탁드렸습니다. ⑩ 귀 대학이 제가 가장 원하는 학교이며 다른 곳은 지원하지 않았다는 것을 말씀드리지 못했습니다. ⑪ 이러한 이유와 기타 이유로 저는 귀교의 거절을 받아들일 수 없다는 것을 선생님께 알려 드릴 수밖에 없습니다. ⑫ 저는 대학에 너무 많은 폐를 끼치지 않기를 정말 바라지만, 부디 가을에 개학할 때 저를 보게 되리라 기대해 주세요." ⑬ 내가 다음번에 그 젊은이를 우연히 만났을 때, 그는 신입생 오리엔테이션 그룹에 있었다. ⑭ 그는 결국 캠퍼스로 오는 길을 찾았고, 상담실 직원 중 몇몇을 만났다. ⑮ 그들은 그의 이야기와 결의에 매우 감명받아서 그를 입학처에 데려가 친히 그에 대한 입학 허가를 옹호했다. ⑯ 자신의 목표를 이루기 위해 그렇게 대단한 추진력과 집념을 가진 젊은이에게 내가 어떻게 방해가 될 수 있었겠는가? ⑰ 그는 입학 허가를 받았다! ⑱ 그의 입학은 조건부였고, 그는 대부분 학생보다 더 열심히 공부해야 했지만, 해냈다.

Word List

- admission 입학 □ applicant 지원자 □ selective 까다로운, 선별적인 □ minimum 최소한의 □ requirement 요건, 요구
- measure 기준, 척도 □ reconsider ~를 재고하다 □ commendable 칭찬할 만한, 훌륭한 □ institution 기관
- strengthen 튼튼히 하다, 강화하다 □ foundation 기초, 토대 □ transfer 옮기다, 이전하다 □ mention 말하다, 언급하다
- inconvenience 폐를 끼치다 □ encounter (우연히) 만나다, 마주치다 □ freshman 신입생 □ impressed 감명받는, 감동하는
- determination 결의, 결단력 □ advocate 옹호하다, 지지하다 □ acceptance 수용, 받아들임 □ stand in the way 방해가 되다
- commitment 집념, 전념 □ get in (대학 등에) 입학 허가를 받다 □ conditional 조건부의

I am a loyal subscriber of your magazine and have been for over three years now and have always enjoyed the articles that you write about. I was really excited when I realized that you were going to do a piece on the charitable organization Open Heart Orphanage Ministry, which is very close to my heart. I was, however, a little bit disappointed when I read the article and realized that there were several mistakes in it, especially with regard to the history of the group. I feel that a publication's reputation rests greatly on its ability to provide factual information and, therefore, feel moved to send you corrections that you can use. Moreover, I want to maintain the integrity of the history of the Open Heart Orphanage Ministry that has done a lot to improve the lives of numerous children in Africa. Thank you and I hope to see a printed correction in your next issue.

- ① how to support charities for children
- ② the importance of editing in publication
- ③ how to find reliable sources in magazines
- ④ roles of magazines in providing entertainment
- ⑤ the necessity of fact checking publications

02 Test 1 2번

Ms. Carter에 관한 다음 글의 내용과 일치하지 않는 것은?

Ms. Carter was a teacher who everyone said was so hard in her grading. She kept telling us in class that she was willing to go over our papers beforehand with us during her office hours. At the time I thought, "Well, I don't think I'll go to your office and have you chop up my paper." Then I tried to actually write the paper over the weekend, but I found that I was clueless. I hesitantly decided that I would swallow my pride and go to her with my first draft. Contrary to my expectation, when I sat down with her, she was actually really encouraging about it. She looked over my entire

paper quickly, then sat and discussed with me my strong ideas and areas that needed more work. She even helped me with the format so I wouldn't get docked points on that. Though it took a lot of courage and guts for me to enter that office, I'm so glad I did.

*get docked points 점수를 깎이다

- ① 채점에 있어 매우 엄격한 것으로 알려져 있었다.
- ② 근무 시간 이외에도 학생들과 면담하겠다고 했다.
- ③ 도움을 받으러 간 필자에게 격려를 아끼지 않았다.
- ④ 필자의 리포트에서 좋은 점 외에 보완해야 할 점도 지적했다.
- ⑤ 필자가 리포트 점수를 깎이지 않도록 제출 기한을 늘려 주었다.

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

This is when you have to switch off (in every sense of the word) and start getting ready for bed.

Tech eats into sleep time. It doesn't matter if your screen is pumping out a restful, warm light and you're looking at soothing images. If you don't nod off because you're too busy looking at screens, your sleep will suffer. I'm sure we've all been aimlessly scrolling or working on something or checking social networking services in an endless loop, but know it's about time we got some sleep yet still can't seem to stop. (①) A straightforward way of addressing this problem is to set a sleep alarm. (②) You set an alarm for the morning, so set another for the evening too. (③) You can't ignore your morning alarm if you want to keep your job, so the one you set for the evening has to become immovable too. (④) You could swipe-proof your night-time sleep alarm by changing the settings on your smartphone to ban apps after a particular time. (⑤) That way, you're more likely to focus on sleep, not apps.

*soothing 마음을 진정시키는

**swipe-proof 손가락으로 화면을 획 쓰는 동작으로 해제되지 않게 하다

다음 글의 제목으로 가장 적절한 것은?

Don't believe anyone who says that since nature is based on a struggle for life, we need to live like this as well. Many animals survive not by eliminating each other or keeping everything for themselves, but by cooperating and sharing. This applies most definitely to pack hunters, such as wolves or killer whales, but it also applies to our closest relatives, the primates. In a study done at Tai National Park, in Ivory Coast, chimpanzees took care of group mates wounded by leopards; they licked their mates' blood, carefully removed dirt, and waved away flies that came near the wounds. They protected injured companions and slowed down during travel in order to accommodate them. All of this makes perfect sense, given that chimpanzees live in groups for a reason, the same way wolves and humans are group animals for a reason. If man is wolf to man, he is so in every sense, not just the negative one. We would not be where we are today had our ancestors been socially aloof.

*aloof 냉담한

- ① The Selfish Instincts of Our Ancestors
- ② The Beauty and Terror of Surviving Life
- ③ The Humane Treatment of Wild Animals
- ④ Thriving by Cooperating and Sharing
- ⑤ Perpetual Struggles in the Animal Kingdom

Test 1 5번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The physical environment directly determines the capacity for independent living of anyone with a difficulty or disability (difficulty walking, poor sight, impaired hearing, etc.). The idea is to encourage independent living through careful attention to architectural and urban design and services. In buildings, the absence of lifts or ramps can make life impossible for the elderly. The design of interior traffic and services areas can do the same. Outdoors, the absence of public benches, footpaths that are too narrow or too high, a road that is dangerous to cross, the difficulty or impossibility of boarding a bus or tram can force someone with impaired mobility to curtail their activities, or to stay at home. Bad design _____. Poor design can be exacerbated by the "rudeness, insecurity and violence" that can be attendant on going outdoors. If these issues are not dealt with, a vicious circle of dependence develops.

*curtail 줄이다 **exacerbate 더욱 나쁘게 하다

- ① turns disabilities into handicaps
- ② eliminates boundaries for the disabled
- ③ makes all environments accessible
- ④ proves accessibility norms sufficient
- ⑤ pays careful attention to the elderly

06 Test 1 6번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

While the term “ecosystem management” began appearing ever more frequently in scientific journals and government reports, it seemed that no two people could agree on what it meant, as definitions of ecosystem management and practitioners or advocates of its use occurred in roughly equal numbers. So it seems strange that nearly everyone agreed that ecosystem management was a good thing. When ecosystem management became part of the process of deciding how to use public land, both the environmental community and those concerned with maintaining resource flows took a keen interest in defining ecosystem management in their own terms. Indeed, one observer suggested that when environmental groups heard the term “ecosystem management” they mainly heard “ecosystem,” while industry groups heard “management.” This led to the unsettling phenomenon of resource management agencies, conservationists, and industry representatives, who generally couldn’t agree on what time it was, singing in unison the praises of ecosystem management at congressional hearings in the early 1990s.

*in unison 한목소리로

Experts of different fields seem to have difficulty in reaching an agreement on the ____ (A) ____ definition of “ecosystem management,” but they have one common belief: ecosystem management as a concept is a ____ (B) ____ approach that seems to hold potential on how to use public land for the better.

(A) (B)

- ① current negative
- ② exact positive
- ③ changing negative
- ④ outdated positive
- ⑤ trivial negative

07 Test 1 7번

(A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

Namibian communities have been receiving nearly \$10 million a year from wildlife, says Fred Nelson, a wildlife expert who spent 11 years in Africa developing wildlife management partnerships. Since the revenues come primarily from trophy hunting and tourism ventures, local communities had a strong incentive to (A) protect/neglect the animals and their habitat. These new incentives led to a natural resurgence in wildlife numbers. Even the number of black rhinos in Namibia rose from 707 in 1997 to 1,134 in 2004. Clearly, property rights to ownership or use and freedom to trade are among the keys to (B) conservation/extinction. These incentives can encourage protection, care, and increased numbers, just as they do with cattle. Indeed, after legal action by private rhino holders, a judge in South Africa lifted the ban on domestic trade in rhino horn. Trade will give those farmers and communities that own rhinos an incentive to protect them. But where ownership and trade are (C) prohibited/executed, the protection will be missing and poaching will probably continue.

*trophy hunting 오락용 야생 동물 사냥 **resurgence 재증가
***poach 밀렵하다

(A) (B) (C)

- ① protect conservation prohibited
- ② protect extinction prohibited
- ③ protect conservation executed
- ④ neglect extinction executed
- ⑤ neglect conservation prohibited

08 Test 1 8번

다음 글의 제목으로 가장 적절한 것은?

Robert Boyle (1627–1691) was the fourteenth child of the first Earl of Cork, who was the richest man in England. As the founder of modern chemistry, Boyle devoted his life to scientific investigation and methodology. He was well-received at the British Court, and a member of the council of the Royal Society, although he declined its presidency and the provostship of Eton because he did not want to “take oaths.” When he retired to a house in Pall Mall after a stroke at age 42, he maintained his own laboratory. Boyle’s goal was to replace Aristotelian mechanics with explanations using just two things: matter and motion. He was also a champion of the new atomism, or “corpuscular theory.” Boyle’s most famous works were *New Experiments Physico-Mechanical*, *Touching the Spring of the Air and Its Effects*, *The Skeptical Chemist*, and *The Experimental History of Colors*. He also wrote a religious novel, *Seraphic Love*.

*earl 백작 **provostship 학장직 ***corpuscular theory 입자설

- ① Boyle: A Scientist Turned Politician
- ② The Considerable Accomplishments of Dr. Boyle
- ③ Matter and Motion: Boyle’s First Discovery
- ④ How Boyle’s Religion Influenced His Works
- ⑤ Do Scientists Prefer an Independent Lifestyle?

09 Test 1 9번

Americans’ views on the federal government’s role in energy activities에 관한 다음 글의 내용과 일치하지 않는 것은?

Americans’ views on the federal Government’s Role in Energy Activities in 2022

% of U.S. adults who say that the federal government should _____ each of the following activities

Note: Percentages may not sum to 100% due to rounding.

The above graph shows Americans’ views on the federal government’s role in energy activities in 2022. While 72% of the respondents believe the federal government should encourage the production of wind and solar power, just 5% say the federal government should discourage this. More say the federal government should encourage than discourage the use of electric vehicles (51% vs. 10%), and 39% say the federal government should neither encourage nor discourage this. In views on how the federal government should engage with nuclear power production, less say the government should discourage than encourage the production of nuclear power, while 37% say it should do neither. Views about oil and gas drilling are evenly divided; equal shares say the federal government should encourage, discourage and neither encourage nor discourage this. Opinion is more negative toward a governmental role in coal mining, with only one-fifth thinking the federal government should encourage this activity.

- ① 풍력과 태양 에너지 생산을 장려해야 한다는 응답자 수가 막아야 한다는 응답자 수의 14배 이상이다.
- ② 전기 자동차 사용을 장려해야 한다는 응답자 수가 막아야 한다는 수의 5배 이상이다.
- ③ 원자력 생산을 정부가 장려해서도 막아서도 안 된다고 말한 응답자 비율은 전체의 4분의 1이다.
- ④ 석유와 가스 시추에 대한 응답자 비율이 유일하게 세 가지 견해 항목에서 동등하게 나뉜다.
- ⑤ 정부가 석탄 채굴을 장려해야 한다는 비율은 전체의 5분의 1이다.

Riverside High School Food Drive Contest에 관한 다음 글의 내용과 일치하지 않는 것은?

Riverside High School Food Drive Contest

We collect canned and boxed foods to help families in need in the community!

◆ Needed Items Are (But Are Not Limited To):

Low Sodium Canned Foods Boxed Dinners

Nuts All Other Canned Foods

Dry Milk Boxed Cheese

Pasta and Rice Low Sugar Cereal

Canned and Dry Beans

ABSOLUTELY NO: anything contained in glass or cellophane

◆ Contest Rules

1. Enter as a team (3+ members) and pick your own team name (e.g. Yes We Can!).
2. To enter the contest, you must register at the school office by May 26, 2023.
3. Food collection will be from June 1 through 30, 2023.

◆ Prizes

Prizes will be determined by the number of contributed items.

\$300 for the first place team

\$200 for the second place team

\$100 for the third place team

The winning teams will be announced on our school website at 4:00 PM on Friday, July 7, 2023.

*sodium 나트륨

- ① 기부 물품에는 통조림, 견과류, 분유 및 쌀 등이 포함된다.
- ② 기부 물품에 해당하지 않는 것은 유리나 셀로판 용기에 담긴 물건이다.
- ③ 참여 팀은 5월 26일까지 학교 행정실에서 등록해야 대회에 참가할 수 있다.
- ④ 수상 기준은 기부한 품목 수로 결정될 것이며 상금이 수여될 예정이다.
- ⑤ 수상자에게는 7월 7일 오후 4시에 학교에서 개별적으로 연락할 것이다.

South Bay Dance Center Summer Camps에 관한 다음 글의 내용과 일치하지 않는 것은?

South Bay Dance Center Summer Camps

Ages 5—10 years

May 22—June 2

Monday—Friday, 9:00 AM—2:00 PM

All campers should bring bottled water, a healthy snack and lunch.

SUMMER FUN

Come dance to a different theme each day. You will learn ballet, jazz and hip hop technique.

PRIMA BALLERINA

One year of ballet is required.

Refine your ballet technique.

You will also learn some jazz technique.

MOVIE MANIA

Come dance to a different animated movie theme each day.

\$350 per week per camper

Early registration discount until May 5, 2023:

\$300 per week per camper

Camps with less than 10 campers may be subject to cancellation one week prior to the start of the camp.

- ① 5세에서 10세 아이들을 대상으로 한다.
- ② 평일 오전 9시부터 오후 2시까지만 운영된다.
- ③ Summer Fun에서는 발레, 재즈, 힙합을 배울 수 있다.
- ④ Prima Ballerina에서는 발레만 집중적으로 배울 수 있다.
- ⑤ 5월 5일까지 등록할 경우, 한 주 수강료는 300달러이다.

12 Test 1 12번

다음 글에서 전체 흐름과 관계 없는 문장은?

Differences in power distance can have an impact on learners' perceived position in the course and may result in some learners not being able to interact as equals with other learners. Tony Bates, an author and educator, describes how culture influences critical thinking skills, debate, and discussion. In an online environment, learners are often encouraged to critically evaluate and debate the content being presented and share their ideas and knowledge in discussion. ① Cultural differences may affect the degree to which individual learners interact and can interfere with their ability to challenge ideas or express opinions contrary to those of the instructor or other learners in the class. ② Cultural differences can also affect learners who consider the instructor a higher power. ③ If you participate in discussions and other activities by offering opinions on a topic or issue, a learner who views you as a higher power may find it difficult to offer opinions or ideas that are contrary to your opinions. ④ The concept of power distance varies among cultures, therefore educators should rethink assumptions on student's academic outcomes in particular. ⑤ Instructional activities that are teacher-directed tend to be best for learners from cultures with higher power distance, whereas lower power distance cultures prefer more learner-directed learning strategies.

13 Test 1 13번

다음 글의 제목으로 가장 적절한 것은?

Unfortunately, unemployment programs have an unintended secondary effect: They increase the unemployment rate. The benefits make it less costly for an unemployed worker to turn down available jobs and continue searching while receiving the payments. They also reduce the incentive of the unemployed to switch occupations or move to another location in order to find employment. As a result, workers stay unemployed longer and the overall unemployment rate is higher than it would be otherwise. In fact, empirical evidence indicates that there is a spike in the number of unemployed workers obtaining employment just before and immediately after their unemployment benefits are exhausted. The persistently higher unemployment rates in Europe, where the benefits are more generous, also indicate that the program pushes the unemployment rate upward, perhaps by as much as 2 or 3 percentage points.

*empirical 실증적인 **spike 급증

- ① Risking It All: The Key to Staying Employed
- ② Restoring Unemployment Benefits for All
- ③ Reducing Incentives to Support the Unemployed
- ④ Unemployment Programs: A Double-Edged Sword
- ⑤ Searching for a Young Eligible Workforce in Europe

14 Test 1 14번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

The sense of familial and cultural solidarity that comes with feasting can be very pleasant and reassuring, ① rewarding in ways both nutritional and psychological. Eating to 120 percent full is probably a pretty standard performance at a feast, so over the course of a million-plus years of feasting, a strong psychological association likely evolved between ② being extra full and a sense of social well-being. The importance of social life to human beings cannot be underestimated. The common ancestor we shared with chimpanzees millions of years ago ③ was likely a highly social species, just as chimpanzees and we are today. Over the course of our evolution, humans ④ gaining a tool — language — that has helped our kind to ratchet up all aspects of social life. Sharing food both on a day-to-day basis and on special occasions is part of the complex of behaviors that now defines ⑤ how humans are social. In a less profound or obvious way, occasional overeating may also be part of this complex.

*ratchet up ~을 단계별로 향상하다

15 Test 1 15번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

There are a number of ways our selfish behaviour can be moderated, especially when attention is drawn to us. For example, simply looking in a mirror forces adults literally to self-reflect, which studies have shown reduces cheating on a test. This effect of mirrored self-focus on morality is consistent with recent studies demonstrating that merely hanging up posters of staring human eyes doubled the number of diners that cleaned up after themselves after they had finished their meals. When we think we are being watched, we tend to behave ourselves. If the fear of exposure regulates our transgressions, then religions with an all-seeing God may operate to foster moral behaviour precisely because followers think that they are constantly observed. Most of the world's religions promote prosociality in their teachings and practices. There is a common assumption that religions foster kindness and generosity, as epitomized by the parable of the Good Samaritan in Christianity.

*transgression 위반 (행위) **epitomize 전형적으로 보여 주다
***parable 비유(담), 우화

The reason why people tend to be more (A) of their behaviors in the presence of others is that there is the (B) that any morally inappropriate action will be exposed.

(A)

(B)

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

It is the same in business: senior executives second-guess their subordinates because their corporate IT system gives them line of sight down to detailed plant-level data.

Consider the old saying “A little learning is a dangerous thing.” As individuals, we are quick to access information that helps us. (①) But we often lack the ability to make sense of it, or to use it appropriately. (②) One of us has a brother who is a medical doctor. (③) He encounters this problem on a daily basis (and we might add, he is not too happy about it). (④) Patients show up with (often incorrect) self-diagnoses derived from spending a couple of hours on the Internet. (⑤) At a societal level, people believe they have the right to information that is in the public interest (think Wikileaks), but they are rarely capable of interpreting and using it in a sensible way.

*line of sight 시선

17 Test 1 17번

(A), (B), (C)의 각 네모 안에서 어법에 맞는 표현으로 가장 적절한 것은?

Many economic laws have been criticized as having only statistical necessity. Consider the law stating that the quantity sold (A) vary/varies inversely with its price. We can show that it is not universally true with a thought experiment featuring an isolated village of peasants. The villagers can subsist on a weekly ration of one pound of rice and two pounds of beans or can subsist on the tastier and more nutritious fare of one pound of rice, one pound of beans, and one pound of fish. Rice and beans each (B) cost/costing \$1.00 per pound, but a pound of fish costs \$1.20. Since the peasants are paid \$3.20 a week, they spend it all on the rice, beans, and fish diet. What happens if the price of beans rises to \$1.10? (It is impossible to buy less than a pound of anything.) Bean sales double (C) because/because of the only adequate diet becomes the one with one pound of rice and two pounds of beans.

*inversely 반비례로, 반대로 **subsist on ~으로 연명하다 ***ration 배급량

다음 글의 제목으로 가장 적절한 것은?

The confirming-evidence bias not only affects where we go to collect evidence, but also how we interpret the evidence we do receive, leading us to give too much weight to supporting information and too little to conflicting information. In one psychological study of this phenomenon, two groups — one opposed to and one supporting capital punishment — each read two reports of carefully conducted research on the effectiveness of the death penalty as a deterrent to crime. One report concluded that the death penalty was effective; the other concluded it was not. Despite being exposed to solid scientific information supporting counter-arguments, the members of both groups became even more convinced of the validity of their own position after reading both reports. They automatically accepted the supporting information and dismissed the conflicting information.

다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

In our everyday lives we constantly use causal language. Sometimes this employs the word 'cause' (or its derivatives), for example 'She went through a red light and caused an accident', or language that implies that something was caused, 'I arrived late because I missed my flight'. In common speech we do not distinguish between things caused by human behaviour or non-human events (e.g. the brakes failed and this caused the car to crash). Our everyday causal language is good enough for everyday events. However, in the sciences we require more precision. Pharmacologists must specify a precise dosage of a drug that will cause the desired effect, or indeed the maximum safe dosage; similarly accident investigators are required to closely specify the circumstances that caused a crash. Though in the social sciences such precision is not required, or indeed possible, a causal explanation is expected to go beyond common sense. Indeed causal explanation is a central feature of social science because many, if not most, questions are about why something is the case. Yet specifying what a 'cause' is that goes beyond common sense is not straightforward.

*derivative 파생어 **pharmacologist 약리학자

- ① 일상생활에서 인과 관계를 나타내는 특정한 단어가 사용된다.
- ② 일상생활에서 결과를 초래한 행위자를 명확하게 밝히는 것이 중요하다.
- ③ 과학뿐만 아니라 모든 분야에서 인과 관계를 명시하는 것은 필수적이다.
- ④ 사회과학의 경우 인과 관계를 정확하게 구별 짓는 것은 간단 명료하지 않다.
- ⑤ 사회과학에서는 상식을 동원하면 현상의 인과 관계를 직접적으로 찾을 수 있다.

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Observe a single ant and it doesn't make much sense — walking in one direction, suddenly *careening* in another for no obvious reason, doubling back on ① itself. Thoroughly unpredictable. The same happens with two ants, with a handful of ants. But a colony of ants makes fantastic sense. Specialized jobs, efficient means of exploiting new food sources, complex underground nests with temperature ② regulates within a few degrees. And critically, there's no blueprint or central source of command — each individual ant has algorithms for its behaviors. But this is not the wisdom of the crowd, ③ where a bunch of reasonably informed individuals outperform a single expert. The ants aren't reasonably ④ informed about the big picture. Instead, the behavior algorithms of each ant consist of a few simple rules for interacting with the local environment and local ants. And out of this ⑤ emerges a highly efficient colony.

*careen (전속력으로) 달리다

21 Test 1 21번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

To be sure, the Internet is a human invention reflecting human choices and values. However, it often looks *as if* it is a separate species with an internal logic of its own. The 1987 stock market crash has been blamed on program trading — computers that started selling ① frantically because every *other* computer was selling. The ceaseless war between viruses and antivirus programs ② looks eerily like the workings of a biological ecosystem. However, even if one posits ③ what the Internet is comparable to a biological species, it's obvious that it's not very intelligent. It has primitive ways of “sensing” and “reacting,” but it has no self-awareness and no ability to formulate its own goals. Nor ④ could it ever reach such a state on its own. It could, however, be the backbone of a sophisticated new organism if physically ⑤ integrated with humanity. The Internet would become a new nervous system for humanity, and humanity would become a new body and executive brain for the Internet.

*frantically 미친 듯이 **eerily 섬뜩하게 ***posit 단정하다

Test 1 22번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

We frame losses and gains relative to a subjective reference point. This means that we are concerned not so much about absolute wealth, but about our relative wealth. For example, if I have bought a house for £150,000, then this is likely to become my reference point, and it is against this value that I measure any gains or losses. If I sell the house for more than £150,000, then I view this as a gain; if I sell the house for less than £150,000, then I view this as a loss. But note that my reference point may not remain static over time. If I hear that, on average, house prices have increased by 10 per cent in the period since I purchased the property, then I may shift my reference point and judge whether I have made a gain or loss relative to a reference value of £165,000. A parallel situation can occur in stock markets where I set the initial reference value according to the purchase price I paid for the shares, but I may shift the reference value in the future according to _____.

*static 고정된

- ① the varying perceptions of gains and losses
- ② how the stock market has performed overall
- ③ the existing major and minor economic indicators
- ④ how much I understand what market value is
- ⑤ the pleasure I get from winning gains than losses

The contribution of culture to progress has been called the ratchet *effect*, based on an analogy with the tool that permits forward movement but ① prevents backward movement. Michael Tomasello, an expert who has written extensively about both primate and human thought capabilities, ② summarizes the effect this way. Two things are needed for progress. The first is innovation: Someone has to come up with a better solution to a common problem. The other is preservation: The solution has to be transmitted to others and remembered, so everyone can continue using ③ them even after the inventor or discoverer has died. Tomasello says that nonhuman apes actually are pretty good at ④ coming up with novel, creative solutions to problems. For them (our biological relatives), the problem is with preservation. Even if the solver remembers the solution for a while, and even if a couple of his or her mates copy the solution and use it for a while, it is eventually ⑤ forgotten, and the next generation has to start over.

*ratchet 래칫(한쪽 방향으로만 회전하게 되어 있는 톱니바퀴)

**analogy 유사점

[24~25] 다음 글을 읽고, 물음에 답하시오.

In Europe, it was not until the end of the eighteenth century that the musicians' guilds, which had regulated professional musical activities since the early Middle Ages, were replaced by specific trade regulations that allowed and, indeed, (a) forced musicians to offer their services to the general public for regular payment. As a consequence, a type of 'all-around musician' emerged, characterized by the ability to cover a (b) broad repertoire, from dance music to folk song, from parlor song to the music of the vaudeville theater. This type of all-around musicianship became a major force in the development of popular music. The changes and uncertainties of the market and the demands of the consuming audience did not permit a (c) strict division of labor among musicians. Songwriters acted customarily as band leaders, and performing musicians frequently played more than one instrument. Many musicians were forced into an existence that hovered uneasily between that of the professional and that of the semiprofessional. However, with the growth of urbanization and industrialization, an increasing specialization occurred. Toward the end of the nineteenth century, popular musicians had clearly (d) indefinite areas of work in dance music, in public entertainment and in music halls or musical theaters. These musicians frequently relied on a formal training — graduating from one of the conservatories and then (e) leaving the world of classical music, or taking lessons from one of the many popular musicians who supported themselves by giving lessons in addition to performing.

*vaudeville 보드빌(춤과 노래 따위를 결집한 가볍고 풍자적인 통속 희극)

hover 맴돌다 *conservatory 음악 학교

Test 1 26-28번

[26~28] 다음 글을 읽고, 물음에 답하십시오.

(A)

Some years ago, I was the Director of Admission at a small private college. I will never forget the time when an applicant named John Graham rejected our rejection. The college was not particularly (a) selective, but there were some minimum requirements for admission and John fell short on one or two key measures. A week after we sent out our admission decisions, I received a note from him asking us to reconsider.

(B)

The next time I encountered the young man, he was in the group at freshman orientation. He had found his way to campus and met with some of the staff in the Counseling Office. They were so impressed with his story and his determination that they walked him over to the admission office and personally advocated for his (b) dismissal. How could I stand in the way of a young person with that much drive and commitment to reach his goal? He got in! His admission was conditional and he had to work harder than most students, but he succeeded.

(C)

Weeks went by and then I received another note from him: "Dear Sir, I asked that you (c) reconsider your decision not to admit me to your college. I failed to mention that your college is my first choice school and I have not applied anywhere else. For these reasons and others, I must inform you that I cannot (d) accept your rejection. I do hope that it does not inconvenience the college too much but please expect to see me at the school opening in the fall."

(D)

He stated that he had not done well in high school because he had to work to help to support his family. I looked at his application again, but I did not believe he could succeed at our college with his low grades. I wrote "Young man, your goal of attending college is (e) commendable, but there are many other options for you beyond our institution. For example, you might attend a community college and strengthen your academic foundation and then apply to transfer to our college later."

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Tech eats into sleep time. It doesn't matter if your screen is pumping out a restful, warm light and you're looking at soothing images. If you don't nod off ① because you're too busy looking at screens, your sleep will suffer. I'm sure we've all been aimlessly scrolling or working on something or ② check social networking services in an endless loop, but know it's about time we got some sleep yet still can't seem to stop. A straightforward way of addressing this problem ③ is to set a sleep alarm. You set an alarm for the morning, so set another for the evening too. This is when you have to switch off (in every sense of the word) and ④ start getting ready for bed. You can't ignore your morning alarm if you want to keep your job, so the one you set for the evening has to become ⑤ immovable too. You could swipe-proof your night-time sleep alarm by changing the settings on your smartphone to ban apps after a particular time. That way, you're more likely to focus on sleep, not apps.

*soothing 마음을 진정시키는

**swipe-proof 손가락으로 화면을 획 쓰는 동작으로 해제되지 않게 하다

32 Test 1 4번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Don't believe anyone who says that since nature is based on a struggle for life, we need to live like this as well. Many animals survive not by eliminating each other or keeping everything for themselves, but by ① cooperating and sharing. This applies most definitely to pack hunters, such as wolves or killer whales, but it also applies to our closest relatives, the primates. In a study done at Tai National Park, in Ivory Coast, chimpanzees took care of group mates ② wounded by leopards; they licked their mates' blood, carefully removed dirt, and waved away flies that came near the wounds. They protected injured companions and slowed down during travel in order to accommodate ③ them. All of this ④ make perfect sense, given that chimpanzees live in groups for a reason, the same way wolves and humans are group animals for a reason. If man is wolf to man, he is so in every sense, not just the negative one. We would not be where we are today ⑤ had our ancestors been socially aloof.

*aloof 냉담한

Test 1 6번

다음 글에서 전체 흐름과 관계 없는 문장은?

While the term “ecosystem management” began appearing ever more frequently in scientific journals and government reports, it seemed that no two people could agree on what it meant, as definitions of ecosystem management and practitioners or advocates of its use occurred in roughly equal numbers. ① So it seems strange that nearly everyone agreed that ecosystem management was a good thing. ② When ecosystem management became part of the process of deciding how to use public land, both the environmental community and those concerned with maintaining resource flows took a keen interest in defining ecosystem management in their own terms. ③ This showed the public that there was no generally accepted definition of ecosystem management but only concrete instances that seemed to converge into a common goal of eliminating the ecological integrity of public land. ④ Indeed, one observer suggested that when environmental groups heard the term “ecosystem management” they mainly heard “ecosystem,” while industry groups heard “management.” ⑤ This led to the unsettling phenomenon of resource management agencies, conservationists, and industry representatives, who generally couldn’t agree on what time it was, singing in unison the praises of ecosystem management at congressional hearings in the early 1990s.

*in unison 한목소리로

Test 1 7번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Namibian communities have been receiving nearly \$10 million a year from wildlife, says Fred Nelson, a wildlife expert who spent 11 years in Africa developing wildlife management partnerships. Since the revenues come primarily from trophy hunting and tourism ventures, local communities had a strong incentive to protect the animals and their habitat. These new incentives led to a natural resurgence in wildlife numbers. Even the number of black rhinos in Namibia rose from 707 in 1997 to 1,134 in 2004. Clearly, property rights to ownership or use and freedom to trade are _____. These incentives can encourage protection, care, and increased numbers, just as they do with cattle. Indeed, after legal action by private rhino holders, a judge in South Africa lifted the ban on domestic trade in rhino horn. Trade will give those farmers and communities that own rhinos an incentive to protect them. But where ownership and trade are prohibited, the protection will be missing and poaching will probably continue.

*trophy hunting 오락용 야생 동물 사냥 **resurgence 재증가
***poach 밀렵하다

- ① preventive measures on hunting
- ② among the keys to conservation
- ③ the gates to exporting local goods
- ④ policies to save endangered species
- ⑤ incompatible with wildlife preservation

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Boyle's most famous works were *New Experiments Physico-Mechanical, Touching the Spring of the Air and Its Effects, The Skeptical Chemist, and The Experimental History of Colors*.

Robert Boyle (1627–1691) was the fourteenth child of the first Earl of Cork, who was the richest man in England. As the founder of modern chemistry, Boyle devoted his life to scientific investigation and methodology. (①) He was well-received at the British Court, and a member of the council of the Royal Society, although he declined its presidency and the provostship of Eton because he did not want to “take oaths.” (②) When he retired to a house in Pall Mall after a stroke at age 42, he maintained his own laboratory. (③) Boyle's goal was to replace Aristotelian mechanics with explanations using just two things: matter and motion. (④) He was also a champion of the new atomism, or “corpuscular theory.” (⑤) He also wrote a religious novel, *Seraphic Love*.

*earl 백작 **provostship 학장직 ***corpuscular theory 입자설

37

Test 1 12번

다음 글의 제목으로 가장 적절한 것은?

Differences in power distance can have an impact on learners' perceived position in the course and may result in some learners not being able to interact as equals with other learners. Tony Bates, an author and educator, describes how culture influences critical thinking skills, debate, and discussion. In an online environment, learners are often encouraged to critically evaluate and debate the content being presented and share their ideas and knowledge in discussion. Cultural differences may affect the degree to which individual learners interact and can interfere with their ability to challenge ideas or express opinions contrary to those of the instructor or other learners in the class. Cultural differences can also affect learners who consider the instructor a higher power. If you participate in discussions and other activities by offering opinions on a topic or issue, a learner who views you as a higher power may find it difficult to offer opinions or ideas that are contrary to your opinions. Instructional activities that are teacher-directed tend to be best for learners from cultures with higher power distance, whereas lower power distance cultures prefer more learner-directed learning strategies.

- ① Ways Power Distance Affects Educators
- ② The Need for Various Online Culture Classes
- ③ Benefits of Different Teaching Strategies
- ④ Advantages of Distance Learning in Education
- ⑤ The Effect of Cultural Differences on Students Learning

38 Test 1 13번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Unfortunately, unemployment programs _____: They increase the unemployment rate. The benefits make it less costly for an unemployed worker to turn down available jobs and continue searching while receiving the payments. They also reduce the incentive of the unemployed to switch occupations or move to another location in order to find employment. As a result, workers stay unemployed longer and the overall unemployment rate is higher than it would be otherwise. In fact, empirical evidence indicates that there is a spike in the number of unemployed workers obtaining employment just before and immediately after their unemployment benefits are exhausted. The persistently higher unemployment rates in Europe, where the benefits are more generous, also indicate that the program pushes the unemployment rate upward, perhaps by as much as 2 or 3 percentage points.

*empirical 실증적인 **spike 급증

- ① temporarily reduce labor costs
- ② impact rise in financial incentives
- ③ have an unintended secondary effect
- ④ may inversely affect job-finding rates
- ⑤ contribute to lower economic production

39 Test 1 14번

다음 글의 내용과 일치하지 않는 것은?

The sense of familial and cultural solidarity that comes with feasting can be very pleasant and reassuring, rewarding in ways both nutritional and psychological. Eating to 120 percent full is probably a pretty standard performance at a feast, so over the course of a million-plus years of feasting, a strong psychological association likely evolved between being extra full and a sense of social well-being. The importance of social life to human beings cannot be underestimated. The common ancestor we shared with chimpanzees millions of years ago was likely a highly social species, just as chimpanzees and we are today. Over the course of our evolution, humans gained a tool — language — that has helped our kind to ratchet up all aspects of social life. Sharing food both on a day-to-day basis and on special occasions is part of the complex of behaviors that now defines how humans are social. In a less profound or obvious way, occasional overeating may also be part of this complex.

*ratchet up ~을 단계별로 향상하다

- ① 잔치에서의 가족적이며 문화적인 연대감은 심리적인 방식으로 보상해 준다.
- ② 오랜 시간 동안 사람들은 배불리 먹으면서 사회적 행복감을 채워 왔다.
- ③ 과식의 이유를 사회학적으로 설명하는 것은 인간에게 큰 의미가 없다.
- ④ 진화 과정에서 인간은 언어라는 도구를 통해 사회생활의 모든 측면을 향상했다.
- ⑤ 음식 공유와 과식은 인간의 사회적 측면을 보여 주는 행동 복합체의 일부이다.

Test 1 16번

밑줄 친 A little learning is a dangerous thing.이 다음 글에서 의미하는 바로 가장 적절한 것은?

Consider the old saying “A little learning is a dangerous thing.” As individuals, we are quick to access information that helps us. But we often lack the ability to make sense of it, or to use it appropriately. One of us has a brother who is a medical doctor. He encounters this problem on a daily basis (and we might add, he is not too happy about it). Patients show up with (often incorrect) self-diagnoses derived from spending a couple of hours on the Internet. It is the same in business: senior executives second-guess their subordinates because their corporate IT system gives them line of sight down to detailed plant-level data. At a societal level, people believe they have the right to information that is in the public interest (think Wikileaks), but they are rarely capable of interpreting and using it in a sensible way.

*line of sight 시선

- ① Never underestimate the power of those having little knowledge.
- ② People with little learning misinterpret information, which is harmful.
- ③ The world is no place for people with a limited educational background.
- ④ Little knowledge can mislead one into thinking that he knows it all.
- ⑤ People are anxious to interpret the world because they only know little about it.

42 Test 1 17번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

What happens if the price of beans rises to \$1.10?

Many economic laws have been criticized as having only statistical necessity. Consider the law stating that the quantity sold varies inversely with its price. We can show that it is not universally true with a thought experiment featuring an isolated village of peasants. (①) The villagers can subsist on a weekly ration of one pound of rice and two pounds of beans or can subsist on the tastier and more nutritious fare of one pound of rice, one pound of beans, and one pound of fish. (②) Rice and beans each cost \$1.00 per pound, but a pound of fish costs \$1.20. (③) Since the peasants are paid \$3.20 a week, they spend it all on the rice, beans, and fish diet. (④) (It is impossible to buy less than a pound of anything.) (⑤) Bean sales double because the only adequate diet becomes the one with one pound of rice and two pounds of beans.

43 Test 1 18번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The confirming-evidence bias not only affects where we go to collect evidence, but also how we interpret the evidence we do receive, leading us to give too much weight to supporting information and too little to conflicting information. In one psychological study of this phenomenon, two groups — one opposed to and one supporting capital punishment — each read two reports of carefully conducted research on the effectiveness of the death penalty as a deterrent to crime. One report concluded that the death penalty was effective; the other concluded it was not. Despite being exposed to solid scientific information supporting counter-arguments, the members of both groups became even more _____ of the validity of their own position after reading both reports. They automatically accepted the supporting information and dismissed the conflicting information.

*deterrent 억제책

Test 1 19번

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

In our everyday lives we constantly use causal language. Sometimes this employs the word 'cause' (or its derivatives), for example 'She went through a red light and caused an accident', or language that ① implies that something was caused, 'I arrived late because I missed my flight'. In common speech we do not ② distinguish between things caused by human behaviour or non-human events (e.g. the brakes failed and this caused the car to crash). Our everyday causal language is good enough for everyday events. However, in the sciences we require more ③ fluidity. Pharmacologists must specify a precise dosage of a drug that will cause the desired effect, or indeed the maximum safe dosage; similarly accident investigators are required to closely specify the ④ circumstances that caused a crash. Though in the social sciences such precision is not required, or indeed possible, a causal explanation is expected to go beyond common sense. Indeed causal explanation is a ⑤ central feature of social science because many, if not most, questions are about why something is the case. Yet specifying what a 'cause' is that goes beyond common sense is not straightforward.

*derivative 파생어 **pharmacologist 약리학자

45

Test 1 20번

다음 글의 묘지로 가장 적절한 것은?

Observe a single ant and it doesn't make much sense — walking in one direction, suddenly *careening* in another for no obvious reason, doubling back on itself. Thoroughly unpredictable. The same happens with two ants, with a handful of ants. But a colony of ants makes fantastic sense. Specialized jobs, efficient means of exploiting new food sources, complex underground nests with temperature regulated within a few degrees. And critically, there's no blueprint or central source of command — each individual ant has algorithms for its behaviors. But this is not the wisdom of the crowd, where a bunch of reasonably informed individuals outperform a single expert. The ants aren't reasonably informed about the big picture. Instead, the behavior algorithms of each ant consist of a few simple rules for interacting with the local environment and local ants. And out of this emerges a highly efficient colony.

*careen (전속력으로) 달리다

- ① 개미는 독단적으로 일을 할 때에만 최대치의 성과를 낼 수 있다.
- ② 개미는 사회적 곤충이므로 그들의 움직임을 예상하기란 불가능하다.
- ③ 개미는 집단 지성을 통하여 전체적인 상황을 파악하고 일을 실행한다.
- ④ 개미는 청사진이나 중앙 명령이 없는 상황에서도 집단 지성에 의해 소통한다.
- ⑤ 개미의 소통 방식은 단순한 규칙으로 구성되어 있어서 효율적인 군집 출현이 가능하다.

46 Test 1 21번

다음 글의 요지로 가장 적절한 것은?

To be sure, the Internet is a human invention reflecting human choices and values. However, it often looks *as if* it is a separate species with an internal logic of its own. The 1987 stock market crash has been blamed on program trading — computers that started selling frantically because every *other* computer was selling. The ceaseless war between viruses and antivirus programs looks eerily like the workings of a biological ecosystem. However, even if one posits that the Internet is comparable to a biological species, it's obvious that it's not very intelligent. It has primitive ways of “sensing” and “reacting,” but it has no self-awareness and no ability to formulate its own goals. Nor could it ever reach such a state on its own. It could, however, be the backbone of a sophisticated new organism if physically integrated with humanity. The Internet would become a new nervous system for humanity, and humanity would become a new body and executive brain for the Internet.

*frantically 미친 듯이 **eerily 섬뜩하게 ***posit 단정하다

- ① 인간의 발명품은 인간의 선택과 가치를 투영한 물건이다.
- ② 인터넷의 작용 방식은 생물 생태계의 작용 방식과 흡사하다.
- ③ 인터넷의 감지 및 반응 속도는 인간의 것보다 훨씬 느리다.
- ④ 인터넷의 정교한 작동 원리는 인간의 신경계와 비교할 수 없다.
- ⑤ 인터넷은 인간과 정교하게 통합될 때 유기체의 중요한 역할을 할 수 있다.

47 Test 1 22번

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

We frame losses and gains relative to a subjective reference point. This means that we are concerned not so much about ① absolute wealth, but about our relative wealth. For example, if I have bought a house for £150,000, then this is likely to become my reference point, and it is against this value that I ② measure any gains or losses. If I sell the house for more than £150,000, then I view this as a gain; if I sell the house for less than £150,000, then I view this as a loss. But note that my reference point may not remain static over time. If I hear that, on average, house prices have increased by 10 per cent in the period since I purchased the property, then I may ③ fix my reference point and judge whether I have made a gain or loss relative to a reference value of £165,000. A ④ parallel situation can occur in stock markets where I set the initial reference value according to the purchase price I paid for the shares, but I may shift the reference value in the future according to how the stock market has performed ⑤ overall.

*static 고정된

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

The contribution of culture to progress has been called the *ratchet effect*, based on an analogy with the tool that permits forward movement but prevents backward movement.

- (A) The other is preservation: The solution has to be transmitted to others and remembered, so everyone can continue using it even after the inventor or discoverer has died. Tomasello says that nonhuman apes actually are pretty good at coming up with novel, creative solutions to problems.
- (B) For them (our biological relatives), the problem is with preservation. Even if the solver remembers the solution for a while, and even if a couple of his or her mates copy the solution and use it for a while, it is eventually forgotten, and the next generation has to start over.
- (C) Michael Tomasello, an expert who has written extensively about both primate and human thought capabilities, summarizes the effect this way. Two things are needed for progress. The first is innovation: Someone has to come up with a better solution to a common problem.

*ratchet 래킷(한쪽 방향으로만 회전하게 되어 있는 톱니바퀴)

**analogy 유사점

- ① (A) - (C) - (B) ② (B) - (A) - (C)

Ms. Carter was a teacher who everyone said was so hard in her grading. She kept telling us in class that she was willing to go over our papers beforehand with us during her office hours. At the time I thought, "Well, I don't think I'll go to your office and have you chop up my paper." Then I tried to actually write the paper over the weekend, but I found that I was clueless. I hesitantly decided that I would swallow my _____ and go to her with my first draft. Contrary to my expectation, when I sat down with her, she was actually really encouraging about it. She looked over my entire paper quickly, then sat and discussed with me my strong ideas and areas that needed more work. She even helped me with the format so I wouldn't get docked points on that. 내가 그 교무실에 들어가는 데 많은 용기와 배짱이 필요했지만, I'm so glad I did.

*get docked points 점수를 깎이다

Test 1 3번

Tech eats into sleep time. It doesn't matter if your screen is pumping out a restful, warm light and you're looking at soothing images. If you don't nod off because you're too busy looking at screens, your sleep will suffer. I'm sure we've all been aimlessly scrolling or working on something or checking social networking services in an endless loop, but know 우리가 잠을 좀 자야 할 때이다 yet still can't seem to stop. A straightforward way of addressing this problem is to set a sleep alarm. You set an alarm for the morning, so set another for the evening too. This is when you have to switch off (in every sense of the word) and start getting ready for bed. You can't ignore your morning alarm if you want to keep your job, so the one you set for the evening has to become immovable too. You could swipe-proof your night-time sleep alarm by changing the settings on your smartphone to ban apps after a particular time. That way, you're more likely to focus on sleep, not apps.

*soothing 마음을 진정시키는

**swipe-proof 손가락으로 화면을 훑 쓰는 동작으로 해제되지 않게 하다

We should set a(n) _____ (A) not only for the morning but also for the evening to keep a regular _____ (B) schedule.

(A) _____ (B) _____

Test 1 4번

Don't believe anyone who says that since nature is based on a struggle for life, we need to live like this as well. 많은 동물은 서로를 제거하거나 모든 것을 독차지함으로써가 아니라 협력하고 공유함으로써 생존한다. This applies most definitely to pack hunters, such as wolves or killer whales, but it also applies to our closest relatives, the primates. In a study done at Tai National Park, in Ivory Coast, chimpanzees took care of group mates wounded by leopards; they licked their mates' blood, carefully removed dirt, and waved away flies that came near the wounds. They protected injured companions and slowed down during travel in order to accommodate them. All of this makes perfect sense, given that chimpanzees live in groups for a reason, the same way wolves and humans are group animals for a reason. If man is wolf to man, he is so in every sense, not just the negative one. We would not be where we are today had our ancestors been socially aloof.

*aloof 냉담한

The physical environment ① directly determines the capacity for independent living of anyone with a difficulty or disability (difficulty walking, poor sight, impaired hearing, etc.). The idea is to encourage independent living through careful attention to architectural and urban design and services. In buildings, the ② absence of lifts or ramps can make life impossible for the elderly. The design of interior traffic and services areas can do the same. Outdoors, the absence of public benches, footpaths that are too narrow or too high, a road that is dangerous to cross, the difficulty or impossibility of boarding a bus or tram can force someone with impaired mobility to curtail their activities, or to stay ③ outdoors. Bad design turns disabilities into handicaps. Poor design can be ④ exacerbated by the "rudeness, insecurity and violence" that can be attendant on going outdoors. If these issues are not dealt with, a vicious circle of ⑤ dependence develops.

Test 1 6번

While the term "ecosystem management" began appearing ever more frequently in scientific journals and government reports, it seemed that 그것이 무엇을 의미하는지에 대해 어떠한 두 사람도 의견의 일치를 볼 수 없었다, as definitions of ecosystem management

and practitioners or advocates of its use occurred in roughly equal numbers. So it seems strange that nearly everyone agreed that ecosystem management was a good thing. When ecosystem management became part of the process of deciding how to use public land, both the environmental community and those concerned with _____ resource flows took a keen interest in defining ecosystem management in their own terms. Indeed, one observer suggested that when environmental groups heard the term “ecosystem management” they mainly heard “ecosystem,” while industry groups heard “management.” This led to the unsettling phenomenon of resource management agencies, conservationists, and industry representatives, who generally couldn’t agree on what time it was, singing in unison the praises of ecosystem management at congressional hearings in the early 1990s.

Test 1 7번

나미비아의 지역 사회는 야생 동물로 한 해에 거의 1천만 달러를 벌어들여 오고 있다, says Fred Nelson, a wildlife expert who spent 11 years in Africa developing wildlife

management partnerships. Since the revenues come primarily from trophy hunting and tourism ventures, local communities had a strong incentive to protect the animals and their habitat. These new incentives led to a natural resurgence in wildlife numbers. Even the number of black rhinos in Namibia rose from 707 in 1997 to 1,134 in 2004. Clearly, property rights to ownership or use and freedom to trade are among the keys to (A) _____. These incentives can encourage protection, care, and increased numbers, just as they do with cattle. Indeed, after legal action by private rhino holders, a judge in South Africa lifted the (B) _____ on domestic trade in rhino horn. Trade will give those farmers and communities that own rhinos an incentive to protect them. But where ownership and trade are prohibited, the protection will be missing and poaching will probably continue.

*trophy hunting 오락용 야생 동물 사냥 **resurgence 재증가 ***poach 밀렵하다

Test 1 8번

Robert Boyle (1627–1691) was the fourteenth child of the first Earl of Cork, who was the richest man in England. 현대 화학의 창시자로서, Boyle은 과학적 연구와 방법론에 자신의 일생을 바쳤다. He was well-received at the British Court, and a member of the council of the Royal Society, although he declined its presidency and the provostship of Eton because he did not want to “take oaths.” When he retired to a house in Pall Mall after a stroke at age 42, he maintained his own laboratory. Boyle’s goal was to replace Aristotelian mechanics with explanations using just two things: matter and motion. He was also a champion of the new atomism, or “corpuscular theory.” Boyle’s most famous works were *New Experiments Physico-Mechanical, Touching the Spring of the Air and Its Effects*, *The Skeptical Chemist*, and *The Experimental History of Colors*. He also wrote a religious novel, *Seraphic Love*.

*earl 백작 **provostship 학장직 ***corpuscular theory 입자설

Americans' views on the federal Government's Role in Energy Activities in 2022

% of U.S. adults who say that the federal government should _____ each of the following activities

Note: Percentages may not sum to 100% due to rounding.

The above graph shows Americans' views on the federal government's role in energy activities in 2022. While 72% of the respondents believe the federal government should encourage the production of wind and solar power, just 5% say the federal government should discourage this. More say the federal government should encourage than discourage the use of electric vehicles (51% vs. 10%), and 39% say the federal government should neither encourage nor discourage (A) this. In views on how the federal government should engage with nuclear power production, less say the government should discourage than encourage the production of nuclear power, while 37% say (B) it should do neither. Views about oil and gas drilling are evenly divided; equal shares say the federal government should encourage, discourage and neither encourage nor discourage this. Opinion is more negative toward a governmental role in coal mining, 연방 정부가 이러한 활동을 장려해야 한다고 믿는 사람은 5분의 1에 불과하다.

Test 1 12번

Differences in power distance can have an impact on learners' perceived position in the course and may result in some learners 상호 작용을 할 수 없는 as equals with other learners. Tony Bates, an author and educator, describes how culture influences critical thinking skills, debate, and discussion. In an online environment, learners are often encouraged to critically evaluate and debate the content being presented and share their ideas and knowledge in discussion. Cultural differences may affect the degree to which individual learners interact and can interfere with their ability to challenge ideas or express opinions contrary to those of the instructor or other learners in the class. Cultural differences can also affect learners who consider the instructor a higher power. If you participate in discussions and other activities by offering opinions on a topic or issue, a learner who views you as a higher power may find it difficult to offer opinions or ideas that are contrary to your opinions. Instructional activities that are teacher-directed tend to be best for learners from cultures with higher power distance, whereas lower power distance cultures prefer more learner-directed learning strategies.

Learners from cultures with ____ (A) ____ power distance are more likely to be hesitant to express their opinions in class than those from cultures with ____ (B) ____ power distance when they don't agree with teachers.

(A) _____ (B) _____

Test 1 13번

Unfortunately, unemployment programs have an unintended secondary effect: They increase the unemployment rate. The benefits make it less costly for an unemployed worker to turn down available jobs and continue searching while receiving the payments. They also reduce the incentive of the unemployed to switch occupations or move to another location in order to find employment. As a result, workers stay (A) unemploy longer and the overall unemployment rate is higher than it would be otherwise. In fact, empirical evidence indicates that there is a spike in the number of unemployed workers (B) obtain employment just before and immediately after their unemployment benefits are exhausted. The persistently higher unemployment rates in Europe, (C) which the benefits are more generous, also indicate that the program pushes the unemployment rate upward, perhaps by as much as 2 or 3 percentage points.

*empirical 실증적인 **spike 급증

73 윗글의 밑줄 친 부분을 어법상 알맞은 형태로 고쳐 쓰시오.

Test 1 14번

The sense of familial and cultural solidarity that comes with feasting can be very pleasant and reassuring, rewarding in ways both nutritional and ____ (A) _____. Eating to 120 percent full is probably a pretty standard performance at a feast, so over the course of a million-plus years of feasting, a strong ____ (B) ____ association likely evolved between being extra full and a sense of social well-being. The importance of social life to human beings cannot be underestimated. The common ancestor we shared with chimpanzees millions of years ago was likely a highly social species, just as chimpanzees and we are today. Over the course of our evolution, humans gained a tool — language — that has helped our kind to ratchet up all aspects of social life. 매일, 그리고 특별한 때에도 음식을 나눠 먹는 것은 is part of the complex of behaviors that now defines how humans are social. In a less profound or obvious way, occasional overeating may also be part of this complex.

*ratchet up ~을 단계별로 향상하다

Test 1 15번

There are a number of ways our selfish behaviour can be moderated, especially when attention is drawn to us. For example, simply looking in a mirror forces adults literally to self-reflect, which studies have shown reduces cheating on a test. 거울에 의한 자기 주목이 도덕성에 미치는 이런 영향은 응시하는 인간의 눈의 포스터를 그저 걸기만 해도 자신의 뒷자리를 치우는 식사하는 사람의 수가 두 배로 늘었다는 것을 보여 주는 최근의 연구들과 일치한다 after they had finished their meals. When we think we are being watched, we tend to behave ourselves. If the fear of exposure regulates our transgressions, then religions with an all-seeing God may operate to foster moral behaviour precisely because followers think that they are constantly observed. Most of the world's religions promote prosociality in their teachings and practices. There is a common assumption that religions foster kindness and generosity, as epitomized by the parable of the Good Samaritan in Christianity.

*transgression 위반 (행위) **epitomize 전형적으로 보여 주다
***parable 비유(담), 우화

Test 1 16번

Consider the old saying “어설픈 지식은 위험한 것이다.” As individuals, we are quick to access information that helps us. But we often lack the ability to make sense of it, or to use it appropriately. One of us has a brother who is a medical doctor. He encounters this problem on a daily basis (and we might add, he is not too happy about it). Patients show up with (often incorrect) self-diagnoses derived from spending a couple of hours on the Internet. It is the same in business: senior executives second-guess their subordinates because their corporate IT system gives them line of sight down to detailed plant-level data. At a societal level, people believe they have the right to information that is in the public interest (think Wikileaks), but they are rarely capable of interpreting and using it in a sensible way.

*line of sight 시선

We are quick to acquire (A) that helps us, but we lack the ability to understand or use it (B).

(A) _____ (B) _____

Test 1 17번

Many economic laws have been criticized as having only statistical necessity. Consider the law stating that the quantity sold varies inversely with its price. We can show that it is not universally true with a thought experiment featuring an isolated village of peasants. The villagers can subsist on a weekly ration of one pound of rice and two pounds of beans or can subsist on the tastier and more nutritious fare of one pound of rice, one pound of beans, and one pound of fish. Rice and beans each cost \$1.00 per pound, but a pound of fish costs \$1.20. Since the peasants are paid \$3.20 a week, they spend it all on the rice, beans, and fish diet. What happens if the price of beans rises to \$1.10? (It is impossible to buy less than a pound of anything.) Bean sales double 유일하게 적합한 식단이 1파운드의 쌀과 2파운드의 콩이기 때문에.

*inversely 반비례로, 반대로 **subsist on ~으로 연명하다 ***ration 배급량

Test 1 18번

The confirming-evidence bias not only affects ① where we go to collect evidence, but also how we interpret the evidence we do receive, ② leads us to give too much weight to supporting information and too little to conflicting information. In one psychological study of this phenomenon, two groups — one opposed to and one ③ supporting capital punishment — each read two reports of carefully conducted research on the effectiveness of the death penalty as a deterrent to crime. One report concluded that the death penalty was effective; ④ the other concluded it was not. 반론을 뒷받침하는 확실한 과학적 정보에 노출되었는데도, the members of both groups became ⑤ even more convinced of the validity of their own position after reading both reports. They automatically accepted the supporting information and dismissed the conflicting information.

*deterrent 억제책

Test 1 19번

In our everyday lives we constantly use causal language. Sometimes this employs the word ‘cause’ (or its derivatives), for example ‘She went through a red light and caused an accident’, or language that implies that something was caused, ‘I arrived late because I missed my flight’. In common speech we do not distinguish between things caused by human behaviour or non-human events (e.g. the brakes failed and this caused the car to crash). Our everyday causal language is good enough for everyday events. However, in the sciences we require more precision. Pharmacologists must specify a precise dosage of a drug that will cause the desired effect, or indeed the maximum safe dosage; similarly accident investigators are required to closely specify the circumstances that caused a crash. Though in the social sciences such precision is not required, or indeed possible, 인과 관계의 설명은 상식을 넘어설 것으로 기대된다. Indeed causal explanation is a central feature of social science because many, if not most, questions are about why something is the case. Yet specifying what a ‘cause’ is that goes beyond common sense is not straightforward.

*derivative 파생어 **pharmacologist 약리학자

Observe a single ant and it doesn't make much sense — walking in one direction, suddenly *careening* in another for no obvious reason, doubling back on itself. Thoroughly _____. The same happens with two ants, with a handful of ants. But a colony of ants makes fantastic sense. Specialized jobs, efficient means of exploiting new food sources, complex underground nests with temperature regulated within a few degrees. And critically, there's no blueprint or central source of command — each individual ant has algorithms for its behaviors. But this is not the wisdom of the crowd, where a bunch of reasonably informed individuals outperform a single expert. The ants aren't reasonably informed about the big picture. Instead, the behavior algorithms of each ant 현지 환경 및 현지 개미들과의 상호 작용을 위한 몇 가지 단순한 규칙으로 구성되어 있다. And out of this emerges a highly efficient colony.

*careen (전속력으로) 달리다

Test 1 21번

To be sure, the Internet is a human invention reflecting human choices and values. However, it often looks *as if* it is a separate species with an internal logic of its own. The 1987 stock market crash has been blamed on program trading — computers that started selling frantically because every *other* computer was selling. The ceaseless war between viruses and antivirus programs (A) look eerily like the workings of a biological ecosystem. However, even if one posits that the Internet is comparable to a biological species, it's obvious (B) which it's not very intelligent. It has primitive ways of “sensing” and “reacting” but it has no self-awareness and no ability (C) formulate its own goals. 또한 그것은 절대 스스로 그런 상태에 도달할 수도 없다. It could, however, be the backbone of a sophisticated new organism if physically integrated with humanity. The Internet would become a new nervous system for humanity, and humanity would become a new body and executive brain for the Internet.

*frantically 미친 듯이 **eerily 섬뜩하게 ***posit 단정하다

Test 1 22번

We frame losses and gains relative to a subjective reference point. This means that we are concerned not so much about absolute wealth, but about our relative wealth. For example, if I have bought a house for £150,000, then this is likely to become my reference point, and 나는 어떤 이득이나 손실이라도 바로 이 가격에 견주어 따진다; If I sell the house for more than £150,000, then I view this as a gain; if I sell the house for less than £150,000, then I view this as a loss. But note that my reference point may not remain static over time. If I hear that, on average, house prices have increased by 10 per cent in the period since I purchased the property, then I may shift my reference point and judge whether I have made a gain or loss relative to a reference value of £165,000. A parallel situation can occur in stock markets where I set the initial reference value according to the purchase price I paid for the shares, but I may shift the reference value in the future according to how the stock market has performed overall.

*static 고정된

Test 1 23번

The contribution of culture to progress has been called the *ratchet effect*, based on an analogy with the tool that permits forward movement but ① prevents backward movement. Michael Tomasello, an expert who has written extensively about both primate and human thought capabilities, ② summarize the effect this way. Two things are needed for progress. The first is innovation: Someone has to come up with a better solution to a common problem. The other is preservation: The solution has to be transmitted to others and ③ remembered, so everyone can continue ④ using it even after the inventor or discoverer has died. Tomasello says that nonhuman apes actually are pretty good at ⑤ coming up with novel, creative solutions to problems. For them (our biological relatives), the problem is with preservation. Even if the solver remembers the solution for a while, and even if a couple of his or her mates copy the solution and use it for a while, it is eventually forgotten, and the next generation has to start over.

*ratchet 래칫(한쪽 방향으로만 회전하게 되어 있는 톱니바퀴)

**analogy 유사점

93 읽글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (20자 내외)

Q: What prevents nonhuman apes from preserving solutions to problems?

A: _____

94 읽글의 밑줄 친 부분 중 어법상 틀린 것을 찾아 그 번호를 쓰고 고쳐 쓰시오.

Test 1 24-25번

In Europe, it was not until the end of the eighteenth century that the musicians' guilds, which had regulated professional musical activities since the early Middle Ages, (A) replace by specific trade regulations that allowed and, indeed, forced musicians to offer their services to the general public for regular payment. As a consequence, a type of 'all-around musician' emerged, characterized by the ability to cover a broad repertoire, from dance music to folk song, from parlor song to the music of the vaudeville theater. This type of all-around musicianship became a major force in the development of popular music. The changes and uncertainties of the market and the demands of the consuming audience 음악가들 사이에서 노동의 엄격한 분업을 허용하지 않았다. Songwriters acted customarily as band leaders, and performing musicians frequently played more than one instrument. Many musicians were forced into an existence (B) who hovered uneasily between that of the professional and that of the semiprofessional. However, with the growth of urbanization and industrialization, an increasing specialization occurred. Toward the end of the nineteenth century, popular musicians had clearly defined areas of work in dance music, in public entertainment and in music halls or musical theaters. These musicians frequently relied on a formal training — graduating from one of the conservatories and then leaving the world of classical music, or (C) take lessons from one of the many popular musicians who supported themselves by giving lessons in addition to performing.

*vaudeville 보드빌(춤과 노래 따위를 곁들인 가볍고 풍자적인 통속 희극)

hover 맴돌다 *conservatory 음악 학교

Test 1 26-28번

Some years ago, I was the Director of Admission at a small private college. I will never forget the time when an applicant named John Graham rejected our rejection. The college was not particularly selective, but there were some minimum requirements for admission and John fell short on one or two key measures. A week after we sent out our admission decisions, I received a note from him asking us to reconsider. He stated that he had not done well in high school because he had to work to help to support his family. I looked at his application again, but I did not believe he could succeed at our college with his low grades. I wrote "Young man, your goal of attending college is commendable, but there are many other options for you beyond our institution. For example, you might attend a community college and strengthen your academic foundation and then apply to transfer to our college later." Weeks went by and then I received another note from him: "Dear Sir, I asked that 귀 대학에 내가 입학하는 것을 허락하지 않기로 한 당신의 결정을 재고해 달라고. I failed to mention that your college is my first choice school and I have not applied anywhere else. For these reasons and others, I must inform you that I cannot accept your rejection. I do hope that it does not inconvenience the college too much but please expect to see me at the school opening in the fall." The next time I encountered the young man, he was in the group at freshman orientation. He had found his way to campus and met with some of the staff in the Counseling Office. They were so impressed with his story and his determination that they walked him over to the admission office and personally advocated for his acceptance. How could I stand in the way of a young person with that much drive and commitment to reach his goal? He got in! His admission was conditional and he had to work harder than most students, but he succeeded.

Test 2

3번

소재: 청소년 스포츠의 운영 방향

정답 및 해설 p.44

① *Reaffirming friendships* is central in the lives of children. ② Organized sports provide contexts for making friends, but friendships are difficult to nurture when children see each other only at adult-controlled practices and games. ③ Additionally, making friends with opponents is seldom considered in organized sports. ④ Therefore, youth teams should be neighborhood- and school-based whenever possible. ⑤ Pregame warm-ups should mix players from both teams, and players should introduce themselves to the person they line up with as each quarter or half begins. ⑥ Unless children learn that games cannot exist without cooperation between opponents, they will have no understanding of fair play, why rules exist, why rule enforcement is necessary, and why players should follow game rules. ⑦ Without this understanding, children don't have what it takes to maintain fair play at the same time that they strive for competitive success. ⑧ When this occurs, youth sports are *not* worth our time and effort.

① '우정을 재확인하는 것'은 아이들의 삶에서 중요하다. ② 단체 스포츠는 친구를 사귀기 위한 환경은 제공하지만, 아이들이 어른이 통제하는 연습과 경기에서만 서로를 보면 우정은 기르기 어렵다. ③ 게다가, 단체 스포츠에서 (경기) 상대와 친구가 되는 것은 거의 고려되지 않는다. ④ 그러므로 청소년 팀은 가능하면 언제나 이웃과 학교를 기반으로 해야 한다. ⑤ 경기 전 준비운동은 양 팀 선수들을 섞어야 하고, 선수들은 쿼터나 전·후반전이 시작될 때 함께 줄을 서는 사람에게 자신을 소개해야 한다. ⑥ 아이들은 상대 선수들과의 협력 없이는 경기가 존재할 수 없다는 것을 배우지 않는 한, 페어플레이, 규칙이 존재하는 이유, 규칙 시행이 필요한 이유, 그리고 선수가 경기 규칙을 따라야 하는 이유를 이해하지 못할 것이다. ⑦ 이러한 이해 없이는, 아이들은 자신이 경쟁을 통한 성공을 위해 노력하는 동시에 페어플레이를 유지하는 데 필요한 것을 가지지 못한다. ⑧ 이것이 발생하면, 청소년 스포츠는 우리의 시간과 노력을 들일 가치가 '없다'.

Word List

- reaffirm 재확인하다 □ organized 조직적인 □ provide 제공하다 □ context 환경, 맥락 □ nurture 기르다
- additionally 게다가 □ opponent (경기의) 상대, 적수 □ pregame 경기 전의 □ warm-up 준비 운동 □ line up 줄을 서다
- exist 존재하다 □ cooperation 협력, 협동 □ enforcement 시행 □ strive for ~을 위해 노력하다 □ competitive 경쟁적인
- occur 발생하다, 일어나다

Reaffirming friendships is central in the lives of children. Organized sports provide contexts for making friends, but friendships are difficult to nurture when children see each other only at adult-controlled practices and games. ① Additionally/Exceptionally, making friends with opponents is seldom considered in organized sports. ② Therefore/Otherwise, youth teams should be neighborhood- and school-based whenever possible. Pregame warm-ups should mix players from both teams, and players should introduce themselves to the person they line up with as each quarter or half begins. ③ If/Unless children learn that games cannot exist without cooperation between opponents, they will have no understanding of fair play, why rules exist, why rule enforcement is necessary, and why players should follow game rules. ④ With/Without this understanding, children don't have ⑤ what/which it takes to maintain fair play at the same time that they strive for competitive success. When this occurs, youth sports are *not* worth our time and effort.

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

Reaffirming friendships is central in the lives of children. Organized sports provide contexts for making friends, but friendships are difficult ① _____ (nurture) when children see each other only at adult-controlled practices and games. Additionally, making friends with opponents is seldom ② _____ (consider) in organized sports. Therefore, youth teams should be neighborhood- and school-based whenever possible. Pregame warm-ups should mix players from both teams, and players should introduce themselves to the person they line up with as each quarter or half begins. Unless children ③ _____ (learn) that games cannot exist without cooperation between opponents, they will have no understanding of fair play, why rules exist, why rule enforcement is necessary, and why players should follow game rules. Without this understanding, children don't have what it takes ④ _____ (maintain) fair play at the same time that they strive for competitive success. When this occurs, youth sports are *not* worth our time and effort.

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

Reaffirming friendships is central in the lives of children. ① _____ (단체 스포츠) provide contexts for making friends, but friendships are difficult to nurture when children see each other only at adult-controlled practices and games. Additionally, making friends with opponents ② _____ (거의 고려되지 않는다) in organized sports. Therefore, youth teams should be neighborhood- and school-based whenever possible. Pregame warm-ups should mix players from both teams, and players should introduce themselves to the person they ③ _____ (~와 함께 줄을 서다) as each quarter or half begins. Unless children learn that games cannot exist ④ _____ (협력 없이) between opponents, they will have no understanding of fair play, why rules exist, why rule enforcement is necessary, and why players should follow game rules. Without this understanding, children don't have what it takes to maintain fair play at the same time that they ⑤ _____ (통합 성공을 위해 노력하다). When this occurs, youth sports are *not* worth our time and effort.

Test 2

4번

소재: 기다리지 말고 하고 싶은 것을 먼저 하라는 조언

정답 및 해설 p.44

① Don't you hate when you go to a buffet and everything tastes too good? ② You take great care to eat a healthy bountiful salad before you dig into the meats, vegetables, and side dishes. ③ Much later, as you sit back in your chair and rub your stomach to find room, there is none. ④ Those delicious delicacies prepared for dessert will go untouched. ⑤ If you had only started with the sweet temptations, some of the other dishes could have been passed up without remorse. ⑥ There are times in life when you have to do just that. ⑦ Instead of waiting until your work is done to see if you will have time for relaxing, take the time first. ⑧ Don't wait for after work to see a movie, catch the early morning show and go to work late. ⑨ There will always be deadlines and commitments, but there is only one sunrise and sunset every day. ⑩ Take the time to enjoy them and you won't be sorry. ⑪ Believe it or not, sometimes the chocolate cake is better for you than the salad. ⑫ Start with the good stuff and everything else will fall into place.

*bountiful 많은 **remorse 후회

① 뷔페에 갔는데 모든 것이 너무 맛있는 때가 싫지 않은가? ② 여러분은 육류, 채소, 곁가지 요리를 열심히 먹기 시작하기 전에 매우 신경 쓰며 건강에 좋은 샐러드를 많이 먹는다. ③ 한참 후에, 의자에 기대앉아 (더 채울) 공간을 찾으려고 배를 문지를 때 공간이 없다. ④ 디저트로 준비된 그 맛있는 별미들에는 손을 대지 못할 것이다. ⑤ 달콤한 유혹적인 음식으로만 시작했다면, 다른 음식 중 일부는 후회 없이 포기할 수도 있었을 것이다. ⑥ 살다 보면 바로 그렇게 해야만 할 때가 있다. ⑦ 일이 끝날 때까지 기다려 휴식을 취할 시간이 있을지 보는 대신, 먼저 그 시간을 가지라. ⑧ 영화를 보기 위해 일이 끝날 때를 기다리지 말라, 조조 상영을 보고 늦게 출근하라. ⑨ 언제나 마감 기한과 약속이 있겠지만, 일출과 일몰은 매일 한 번뿐이다. ⑩ 시간을 내서 그것들을 즐기면 후회하지 않을 것이다. ⑪ 믿기 힘들겠지만, 가끔은 샐러드보다 초콜릿케이크가 여러분에게 더 좋다. ⑫ 좋은 것으로 시작하라, 그러면 다른 모든 것이 제자리를 찾을 것이다.

Word List

□ taste 맛이 나다 □ dig into ~을 열심히 먹기 시작하다 □ side dish 곁가지 요리, 부식, 반찬 □ rub 문지르다 □ delicacy 별미, 진미
□ temptation 유혹 (적인 음식[것]) □ pass up ~을 포기하다, ~을 무시하다 □ relax 편하게 하다, 쉬게 하다 □ deadline 마감 기한

Test 2

8번

소재: Veery (개똥지빠귀의 일종)

정답 및 해설 p.45

① Named for its call, the veery has a reddish brown head, back, and tail and a faintly spotted breast. ② It breeds in southern Canada and in the northern United States; it is common in central and western Maryland, and in western Virginia at elevations above 3,000 feet. ③ Its song is a delicate, flutelike *da-vee-ur, vee-ur, veer, veer*. ④ Mainly a ground forager, the veery feeds on insects and fruit. ⑤ The female builds a nest in a dense shrub near ground level or on the ground itself, often hiding it in vegetation at the base of a bush or small tree. ⑥ She lays three to five eggs and incubates them for ten to fourteen days. ⑦ The male helps to rear the brood, and the young leave the nest ten to twelve days after hatching. ⑧ Veeries migrate at night to winter in South America east of the Andes, mainly in Bolivia and Brazil.

*forager 먹을 것을 찾아다니는 동물[사람] **shrub 관목 ***brood (같은 때에 태어난) 새끼

① 울음소리를 따서 이름이 지어진 veery는 적갈색의 머리, 등, 꼬리와 희미하게 점무늬가 있는 가슴을 가지고 있다. ② 그것은 캐나다 남부와 미국 북부에서 번식하며, 메릴랜드주의 중부와 서부, 해발 3,000피트 위의 버지니아주 서부에서 흔히 볼 수 있다. ③ 그것의 노래는 가냘프고 플루트 소리 같은 *da-vee-ur, vee-ur, veer, veer*이다. ④ 주로 땅 위에서 먹이를 찾아다니는 새라서 veery는 곤충과 과일을 먹고 산다. ⑤ 암컷은 지면 가까이 잎이 무성한 관목이나 지면 자체에 둥지를 지으며, 흔히 그것을 관목이나 작은 나무의 바닥 부분에 있는 수풀 속에 숨긴다. ⑥ 암컷은 세 개에서 다섯 개의 알을 낳고 10일에서 14일 동안 품는다. ⑦ 수컷은 새끼 기르는 것을 도우며, 어린 새끼는 부화한 지 10일에서 12일 후 둥지를 떠난다. ⑧ veery는 남미의 안데스산맥 동쪽, 주로 볼리비아와 브라질에서 겨울을 나기 위해 밤에 이동한다.

Word List

- veery 개똥지빠귀의 일종 □ reddish 볼그스름한 □ faintly 희미하게 □ spotted 점이 박힌 □ breed 번식하다
- elevation 해발, 고도 □ delicate 가냘픈, 우아한 □ flutelike 플루트 같은 □ dense (잎이) 무성한, 뻘뻘한 □ ground level 지상
- vegetation 초목 □ incubate (알을) 품다, 부화하다 □ rear 기르다 □ hatch 부화하다 □ migrate 이동하다, 이주하다

U.S. Adults' Level of Confidence in Various Occupational Groups to Act in the Public Interest

Note: Respondents who did not give an answer are not shown.
Percentages may not total 100 due to rounding.
Source: Survey conducted April 20–26, 2020.

① The above graph shows U.S. adults' level of confidence in various occupational groups to act in the public interest. ② Out of the 7 groups included in the survey, Americans are most likely to express confidence in medical scientists, scientists and the military. ③ About nine-in-ten U.S. adults have either a great deal or a fair amount of confidence in medical scientists to act in the public interest. ④ Large majorities have at least a fair amount of confidence in scientists (87%) and the military (83%). ⑤ About half of Americans have not too much or no confidence in journalists or business leaders to act in the public interest. ⑥ A majority (63%) say they have not too much or no confidence in elected officials, while more than 30% have those levels of confidence in religious leaders.

① 위 도표는 여러 직업군이 공공의 이익을 위해 활동할 것에 대한 미국 성인의 신뢰 수준을 보여 준다. ② 조사에 포함된 7개 집단 중에서, 미국인은 의과학자, 과학자, 그리고 군인에 대한 신뢰를 표현할 가능성이 매우 크다. ③ 미국 성인 10명 중 약 9명은 의과학자가 공공의 이익을 위해 활동할 것이라고 많이 또는 상당히 신뢰한다. ④ 대다수의 사람은 과학자(87퍼센트)와 군인(83퍼센트)에 대해 적어도 상당히 신뢰한다. ⑤ 미국인의 약 절반은 언론인이거나 기업 지도자가 공공의 이익을 위해 활동할 것이라고 별로 또는 전혀 신뢰하지 않는다. ⑥ 다수(63퍼센트)는 선출직 공직자에 대해 별로 또는 전혀 신뢰하지 않는다고 말하는 반면에, 30퍼센트보다 많은 사람은 종교 지도자에 대해 그러한 신뢰 수준을 갖는다.

Maple Photo Contest

① Maple City's annual photo contest is a great way to show how special our community is! ② Everyone is encouraged to participate-residents, business people and students.

③ There are four contest categories: *Going Natural*(nature), *Going Strong*(community), *Going Together*(people), and *Going Wild* (animals).

Contest Guidelines:

- ④ All photos must be taken in Maple City from January 2022 to August 31, 2023.
- ⑤ Participants can submit up to 12 photos.
- ⑥ Please submit your photos by September 30.
- ⑦ Prizes are awarded for 1st, 2nd, and 3rd place in each category. All submitted photographs will be posted on the Maple City website and may be used in official Maple City newsletters and brochures.
- ⑧ Winning photographers will be invited to a City Council meeting to receive their awards.
- ⑨ Photos may only be submitted online through a special link on the Maple City website(www.maplecitycontest.gov). ⑩ You can also get additional information related to the contest on this site.

Maple 사진 경연 대회

① Maple 시의 연례 사진 경연 대회는 우리 공동체가 얼마나 특별한지를 보여 주는 훌륭한 방법입니다! ② 주민, 사업가, 학생, 모든 사람이 참여하도록 권장됩니다.

③ 네 가지 경연 대회 부문, 즉 '자연으로 가기' (자연), '강해지기' (공동체), '함께 가기' (사람들), 그리고 '야생으로 가기' (동물)가 있습니다.

경연 대회 지침:

- ④ 모든 사진은 2022년 1월부터 2023년 8월 31일까지 Maple 시에서 촬영된 것이어야 합니다.
- ⑤ 참가자는 사진을 12장까지 제출할 수 있습니다.
- ⑥ 9월 30일까지 여러분의 사진을 제출해 주십시오.
- ⑦ 각 부문에서 1등, 2등, 3등에게 상이 수여됩니다. 제출된 모든 사진은 Maple 시의 웹사이트에 게재될 것이고, Maple 시의 공식 소식지 및 안내 책자에 사용될 수 있습니다.
- ⑧ 수상 사진작가들은 상을 받도록 시 의회 회의에 초대됩니다.
- ⑨ 사진은 Maple 시 웹사이트(www.maplecitycontest.gov)의 특별 링크를 통해서 온라인으로만 제출될 수 있습니다.
- ⑩ 여러분은 또한 이 사이트에서 경연 대회와 관련된 추가 정보를 얻을 수 있습니다.

Test 2

13번

소재: 집단 크기의 효과

정답 및 해설 p.46

① There are fascinating effects of group size. ② In a dyad or triad, the host usually has the edge over the visitor; the host is more likely to get his or her own way. ③ Thus, a businessperson can strike a better deal by inviting the other person to his or her office. ④ But such territorial dominance — the so-called home court advantage — may disappear if the group is larger than a triad. ⑤ In public places, a large group may also inhibit an individual from helping someone in distress. ⑥ More than 50 studies have shown consistently that people are less likely to help a victim if others are around than if they are alone with the victim. ⑦ A major reason is that the knowledge that others are present and available to respond allows the individual to shift some of the responsibility to others. ⑧ The same factor operates in “social loafing”: ⑨ As the size of a group performing a certain task increases, each member tends to work less hard.

*dyad 한 쌍 **triad 3인조

① 집단 크기의 대단히 흥미로운 효과가 있다. ② 한 쌍이나 3인조의 경우에, 주인은 보통 방문객보다 우위에 있으며, 주인은 자신의 방식으로 할 가능성이 더 크다. ③ 그러므로 사업가는 상대방을 자신의 사무실로 초대함으로써 더 나은 계약을 맺을 수 있다. ④ 그러나 그러한 자기 영역에서의 우위, 즉 홈 코트 이점이라고 불리는 것은 집단이 3인조보다 더 클 경우에는 사라질 수도 있다. ⑤ 공공장소에서, 큰 집단은 또한 개인이 곤경에 처한 사람을 돕지 못하게 할 수도 있다. ⑥ 50개가 넘는 연구에서 일관되게 나타났듯이, 사람들은 다른 사람들이 근처에 있을 때, 자신이 피해자와 단둘이 있을 때보다 피해자에게 도움을 줄 가능성이 더 작다. ⑦ 주된 이유는 다른 사람들이 존재하고 응할 수 있다는 것을 아는 것은 그 사람이 책임의 일부를 다른 사람들에게 전가할 수 있게 해 주기 때문이다. ⑧ ‘사회적 태만’에서도 같은 요인이 작동한다. ⑨ 특정 업무를 수행하는 집단의 규모가 커질수록 각 구성원은 덜 열심히 일하는 경향이 있다.

Word List

- fascinating 대단히 흥미로운 □ effect 효과 □ host 주인 □ edge 우위, 강점 □ strike a deal 계약을 맺다
- territorial 영역의, 영토의, 세력권의 □ dominance 우위, 지배 □ home court advantage 홈 코트 이점
- inhibit 못 하게 하다, 억제하다 □ individual 사람, 개인 □ in distress 곤경에 처한 □ consistently 일관되게 □ victim 희생자
- shift 전가하다, 옮기다 □ factor 요인 □ operate 작동하다

소재: 미국 역사에서 모험과 가능성의 정신

정답 및 해설 p.46

① American industrialists and their European counterparts were taking capitalism to new levels of innovation and human improvement, resting in part on the cultural conditions that German sociologist and economist Max Weber called the Protestant ethic. ② The spirit of adventure and possibility was signified in the very physical spaces of America, a great stage that could nurture virtue and improvement. ③ In 1893 historian Frederick Jackson Turner delivered his paper "The Significance of the Frontier in American History" at the American Historical Association. ④ Whether or not his thesis that the frontier was the key factor in America's uniquely innovative and democratic character was accurate, the idea itself captured the imagination of generations of scholars and the educated public, becoming very nearly a self-fulfilling account. ⑤ Like Charles Peirce, the philosopher of science, Turner was deeply influenced by evolutionary theory. ⑥ According to his thesis, the seventeenth-century settlers were in effect forced to take an experimental attitude toward their situation, as the old European ways would not do.

*frontier 접경지대, (미국 서부 개척지의) 변경 **thesis 논지

① 미국의 기업가들과 그들의 유럽 상대자들은 독일의 사회학자이자 경제학자인 Max Weber가 프로테스탄트 윤리라고 불렀던 문화적 상황에 부분적으로 의지하면서 자본주의를 새로운 수준의 혁신과 인간의 향상으로 끌고 가고 있었다. ② 모험과 가능성의 정신은 미덕과 향상을 양성할 수 있었던 위대한 무대인 다음 아닌 바로 그 미국이라는 물리적 공간에 나타났다. ③ 1893년에 역사학자 Frederick Jackson Turner는 미국 역사 학회에서 '미국 역사에서 (미국 서부 개척지의) 접경지대의 중요성'이라는 논문을 발표하였다. ④ 접경지대가 미국의 독특하게 혁신적이고 민주적인 성격의 핵심 요소라는 그의 논제가 정확했던 아니든 간에, 그 생각 자체는 여러 세대에 걸친 학자들과 교육받은 대중의 상상력을 사로잡아 아주 거의 자기 충족적 설명이 되었다. ⑤ 과학철학자 Charles Peirce처럼 Turner는 진화론에 깊은 영향을 받았다. ⑥ 그의 논지에 따르면, 17세기 정착민들은 사실상 자신들의 상황에 대해 실험적인 태도를 취할 수밖에 없었고, 이는 옛 유럽 방식에서는 하지 않았을 것이었다.

소재: 삶의 의미

정답 및 해설 p.46

① In his famous book *Man's Search for Meaning*, Viktor Frankl writes, "Man's search for meaning is the primary motivation in his life."
 ② He quotes Nietzsche's words, "He who has a *why* to live for can bear with almost any how." ③ But then Frankl made a crucial, helpful point: It's fruitless to try to think in the abstract about what life in general means. ④ The meaning of one's life is only discernible within the specific circumstances of one's own specific life. ⑤ In the concentration camp, he writes, "We had to learn ourselves and, furthermore, we had to teach the despairing men, that *it did not really matter what we expected from life, but rather what life expected from us.*" ⑥ We needed to stop asking the meaning of life, and instead to think of ourselves as those who were being questioned by life — daily and hourly. ⑦ Our answer must consist, not in talk and meditation, but in right action and right conduct."

*discernible 인식할 수 있는

① Viktor Frankl 은 자신의 유명한 책 *Man's Search for Meaning*에서 "인간의 의미 탐색은 삶의 주된 동기이다."라고 쓰고 있다. ② 그는 Nietzsche 의 말인 "살아갈 '이유'가 있는 사람은 거의 어떤 방식의 삶도 견딜 수 있다."를 인용한다. ③ 하지만, 그런 다음, Frankl은 매우 중요하고 도움이 되는 생각을 밝혔는데, 그것은 일반적으로 삶이 무엇을 의미하는지를 추상적으로 생각하려고 하는 것은 무의미하다는 것이다. ④ 한 사람의 삶의 의미는 그 자신의 특정한 삶의 특정한 상황 속에서만 인식할 수 있다. ⑤ 그는 다음과 같이 적고 있다. 강제 수용소에서 "우리는 '우리가 삶에서 무엇을 기대하느냐가 아니라 오히려 삶이 우리에게 무엇을 기대하느냐가 정말로 중요하다'는 것을 우리 자신이 배워야 했고, 더 나아가 그것을 절망한 사람들에게도 가르쳐야 했다. ⑥ 우리는 삶의 의미를 묻기를 멈추고, 대신 매일 그리고 매시간 우리 자신을 삶에 의해 질문받고 있는 사람으로 생각할 필요가 있었다. ⑦ 우리의 답은 대화와 명상에 있는 것이 아니라 (상황에 맞는) 적절한 행동과 적절한 실행에 있어야 한다."

Test 2

16번

소재: 자기관(自己觀)과 반영된 자기 평가

정답 및 해설 p.46

① Gaining self-knowledge through reflected self-appraisals might seem to suggest that we have little say in how we see ourselves. ② But the idea here is that we internalize how we think others appraise us, not necessarily how others actually see us. ③ In fact, our reflected self-appraisals often do not correlate highly with the appraisals that others actually make of us. ④ Figuring out how and to what degree reflected self-appraisals influence people's sense of self can be tricky. ⑤ For example, Amy's view of herself as a clumsy person could stem from her perception that her family and friends see her this way — but it's also possible that her view of herself as clumsy is actually what led her to perceive these reflected self-appraisals. ⑥ Indeed, self-views often affect reflected self-appraisals rather than the other way around. ⑦ The upshot, then, is that although other people influence our sense of self through reflected self-appraisals, their impact may not be as simple and direct as the looking-glass self, referring to the idea that we see ourselves as others see us.

*appraisal 평가 **clumsy 서투른 ***upshot (최종적인) 결과

① 반영된 자기 평가를 통해 자기 인식을 얻는 것은 우리가 우리 자신을 어떻게 보는데 대해 발언권이 거의 없다는 것을 시사하는 것처럼 보일 수 있다. ② 하지만 여기에서 요점은 우리가 다른 사람들이 우리를 어떻게 평가한다고 생각하는지를 내면화하는 것이지, 반드시 다른 사람들이 우리를 실제로 어떻게 보는지를 내면화하는 것이 아니라는 것이다. ③ 사실, 우리의 반영된 자기 평가는 흔히 다른 사람들이 실제로 우리에게 대해서 하는 평가와 크게 연관성이 없다. ④ 반영된 자기 평가가 사람들의 자아의식에 어떻게 그리고 어느 정도까지 영향을 미치는지 알아내는 것은 까다로울 수 있다. ⑤ 예를 들어, Amy가 자신을 서투른 사람으로 보는 것은 그녀의 가족과 친구들이 그녀를 이런 식으로 본다는 그녀의 인식에서 비롯되었을 수 있지만, 또한 Amy가 자신을 서투른 사람으로 보는 것이 실제로 그녀가 이러한 반영된 자기 평가를 인식하게 했던 것일 수도 있다. ⑥ 사실, 자기관(自己觀)은 흔히 반영된 자기 평가에 영향을 미치고 그 반대로는 아니다. ⑦ 그러면 결과는 비록 다른 사람들이 반영된 자기 평가를 통해 우리의 자아의식에 영향을 미친다고 하더라도, 그들의 영향은 다른 사람들이 우리를 보는 대로 우리가 스스로를 본다는 개념을 의미하는 것을 자아만큼 단순하고 직접적이지는 않을 수도 있다는 것이다.

Word List

- gain 얻다 □ reflect 반영하다 □ internalize 내면화하다 □ appraise 평가하다 □ correlate 연관성이 있다
- figure out ~을 알아내다 □ degree 정도, 수준 □ tricky 까다로운 □ stem from ~에서 비롯되다 □ perception 인식

① All societies evolve rules of etiquette, good manners, and tact that specify what is or is not appropriate to say in any given situation. ② Most of us are, therefore, walking repositories of rules that were taught to us when young and that represent early layers of cultural socialization. ③ We learn as part of our acculturation into the family that in the interests of getting along with each other, it is important to withhold some of our perceptions and feelings because to say them out loud might hurt or offend others. ④ And if we hurt others, that permits them to hurt us back, which makes social life generally too dangerous. ⑤ We learn that some of these things can be said to friends and even more can be said to intimates. ⑥ However, the basic assumptions about why you cannot say certain things remain below consciousness, and the process by which you learned them is probably totally forgotten.

*tact 요령, 재치 **repository 저장소 ***withhold 억제하다

① 모든 사회는 어떤 특정한 상황에서도 말하기에 적절하거나 적절하지 않은 것을 명시하는 예의, 좋은 예절, 그리고 요령을 발전시킨다. ② 그러므로 우리 대부분은 어렸을 때 우리가 배운 그리고 문화적 사회화의 초기 단계를 나타내는 규칙의 살아 있는 저장소이다. ③ 우리는 가족 내에서의 문화적 적응의 일환으로서 서로 사이좋게 지내기 위해 우리의 견해와 감정 일부를 억제하는 것이 중요하다는 것을 배우는데, 왜냐하면 그것들을 입 밖으로 말하는 것이 다른 사람들에게 상처를 주거나 그들을 화나게 할 수도 있기 때문이다. ④ 그리고 만약 우리가 다른 사람들에게 상처를 준다면, 그것은 그들이 우리에게 상처를 되갚는 것을 허락하는 것이고, 이것은 일반적으로 사회생활을 너무 위험하게 만든다. ⑤ 우리는 이러한 것 중 일부를 친구들에게 말할 수 있고 훨씬 더 많은 것들을 친한 사람들에게 말할 수 있다는 것을 배운다. ⑥ 하지만, 왜 여러분이 특정한 것을 말할 수 없는지에 대한 기본적인 가정은 의식 아래에 남아 있고, 여러분이 그것들을 배운 과정은 아마 완전히 잊힐 것이다.

Word List

Test 2

22번

소재: 유명 블로거의 역할

정답 및 해설 p.47

① The new system of fashion that has emerged from the digital revolution is largely centered, in marketing terms, on popular bloggers, who have unprecedented influence due to their massive numbers of subscribers. ② If an elite blogger (an “influencer”) has more than half a million subscribers, his or her influence can be worth a significant amount of money: the value of a single post mentioning a particular brand is in the range of five figures. ③ Obviously, this approach leads to limited ability to make independent critical judgments. ④ However, when choosing an outfit for a photoshoot, an influential blogger is guided not only by the profit motive but also, and primarily, by a sense of style. ⑤ Otherwise, the trust of subscribers may be lost. ⑥ For subscribers, their idol is not merely a guide to the latest fashion, but is the key to an aspirational lifestyle. ⑦ The direct personal contact between popular bloggers and their subscribers allows the former to be an intermediary between the brand and the consumer. ⑧ This role is not available to models, whose position makes no allowance for expressions of personal taste.

*outfit 의상, 복장 **intermediary 중재자

① 디지털 혁명으로부터 나타난 새로운 패션 체계는 마케팅 관점에서 유명 블로거에 주로 집중되어 있는데, 그들은 막대한 수의 구독자로 인해 전례 없는 영향력을 가지고 있다. ② 최상의 블로거(‘인플루언서’)가 50만이 넘는 구독자를 가지고 있다면, 그의 영향력은 상당한 액수의 돈의 가치일 수 있으며, 특정 상표를 언급하는 단 한 번의 게시물의 가치는 다섯 자리 숫자 액수 범위 안에 있다. ③ 분명히 이러한 접근법은 독자적이고 비판적인 판단을 하는 능력을 제한하는 것으로 이어진다. ④ 그러나 사진 촬영을 위한 의상을 고를 때, 영향력 있는 블로거는 이익을 염두에 둔 동기뿐만 아니라, 무엇보다 먼저, 스타일 감각에 의해서도 마음이 움직인다. ⑤ 그러지 않으면, 구독자의 신뢰를 잃을 수도 있다. ⑥ 구독자에게 자신의 우상은 최신 패션에 대한 안내인일 뿐만 아니라, 동경의 대상인 생활 방식으로 가는 비결이기도 하다. ⑦ 유명 블로거와 구독자 사이의 직접적인 개인적 접촉은 전자가 상표와 소비자 사이의 중재자가 될 수 있게 한다. ⑧ 이러한 역할은 모델에게는 가능하지 않은데, 그들의 지위는 개인적인 취향의 표현을 허용하지 않는다.

Word List

- emerge 나타나다, 떠오르다 □ revolution 혁명 □ largely 주로 □ unprecedented 전례 없는 □ massive 막대한
- subscriber 구독자, 가입자 □ significant 상당한 □ value 가치 □ range 범위 □ figure (보통 수식어와 함께) 액수
- obviously 분명히 □ independent 독자적인 □ judgment 판단 □ photoshoot 사진 촬영 □ motive 동기
- primarily 무엇보다 먼저 □ aspirational 동경의 대상인 □ allowance 허용

Test 2

23번

소재: 비극적인 예술에서 즐거움을 얻는 인간

정답 및 해설 p.48

① Thinkers of the eighteenth century puzzled over what contemporary aesthetics calls ‘the paradox of negative emotion in art’. ② L’Abbé Dubos noted that, ‘at the theatre, man finds more pleasure weeping than he does laughing’, in that ‘the art of poetry and the art of painting are never more appreciated than when they succeed in stirring in us a sense of profound grief’. ③ He wondered about the nature of this apparently ‘secret charm that draws us to artistic depictions of overwhelming events, while at the same time an internal tremor tells us that we are contradicting our own understanding of pleasure’. ④ David Hume also underlines the strangeness of this pleasure that seems to contradict our human nature: ⑤ ‘It seems an unaccountable pleasure, which the spectators of a well-written tragedy receive from sorrow, terror, anxiety, and other passions that are in themselves disagreeable and uneasy. ⑥ The more they are touched and affected, the more they are delighted with the spectacle’.

*weep 눈물을 흘리다 **tremor 전율

① 18세기의 사상가들은 현대 미학이 ‘예술에서 부정적인 감정의 역설’이라고 부르는 것을 두고 골똘히 생각했다. ② L’Abbé Dubos는 ‘시 예술과 회화 예술은 그것들이 우리 안에 깊은 슬픔의 감각을 불러일으키는 데 성공할 때보다 더 잘 감상되는 경우는 결코 없다’라는 점에서, ‘극장에서 사람들은 웃으면서보다 눈물을 흘리면서 더 많은 기쁨을 발견한다’라고 언급했다. ③ 그는 ‘어떤 내적인 전율이 우리가 즐거움에 관한 우리 자신의 이해를 부정하고 있다고 우리에게 말하고 있음과 동시에, 우리를 압도적인 사건들의 예술적 묘사로 끌어들이는’ 이 겉보기에는 ‘은밀한 매력’의 본질에 대해 궁금해했다. ④ David Hume은 또한 우리의 인간적인 본성과 모순되는 것처럼 보이는 이러한 즐거움의 이상함을 강조한다. ⑤ ‘그것은 설명할 수 없는 즐거움으로, 잘 쓰인 비극의 관객은 슬픔, 공포, 불안, 그리고 그 자체로는 불쾌하고 불편한 여타의 걱정으로부터 그것을 받는다. ⑥ 그들이 더 많이 감동하고 영향을 받을수록, 그들은 그 광경에 더 많이 기뻐한다.’

Word List

- puzzle over ~을 두고 골똘히 생각하다, ~을 숙고하다 □ contemporary 현대의 □ aesthetics 미학 □ paradox 역설
- note 언급하다, 지적하다 □ appreciate 감상하다, 이해하다 □ stir 불러일으키다 □ profound 깊은, 심오한 □ grief 슬픔
- apparently 겉보기에는, ~인 것처럼 보이는 □ depiction 묘사 □ overwhelming 압도적인 □ contradict 부정[부인]하다, 모순되다
- underline 강조하다 □ unaccountable 설명할 수 없는 □ spectator 관객 □ disagreeable 불쾌한 □ spectacle 광경

• Word Test

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

However, the last couple of times Ross has come home from your house, he has had scratches and even a few small bite marks on his arm.

My son Ross enjoys playing with your son Jim very much, and my husband and I think Jim is a really good kid. (①) Ross tells me they are from your new puppy, Raven. (②) We love dogs, and we want Ross to be comfortable around them. (③) But at this time we have to ask that there be adult supervision when Ross is in your home to prevent this sort of injury; we also want to make sure that Raven is not harmed. (④) After considering this, please let me know your plans. (⑤) I'd be glad to speak with you about this matter before the next time Ross and Jim (and Raven) get together.

Soon after the conversation with Alec, his parents, Marko and Elizabeth, arrived home. I was waiting outside to meet them as they made their way to the house. Would they like me? If they didn't want me, what would I do? Spend eternity alone? They walked through the door and I gulped rather too loudly. They were both very charming, with the same fair skin and crystal blue eyes that Alec has. "Rebecca," Elizabeth's excited voice called, "I'm so glad to see you. I've been dying to meet you, welcome to the family." And with that all my worries disappeared. Alec introduced me to his parents formally. Elizabeth told me to call her Beth. She wrapped her arms around me in an unbreakable but gentle hold with a smile on her face. Marko also smiled at me warmly. "Welcome,

Becca. How are you feeling? You're part of this family now, you can be assured of that." They welcomed me into their family. I spent a couple of hours with them. It was so easy being in their company.

*eternity 영원 **gulp 침을 꿀꺽 삼키다

- ① 글쓴이는 Alec의 부모님을 만나기 위해 집밖에서 기다렸다.
- ② Alec은 하얀 피부와 파란 눈동자를 가졌다.
- ③ Elizabeth가 반갑게 맞이하자 글쓴이는 안도감을 느꼈다.
- ④ Marko가 글쓴이의 가족에 대해 여러 가지 질문을 했다.
- ⑤ 글쓴이는 Alec의 가족과 함께 있는 것을 편하게 느꼈다.

03 Test 2 3번

밑줄 친 When this occurs, youth sports are not worth our time and effort.가 다음 글에서 의미하는 바로 가장 적절한 것은?

Reaffirming friendships is central in the lives of children. Organized sports provide contexts for making friends, but friendships are difficult to nurture when children see each other only at adult-controlled practices and games. Additionally, making friends with opponents is seldom considered in organized sports. Therefore, youth teams should be neighborhood- and school-based whenever possible. Pregame warm-ups should mix players from both teams, and players should introduce themselves to the person they line up with as each quarter or half begins. Unless children learn that games cannot exist without cooperation between opponents, they will have no understanding of fair play, why rules exist, why rule enforcement is necessary, and why players should follow game rules. Without this understanding, children don't have what it takes to maintain fair play at the same time that they strive for competitive success. When this occurs, youth sports are not worth our time and effort.

- ① It is crucial for youth players to master core sport skills and abilities as young as possible.
- ② Without an understanding of fair play and rules, a youth should not sign up for organized sports.
- ③ It is necessary to provide youth sports team managers with systematic support so they can gain ethical team managing skills.
- ④ The success of youth sports lies in promoting friendships with the spirit of fair play and cooperation into young players.
- ⑤ Fair play and cooperation are considered core values in youth sports but there's no teaching them without a lot of time and effort.

04 Test 2 4번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Don't you hate when you go to a buffet and everything tastes too good? You take great care to eat a healthy bountiful salad before you dig into the meats, vegetables, and side dishes. Much later, as you sit back in your chair and rub your stomach to find room, there is none. Those delicious delicacies prepared for dessert will go untouched. you had only started with the sweet temptations, some of the other dishes could have been passed up without remorse. There are times in life when you have to do just that. Instead of waiting until your work is done to see if you will have time for relaxing, take the time first. Don't wait for after work to see a movie, catch the early morning show and go to work late. There will always be deadlines and commitments, but there is only one sunrise and sunset every day. Take the time to enjoy them and you won't be sorry. Believe it or not, sometimes the chocolate cake is better for you than the salad. _____.

*bountiful 많은 **remorse 후회

- ① You can't eat your cake and salad at the same time
- ② Start with the good stuff and everything else will fall into place
- ③ Eating a salad does not automatically equate to having a healthy meal
- ④ If you get away from being overly concerned about your health, you will become healthy
- ⑤ Take time to reflect on yourself and your life, and you will enjoy your life better

05 Test 2 5번

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Large teams are ① notorious for needing multiple steps to make most decisions. Aligning calendars often takes time, and once you get everyone into a room (or, more likely, on a call), several attendees need to be brought up to speed. Some attendees will not have read the requisite material, and others will have been sent as substitutes for key decision-makers who could not make the time (and these substitutes will not be able to make any ② critical decisions without conferring with their boss). We've all attended these sorts of meetings. They ③ rarely result in decisions — and they usually lead to additional meetings. A small team can deal with these issues much more easily. ④ Fewer people need to be present to make decisions, and those present are typically much more involved in the details of the problem, so they don't need a meeting to ramp up before they can contribute. In a word, a smaller team can be ⑤ less effective, as communication is easier and decision-making can be accomplished more quickly.

*ramp up 늘어나다

06 Test 2 6번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

We cannot test for consciousness. This simple fact has been used to argue that consciousness doesn't even merit being considered a legitimate field of science. Science, it is argued, is objective, whereas consciousness is defined as subjective experience. How can there be a scientific study of consciousness? As the philosopher John Searle relates, years ago a famous neurobiologist responded to his repeated questions about consciousness by saying, "Look, in my discipline it's okay to be interested in consciousness, but get tenure first." Searle continues by noting that in this day and age, "you might actually get tenure by working on consciousness. If so, that's a real step forward." The bias against a scientific inquiry into consciousness seems to be thawing, with the realization that while consciousness is subjective experience, that subjective experience either objectively happens or not. Pain is also subjectively experienced, but it is objectively real.

*tenure 종신 재직권 **thaw 누그러지다, 부드러워지다

Consciousness was hardly considered a legitimate field of science because it is related with (A) experience, but (B) of consciousness as a scientific field of study seems to have weakened with the realization that subjective experience can happen objectively or not.

(A)

(B)

- ① objective acceptance
- ② objective disapproval
- ③ unrealistic acceptance
- ④ subjective disapproval
- ⑤ subjective recognition

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

On February 1, 1960, four African American students entered a Greensboro Woolworth's store to buy school supplies. If their money was good enough to buy school supplies, why not a cup of coffee, they reasoned. At 4:30 p.m., they sat at the "whites only" lunch counter, intending to place an order.

- (A) This one act by four students was the pivotal step in propelling forward what became known as the American civil rights movement.
- (B) As news of the "sit-in" spread, students returned to the Greensboro Woolworth's and to other lunch counters across the South. White and Black American students alike from New York to San Francisco began picketing Woolworth's in support of the "Greensboro Four."
- (C) The four young men sat at the counter until closing but were never served. The next day more students sat at the counter — they too were never served.

*pivotal 중추적인

- ① (A) – (C) – (B)
- ② (B) – (A) – (C)

다음 글에서 전체 흐름과 관계 없는 문장은?

Named for its call, the veery has a reddish brown head, back, and tail and a faintly spotted breast. It breeds in southern Canada and in the northern United States; it is common in central and western Maryland, and in western Virginia at elevations above 3,000 feet. Its song is a delicate, flutelike *da-vee-ur, vee-ur, veer, veer*. Mainly a ground forager, the veery feeds on insects and fruit. ① The female builds a nest in a dense shrub near ground level or on the ground itself, often hiding it in vegetation at the base of a bush or small tree. ② She lays three to five eggs and incubates them for ten to fourteen days. ③ The male helps to rear the brood, and the young leave the nest ten to twelve days after hatching. ④ There are many reasons for incubating and hatching chicken eggs under a broody hen or with an incubator. ⑤ Veeries migrate at night to winter in South America east of the Andes, mainly in Bolivia and Brazil.

*forager 먹을 것을 찾아다니는 동물(사람)
shrub 관목 *brood (같은 때에 태어난) 새끼

Maple Photo Contest에 관한 다음 안내문의 내용과 일치하지 않는 것은?

Maple Photo Contest

Maple City's annual photo contest is a great way to show how special our community is! Everyone is encouraged to participate — residents, business people and students.

There are four contest categories: *Going Natural* (nature), *Going Strong* (community), *Going Together* (people), and *Going Wild* (animals).

Contest Guidelines:

- All photos must be taken in Maple City from January 2022 to August 31, 2023.
- Participants can submit up to 12 photos.
- Please submit your photos by September 30.

Prizes are awarded for 1st, 2nd, and 3rd place in each category. All submitted photographs will be posted on the Maple City website and may be used in official Maple City newsletters and brochures. Winning photographers will be invited to a City Council meeting to receive their awards.

Photos may only be submitted online through a special link on the Maple City website(www.maplecitycontest.gov). You can also get additional information related to the contest on this site.

- ① 누구나 참여하도록 권장된다.
- ② 경연 대회 부문은 총 네 가지이다.
- ③ Maple 시에서 촬영된 사진만 제출할 수 있다.
- ④ 9월 30일까지 사진을 제출해야 한다.
- ⑤ 경연 대회와 관련된 추가 정보는 이메일로 문의할 수 있다.

12 Test 2 12번

다음 글의 제목으로 가장 적절한 것은?

Feeling at home is a biological phenomenon because feelings themselves are the product of the human mind and body. Feelings and emotions evolved over the course of millions of years of evolution to help us regulate and monitor our internal state in relation to the external environment. Anger, fear, sadness, and the other emotions and feelings prime the body for action and help the mind make decisions about what we should or should not do. The feelings we associate with home are built on a cognitive foundation that we inherited from our ancestors. A feeling for home coupled with the inclination and ability to build a shelter for our bodies makes for a profound biocultural adaptation. This adaptation helps people survive in all manner of environments, far from the African woodlands and savannas where the human evolutionary journey first started some six million years ago.

*prime 준비시키다

- ① Where Our Evolutionary Journey Started
- ② Feeling at Home: Inherited to Successfully Remain Alive
- ③ A Way to Control Feelings and Emotions: Listen to Your Internal Voice
- ④ Building Homes: A Biocultural Adaptation to the External Environment
- ⑤ The Differing Feelings of Home from Culture to Culture

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

But such territorial dominance — the so-called home court advantage — may disappear if the group is larger than a triad.

There are fascinating effects of group size. In a dyad or triad, the host usually has the edge over the visitor; the host is more likely to get his or her own way. (①) Thus, a businessperson can strike a better deal by inviting the other person to his or her office. (②) In public places, a large group may also inhibit an individual from helping someone in distress. (③) More than 50 studies have shown consistently that people are less likely to help a victim if others are around than if they are alone with the victim. (④) A major reason is that the knowledge that others are present and available to respond allows the individual to shift some of the responsibility to others. (⑤) The same factor operates in “social loafing”: As the size of a group performing a certain task increases, each member tends to work less hard.

*dyad 한 쌍 **triad 3인조

14 Test 2 14번

다음 글의 주제로 가장 적절한 것은?

American industrialists and their European counterparts were taking capitalism to new levels of innovation and human improvement, resting in part on the cultural conditions that German sociologist and economist Max Weber called the Protestant ethic. The spirit of adventure and possibility was signified in the very physical spaces of America, a great stage that could nurture virtue and improvement. In 1893 historian Frederick Jackson Turner delivered his paper “The Significance of the Frontier in American History” at the American Historical Association. Whether or not his thesis that the frontier was the key factor in America’s uniquely innovative and democratic character was accurate, the idea itself captured the imagination of generations of scholars and the educated public, becoming very nearly a self-fulfilling account. Like Charles Peirce, the philosopher of science, Turner was deeply influenced by evolutionary theory. According to his thesis, the seventeenth-century settlers were in effect forced to take an experimental attitude toward their situation, as the old European ways would not do.

*frontier 접경지대, (미국 서부 개척지의) 변경 **thesis 논지

- ① side effects of rapid economic development in America
- ② pros and cons of taking European capitalism to America
- ③ increasing needs for economic system reform in American history
- ④ the domination of the spirits of experimentation and innovation in American history
- ⑤ growing conflicts between Americans and Europeans on the American frontier

15 Test 2 15번

다음 글에서 전체 흐름과 관계 없는 문장은?

In his famous book *Man’s Search for Meaning*, Viktor Frankl writes, “Man’s search for meaning is the primary motivation in his life.” He quotes Nietzsche’s words, “He who has a *why* to live for can bear with almost any how.” But then Frankl made a crucial, helpful point: It’s fruitless to try to think in the abstract about what life in general means. ① The meaning of one’s life is only discernible within the specific circumstances of one’s own specific life. ② In the concentration camp, he writes, “We had to learn ourselves and, furthermore, we had to teach the despairing men, that *it did not really matter what we expected from life, but rather what life expected from us*. ③ To better understand the meaning of life as a theme of modern psychology, it is necessary to return to Greek philosophical thought, which exerted an enormous influence on Western thought. ④ We needed to stop asking the meaning of life, and instead to think of ourselves as those who were being questioned by life — daily and hourly. ⑤ Our answer must consist, not in talk and meditation, but in right action and right conduct.”

*discernible 인식할 수 있는

16 Test 2 16번

다음 글의 주제로 가장 적절한 것은?

Gaining self-knowledge through reflected self-appraisals might seem to suggest that we have little say in how we see ourselves. But the idea here is that we internalize how we think others appraise us, not necessarily how others actually see us. In fact, our reflected self-appraisals often do not correlate highly with the appraisals that others actually make of us. Figuring out how and to what degree reflected self-appraisals influence people's sense of self can be tricky. For example, Amy's view of herself as a clumsy person could stem from her perception that her family and friends see her this way — but it's also possible that her view of herself as clumsy is actually what led her to perceive these reflected self-appraisals. Indeed, self-views often affect reflected self-appraisals rather than the other way around. The upshot, then, is that although other people influence our sense of self through reflected self-appraisals, their impact may not be as simple and direct as the looking-glass self, referring to the idea that we see ourselves as others see us.

*appraisal 평가 **clumsy 서투른 ***upshot (최종적인) 결과

- ① the importance of positive self-appraisals
- ② how to gain self-knowledge through reflective practices
- ③ the complex relationship between reflected self-appraisals and self-views
- ④ understanding the meaning of perceived self-image
- ⑤ the impact of reflected self-appraisals on true appraisals

17 Test 2 17번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

That is, households are the suppliers of labor, capital and natural resources, while firms are the buyers, and in turn use these items to produce final goods and services for the product market.

Markets represent an institutional arena in which exchanges (buying and selling) of final goods and services and factors of production (labor, capital and natural resources) take place. Traditionally, economists group markets into two broad categories, namely product and factor markets. (①) The *product market* is where the exchange of *final* goods and services occurs. (②) In this market, demand and supply provide information about households and firms, respectively. (③) The *factor market* refers exclusively to the buying and selling of basic resources, such as labor, capital and natural resources. (④) In this submarket, demand imparts market information about firms and supply provides information about households. (⑤) Clearly, then, the roles played in the factor market by households and firms respectively are the reverse of their roles in the product market.

*arena 장, 무대 **impart 나누어 주다

다음 빈칸에 들어갈 말로 가장 적절한 것은?

All societies evolve rules of etiquette, good manners, and tact that specify what is or is not appropriate to say in any given situation. Most of us are, therefore, walking repositories of rules that were taught to us when young and that represent early layers of cultural _____. We learn as part of our acculturation into the family that in the interests of getting along with each other, it is important to withhold some of our perceptions and feelings because to say them out loud might hurt or offend others. And if we hurt others, that permits them to hurt us back, which makes social life generally too dangerous. We learn that some of these things can be said to friends and even more can be said to intimates. However, the basic assumptions about why you cannot say certain things remain below consciousness, and the process by which you learned them is probably totally forgotten.

*tact 요령, 재치 **repository 저장소 ***withhold 억제하다

- ① difference
- ② relativism
- ③ socialization
- ④ identity
- ⑤ background

19 Test 2 19번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Because their claims on the oranges were assumed to be mutually exclusive, no deal could be reached — more oranges for one negotiator meant fewer oranges for the other.

We know that negotiators often assume a situation is distributive and therefore competitive when indeed it is not necessarily so. In the classic negotiation primer, Fisher and Ury give the example of two individuals fighting over a small number of oranges. Each needs the oranges for worthwhile purposes and there is no way to obtain additional oranges. (①) The negotiators begin using competitive strategies — trying to convince each other to give up or sell the oranges. (②) Then they changed to an integrative bargaining strategy. (③) They sought to learn more about each other's needs with the goal of helping each other meet their needs. (④) In the end, they realized that one negotiator needed the juice of the orange and the other needed only the rind. (⑤) Their needs were not mutually exclusive, yet a traditional distributive bargaining approach would have resulted in impasse.

*primer 입문서 **rind 껍질 ***impasse 교착 상태

20 Test 2 20번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

I confess that one of the most suggestive theories that I learned of in my course on the economics of science at the London School of Economics and Political Science ① was that of the ‘tournament model’. It may be well known to many readers, but I was surprised that something ② that I thought was highly intuitive, such as human resource management, could be described in terms of an elaborate theory. The tournament theory was described in 1981 by economists Edward Lazear and Sherwin Rosen. They argued that a worker’s performance (both evaluated and the incentive) can ③ be modelled as a tennis tournament. There is only one prize: either you win and have everything or you lose and have nothing; glory is only for the first. And most US/UK experts who ④ analysing the behaviour of science consider that this model fits the profession of a scientist like a glove. Why? Because everyone knows the winners of the Tour de France, but nobody remembers the runners-up. In science, it means if anyone comes to a result or a patent second, if only by a few hours, it is of no use to him. Only the first has ⑤ any glory.

*intuitive 직관적인 **patent 특허

21 Test 2 20번

다음 글의 주제로 가장 적절한 것은?

For decades, nineteenth-century city dwellers had ridden horse-drawn passenger railways — also known as trams, tramways, trolleys, trolley cars, or streetcars — along regular routes marked out by steel railways in the roadbed. They picked up and dropped off passengers when flagged or at designated stops, and, unlike a private taxi carriage, didn’t need to be pre-hired. John Stephenson, an Irish-American businessman, got them rolling first down the Bowery in New York City in 1832. They were successful, but problems rapidly developed with the power source. Horses have to be fed, which required massive supplies of hay and oats to be brought into the city, and once fed, horses created wastes that fouled the streets and made walking an unpleasant, unhealthy, and smelly business, especially during fly season. Horses also die; a dead horse in a Manhattan street had to be moved to the river and dumped in. Sanitation records from New York in 1880 showed fifteen thousand horses per year removed from city right-of-ways.

*foul 더럽히다 **sanitation 공중위생

- ① the history of using horse-drawn vehicles
- ② the convenience of traffic services as an advantage of living in the city
- ③ merits and demerits of railway development in the city
- ④ how to solve the problems caused by using horses as a method of transport
- ⑤ the nineteenth-century’s successful traffic revolution of horse-drawn vehicles

22 Test 2 22번

다음 글에서 전체 흐름과 관계 없는 문장은?

The new system of fashion that has emerged from the digital revolution is largely centered, in marketing terms, on popular bloggers, who have unprecedented influence due to their massive numbers of subscribers. If an elite blogger (an “influencer”) has more than half a million subscribers, his or her influence can be worth a significant amount of money: the value of a single post mentioning a particular brand is in the range of five figures. Obviously, this approach leads to limited ability to make independent critical judgments. However, when choosing an outfit for a photoshoot, an influential blogger is guided not only by the profit motive but also, and primarily, by a sense of style. ① Otherwise, the trust of subscribers may be lost. ② For subscribers, their idol is not merely a guide to the latest fashion, but is the key to an aspirational lifestyle. ③ The direct personal contact between popular bloggers and their subscribers allows the former to be an intermediary between the brand and the consumer. ④ There is a program that is designed to assist not only beginners but also experienced bloggers in improving their blogging skills. ⑤ This role is not available to models, whose position makes no allowance for expressions of personal taste.

*outfit 의상, 복장 **intermediary 중재자

23 Test 2 23번

밑줄 친 the paradox of negative emotion in art가 다음 글에서 의미하는 바로 가장 적절한 것은?

Thinkers of the eighteenth century puzzled over what contemporary aesthetics calls ‘the paradox of negative emotion in art’. L’Abbé Dubos noted that, ‘at the theatre, man finds more pleasure weeping than he does laughing’, in that ‘the art of poetry and the art of painting are never more appreciated than when they succeed in stirring in us a sense of profound grief’. He wondered about the nature of this apparently ‘secret charm that draws us to artistic depictions of overwhelming events, while at the same time an internal tremor tells us that we are contradicting our own understanding of pleasure’. David Hume also underlines the strangeness of this pleasure that seems to contradict our human nature: ‘It seems an unaccountable pleasure, which the spectators of a well-written tragedy receive from sorrow, terror, anxiety, and other passions that are in themselves disagreeable and uneasy. The more they are touched and affected, the more they are delighted with the spectacle’.

*weep 눈물을 흘리다 **tremor 전율

- ① the reason that artists depict pleasure as a part of human nature
- ② the fact that pleasure is scarcely found in art but strongly affected by art
- ③ the inexplicable situation where more pleasure comes with deeply felt grief and distress
- ④ the truth that pleasure is a popular but difficult subject to be expressed in art
- ⑤ the fact that there is a conflicting relationship between artists and their pleasures

Test 2 24~25번

[24~25] 다음 글을 읽고, 물음에 답하시오.

Until the mid-1800s it was not clear to what extent the laws of physics and chemistry, which were formulated from the observed behavior of inanimate matter, could be (a) applied to living matter. It was certainly evident that on the large scale the laws were applicable. Animals are clearly subject to the same laws of motion as inanimate objects. The question of applicability arose on a more basic level. Living organisms are very (b) simple. Even a virus, which is one of the simplest biological organisms, consists of millions of interacting atoms. A cell, which is the basic building block of tissue, contains on the average 10^{14} atoms. Living organisms exhibit properties not found in inanimate objects. They grow, reproduce, and decay. These phenomena are so (c) different from the predictable properties of inanimate matter that many scientists in the early 19th century believed that different laws governed the structure and organization of molecules in living matter. Even the physical origin of organic molecules was in question. These molecules tend to be (d) larger and more complex than molecules obtained from inorganic sources. It was thought that the large molecules found in living matter could be produced only by living organisms through a “vital force” that could not be explained by the existing laws of physics. This concept was disproved in 1828 when Friedrich Wöhler synthesized an organic substance, urea, from inorganic chemicals. Soon thereafter many other organic molecules were synthesized without the intervention of biological organisms. Today most scientists believe that there is no special vital force (e) residing in organic substances. Living organisms are governed by the laws of physics on all levels.

*inanimate 무생물의 **synthesize 합성하다 ***urea 요소(尿素)

Test 2 26-28번

[26~28] 다음 글을 읽고, 물음에 답하십시오.

(A)

A wise king wanted his only son also to be a wise man before becoming his successor. The king was an extraordinary man who selected a very strange way. He summoned the prince one day and said, “(a) You are no longer a prince and I am not going to make you my successor.” He sent the son away from the kingdom and abandoned him completely.

*summon 부르다

(B)

Many years passed. Then, one day he was sitting in a busy street crying out for just a few coins to buy some food. Suddenly a golden chariot stopped before him, and a man descended. The man said, “Your father has called you back. (b) He is very old and dying, and he wants you to be his successor.” In a split second the beggar disappeared. The man was totally changed — his face became radiant, eyes reflecting the princely majesty. A great crowd gathered — people who before were ignoring (c) his stretched-out hands for a few coins — there to show great respect.

*chariot 마차 **radiant 빛나는

(C)

The prince was shocked, and he was left as a beggar in an alien land. The king gave strict orders that he should not be allowed back into the kingdom. Over the years the prince really became a beggar and totally forgot (d) his princehood. He was literally begging for food, clothes and shelter and gradually became accustomed to the condition he was in.

(D)

But without paying any attention to them he sat in the chariot and told the charioteer, “Take (e) me to a place where I can have a good bath, find clothes worthy of me, shoes, ornaments...

because I can go before the king only as a prince.” A great crowd gathered — people who before were ignoring (c) his stretched-out hands for a few coins — there to show great respect.

Test 2 5번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

A small team can deal with these issues much more easily.

Large teams are notorious for needing multiple steps to make most decisions. Aligning calendars often takes time, and once you get everyone into a room (or, more likely, on a call), several attendees need to be brought up to speed. (①) Some attendees will not have read the requisite material, and others will have been sent as substitutes for key decision-makers who could not make the time (and these substitutes will not be able to make any critical decisions without conferring with their boss). (②) We've all attended these sorts of meetings. (③) They rarely result in decisions — and they usually lead to additional meetings. (④) Fewer people need to be present to make decisions, and those present are typically much more involved in the details of the problem, so they don't need a meeting to ramp up before they can contribute. (⑤) In a word, a smaller team can be more effective, as communication is easier and decision-making can be accomplished more quickly.

*ramp up 늘어나다

Test 2 6번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

We cannot test for consciousness. This simple fact has been used to argue that consciousness doesn't even merit being considered a legitimate field of science. Science, it is argued, is objective, whereas consciousness is defined as subjective experience. How can there be a scientific study of consciousness? As the philosopher John Searle relates, years ago a famous neurobiologist responded to his repeated questions about consciousness by saying, "Look, in my discipline it's okay to be interested in consciousness, but get tenure first." Searle continues by noting that in this day and age, "you might actually get tenure by working on consciousness. If so, that's a real step forward." The bias against a scientific inquiry into consciousness seems to be thawing, with the realization that while consciousness is subjective experience, that subjective experience either _____ happens or not. Pain is also subjectively experienced, but it is objectively real.

*tenure 종신 재직권 **thaw 누그러지다, 부드러워지다

- ① equally
- ② logically
- ③ objectively
- ④ personally

35 Test 2 7번

four African American students에 관한 다음 글의 내용과 일치하지 않는 것은?

On February 1, 1960, four African American students entered a Greensboro Woolworth's store to buy school supplies. If their money was good enough to buy school supplies, why not a cup of coffee, they reasoned. At 4:30 p.m., they sat at the "whites only" lunch counter, intending to place an order. The four young men sat at the counter until closing but were never served. The next day more students sat at the counter — they too were never served. As news of the "sit-in" spread, students returned to the Greensboro Woolworth's and to other lunch counters across the South. White and Black American students alike from New York to San Francisco began picketing Woolworth's in support of the "Greensboro Four." This one act by four students was the pivotal step in propelling forward what became known as the American civil rights movement.

*pivotal 중추적인

- ① 학용품을 사기 위해 Greensboro Woolworth의 가게에 들어갔다.
- ② 학용품뿐 아니라 커피를 마실 만큼의 돈을 지니고 있었다.
- ③ 백인 전용 간이식당에 앉아서 문을 닫을 때까지 음식 제공을 기다렸다.
- ④ 두 번째 날에 더 많은 학생과 함께 다시 간이식당을 방문해서 음식을 제공받았다.
- ⑤ 이들을 지지하는 학생들이 Woolworth 가게에 대해 피켓 시위를 벌였다.

37 Test 2 12번

다음 글에서 전체 흐름과 관계 없는 문장은?

Feeling at home is a biological phenomenon because feelings themselves are the product of the human mind and body. Feelings and emotions evolved over the course of millions of years of evolution to help us regulate and monitor our internal state in relation to the external environment. ① Feelings and emotions are the things we share as humans, but the difference between feelings and emotions should be explored first to better understand human behaviors. ② Anger, fear, sadness, and the other emotions and feelings prime the body for action and help the mind make decisions about what we should or should not do. ③ The feelings we associate with home are built on a cognitive foundation that we inherited from our ancestors. ④ A feeling for home coupled with the inclination and ability to build a shelter for our bodies makes for a profound biocultural adaptation. ⑤ This adaptation helps people survive in all manner of environments, far from the African woodlands and savannas where the human evolutionary journey first started some six million years ago.

*prime 준비시키다

38 Test 2 13번

다음 글의 제목으로 가장 적절한 것은?

There are fascinating effects of group size. In a dyad or triad, the host usually has the edge over the visitor; the host is more likely to get his or her own way. Thus, a businessperson can strike a better deal by inviting the other person to his or her office. But such territorial dominance — the so-called home court advantage — may disappear if the group is larger than a triad. In public places, a large group may also inhibit an individual from helping someone in distress. More than 50 studies have shown consistently that people are less likely to help a victim if others are around than if they are alone with the victim. A major reason is that the knowledge that others are present and available to respond allows the individual to shift some of the responsibility to others. The same factor operates in “social loafing”: As the size of a group performing a certain task increases, each member tends to work less hard.

*dyad 한 쌍 **triad 3인조

- ① Group Action Is of Little Consequence
- ② What Happened to the Crowd of People Outside?
- ③ The Cause and Effect of Social Loafing
- ④ Group Size: Meaningful in Various Situations
- ⑤ What's the Right Number of Members for Your Meeting?

40 Test 2 15번

다음 글의 요지로 가장 적절한 것은?

In his famous book *Man’s Search for Meaning*, Viktor Frankl writes, “Man’s search for meaning is the primary motivation in his life.” He quotes Nietzsche’s words, “He who has a *why* to live for can bear with almost any how.” But then Frankl made a crucial, helpful point: It’s fruitless to try to think in the abstract about what life in general means. The meaning of one’s life is only discernible within the specific circumstances of one’s own specific life. In the concentration camp, he writes, “We had to learn ourselves and, furthermore, we had to teach the despairing men, that *it did not really matter what we expected from life, but rather what life expected from us*. We needed to stop asking the meaning of life, and instead to think of ourselves as those who were being questioned by life — daily and hourly. Our answer must consist, not in talk and meditation, but in right action and right conduct.”

*discernible 인식할 수 있는

- ① 삶의 의미를 찾은 사람은 어떠한 시련도 견딜 수 있다.
- ② 삶에 대한 긍정적인 기대가 삶의 의미를 찾는 중요 요인이다.
- ③ 일반적인 삶의 의미를 이해하는 것이 개인적인 의미를 찾는 데 도움이 된다.
- ④ 절망하는 사람들이 삶의 의미를 찾을 수 있도록 교육을 통한 도움을 제공해야 한다.
- ⑤ 삶의 의미는 각자가 처한 상황에서 적절히 대처하고 실행하며 찾아가는 것이다.

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Gaining self-knowledge through reflected self-appraisals might seem ① to suggest that we have little say in how we see ourselves. But the idea here is that we internalize how we think others appraise us, not necessarily how others actually see us. In fact, our reflected self-appraisals often do not correlate ② highly with the appraisals that others actually make of us. ③ Figure out how and to what degree reflected self-appraisals influence people's sense of self can be tricky. For example, Amy's view of herself as a clumsy person could stem from her perception that her family and friends see her this way — but it's also possible that her view of herself as clumsy is actually ④ what led her to perceive these reflected self-appraisals. Indeed, self-views often affect reflected self-appraisals rather than the other way around. The upshot, then, is that although other people influence our sense of self through reflected self-appraisals, their impact may not be as simple and direct as the looking-glass self, ⑤ referring to the idea that we see ourselves as others see us.

*appraisal 평가 **clumsy 서투른 ***upshot (최종적인) 결과

42 Test 2 17번

다음 글의 내용과 일치하지 않는 것은?

Markets represent an institutional arena in which exchanges (buying and selling) of final goods and services and factors of production (labor, capital and natural resources) take place. Traditionally, economists group markets into two broad categories, namely product and factor markets. The *product market* is where the exchange of *final* goods and services occurs. In this market, demand and supply provide information about households and firms, respectively. The *factor market* refers exclusively to the buying and selling of basic resources, such as labor, capital and natural resources. In this submarket, demand imparts market information about firms and supply provides information about households. That is, households are the suppliers of labor, capital and natural resources, while firms are the buyers, and in turn use these items to produce final goods and services for the product market. Clearly, then, the roles played in the factor market by households and firms respectively are the reverse of their roles in the product market.

*arena 장, 무대 **impart 나누어 주다

- ① 전통적으로 경제학자들은 시장을 상품 시장과 요소 시장으로 분류한다.
- ② 상품 시장에서는 최종적인 재화와 용역이 교환된다.
- ③ 요소 시장은 기본적인 자원의 매매 시장이다.
- ④ 요소 하위 시장에서 기업은 공급자이고 가계는 구매자이다.
- ⑤ 상품 시장과 요소 시장에서의 가계와 기업의 역할은 각각 서로 다르다.

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

All societies evolve rules of etiquette, good manners, and tact that specify what is or is not ① appropriate to say in any given situation. We learn as part of our acculturation into the family that in the interests of getting along with each other, it is important to withhold some of our perceptions and feelings because to say them out loud might hurt or offend others. And if we hurt others, that permits them to hurt us back, which makes social life generally too ③ safe. We learn that some of these things can be said to friends and even more can be said to ④ intimates. However, the basic assumptions about why you cannot say certain things remain below ⑤ consciousness, and the process by which you learned them is probably totally forgotten.

*tact 요령, 재치 **repository 저장소 ***withhold 억제하다

44 Test 2 19번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

We know that negotiators often assume a situation is distributive and therefore competitive when indeed it is not necessarily so. In the classic negotiation primer, Fisher and Ury give the example of two individuals fighting over a small number of oranges. Each needs the oranges for worthwhile purposes and there is no way to obtain additional oranges. The negotiators begin using competitive strategies — trying to convince each other to give up or sell the oranges. Because their claims on the oranges were assumed to be mutually exclusive, no deal could be reached — more oranges

for one negotiator meant fewer oranges for the other. Then they changed to a(n) _____ bargaining strategy. They sought to learn more about each other's needs with the goal of helping each other meet their needs. In the end, they realized that one negotiator needed the juice of the orange and the other needed only the rind. Their needs were not mutually exclusive, yet a traditional distributive bargaining approach would have resulted in impasse.

*primer 입문서 **rind 껍질 ***impasse 교착 상태

- ① aggressive
- ② integrative
- ③ self-interested

tournament theory에 관한 다음 글의 내용과 일치하지 않는 것은?

I confess that one of the most suggestive theories that I learned of in my course on the economics of science at the London School of Economics and Political Science was that of the 'tournament model'. It may be well known to many readers, but I was surprised that something that I thought was highly intuitive, such as human resource management, could be described in terms of an elaborate theory. The tournament theory was described in 1981 by economists Edward Lazear and Sherwin Rosen. They argued that a worker's performance (both evaluated and the incentive) can be modelled as a tennis tournament. There is only one prize: either you win and have everything or you lose and have nothing; glory is only for the first. And most US/UK experts who analyse the behaviour of science consider that this model fits the profession of a scientist like a glove. Why? Because everyone knows the winners of the Tour

de France, but nobody remembers the runners-up. In science, it means if anyone comes to a result or a patent second, if only by a few hours, it is of no use to him. Only the first has any glory.

*intuitive 직관적인 **patent 특허

- ① 1981년에 두 명의 경제학자에 의해 설명되었다.
- ② 근로자의 성과를 테니스 토너먼트로 모형화할 수 있다고 본다.
- ③ 이 이론의 모형에 의하면 승자가 모든 것을 다 갖고 패자는 아무것도 얻을 수 없다.
- ④ 이론 창시자들은 이 이론의 모형이 특히 과학자에게 잘 맞는다고 주장했다.
- ⑤ 이 이론의 모형에 따르면 과학에서 두 번째로 결과에 도달하는 것은 아무 소용이 없음을 의미한다.

Because there will be things to do, it's better to do the things you want to do _____ (A) _____ without waiting so that you can _____ (B) _____ them as much as possible without regretting anything.

(A) _____ (B) _____

Test 2 5번

Large teams are notorious for needing multiple steps to make most _____ (A) _____. Aligning calendars often takes time, and once you get everyone into a room (or, more likely, on a call), several attendees need to be brought up to speed. Some attendees will not have read the requisite material, and others will have been sent as substitutes for key decision-makers who could not make the time (and these substitutes will not be able to make any critical decisions without conferring with their boss). We've all attended these sorts of meetings. They rarely result in _____ (B) _____ — and they usually lead to additional meetings. A small team can deal with these issues much more easily. Fewer people need to be present to make decisions, and those present are typically much more involved in the details of the problem, so they don't need a meeting to ramp up before they can contribute. In a word, a smaller team can be more effective, as communication is easier and decision-making can be accomplished more quickly.

*ramp up 늘어나다

57 윗글의 빈칸 (A), (B)에 공통으로 들어갈 말을 본문에서 찾아 쓰시오.

58 윗글의 내용을 한 문장으로 요약하려고 한다. 빈칸 (A)와 (B)에 들어갈 알맞은 말을 본문에서 찾아 쓰시오. (단, 필요시 어형을 바꿔 쓸 것)

Small teams are usually easier to gather and are much more involved in the details of problems, making them more _____ (A) _____ in decision-making than large teams, which often can't reach a decision without _____ (B) _____ meetings.

(A) _____ (B) _____

Test 2 6번

We cannot test for consciousness. This simple fact has been used to argue that consciousness doesn't even merit (A) considering a legitimate field of science. Science, it is argued, is objective, whereas consciousness is defined as subjective experience. How can there be a scientific study of consciousness? As the philosopher John Searle relates, years ago a famous neurobiologist responded to his repeated questions about consciousness by saying, "Look, in my discipline (B) that's okay to be interested in consciousness, but get tenure first." Searle continues by noting that in this day and age, "you might actually get tenure by working on consciousness. If so, that's a real step forward." The bias against a scientific inquiry into consciousness seems to be thawing, with the realization (C) which while consciousness is subjective experience, that subjective experience either objectively happens or not. 고통은 주관적으로도 경험되지만, 객관적으로도 실재한다.

*tenure 종신 재직권 **thaw 녹거리지다, 부드러워지다

U.S. Adults' Level of Confidence in Various Occupational Groups to Act in the Public Interest

Note: Respondents who did not give an answer are not shown.
Percentages may not total 100 due to rounding.
Source: Survey conducted April 20–26, 2020.

The above graph shows U.S. adults' level of confidence in various occupational groups to act in the public interest. Out of the 7 groups included in the survey, Americans are most likely to express confidence in medical scientists, scientists and the military. About nine-in-ten U.S. adults have either a great deal or a fair amount of confidence in medical scientists to act in the public interest. Large majorities have at least a fair amount of confidence in scientists (87%) and the military (83%). About half of Americans have not too much or no confidence in journalists or business leaders to act in the public interest. A majority (63%) say they have not too much or no confidence in elected officials, while more than 30% have those levels of confidence in religious leaders.

Maple Photo Contest

Maple City's annual photo contest is a great way to show (A) what special our community is! Everyone is encouraged to participate — residents, business people and students.

There are four contest categories: *Going Natural* (nature), *Going Strong* (community), *Going Together* (people), and *Going Wild* (animals).

Contest Guidelines:

- All photos must (B) take in Maple City from January 2022 to August 31, 2023.
- Participants can submit up to 12 photos.
- Please submit your photos by September 30.

Prizes are awarded for 1st, 2nd, and 3rd place in each category. All submitted photographs will be posted on the Maple City website and may be used in official Maple City newsletters and brochures. Winning photographers will be invited to a City Council meeting to receive their awards.

Photos may only be submitted online through a special link on the Maple City website (www.maplecitycontest.gov). You can also get additional information (C) relating to the contest on this site.

Test 2 13번

There are fascinating effects of ____ (A) ____ size. In a dyad or triad, the host usually has the edge over the visitor; the host is more likely to get his or her own way. Thus, a businessperson can strike a better deal by inviting the other person to his or her office. But such territorial dominance — the so-called home court advantage — may disappear if the group is larger than a triad. In public places, a large group may also inhibit an individual from helping someone in distress. More than 50 studies have shown consistently that people are less likely to help a victim if others are around than if they are alone with the victim. A major reason is that the knowledge that others are present and available to respond allows the individual to shift some of the responsibility to others. The same factor operates in “social loafing”: As the size of a ____ (B) ____ performing a certain task increases, each member tends to work less hard.

*dyad 한 쌍 **triad 3인조

Being in a large group can have varying effects, including overcoming the typical advantages of territorial dominance, shifting ____ (A) ____ onto others when a person is in need, and being inclined to work ____ (B) ____ on a task.

(A) _____ (B) _____

Test 2 14번

American industrialists and their European counterparts were taking capitalism to ① new levels of innovation and human improvement, resting in part on the cultural conditions that German sociologist and economist Max Weber called the Protestant ethic. The spirit of adventure and possibility was ② signified in the very physical spaces of America, a great stage that could nurture virtue and improvement. In 1893 historian Frederick Jackson Turner ③ delivered his paper “The Significance of the Frontier in American History” at the American Historical Association. Whether or not his thesis that the frontier was the key factor in America’s uniquely ④ conservative and democratic character was accurate, the idea itself captured the imagination of generations of scholars and the educated public, becoming very nearly a self-fulfilling account. Like Charles Peirce, the philosopher of science, Turner was deeply influenced by evolutionary theory. According to his thesis, the seventeenth-century settlers were in effect forced to take an ⑤ experimental attitude toward their situation, as the old European ways would not do.

*frontier 접경지대, (미국 서부 개척지의) 변경 **thesis 논지

75 읽글을 읽고 다음 질문에 영어로 답하십시오. (11단어)

Test 2 16번

Gaining self-knowledge through reflected self-appraisals might seem to suggest that we have little say in how we see ourselves. But the idea here is that we _____ how we think others appraise us, not necessarily how others actually see us. In fact, our reflected self-appraisals often do not correlate highly with the appraisals that others actually make of us. Figuring out how and to what degree reflected self-appraisals influence people's sense of self can be tricky. For example, Amy's view of herself as a clumsy person could stem from her perception that her family and friends see her this way — but it's also possible that her view of herself as clumsy is actually what led her to perceive these reflected self-appraisals. Indeed, self-views often affect reflected self-appraisals rather than the other way around. The upshot, then, is that although other people influence our sense of self through reflected self-appraisals, their impact may not be as simple and direct as the looking-glass self, referring to the idea that we see ourselves as others see us.

*appraisal 평가 **clumsy 서투른 ***upshot (최종적인) 결과

Markets represent an institutional arena ① in which exchanges (buying and selling) of final goods and services and factors of production (labor, capital and natural resources) take place. Traditionally, economists group markets into two broad categories, namely product and factor markets. The *product market* is where the exchange of *final* goods and services ② occur. In this market, demand and supply provide information about households and firms, respectively. The *factor market* refers ③ exclusively to the buying and selling of basic resources, such as labor, capital and natural resources. In this submarket, demand imparts market information about firms and supply provides information about households. That is, households are the suppliers of labor, capital and natural resources, while firms are the buyers, and in turn ④ using these items to produce final goods and services for the product market. Clearly, then, the roles ⑤ played in the factor market by households and firms respectively are the reverse of their roles in the product market.

(A) _____ (B) _____

Test 2 18번

All societies evolve rules of etiquette, good manners, and tact that specify what is or is not appropriate to say in any given situation. Most of us are, therefore, walking repositories of rules that were taught to us when young and that represent early layers of cultural socialization. We learn as part of our acculturation into the family that in the interests of getting along with each other, it is important to withhold some of our perceptions and feelings because to say them out loud might hurt or offend others. And 만약 우리가 다른 사람들에게 상처를 준다면, 그것은 그들이 우리에게 상처를 되갚는 것을 허락하는 것이고, which makes social life generally too dangerous. We learn that some of these things can be said to friends and even more can be said to intimates. However, the basic assumptions about why you cannot say certain things remain below _____, and the process by which you learned them is probably totally forgotten.

*tact 요령, 재치 **repository 저장소 ***withhold 억제하다

We know that negotiators often assume a situation is distributive and therefore competitive when indeed it is not necessarily so. In the classic negotiation primer, Fisher and Ury give the example of two individuals (A) fight over a small number of oranges. Each needs the oranges for worthwhile purposes and there is no way to obtain additional oranges. The negotiators begin using competitive strategies — trying to convince each other (B) give up or sell the oranges. Because their claims on the oranges were assumed to be mutually exclusive, no deal could be reached — 한 협상자가 더 많은 오렌지를 갖는다는 것은 다른 협상자가 더 적은 오렌지를 갖는다는 것을 의미했다. Then they changed to an integrative bargaining strategy. They sought to learn more about each other's needs with the goal of helping each other meet their needs. In the end, they realized that one negotiator needed the juice of the orange and the other needed only the rind. Their needs were not mutually exclusive, yet a traditional distributive bargaining approach would (C) result in impasse.

*primer 입문서 **rind 껍질 ***impasse 교착 상태

85 뒷글의 밑줄 친 부분을 어법상 알맞은 형태로 고쳐 쓰시오.

Test 2 20번

I confess that one of the most suggestive theories that I learned of in my course on the economics of science at the London School of Economics and Political Science was that of the ‘ (A) model’. It may be well known to many readers, but I was surprised that something that I thought was highly intuitive, such as human resource management, could be described in terms of an elaborate theory. The tournament theory was described in 1981 by economists Edward Lazear and Sherwin Rosen. They argued that a worker’s performance (both evaluated and the incentive) can be modelled as a tennis (B). There is only one prize: either you win and have everything or you lose and have nothing; glory is only for the first. And most US/UK experts who analyse the behaviour of science consider that this model fits the profession of a scientist like a glove. Why? Because everyone knows the winners of the Tour de France, but nobody remembers the runners-up. In science, it means if anyone comes to a result or a patent second, if only by a few hours, it is of no use to him. Only the first has any glory.

*intuitive 직관적인 **patent 특허

Test 2 22번

The new system of fashion that has emerged from the digital revolution is largely centered, in marketing terms, on popular bloggers, who have unprecedented influence due to their massive numbers of subscribers. If an elite blogger (an “influencer”) has more than half a million subscribers, his or her influence can be worth a significant amount of money: the value of a single post mentioning a particular brand is in the range of five figures. Obviously, this approach leads to limited ability to make independent critical judgments. However, when choosing an outfit for a photoshoot, an influential blogger is guided not only by the profit motive but also, and primarily, by a sense of style. Otherwise, the trust of subscribers may be lost. For subscribers, their idol is not merely a guide to the latest fashion, but is the key to an aspirational lifestyle. The direct personal contact between popular bloggers and their subscribers allows the former to be an intermediary between the brand and the consumer. This role is not available to models, whose position makes no allowance for expressions of personal taste.

*outfit 의상, 복장 **intermediary 중재자

Popular bloggers who have massive numbers of subscribers are highly valued for their unprecedented _____ (A) _____ on them, as their more personal relationships with their subscribers allows them to play a role in _____ (B) _____ them in not only the latest fashion but also an aspirational lifestyle.

(A) _____ (B) _____

Test 2 23번

Thinkers of the eighteenth century puzzled over what contemporary aesthetics calls ‘the paradox of negative emotion in art’. L’Abbé Dubos noted that, ‘at the theatre, man finds more pleasure weeping than he does laughing’, in that ‘the art of poetry and the art of painting are never more appreciated than when they succeed in stirring in us a sense of profound grief’. He wondered about the nature of this apparently ‘secret charm that draws us to artistic depictions of overwhelming events, while at the same time an internal tremor tells us that we are contradicting our own understanding of pleasure’. David Hume also underlines the strangeness of this pleasure that seems to contradict our human nature: ‘It seems an unaccountable pleasure, which the spectators of a well-written tragedy receive from sorrow, terror, anxiety, and other passions that are in themselves disagreeable and uneasy. 그들이 더 많이 감동하고 영향을 받을수록, 그들은 그 광경에 더 많이 기뻐한다.’

*weep 눈물을 흘리다 **tremor 전율

Test 2 24-25번

Until the mid-1800s it was not clear to what extent the laws of physics and chemistry, ① which were formulated from the observed behavior of inanimate matter, could be applied to living matter. It was certainly evident that on the large scale the laws were applicable. Animals are clearly subject to the same laws of motion as inanimate objects. The question of applicability arose on a more basic level. Living organisms are very complex. Even a virus, which is one of the simplest biological organisms, ② consist of millions of interacting atoms. A cell, which is the basic building block of tissue, contains on the average 10^{14} atoms. Living organisms exhibit properties not found in inanimate objects. They grow, reproduce, and decay. These phenomena are so different from the predictable properties of inanimate matter ③ what many scientists in the early 19th century believed that different laws governed the structure and organization of molecules in living matter. Even the physical origin of organic molecules was in question. These molecules tend to be larger and more complex than molecules ④ obtained from inorganic sources. It was thought that the large molecules found in living matter could be produced only by living organisms through a “vital force” that could not be explained by the existing laws of physics. This concept was disproved in 1828 when Friedrich Wöhler synthesized an organic substance, urea, from inorganic chemicals. Soon thereafter many other organic molecules were synthesized without the intervention of biological organisms. Today most scientists believe that there is no special vital force ⑤ resides in organic substances. Living organisms are governed by the laws of physics on all levels.

Test 2 26-28번

A wise king wanted his only son also to be a wise man before becoming his ____ (A) _____. The king was an extraordinary man who selected a very strange way. He summoned the prince one day and said, "You are no longer a prince and I am not going to make you my ____ (B) _____." He sent the son away from the kingdom and abandoned him completely.

The prince was shocked, and he was left as a beggar in an alien land. The king gave strict orders that he should not be allowed back into the kingdom. Over the years the prince really became a beggar and totally forgot his princehood. He was literally begging for food, clothes and shelter and gradually became accustomed to the condition he was in.

Many years passed. Then, one day he was sitting in a busy street crying out for just a few coins to buy some food. Suddenly a golden chariot stopped before him, and a man descended. The man said, "Your father has called you back. He is very old and dying, and he wants you to be his ____ (C) _____." In a split second the beggar disappeared. The man was totally changed — his face became radiant, eyes reflecting the princely majesty. A great crowd gathered — people who before were ignoring his stretched-out hands for a few coins — there to show great respect.

But without paying any attention to them he sat in the chariot and told the charioteer, "Take me to a place where I can have a good bath, find clothes worthy of me, shoes, ornaments... because I can go before the king only as a prince." He came as a prince. He said to his father, "Just tell me one thing: Why did I have to be a beggar for so many years?" The king said, "It was not done to harm you, but to give you experience of the extremes of life — the beggar and the king. And between these two, everybody exists."

*summon 부르다 **chariot 마차
radiant 빛나는 *ornament 장신구

97 윗글을 읽고 다음 질문에 영어로 답하십시오. (6단어)

Q: What experience did the wise king want his successor, his only son, to gain through living as a beggar?

A: The king wanted his son to gain _____.

98 윗글의 빈칸 (A)~(C)에 공통으로 들어갈 단어를 영영 뜻 풀이를 참고하여 쓰시오. (단, 주어진 글자로 시작할 것)

someone who takes an important position after someone else

s _____

1번

소재: 업무 시간 사용에 대한 주의 당부

정답 및 해설 p.58

① It has come to my attention that many in the office have been spending time on a popular online games website. ② According to a recent article, the estimated daily cost of people collectively playing these games instead of working is over \$120 million. ③ If these estimates are applied to our 600 office employees, this results in a nearly \$700 weekly loss. ④ This is a conservative estimate considering the extensive discussions that occur about beating the office's current highest game score. ⑤ The extra cost quickly adds up. ⑥ Of course, I don't want you to view our organization as a place of strict rules. ⑦ I want to encourage a fun and competitive environment, and I recognize that the company certainly will not be profitable if you are unhappy or dissatisfied with your jobs. ⑧ This is just a reminder to be careful with your use of company time.

⑨ Thank you.

① 사무실의 많은 직원이 인기 있는 온라인 게임 웹사이트에서 시간을 보내고 있다는 사실을 알게 되었습니다. ② 최근 기사에 따르면, 사람들이 일하지 않고 집단으로 이 게임들을 하는 데 드는 하루 예상 비용은 1억 2천만 달러가 넘습니다. ③ 이러한 추정치를 600명의 우리 사무실 직원에게 적용하면 주당 거의 700달러의 손실이 발생합니다. ④ 현재의 직원 게임 최고 점수를 경신하는 것에 대해 많은 이야기가 오가는 점을 감안하면 이는 보수적인 추정치입니다. ⑤ 추가 비용이 빠르게 늘어납니다. ⑥ 물론, 저는 여러분이 우리 조직을 엄격한 규칙의 장소로 여기는 것을 원하지 않습니다. ⑦ 저는 재미있고 경쟁적인 환경을 장려하고자 하며, 여러분이 본인의 직업에 불만스럽거나 만족하지 않는다면 회사는 분명히 수익성이 없으리라는 것을 알고 있습니다. ⑧ 이것은 단지 여러분이 회사에서 시간을 사용하는 것에 대해 주의하라는 것을 상기시켜 주는 것일 뿐입니다.

⑨ 고맙습니다.

It was the day when I had the opportunity to attend my first board meeting. I arrived early. It was a great honor that I had been asked to join them ❶ _____ (한 명의 이사로서). Their mission was important. The other members were powerful, highly respected women from ❷ _____ (전국에서). I had heard about their work and their reputations for years. I was finally going to ❸ _____ (기회를 가지다) to meet them. As I walked into the meeting room, someone from the organization was already there, getting ready for the meeting. Caterers were bringing in delicious treats and hot coffee. I looked at the big mahogany table and quickly saw that name tags and binders were already being arranged and placed on the table. I saw my name — ❹ _____ (손수 쓴 쪽지와 함께) from the president — welcoming me to my first meeting. Quite frankly, I couldn't believe what my eyes were seeing!

Test 3

3번

소재: 쓰지 않는 물품의 기부나 판매

정답 및 해설 p.58

① Let's say you're storing a working microwave in your basement. ② You're not currently using the microwave; instead, it's collecting dust. ③ Applying the concept of utility informs us that the microwave has no true value to you or anyone else because it isn't being used right now for its intended purpose (which is, of course, to warm food). ④ But if you donated or sold that microwave to someone who could use it, you would immediately restore its value while also saving the recipient from having to purchase a brand new one. ⑤ Many consumers balk at the idea of donating or selling perfectly decent items, and that's understandable, as items cost money. ⑥ But thanks to constant product turnover and innovation, electronics and appliances quickly become outdated. ⑦ Giving that microwave to someone in your community who needs it to warm food right now decreases the chances of finite resources, including fossil fuels, copper, other metals, and water, being extracted from the earth to make another microwave.

*balk 멈칫거리다, 꺼리다 **copper 구리

① 여러분이 작동하는 전자레인지로 지하실에 보관하고 있다고 가정해 보자. ② 여러분은 현재 전자레인지를 사용하고 있지 않고, 대신 그것에 먼지만 쌓이고 있다. ③ 효용이라는 개념을 적용하면 현재 의도된 목적(물론 음식을 데우기 위한)으로 사용되고 있지 않기 때문에 그 전자레인지는 여러분 혹은 다른 누구에게도 진정한 가치가 없다는 것을 우리는 알게 된다. ④ 하지만 만약 여러분이 전자레인지를 사용할 수 있는 사람에게 기부하거나 판다면, 여러분은 그 전자레인지의 가치를 즉각적으로 회복시키는 동시에 또한 그 전자레인지를 받는 사람이 새 전자레인지를 구매하지 않아도 되도록 만들 것이다. ⑤ 많은 소비자가 완벽하게 괜찮은 물건을 기부하거나 판매한다는 생각에 멈칫거리는데, 물품들에는 돈이 들기 때문에 이는 이해할 수 있는 일이다. ⑥ 그러나 끊임없는 제품 회전율과 혁신 때문에 전자 기기와 가전제품은 빠르게 구식이 된다. ⑦ 지금 당장 음식을 데우기 위해 전자레인지가 필요한 지역 사회의 누군가에게 그것을 주는 것은 화석 연료, 구리, 기타 금속, 그리고 물을 포함하여 유한한 자원이 또 하나의 전자레인지를 만들기 위해 지구로부터 추출될 가능성을 감소시킨다.

Word List

- store 보관하다 □ microwave 전자레인지 □ basement 지하실 □ currently 현재, 지금 □ dust 먼지 □ apply 적용하다
- utility 효용, 유용 □ inform 알리다 □ intended 의도된, 계획된 □ donate 기부하다 □ immediately 즉각적으로, 즉시
- restore 회복시키다, 복구하다 □ recipient 받는 사람, 수령인 □ decent 괜찮은, 점잖은 □ constant 끊임없는 □ turnover 회전율
- innovation 혁신 □ electronics 전자기기 □ appliance 가전제품 □ outdated 구식인, 낡은 □ finite 유한한, 한정된
- fossil fuel 화석 연료 □ extract 추출하다

• Word Test

Test 3

5번

소재: 일상의 작은 일에 대해 감사를 실천하기

정답 및 해설 p.59

① You've probably already heard about the importance of adopting an attitude of gratitude and focusing on the positive things in your life. ② But what does that even mean beyond a tired cliché? ③ Isn't it enough when you're grateful for Thanksgiving dinner and the mounds of sweet potatoes and pumpkin pie that will soon be happily in your stomach? ④ Well, not really. ⑤ Thanksgiving is a good place to start for taking inventory of all the things for which you're thankful, but it's by no means the finish line. ⑥ When you have an average day that's probably going to simply fade into the fabric of your life, remember to take stock — ⑦ are you thankful for that text your friend sent you that made you feel special? ⑧ What about when someone at lunch let you take the last slice of pizza? ⑨ Small, seemingly inconsequential things are the threads of thankfulness, and gratitude for those small things can be practiced every day.

*cliché 상투적 표현 **mound 더미 ***inconsequential 보잘것없는

① 여러분은 아마도 여러분의 삶에서 감사하는 태도를 취하고 긍정적인 것들에 집중하는 것의 중요성에 대해 이미 들었을 것이다. ② 하지만 그것이 진부한 상투적 표현 이상으로 무엇을 의미한다는 말인가? ③ 추수 감사절 저녁 식사와 곧 여러분의 배 속을 행복하게 해 줄 고구마와 호박파이 더미를 고맙게 여기면 충분한 것이 아닌가? ④ 글썄, 꼭 그렇지는 않다. ⑤ 추수 감사절은 여러분이 감사하는 모든 것들에 대한 목록 작성을 시작하기 좋은 기회이긴 하지만, 그것이 결코 종착점은 아니다. ⑥ 아마도 그저 삶의 짜임새 속으로 사라질 평범한 하루하루를 보낼 때, 찬찬히 살펴봐야 한다는 것을 기억하라. ⑦ 여러분을 특별하게 느끼도록 만든, 친구가 보내온 문자 메시지에 감사하는가? ⑧ 점심에 누군가가 여러분에게 마지막 피자 조각을 먹게 한 때는 어떠한가? ⑨ 작고 겉보기에 보잘것없는 일들이 감사의 실마리이고, 그러한 작은 일들에 대한 감사는 매일 실천될 수 있다.

Word List

- adopt 취하다, 받아들이다 □ attitude 태도 □ gratitude 감사 □ positive 긍정적인 □ be grateful for ~을 고맙게 여기다
- pumpkin 호박 □ place 기회 □ inventory 목록 □ by no means 결코 ~이 아닌 □ fade 사라져 가다, 희미해지다
- fabric 짜임새 □ take stock (찬찬히) 살펴보다, 점검하다 □ seemingly 겉보기에는 □ thread 실마리, 실

You've probably already heard about the importance of ❶ adapting/adopting an attitude of gratitude and focusing on the ❷ negative/positive things in your life. But what does that even mean beyond a tired cliché? Isn't it enough when you're grateful for Thanksgiving dinner and the mounds of sweet potatoes and pumpkin pie ❸ that/who will soon be happily in your stomach? Well, not really. Thanksgiving is a good place to start for taking inventory of all the things ❹ for which/of which you're thankful, but it's by no means the finish line. When you have an average day that's probably going to simply fade into the fabric of your life, remember to take stock — are you thankful for that text your friend sent you ❺ who/that made you feel special? What about when someone at lunch let you take the last slice of pizza? Small, seemingly inconsequential things are the threads of thankfulness, and gratitude for those small things can be practiced every day.

*cliché 상투적 표현 **mound 더미 ***inconsequential 보잘것없는

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

You've probably already heard about the importance of adopting an attitude of gratitude and ❶ _____ (focus) on the positive things in your life. But what does that even mean beyond a tired cliché? Isn't it enough when you're grateful for Thanksgiving dinner and the mounds of sweet potatoes and pumpkin pie that will soon be happily in your stomach? Well, not really. Thanksgiving is a good place ❷ _____ (start) for taking inventory of all the things for which you're thankful, but it's by no means the finish line. When you have an average day that's probably going to simply ❸ _____ (fade) into the fabric of your life, remember ❹ _____ (take) stock — are you thankful for that text your friend ❺ _____ (send) you that made you feel special? What about when someone at lunch let you ❻ _____ (take) the last slice of pizza? Small, seemingly inconsequential things are the threads of thankfulness, and gratitude for those small things can be practiced every day.

*cliché 상투적 표현 **mound 더미 ***inconsequential 보잘것없는

• 유형 3 우리말에 맞게 빈칸에 알맞은 말을 쓰시오.

You've probably already heard about the importance of adopting a(n) ❶ _____ (감사의 자세) and focusing on the positive things in your life. But what does that even mean beyond a tired cliché? Isn't it enough when you're grateful for Thanksgiving dinner and the mounds of sweet potatoes and pumpkin pie that will soon be happily in your stomach? Well, not really. Thanksgiving is a good place to start for taking inventory of all the things for which you're thankful, but it's ❷ _____ (결코 ~가 아니다) the finish line. When you have an ❸ _____ (평범한 하루) that's probably going to simply fade into the fabric of your life, remember to ❹ _____ (잘 살펴보다) — are you thankful for that text your friend sent you that made you feel special? What about when someone at lunch let you take the last slice of pizza? Small, seemingly inconsequential things are the threads of thankfulness, and gratitude for those small things can be practiced every day.

Test 3

6번

소재: 평생 학습의 중요성

정답 및 해설 p.59

① The emergence of life-long learning is one major development in Europe which is thought to have an impact on educational policies and teaching-learning trends across Europe, and the world. ② It relates to the awareness of the need to bridge the gap between education systems and the socio-economic needs in particular. ③ Education is believed to work more and be directed towards exploring and catering for new emerging needs. ④ In 1996, Europe celebrated The European Year of Life-long Learning, stressing the need to respond to fears about competitiveness, innovations in technology and capitalist globalisation. ⑤ Substantial changes in education systems are expected to cater for the new needs. ⑥ Responding to change has become a must and, as often stated by policy-makers, there is a mounting urgency to adapt and upgrade education to be able to respond to the changing global economic, social and political environment.

① 평생 학습의 출현은 유럽과 전 세계에 걸쳐 교육 정책과 교수-학습의 동향에 영향을 미치는 것으로 여겨지는 유럽에서의 한 가지 주요한 발전이다. ② 그것은 교육 제도와 특히 사회·경제적 요구 사이의 격차를 메울 필요성에 대한 인식과 관련이 있다. ③ 교육은 새롭게 발생하는 요구를 탐색하고 충족하는 방향으로 더 노력하며 그러한 방향으로 향한다고 여겨진다. ④ 1996년에 유럽은 유럽 평생 학습의 해를 기념하며, 경쟁력, 기술 혁신, 그리고 자본주의의 세계화에 대한 우려에 대응할 필요성을 강조했다. ⑤ 교육 제도에서의 상당한 변화가 그 새로운 요구를 충족할 것으로 기대된다. ⑥ 변화에 대한 대응은 필수 사항이 되었고, 정책 입안자들이 종종 표명했듯이, 변화하는 세계의 경제, 사회, 정치 환경에 대응할 수 있도록 교육을 조정하고 개선해야 할 급박함이 증가하고 있다.

*cater for ~을 충족하다

Test 3

8번

소재: 폴란드의 영화감독 Andrzej Wajda

정답 및 해설 p.59

① Andrzej Wajda (born in 1926) is the symbol and main director of the new generation of Polish film-makers. ② The son of a Polish army officer, he grew up in an atmosphere of patriotism and romantic heroism. ③ In 1944, at the age of 18, he was drawn to the resistance movement and served in the ranks of the Armia Krajowa (AK), the Home Army. ④ After the Second World War, he studied fine art before enrolling at the brand new Lodz Film School. ⑤ After making a few short films, he became Aleksander Ford's assistant director. ⑥ In 1957, his second feature film, *Kanal*, brought him international public recognition. ⑦ Since then, he has continued to increase his international audience with a series of major films that tackle the problems facing modern-day Poland. ⑧ As well as being the most famous director of Polish cinema, he was the most typically Polish, constantly drawing on the nation's collective memory and reworking it with a powerful sense of film direction. ⑨ In so doing, he did not simply describe the events of his era; he actively stirred his homeland's historical conscience.

*patriotism 애국심

① Andrzej Wajda(1926년생)는 폴란드의 신세대 영화 제작자들의 상징이자 으뜸가는 감독이다. ② 폴란드 육군 장교의 아들이어서, 그는 애국심과 낭만적 영웅주의 분위기 속에서 성장했다. ③ 1944년에, 18세의 나이로, 그는 저항 운동에 매료되어 Armia Krajowa(AK), 즉 국내군의 사병으로 복무했다. ④ 제2차 세계 대전이 끝난 후에, 그는 신설된 Lodz Film School에 입학하기 전에 순수 미술을 공부했다. ⑤ 몇 편의 단편 영화를 만든 후에, 그는 Aleksander Ford의 조감독이 되었다. ⑥ 1957년, 그의 두 번째 장편 영화인 *Kanal*은 그에게 국제적인 대중적 인정을 가져다주었다. ⑦ 그 이후, 그는 현대 폴란드가 직면하고 있는 문제들을 다루는 일련의 주요 영화들로 자신의 국제 관객들을 계속해서 증가시켰다. ⑧ 그는 폴란드 영화의 가장 유명한 감독이었을 뿐만 아니라, 끊임없이 국가의 집단 기억을 활용하여 강력한 영화 연출 감각으로 그것을 재작업하였기 때문에 가장 전형적으로 폴란드인다운 감독이었다. ⑨ 그렇게 하면서, 그는 자기 시대의 사건들을 묘사했을 뿐만 아니라, 고국의 역사적 양심을 적극적으로 자극했다.

Word List

- director 감독 □ generation 세대 □ atmosphere 분위기 □ heroism 영웅주의 □ resistance 저항
- serve in the ranks 사병으로 복무하다 □ enroll 입학[등록]하다 □ brand new 신설의, 완전히 새로운 □ assistant director 조감독
- feature film 장편 영화 □ recognition 인정 □ tackle 솔직하게 말하다 □ constantly 계속해서 □ draw on ~을 활용하다
- collective 집단의 □ era 시대 □ stir 자극하다 □ conscience 양심

Test 3

9번

소재: 데스크톱 기기와 휴대 전화로 생성된,
지역별 세계 인터넷 트래픽 점유율

정답 및 해설 p.60

Global Internet Traffic Share by Platform per Region in 2021 (in %)

- The above chart shows the global Internet traffic share that was generated with desktop devices versus mobile phones per region in 2021.
- Globally, more Internet traffic was generated with mobile phones than desktop devices, with the difference being 13 percentage points.
- Europe, North America, and Oceania generated more Internet traffic with desktop devices than with mobile phones; in particular, 56.6 percent of Internet traffic was generated by the former in Oceania.
- In contrast, more than two-thirds of Internet traffic was generated using mobile phones in Africa.
- The percentage of Internet traffic generated with desktop devices in South America was larger than that of global Internet traffic generated with the same type of device.
- The percentage point gap between Internet traffic that was generated with desktop devices and mobile phones was larger in Africa than in Asia.

① 위 도표는 2021년 지역별 데스크톱 기기 대비 휴대 전화로 생성된 세계 인터넷 트래픽 점유율을 보여 준다. ② 전 세계적으로, 데스크톱 기기보다 휴대 전화로 더 많은 인터넷 트래픽이 생성되었으며, 그 차이는 13퍼센트포인트였다. ③ 유럽, 북아메리카, 오세아니아는 휴대 전화보다 데스크톱 기기로 더 많은 인터넷 트래픽을 생성했는데, 특히 오세아니아에서는 인터넷 트래픽의 56.6퍼센트가 전자(데스크톱 기기)에 의해 생성되었다. ④ 대조적으로, 3분의 2가 넘는 인터넷 트래픽이 아프리카에서 휴대 전화를 이용하여 생성되었다. ⑤ 남아메리카에서 데스크톱 기기로 생성된 인터넷 트래픽의 비율은 동일한 종류의 기기로 생성된 전 세계 인터넷 트래픽의 비율보다 컸다. ⑥ 데스크톱 기기와 휴대 전화로 생성된 인터넷 트래픽 사이의 퍼센트포인트 차이는 아시아보다 아프리카에서 더 컸다.

Europe, North America, and Oceania generated more Internet traffic with desktop devices than with mobile phones; in particular, 56.6 percent of Internet traffic was generated by the former in Oceania. In contrast, ❷ _____ (3분의 2가 넘는) of Internet traffic was generated using mobile phones in Africa. The percentage of Internet traffic generated with desktop devices in South America was larger than that of global Internet traffic generated with ❸ _____ (동일한 종류의 기기). The percentage point gap between Internet traffic that was generated with desktop devices and mobile phones was larger in Africa than in Asia.

2023 National Women's Month Photo Contest

① We invite you to share your best photos and show us the women that inspire you with chances to win a prize.

► Theme

- ② Photos should capture the essence of the modern women — their leadership, power and decision-making.

► Submission Period

- ③ Entries will be accepted from March 12 to April 15.

► Participation

- ④ The contest is open to all amateur photographers.

► Submission Details

1. ⑤ Each participant is allowed to submit a maximum of two entries.

2. ⑥ Entries must be submitted via email at 2023wmphotocontest@pcw.com.

3. ⑦ Submissions must include the following details:

- ⑧ Name, age, mailing address, and contact number
- ⑨ Where the photo was taken (town/city/country)
- ⑩ When it was taken (must be taken during the submission period)

► Prizes

⑪ The top 12 entries will win \$500 each.

⑫ For more details, visit www.wmphotocontest.pcw.com

2023년 전국 여성의 달 사진 대회

① 여러분의 최고의 사진을 공유하고 여러분에게 영감을 주는 여성을 보여 주며 상도 받을 수 있는 기회에 여러분을 초대합니다.

► 주제

- ② 사진은 현대 여성의 본질인 지도력, 능력, 의사 결정을 포착해야 합니다.

► 제출 기간

- 출품작은 3월 12일부터 4월 15일까지 받을 예정입니다.

► 참가

- ④ 대회는 모든 아마추어 사진작가에게 열려 있습니다.

► 제출 세부 사항

1. ⑤ 각 참가자는 최대 두 개의 출품작 제출이 가능합니다.

2. ⑥ 출품작은 2023wmphotocontest@pcw.com으로 이메일을 통해 제출해야 합니다.

3. ⑦ 제출물에는 다음과 같은 세부 정보가 포함되어야 합니다.

- ⑧ 이름, 나이, 우편 주소 및 연락처
- ⑨ 사진이 촬영된 장소 (읍/시/국가)
- ⑩ 촬영 시점 (제출 기간 중 촬영해야 합니다)

► 상

- ⑪ 상위 12개 출품작이 각각 500달러를 받을 것입니다.

⑫ 더 많은 세부 정보를 원하시면, www.wmphotocontest.pcw.com 을 방문하세요.

- When it was taken (must be taken during the submission period)

▶ Prizes

The top 12 entries will win \$500 each.

For more details, visit www.wmphotocontest.pcw.com

**2023 National Women's Month
Photo Contest**

We invite you ❶ _____ (share) your best photos and show us the women that inspire you with chances ❷ _____ (win) a prize.

▶ Theme

- Photos should capture the essence of the modern women — their leadership, power and decision-making.

▶ Submission Period

- Entries will be ❸ _____ (accept) from March 12 to April 15.

▶ Participation

- The contest is open to all amateur photographers.

▶ Submission Details

1. Each participant ❹ _____ (be) allowed to submit a maximum of two entries.

2. Entries must be submitted via email at 2023wmphtocontest@pcw.com.

3. Submissions must include the following details:

- Name, age, mailing address, and contact number
- Where the photo was ❺ _____ (take) (town/city/country)
- When it was taken (must be taken during the submission period)

▶ Prizes

The top 12 entries will win \$500 each.

Creative Craft Camp

① Want to get your child off the couch this summer? ② Then sign them up for this fun camp where they can release their creative artistic energy!

▶ Location:

Memorial Art Center

▶ Participation Fee:

- ③ \$70 per child per session (supplies & snacks included)
- ④ Sibling discounts are available (10% discount on each additional child).

▶ Age Groups and Times:

- ⑤ Ages 5-8 meet from 9 a.m. to 11:30 a.m.
- ⑥ Ages 9-12 meet from 1 p.m. to 3:30 p.m.

▶ Session Dates and Themes:

- ⑦ Session A: July 4th-July 8th / paper crafts and tile mosaics
- ⑧ Session B: July 11th-July 15th / costume jewelry and plastic crafts
- ⑨ Session C: July 18th-July 22nd / floral crafts and oil painting

▶ Additional Information:

- ⑩ Participants should wear clothes that they don't mind getting dirty.
- ⑪ Space is limited to 8 per group, so register online now at www.creativecraftcamp.org.

⑫ For questions, email eileen@craftcamp.org or call 479-495-6002.

*sibling 형제자매 **floral 꽃의

창의 공예 캠프

① 올여름 아이를 소파에서 벗어나게 하고 싶으세요? ② 그럼 아이들을 자신의 창의적인 예술 에너지를 발산할 수 있는 이 재미있는 캠프에 등록시키세요!

▶ 장소:

- Memorial Art Center

▶ 참가비:

- ③ 각 수업에 대해 아동 1인당 70달러(물품 및 간식 포함)
- ④ 형제자매 할인이 가능합니다(추가 등록 아동마다 10퍼센트 할인).

▶ 연령별 그룹 및 시간:

- ⑤ 5~8세는 오전 9시부터 오전 11시 30분까지 만납니다.
- ⑥ 9~12세는 오후 1시부터 오후 3시 30분까지 만납니다.

▶ 수업 날짜 및 주제:

- ⑦ Session A: 7월 4일~7월 8일 / 종이 공예와 타일 모자이크
- ⑧ Session B: 7월 11일~7월 15일 / 모조 장신구와 플라스틱 공예
- ⑨ Session C: 7월 18일~7월 22일 / 꽃공예와 유화

▶ 추가 정보:

- ⑩ 참가자는 더러워지는 것을 걱정할 필요가 없는 옷을 입어야 합니다.
- ⑪ 공간이 그룹별 8명으로 제한되므로, 지금 www.creativecraftcamp.org에 서 온라인으로 등록하세요.

⑫ 문의 사항은 eileen@craftcamp.org로 이메일을 보내시거나 479-495-6002로 전화하시면 됩니다.

Test 3

12번

소재: 화폐로 사용될 수 있는 물체의 속성

정답 및 해설 p.60

① The idea that money replaced barter by making transactions more efficient allows one to see the economy as something in which money is nothing more than a passive mediator — a “lubricant in exchange.” ② Money objects such as coins are not fundamentally different from commodities such as weights of gold: the stamp is merely something to “save the trouble of weighing” (Aristotle) and “a great convenience” (Ragan and Lipsey) but has no unique importance of its own. ③ The Canadian economist Todd Hirsch quipped that “you could use chickens as money” as long as people are ready to accept them as a means of exchange. ④ However, the fact that many things can serve as money does not tell us much about money, any more than the number of actors who have played Hamlet tells us about Shakespeare’s play. ⑤ What counts is the properties of objects at the time when they are used as money, not when they are offstage.

*barter 물물 교환 **lubricant 윤활유 ***quip 재치 있게 말하다

① 화폐가 거래를 더 효율적이게 함으로써 물물 교환을 대체했다는 생각은 경제를 화폐가 수동적인 매개물, 즉 ‘교환의 윤활유’에 지나지 않는 어떤 것(체제)으로 보게 한다. ② 동전과 같은 화폐로 쓰이는 물체는 (무게가 정해진) 금덩어리 같은 상품과 근본적으로 다르지 않은데, (동전에) 눌러 새긴 그 표시는 단지 ‘무게를 재는 수고를 덜기 위한 것’(Aristotle)과 ‘대단히 편리한 것’(Ragan and Lipsey)일 뿐 그 자체의 고유한 중요성은 없다. ③ 캐나다의 경제학자 Todd Hirsch는 사람들이 닭을 교환 수단으로 받아들일 준비가 되어 있는 한 “여러분은 닭을 화폐로 사용할 수도 있을 것이다.”라고 재치 있게 말했다. ④ 하지만, Hamlet 역을 한 배우의 수가 우리에게 Shakespeare의 연극에 대해 말해 주지 않듯이, 많은 것이 화폐의 역할을 할 수 있다는 사실도 우리에게 화폐에 대해 많은 것을 말해 주지 않는다. ⑤ 중요한 것은 물체가 무대 뒤에 있을(사용되지 않을) 때가 아니라 화폐로 사용될 당시 그 물체의 속성이다.

Word List

- replace 대신하다 □ transaction 거래 □ efficient 효율적인 □ nothing more than ~에 불과한, ~에 지나지 않는
- passive 수동적인 □ mediator 매개물, 중개자 □ object 물체, 사물 □ fundamentally 근본적으로 □ commodity 상품, 물품
- stamp 눌러 새긴 표시, 소인 □ weigh 무게를 재다 □ convenience 편리 □ unique 고유한, 독특한 □ serve as ~의 역할을 하다
- not... any more than ~ ~하지 않듯이 ...하지 않다 □ count 중요하다 □ property 속성, 성질 □ offstage 무대 뒤의, 비공식적인

Test 3

14번

소재: 문자 형태의 의사소통이 미치는 영향

정답 및 해설 p.60

① The consequences of written forms of communication are quite extensive. ② The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies to endure through time by creating durable texts which could be handed down and referred to. ③ This allowed for the control of knowledge by central hierarchies (such as a priesthood). ④ But the invention of more transportable media, such as papyrus, allowed for centralized control to expand over a wider area. ⑤ Writing changes the relationship between a communicator and the person with whom he or she is communicating. ⑥ Audiences now can be remote in time and space, and the communicator can guarantee that the message received is identical with the one sent, without having to rely on the memory of a messenger. ⑦ This means that a communicator can reach a much wider and disparate audience. ⑧ To the extent that society was no longer dependent upon face-to-face communication, societies could expand their boundaries to encompass vast spaces and diverse populations. ⑨ This was, as Innis argues, the beginning of empire.

*hierarchy 지배 계층 **disparate 이질적인 ***encompass 포함하다

① 문자 형태의 의사소통이 미치는 영향은 매우 광범위하다. ② 예를 들어, 캐나다의 경제학자이자 의사소통 역사가인 Harold Innis는 문자 소통을 통해 사회가 (다음 세대에) 물려주고 참조할 수 있는 내구성 있는 문서를 만들어냄으로써 어떻게 오랜 시간 동안 지속될 수 있었는지 설명한다. ③ 이것은 (성직자와 같은) 중앙 지배 계층에 의한 지식 통제를 가능하게 했다. ④ 하지만 파피루스와 같은 더 이동 가능한 매체의 발명은 중앙 집중식 통제가 더 넓은 영역으로 확장되도록 했다. ⑤ 글은 의사 전달자와 그 사람이 의사소통하고 있는 사람 사이의 관계를 변화시킨다. ⑥ 이제 글을 읽는 사람은 시공간에서 멀리 떨어져 있을 수 있고, 의사 전달자는 전해주는 사람의 기억에 의존할 필요 없이 수신 메시지가 송신 메시지와 같다는 것을 확인할 수 있다. ⑦ 이것은 의사 전달자가 훨씬 더 광범위하고 이질적인 독자에게 도달할 수 있다는 것을 의미한다. ⑧ 사회가 더 이상 대면 의사소통에 의존하지 않을 정도로, 사회는 그것의 경계를 확대하여 방대한 공간과 다양한 사람들을 포함할 수 있었다. ⑨ Innis가 주장하기를, 이것이 제정의 시작이었다.

Word List

- consequence 영향, 결과 □ form 형태 □ communication 의사소통 □ extensive 광범위한 □ durable 내구성 있는
- hand down ~을 물려주다 □ refer to ~을 참조하다, ~을 언급하다 □ priesthood 성직자, 사제 □ transportable 이동[운반] 가능한
- centralized 중앙 집권화된 □ expand 확장되다, 확대하다 □ remote 멀리 떨어진 □ guarantee 확인하다, 보장하다
- identical 같은, 동일한 □ to the extent that ~할 정도까지 □ boundary 경계 □ diverse 다양한 □ empire 제정, 제국

• 유형 1 네모 안에서 옳은 어법·어휘를 고르시오.

The consequences of written forms of communication are quite extensive. The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies to endure through time by creating durable texts ❶ what/which could be handed down and referred to. This allowed for the control of knowledge by central hierarchies (such as a priesthood). But the invention of more ❷ transparent/transportable media, such as papyrus, allowed for centralized control to expand over a wider area. Writing changes the relationship between a communicator and the person with ❸ who/whom he or she is communicating. Audiences now can be remote in time and space, and the communicator can guarantee ❹ that/which the message received is identical with the one sent, without having to rely on the memory of a messenger. This means that a communicator can reach a much wider and disparate audience. To the extent that society was no longer dependent upon face-to-face communication, societies could ❺ expand/reduce their boundaries to encompass vast spaces and diverse populations. This was, as Innis argues, the beginning of empire.

*hierarchy 지배 계층 **disparate 이질적인 ***encompass 포함하다

• 유형 2 괄호 안의 동사를 알맞은 형태로 쓰시오.

The consequences of written forms of communication are quite extensive. The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies ❶ _____ (endure) through time by creating durable texts which could be handed down and referred to. This allowed for the control of knowledge by central hierarchies (such as a priesthood). But the invention of more transportable media, such as papyrus, allowed for centralized control ❷ _____ (expand) over a wider area. Writing changes the relationship between a communicator and the person with whom he or she is communicating. Audiences now can be remote in time and space, and the communicator can guarantee that the message ❸ _____ (receive) is identical with the one sent, without ❹ _____ (have) to rely on the memory of a messenger. This means that a communicator can reach a much wider and disparate audience. To the extent that society was no longer dependent upon face-to-face communication, societies could expand their boundaries ❺ _____ (encompass) vast spaces and diverse populations. This was, as Innis argues, the beginning of empire.

소재: 인공지능 기반의 제품 생산의 한계

정답 및 해설 p.61

① Radiology, and in general medical imaging, is one of the areas where A.I. is advancing fast: “In many ways, deep learning can mirror what trained radiologists do, ② that is, identify image parameters but also weigh up the importance of these parameters on the basis of other factors to arrive at a clinical decision.” ③ Therefore some companies only build an A.I.-based product to outcompete the rest. ④ This is common, but what normally happens is that the high end of the market, the part that is more difficult, still needs to be done by humans because the diagnosis by automation alone is not conclusive and may even require skillful interaction between the diagnoser and the patient. ⑤ Therefore these companies need a dual structure in which most of the routine work is replaced but still require critical human skills to handle the remaining tasks — those also being the most expensive part of the workforce. ⑥ This has two implications. ⑦ If the company itself is operating on this business model, its scalability is still limited, and its return on investment reduced.

*image parameter 영상 매개 변수 **diagnosis 진단, 식별 ***scalability 확장성

① 방사선학, 그리고 일반적으로 의료 영상은 인공지능이 빠르게 발전하는 분야 중 하나인데, “여러 면에서 딥 러닝은 숙련된 방사선 전문의가 하는 일을 그대로 할 수 있다. ② 즉, 영상 매개 변수를 확인할 수 있을 뿐만 아니라 임상적 판단에 도달하기 위해 기타 요인들에 기초하여 이러한 매개 변수의 중요성을 평가할 수 있다.” ③ 따라서 몇몇 회사는 나머지와 경쟁에서 이기기 위해 인공지능 기반의 제품만을 개발한다. ④ 이것이 흔한 일이지만, 보통 일어나는 일은 시장의 고급 분야, 즉 더 어려운 부분은 자동화에 의한 진단만으로는 확실하지 않으므로 여전히 사람이 해야 하며, 진단자와 환자 사이의 숙련된 상호 작용까지도 필요로 할 수도 있다는 것이다. ⑤ 따라서 이러한 기업들은 대부분의 일상적인 일이 대체되는 이중 구조가 필요하지만 남아 있는 업무를 처리하기 위해 중요한 인간 기술을 여전히 필요로 하는데, 그것은 또한 노동력에서 가장 돈이 많이 드는 부분이기도 하다. ⑥ 이것은 두 가지 결과를 갖는다. ⑦ 기업 자체가 이러한 기업 모형으로 운영한다면, 그것의 확장성은 여전히 제한적이며, 그것의 투자 수익은 감소한다.

Word List

- radiology 방사선학 □ in general 일반적으로 □ advance 발전하다 □ mirror 반영하다 □ identify 확인하다
- weigh up 평가하다 □ factor 요인 □ clinical 임상의 □ outcompete 경쟁에서 이기다 □ high end 고급, 최고
- automation 자동화 □ conclusive 확실한, 결정적인 □ interaction 상호 작용 □ dual 이중의, 두 가지의
- routine 일상적인, 반복적인 □ workforce 노동력 □ implication 결과, 영향 □ return on investment 투자수익

Emotional empathy, ❸ _____ (반면에), is far more reflexive, an almost ❹ _____ (본능적 반응) that seems to arise from much more physiological processes. It allows us to share ❺ _____ (어느 정도는) in another's emotional state. In considering the possible origins of both forms of empathy, it seems more likely that emotional empathy preceded cognitive empathy. In fact, without emotional empathy existing first, it's challenging to see how theory of mind and self-awareness could have come about at all.

Test 3

24~25번

소재: 바이오 연료의 빛과 그늘

정답 및 해설 p.62

① Gasoline and electricity aren't the only ways to power a car. ② Biofuels also offer promise for future modes of transportation. ③ Made from organic matter such as corn, sugar beets, and potatoes or from vegetable oils and fats, biofuels are designed to supplement or replace gasoline or diesel in cars. ④ Like fossil fuels, biofuels, such as ethanol, discharge a great deal of carbon as they burn. ⑤ But the new crops continually planted to keep up the production of biofuels absorb much of this carbon. ⑥ How these crops are handled determines how effective biofuels actually are. ⑦ If a great deal of fossil fuel is used in fertilizing, harvesting, and processing the crops and then transporting the final product, much of the benefit is lost. ⑧ In 2007, the US Congress passed the Energy Independence and Security Act requiring that biofuel production increase from 4.7 billion gallons in that year to 36 billion gallons by 2022. ⑨ Based on the bill's mandate, more than 2.8 million additional acres nationwide were given over to cropland for biofuels between 2008 and 2016. ⑩ But this meant the loss of many wetlands, prairies, and forests. ⑪ Carbon held in the trees, roots, plants, and soils of these areas was released into the air. ⑫ Many species of wildlife, including butterflies, bees, and other animals that pollinate plants lost their habitats. ⑬ Growing crops for biofuels also took over lands that had been used for food crops. ⑭ So the cost of food rose. ⑮ Newer or more advanced biofuels, made from nonfood plant parts or animal waste products, reduce the competition for land use.

① 휘발유와 전기가 자동차에 동력을 공급하는 유일한 방법은 아니다. ② 바이오 연료 또한 미래 교통 방식에 대한 가능성을 제공한다. ③ 옥수수, 사탕무, 그리고 감자와 같은 유기물이나 식물성 기름과 지방으로 만들어지는 바이오 연료는 자동차의 휘발유나 디젤유를 보충하거나 대체하도록 고안된다. ④ 화석 연료와 마찬가지로 에탄올과 같은 바이오 연료도 연소하면서 많은 양의 탄소를 배출한다. ⑤ 그러나 바이오 연료의 생산을 유지하기 위해 지속적으로 심어지는 새로운 작물들이 이러한 탄소의 많은 부분을 흡수한다. ⑥ 이 작물들이 어떻게 다루어지느냐에 따라 바이오 연료가 얼마나 실제로 효과가 있는지가 결정된다. ⑦ 만약 많은 양의 화석 연료가 작물에 비료를 주고, 수확하고, 가공하고, 그런 다음, 최종 생산물을 운송하는 데 사용된다면, 바이오 연료의 많은 이점이 사라진다. ⑧ 2007년 미국 의회는 바이오 연료 생산을 그 해의 47억 갤런에서 2022년까지 360억 갤런으로 늘리도록 요구하는 에너지 독립 및 보호법을 통과시켰다. ⑨ 그 법안의 명령에 근거하여, 2008년에서 2016년 사이에 전국적으로 280만 에이커가 넘는 추가 면적이 바이오 연료의 경작지로 넘어갔다. ⑩ 그러나 이것은 많은 습지, 대초원, 그리고 숲의 손실을 의미했다. ⑪ 이 지역의 나무, 근채류, 초목, 토양에 들어 있는 탄소가 공기 중으로 방출되었다. ⑫ 나비, 꿀벌, 그리고 식물을 수분시키는 다른 동물들을 포함하여, 많은 종의 야생 동물들이 자신들의 서식지를 잃었다. ⑬ 바이오 연료를 위한 작물 재배는 또한 식량 작물을 위해 사용되었던 땅도 차지했다. ⑭ 그래서 식품 가격이 올라갔다. ⑮ 비식용 식물의 일부나 동물성 폐기물로 만드는 더 새로운 또는 더 발전된 바이오 연료는 토지 사용 경쟁을 감소시킨다.

Word List

- electricity 전기 □ power 동력을 공급하다 □ biofuel 바이오 연료 □ mode 방식 □ transportation 교통, 운송, 수송
- organic matter 유기물 □ sugar beet 사탕무 □ fat 지방 □ supplement 보충하다 □ ethanol 에탄올 □ discharge 배출하다
- crop 작물 □ keep up 유지하다 □ absorb 흡수하다 □ handle 다루다 □ determine 결정하다 □ fertilize 비료를 주다
- harvest 수확하다 □ transport 운송하다 □ nationwide 전국적으로 □ cropland 경작지 □ wetland 습지
- species (생물의) 종 □ wildlife 야생 동물 □ habitat 서식지 □ take over ~을 차지하다

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

It has come to my attention that many in the office have been spending time on a popular online games website. According to a recent article, the estimated daily cost of people collectively playing these games instead of working is over \$120 million. If these ① estimates are applied to our 600 office employees, this results in a nearly \$700 weekly loss. This is a conservative estimate considering the ② extensive discussions that occur about beating the office's current highest game score. The extra cost quickly ③ adds up. Of course, I don't want you to view our organization as a place of ④ loose rules. I want to encourage a fun and competitive environment, and I recognize that the company certainly will not be ⑤ profitable if you are unhappy or dissatisfied with your jobs. This is just a reminder to be careful with your use of company time.

02 Test 3 2번

'I'에 관한 다음 글의 내용과 일치하지 않는 것은?

It was the day when I had the opportunity to attend my first board meeting. I arrived early. It was a great honor that I had been asked to join them as a board member. Their mission was important. The other members were powerful, highly respected women from across the nation. I had heard about their work and their reputations for years. I was finally going to get a chance to meet them. As I walked into the meeting room, someone from the organization was already there, getting ready for the meeting. Caterers were bringing in delicious treats and hot coffee. I looked at the big mahogany table and quickly saw that name tags and binders were already being arranged and placed on the table. I saw my name

— with a handwritten note from the president — welcoming me to my first meeting. Quite frankly, I couldn't believe what my eyes were seeing!

- ① 이사로서 이사회에 참석하게 된 것을 영광으로 여겼다.
- ② 전국 각지 출신의 훌륭한 여성들을 만날 기회를 가지게 되었다.
- ③ 회의실에 들어섰을 때 회의 준비를 하고 있는 사람을 아무도 보지 못했다.
- ④ 출장 연회 업체 직원들이 음식과 커피를 들여오고 있는 것을 보았다.
- ⑤ 이사회가 시작되기 전, 회의실에서의 상황을 직접 겪고 있었지만 실감할 수 없었다.

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Let's say you're storing a working microwave in your basement. You're not currently using the microwave; instead, it's collecting dust. Applying the concept of ① utility informs us that the microwave has no true value to you or anyone else because it isn't being used right now for its intended purpose (which is, of course, to warm food). But if you donated or sold that microwave to someone who could use it, you would immediately ② restore its value while also saving the recipient from having to purchase a brand new one. Many consumers balk at the idea of donating or selling perfectly ③ decent items, and that's understandable, as items cost money. But thanks to constant product turnover and innovation, electronics and appliances quickly become ④ outdated. Giving that microwave to someone in your community who needs it to warm food right now ⑤ increases the chances of finite resources, including fossil fuels, copper, other metals, and water, being extracted from the earth to make another microwave.

*balk 멈칫거리다, 꺼리다 **copper 구리

04 Test 3 4번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

On closer inspection, however, urban sprawl is not mindless at all.

Think about what is inaccurately described as mindless sprawl in our physical environment. We condemn the unstoppable spread of low-density suburbs over millions of acres of formerly virgin land. (①) We worry about its environmental impact, about the obesity in people that it fosters, and about the other social problems that come in its wake. (②) But nobody seems to have designed urban sprawl, it just happens — or so it appears. (③) There is nothing inevitable about its development. (④) Sprawl is the result of zoning laws designed by legislators, low-density buildings designed by developers, marketing strategies designed by ad agencies, tax breaks designed by economists, credit lines designed by banks, geomatics designed by retailers, data-mining software designed by hamburger chains, and automobiles designed by car designers. (⑤) The interactions between all these systems and human behavior are complicated and hard to understand — but the policies themselves are not the result of chance. “Out of control” is an ideology, not a fact.

*sprawl (도시의) 스프롤 현상(무계획적인 팽창 현상) **obesity 비만
***geomatics 지형정보학

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The emergence of life-long learning is one major development in Europe which is thought to have an impact on educational policies and teaching-learning trends across Europe, and the world. It relates to the awareness of the need to bridge the gap between education systems and the socio-economic needs in particular. Education is believed to work more and be directed towards exploring and catering for new emerging needs. In 1996, Europe celebrated The European Year of Life-long Learning, stressing the need to respond to fears about competitiveness, innovations in technology and capitalist globalisation. Substantial changes in education systems are expected to cater for the new needs. Responding to change has become a must and, as often stated by policy-makers, there is a mounting urgency to adapt and upgrade education to be able to respond to the changing global economic, social and political environment.

*cater for ~을 충족하다

The rise of life-long learning has a(n) _____ (A) _____ on educational policies around the world, showing an awareness of the need to narrow the gap between education systems and socio-economic needs, and education must be adapted _____ (B) _____ to respond to the changing global economic, social and political environment.

(A)

(B)

- | | | |
|--------------|-------|--------------|
| ① impact | | objectively |
| ② assumption | | prudently |
| ③ impact | | quickly |
| ④ assumption | | slowly |
| ⑤ strategy | | subjectively |

다음 글에서 전체 흐름과 관계 없는 문장은?

I can't imagine a rat working for a shiny medal to hang around its neck or an inscribed plaque to decorate its cage. Appealing as it sounds having the title of "Laboratory Rat of the Year" or "Most Creative Path through a Maze," the rats just aren't motivated by such distinctions. ① Instead, laboratory rats want the real deal — food, safety, social contact, even some gentle stroking from an experimenter. ② In fact, award ceremonies are distinctly human, as I know no other animal that will work for trophies or certificates. ③ Even laboratory rats have a right to life and are justified in protecting themselves. ④ Other animals learn to associate verbal expressions with the subsequent presentation of tangible rewards such as food, but medals, ribbons, and awards are specific to human motivation. ⑤ Awards are designed to distinguish one individual from a group of individuals, a goal that doesn't register for most nonhuman animals.

*inscribed plaque 이름이 새겨진 명패 **maze 미로 ***tangible 유형의

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Andrzej Wajda (born in 1926) is the symbol and main director of the new generation of Polish filmmakers. The son of a Polish army officer, he grew up in an atmosphere of patriotism and romantic heroism. In 1944, at the age of 18, he ① was drawn to the resistance movement and served in the ranks of the Armia Krajowa (AK), the Home Army. After the Second World War, he studied fine art before ② enrolling at the brand new Lodz Film School. After making a few short films, he became Aleksander Ford's assistant director. In 1957, his second feature film, *Kanal*, brought him international public recognition. Since then, he has continued to increase his international audience with a series of major films that ③ tackle the problems facing modern-day Poland. As well as being the most famous director of Polish cinema, he was the most typically Polish, constantly drawing on the nation's collective memory and ④ reworked it with a powerful sense of film direction. In ⑤ so doing, he did not simply describe the events of his era; he actively stirred his homeland's historical conscience.

*patriotism 애국심

2023 National Women's Month Photo Contest에 관한 다음 안내문의 내용과 일치하지 않는 것은?

2023 National Women's Month Photo Contest

We invite you to share your best photos and show us the women that inspire you with chances to win a prize.

- ▶ Theme
 - Photos should capture the essence of the modern women — their leadership, power and decision-making.
- ▶ Submission Period
 - Entries will be accepted from March 12 to April 15.
- ▶ Participation
 - The contest is open to all amateur photographers.
- ▶ Submission Details
 1. Each participant is allowed to submit a maximum of two entries.
 2. Entries must be submitted via email at 2023wmphotocontest@pcw.com.
 3. Submissions must include the following details:
 - Name, age, mailing address, and contact number
 - Where the photo was taken (town/city/country)
 - When it was taken (must be taken during the submission period)
- ▶ Prizes

The top 12 entries will win \$500 each.

For more details, visit www.wmphotocontest.pcw.com.

- ① 금번 사진 콘테스트는 훌륭한 현대 여성상을 반영한 것이어야 한다.
- ② 출품 기간에 제한이 없고 대회는 모든 아마추어 사진작가에게 참가 기회가 주어진다.
- ③ 출품작은 이메일을 통해 제출해야 한다.
- ④ 참가자당 출품작 개수와 촬영 시점에 제한이 있다.
- ⑤ 상위 12개의 출품작이 각각 500달러의 상금을 받게 된다.

Creative Craft Camp에 관한 다음 안내문의 내용과 일치하지 않는 것은?

Creative Craft Camp

Want to get your child off the couch this summer? Then sign them up for this fun camp where they can release their creative artistic energy!

- ▶ Location:

Memorial Art Center
- ▶ Participation Fee:
 - \$70 per child per session (supplies & snacks included)
 - Sibling discounts are available (10% discount on each additional child).
- ▶ Age Groups and Times:
 - Ages 5–8 meet from 9 a.m. to 11:30 a.m.
 - Ages 9–12 meet from 1 p.m. to 3:30 p.m.
- ▶ Session Dates and Themes:
 - Session A: July 4th–July 8th / paper crafts and tile mosaics
 - Session B: July 11th–July 15th / costume jewelry and plastic crafts
 - Session C: July 18th–July 22nd / floral crafts and oil painting
- ▶ Additional Information:
 - Participants should wear clothes that they don't mind getting dirty.
 - Space is limited to 8 per group, so register online now at www.creativecraftcamp.org.

For questions, email eileen@craftcamp.org or call 479–495–6002.

*sibling 형제자매 **floral 꽃의

- ① 아이들의 창의적 예술 에너지를 발산할 수 있는 캠프이다.
- ② 각 수업에 대한 수업료는 1인당 70달러이며 물품과 간식이 포함된다.
- ③ 형제자매 할인이 가능하여 추가 등록이 되면 모두 10퍼센트씩 할인해 준다.
- ④ 연령별로 수업 시간이 다르며 수업별 진행 기간이 다르다.
- ⑤ 그룹별 제한 인원이 있으며 온라인으로 등록을 진행한다.

12 Test 3 12번

다음 글의 주제로 가장 적절한 것은?

The idea that money replaced barter by making transactions more efficient allows one to see the economy as something in which money is nothing more than a passive mediator — a “lubricant in exchange.” Money objects such as coins are not fundamentally different from commodities such as weights of gold: the stamp is merely something to “save the trouble of weighing” (Aristotle) and “a great convenience” (Ragan and Lipsey) but has no unique importance of its own. The Canadian economist Todd Hirsch quipped that “you could use chickens as money” as long as people are ready to accept them as a means of exchange. However, the fact that many things can serve as money does not tell us much about money, any more than the number of actors who have played Hamlet tells us about Shakespeare’s play. What counts is the properties of objects at the time when they are used as money, not when they are offstage.

*barter 물물 교환 **lubricant 윤활유 ***quip 재치 있게 말하다

- ① properties of coins and gold as commodities
- ② the use of chickens as a means of exchange
- ③ the importance of the properties of objects when used as money
- ④ the concept of barter and its replacement by money
- ⑤ the basic difference between the barter and money system

13 Test 3 13번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Happiness can be brief. Remember how great it felt the last time you got a raise? Do you still feel the same excitement about it today? Probably not. Psychologists have long noted the human tendency to psychologically adapt to new circumstances. Something that initially makes one feel happy soon comes to feel like the norm. The sense of happiness fades, and an urge to acquire the next bigger or better thing takes hold again. This can make the pursuit of happiness feel like walking on a treadmill, where you have to keep working to stay in the same place — and, in fact, this cycle has been called the “hedonic treadmill.” For example, you may feel happy to buy a house. But the euphoria begins to fade as you see how much work it needs. Upgrading the kitchen feels good, but then the bathroom looks outdated. The pleasure of accomplishing one task _____ as the desire for the next improvement arises.

*hedonic treadmill 쾌락의 쳇바퀴 **euphoria 행복감, 희열

- ① fades quickly
- ② increases swiftly
- ③ is expanded slowly
- ④ is strengthened normally
- ⑤ goes up and down rapidly

14 Test 3 14번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

The consequences of written forms of communication are quite extensive. The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies to endure through time by creating durable texts which could be handed down and referred to. This allowed for the control of knowledge by central hierarchies (such as a priesthood). But the invention of more transportable media, such as papyrus, allowed for centralized control to expand over a wider area. Writing changes the relationship between a communicator and the person with whom he or she is communicating. Audiences now can be remote in time and space, and the communicator can guarantee that the message received is identical with the one sent, without having to rely on the memory of a messenger. This means that a communicator can reach a much wider and disparate audience. To the extent that society was no longer dependent upon face-to-face communication, societies could expand their boundaries to encompass vast spaces and diverse populations. This was, as Innis argues, the beginning of empire.

*hierarchy 지배 계층 **disparate 이질적인 ***encompass 포함하다

The invention of written communication allowed for the ____ (A) ____ of knowledge by central hierarchies and made it possible for communicators to reach to ____ (B) ____ and disparate audiences, resulting in societies' expanding their boundaries — the birth of empire.

(A)

(B)

- ① practice general
- ② regulation wider
- ③ spread unknown
- ④ specialization general
- ⑤ modification wider

15 Test 3 15번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Radiology, and in general medical imaging, is one of the areas ① where A.I. is advancing fast: "In many ways, deep learning can mirror what trained radiologists do, that is, identify image parameters but also weigh up the importance of these parameters on the basis of other factors to arrive at a clinical decision." Therefore some companies only build an A.I.-based product ② to outcompete the rest. This is common, but what normally happens is ③ that the high end of the market, the part that is more difficult, still needs to be done by humans because the diagnosis by automation alone is not conclusive and may even require skillful interaction between the diagnoser and the patient. Therefore these companies need a dual structure ④ which most of the routine work is replaced but still require critical human skills to handle the remaining tasks — those also ⑤ being the most expensive part of the workforce. This has two implications. If the company itself is operating on this business model, its scalability is still limited, and its return on investment reduced.

*image parameter 영상 매개 변수 **diagnosis 진단, 식별
***scalability 확장성

16 Test 3 16번

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

One key to understanding the living planet is to recognize that nothing about the physical world is static. The transfers of energy and the movement of matter in the physical world may be hard to see, as the cycles happen over scales that may be microscopic or vast.

- (A) On our unusually lively planet much of the flux among biological systems is accelerated and concentrated, so changes here are easier for us humans to perceive than the longer, slower cycles.
- (B) However, there really are no static elements anywhere in the universe. Changes happen through flows of energy and flows of materials, and these flows take place in regenerative patterns that are cyclical.
- (C) Mountains, continents, stars, and galaxies may appear permanent and unchanging to us but the entire universe, with us in it, is in fact constantly moving and changing, reusing and recycling, dying and regenerating, in all places and at all scales.

*flux 흐름

- ① (A) - (C) - (B) ② (B) - (A) - (C)
 ③ (B) - (C) - (A) ④ (C) - (A) - (B)
 ⑤ (C) - (B) - (A)

17 Test 3 17번

다음 글의 주제로 가장 적절한 것은?

If society is more than a collection of individuals, there must be some kind of relationship between them, and at the very least a sense of what is right and wrong behaviour. This has led legal philosophers in the natural law tradition to argue that there cannot be society without law. From this perspective, social theorists do not usually pay sufficient respect to law. It is central to everything we do, not simply as an external constraint, but because it constitutes and makes possible orderly social life. This involves taking a broad view of law, so any rule or social norm we are following, for example caring for the sick or respecting other people's property, is seen as part of law, even if lawyers or the courts are not asked to intervene, and we are not consulting legal rules. Everything in society is held together, governed and even constituted by law.

- ① role of doctors in enforcing social norms
 ② the importance of law for the existence of society
 ③ the influence of economic systems on legal systems
 ④ the evolution of legal traditions in different cultures
 ⑤ the impact of property ownership on social relationships

18 Test 3 18번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Humans interact with their surroundings with audiovisual cues and utilize their arms or legs to engage and move within this world. This seemingly ordinary ability can be extremely beneficial for those who are experiencing weakening conditions that limit movement or for individuals who are experiencing pain and discomfort either from a chronic illness or as a side effect of a treatment. A recent study, looking at the effect of immersive virtual reality (VR) for patients who had suffered from chronic stroke, found this technology to be contributing positively to the state of patients. During the VR experience, the patients are asked to grab a virtual ball and throw it back into the virtual space. For these patients, this immersive experience could act as a personal rehabilitation physiotherapist who _____, allowing for possible neuroplasticity and a gradual return of normal motor function to these regions.

*immersive 몰입형의 **rehabilitation physiotherapist 재활 물리 치료사
***neuroplasticity 신경 가소성

- ① guides patients through targeted movements to reduce pain
- ② engages their arm movement multiple times a day
- ③ monitors patients' progress and adjusts treatment plans accordingly
- ④ engages therapeutic exercises for their mental function
- ⑤ educates patients on proper body mechanics for daily activities

19 Test 3 19번

다음 글의 내용과 일치하지 않는 것은?

Empathy is generally categorized into at least two types: cognitive and emotional. These need not be experienced exclusively and can certainly influence each other. As its name implies, cognitive empathy is more consciously active in that it allows us to understand another person's mental state or perspective. It's difficult to see how this form of empathy could have come about in hominids until they had attained a certain level of self-awareness and sense of other. Emotional empathy, on the other hand, is far more reflexive, an almost instinctive response that seems to arise from much more physiological processes. It allows us to share to some degree in another's emotional state. In considering the possible origins of both forms of empathy, it seems more likely that emotional empathy preceded cognitive empathy. In fact, without emotional empathy existing first, it's challenging to see how theory of mind and self-awareness could have come about at all.

*hominid 호미니드(현대 인류의 조상인 영장류)

- ① 인지적 공감과 정서적 공감은 서로 영향을 미칠 수 있다.
- ② 인지적 공감은 다른 사람의 관점을 이해하게 해 준다.
- ③ 인지적 공감은 더 의식적으로 능동적이다.
- ④ 정서적 공감은 거의 본능적인 반응이라 훨씬 더 반사적이다.
- ⑤ 정서적 공감은 인간 진화에서 인지적 공감보다 늦게 일어났을 가능성이 높다.

20 Test 3 20번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

One telling indication of the importance of meaning for gifts is the role of money. Cash, as generalized purchasing power, can be used to buy anything. It is extremely useful. Yet however great its utility, money often performs poorly as a gift because _____. Suppose today is St. Valentine's Day, and you wish to give your sweetheart a special gift. First you think that spending \$50 on a bouquet of red roses might be nice, but then it occurs to you that flowers are not very useful and that your girlfriend might prefer something else instead of roses. So you conclude that \$50 cash would be a better gift. Wrong. Red roses symbolize romance, cash does not. Cash may be more useful, but it has the wrong meaning for a romantic relationship. On St. Valentine's Day, it makes a lousy gift.

*bouquet 꽃다발 **lousy 형편없는

- ① it has no emotional value
- ② it sends the wrong message
- ③ it is not useful for everybody
- ④ it is not preferred by children
- ⑤ it should never be given as a gift

21 Test 3 21번

다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Undoubtedly, everyone must strive for excellence because mediocrity is ① insufficient professionally and personally. During economic downturns, mediocre employees are the ② last to be laid off whereas organizations hold on for as long as possible to employees who try hard for excellence. In addition, people who do mediocre work don't get as much *personal* satisfaction as those who are ③ passionate about everything they do. However, we must all be *honest* with ourselves. The fact is that only a *few* individuals of *extraordinary* skills (physical ability, mental focus, self-discipline, and many years of daily grueling training beyond most people's capacity and willingness) earn a gold medal in the Olympics. Most athletes ④ fail to even qualify for a chance to compete at the Olympic level, simply because the available slots are *few* whereas the applicants are *many*. The same is true for the Nobel Prize and many other accomplishments that ⑤ countless people strive for but very few attain.

*mediocrity 평범 **grueling 호된, 심한 ***slot 자리

22 Test 3 22번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The evolution of human rights discourse and activism cannot be separated from political, economic, and cultural globalization. Globalization allowed human rights advocates to move beyond the primacy of the nation-state, though it by no means eliminated the state as a source and a target of activism. Globalization has contributed to the fragmentation of national and international communities by linking the local to the global. It has elevated the importance of new means of communication and information technology. Though imperfect and uneven, global human rights networks broadcast eyewitness accounts and visual images of human rights abuses, thus engaging a global audience in the campaign against offenders. Those efforts have not created an international consensus on the meaning and extent of the human rights regime, however. To the contrary, multiple groups and political constituencies continue to battle over how to define human rights, and these groups often operate in the interest of political expediency rather than moral principle. As a result, the understanding of human rights in the early twenty-first century is _____.

*fragmentation 해체, 분열 **regime 체제 ***expediency 편법

- ① leading to a broader view of human rights
- ② possibly more fragmented than ever before
- ③ definitely more encouraged than ever before
- ④ an ineffective aspect of human rights activism
- ⑤ forming a universal agreement on what constitutes human rights

23 Test 3 23번

다음 글에서 전체 흐름과 관계 없는 문장은?

When we ask students “What is science?” we often receive the same sorts of responses whether they are elementary school, middle school, high school, or college students. Students point to a biology book and say, “That is science.” Or they may give a list of courses such as physics, biology, and chemistry. With additional examination, they’ll cite the scientific method as an explanation of how science is done. ① Some people think that science is just a collection of books and courses, not a quest for knowledge that challenges preconceived notions. ② When we prompt them to draw a picture that answers the question “What does a scientist look like?” we again receive similar messages from students across the grade levels. ③ Students tend to draw a befuddled, wild-haired man in a white lab coat. ④ As we spend even more time discussing these matters, students (again from across the age and grade spectrums) explain that science is a large body of very sure facts, facts that are “discovered” by objective scientists as they study all aspects of the world, a study that is sometimes described as “prying open” the natural world as if the answers are hidden inside like a prize. ⑤ These scientists are often viewed as “lone rangers” who work in isolation and surprise the world with their discoveries after long hours of diligent work.

*befuddled 정신없는 **pry open 비집어 열다

Test 3 24~25번

[24~25] 다음 글을 읽고, 물음에 답하십시오.

Gasoline and electricity aren't the only ways to power a car. Biofuels also offer promise for future modes of transportation. Made from organic matter such as corn, sugar beets, and potatoes or from vegetable oils and fats, biofuels are designed to supplement or replace gasoline or diesel in cars. Like fossil fuels, biofuels, such as ethanol, discharge a great deal of carbon as they burn. But the new crops continually planted to keep up the production of biofuels absorb much of this carbon. How these crops are handled determines how effective biofuels actually are. If a great deal of fossil fuel is used in fertilizing, harvesting, and processing the crops and then transporting the final product,

In 2007, the US Congress passed the Energy Independence and Security Act requiring that biofuel production increase from 4.7 billion gallons in that year to 36 billion gallons by 2022. Based on the bill's mandate, more than 2.8 million additional acres nationwide were given over to cropland for biofuels between 2008 and 2016. But this meant the loss of many wetlands, prairies, and forests. Carbon held in the trees, roots, plants, and soils of these areas was released into the air. Many species of wildlife, including butterflies, bees, and other animals that pollinate plants lost their habitats. Growing crops for biofuels also took over lands that had been used for food crops. So the cost of food rose. Newer or more advanced biofuels, made from nonfood plant parts or animal waste products, reduce the competition for land use.

*mandate 명령, 지시 **prairie (북미·캐나다의) 대초원
***pollinate 수분(受粉)하다

24 윗글의 제목으로 가장 적절한 것은?

- ① Which Comes First, Food or Energy?
- ② The Age of Transition: From Fossil Fuels to Biofuels
- ③ The Multiple Environmental Impacts of Biofuels
- ④ Drawbacks Hidden in the Bright Prospect of Biofuels
- ⑤ The Relationship between Political Decision and the Biofuel Industry

25 윗글의 빈칸에 들어갈 말로 가장 적절한 것은?

- ① much of the benefit is lost
- ② much of biofuel will soon run out
- ③ time is an important factor in energy issues
- ④ political decisions will become more important
- ⑤ the government will accelerate the biofuel industry

Test 3 26-28번

[26~28] 다음 글을 읽고, 물음에 답하십시오.

(A)

The John Fleishauer family includes John, his wife, Angela, his daughter, Sylvia, and two schnauzers. The dogs are nearly the same age and are both considered miniatures, even though they are somewhat different in size. Charles is a gorgeous 23-pound male with a beautiful coat. He is tall and lean and stands like a champion, although in his heart he's still a warm, sweet little puppy. Sadie is smaller, at just ten pounds, and has a more hyper personality. (a) She loves to jump from lap to lap until she decides which one to snuggle into for some nap time.

*hyper 흥분을 잘하는 **snuggle 파고들다

(B)

But the little dog continued her sweet puppy smile, apparently hoping that Angela would forget what had just happened. Angela figured it was in a dog's nature to roam and wasn't about to punish Sadie after the fact. John fixed the fence, and he and his family planted a tree where the loose board had been. Leaving the yard was disobedient and foolish, but thanks to Angela, Sadie was protected from venturing further and reaching the busy street.

*roam 돌아다니다

(C)

One day, after the family had left for work and school, Sadie got out of the yard through a loose fence board. This was her first time to escape. Charles was too big to follow, so she was on (b) her own. Sadie's family doesn't know how long she was out. It was a half-day at the school where Angela taught, so she came home early. Their home is in a quiet neighborhood, but if it's near a very busy street. As Angela approached her house, (c) she saw a little dog barking with all it had at a windmill on their neighbor's lawn.

Her heart nearly jumped out of her chest when she realized that the silly dog was her Sadie.

(D)

Angela opened the car door and yelled for Sadie to come. Sadie stopped barking instantly, gave Angela a huge puppy smile, pranced over to the car, and jumped in. She began kissing Angela the only way (d) she knows how — all tongue. When Angela got Sadie home, she carried the dog inside and they both sat on the couch while Angela caught her breath. She could tell Sadie knew she was in trouble by the way (e) she had her ears pinned back.

*prance 경충거리며 뛰다

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

If these estimates are applied to our 600 office employees, this results in a nearly \$700 weekly loss.

It has come to my attention that many in the office have been spending time on a popular online games website. (①) According to a recent article, the estimated daily cost of people collectively playing these games instead of working is over \$120 million. (②) This is a conservative estimate considering the extensive discussions that occur about beating the office's current highest game score. (③) The extra cost quickly adds up. (④) Of course, I don't want you to view our organization as a place of strict rules. (⑤) I want to encourage a fun and competitive environment, and I recognize that the company certainly will not be profitable if you are unhappy or dissatisfied with your jobs. This is just a reminder to be careful with your use of company time.

30 Test 3 2번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

It was the day ① when I had the opportunity to attend my first board meeting. I arrived early. ② It was a great honor that I had been asked to join them as a board member. Their mission was important. The other members were powerful, highly ③ respected women from across the nation. I had heard about their work and their reputations for years. I was finally going to get a chance to meet them. As I walked into the meeting room, someone from the organization was already there, ④ got ready for the meeting. Caterers were bringing in delicious treats and hot coffee. I looked at the big mahogany table and quickly saw that name tags and binders were already being

arranged and placed on the table. I saw my name — with a handwritten note from the president — ⑤ welcoming me to my first meeting. Quite frankly, I couldn't believe what my eyes were seeing!

31 Test 3 3번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

But thanks to constant product turnover and innovation, electronics and appliances quickly become outdated.

Let's say you're storing a working microwave in your basement. (①) You're not currently using the microwave; instead, it's collecting dust. (②) Applying the concept of utility informs us that the microwave has no true value to you or anyone else because it isn't being used right now for its intended purpose (which is, of course, to warm food). (③) But if you donated or sold that microwave to someone who could use it, you would immediately restore its value while also saving the recipient from having to purchase a brand new one. (④) Many consumers balk at the idea of donating or selling perfectly decent items, and that's understandable, as items cost money. (⑤) Giving that microwave to someone in your community who needs it to warm food right now decreases the chances of finite resources, including fossil fuels, copper, other metals, and water, being extracted from the earth to make another microwave.

*balk 멈칫거리다, 꺼리다 **copper 구리

32 Test 3 4번

다음 글의 주제로 가장 적절한 것은?

Think about what is inaccurately described as mindless sprawl in our physical environment. We condemn the unstoppable spread of low-density suburbs over millions of acres of formerly virgin land. We worry about its environmental impact, about the obesity in people that it fosters, and about the other social problems that come in its wake. But nobody seems to have designed urban sprawl, it just happens — or so it appears. On closer inspection, however, urban sprawl is not mindless at all. There is nothing inevitable about its development. Sprawl is the result of zoning laws designed by legislators, low-density buildings designed by developers, marketing strategies designed by ad agencies, tax breaks designed by economists, credit lines designed by banks, geomatics designed by retailers, data-mining software designed by hamburger chains, and automobiles designed by car designers. The interactions between all these systems and human behavior are complicated and hard to understand — but the policies themselves are not the result of chance. “Out of control” is an ideology, not a fact.

*sprawl (도시의) 스프롤 현상(무계획적인 팽창 현상) **obesity 비만
***geomatics 지형정보학

- ① responsibility for the environmental impact of the sprawl phenomenon
- ② urban sprawl as a kind of planned outcome, not a coincidence
- ③ expansion of policy systems for out-of-control urbanization
- ④ the complexity of the social system seen in urban sprawl
- ⑤ the difficulty of controlling the process of urban sprawl through ideology

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Thanksgiving is a good place to start for taking inventory of all the things for which you're thankful, but it's by no means the finish line.

You've probably already heard about the importance of adopting an attitude of gratitude and focusing on the positive things in your life. But what does that even mean beyond a tired cliché? (①) Isn't it enough when you're grateful for Thanksgiving dinner and the mounds of sweet potatoes and pumpkin pie that will soon be happily in your stomach? (②) Well, not really. (③) When you have an average day that's probably going to simply fade into the fabric of your life, remember to take stock — are you thankful for that text your friend sent you that made you feel special? (④) What about when someone at lunch let you take the last slice of pizza? (⑤) Small, seemingly inconsequential things are the threads of thankfulness, and gratitude for those small things can be practiced every day.

*cliché 상투적 표현 **mound 더미 ***inconsequential 보잘것없는

The emergence of life-long learning is one major development in Europe which is thought to have an impact on educational policies and teaching-learning trends across Europe, and the world. It relates to the awareness of the need to bridge the gap between education systems and the socio-economic needs in particular. ① Education is believed to work more and be directed towards exploring and catering for new emerging needs. ② In 1996, Europe celebrated The European Year of Life-long Learning, stressing the need to respond to fears about competitiveness, innovations

in technology and capitalist globalisation. ③ In addition, it is necessary to further embody the universal perception of neo-Cold Warism under an integrated Europe. ④ Substantial changes in education systems are expected to cater for the new needs. ⑤ Responding to change has become a must and, as often stated by policy-makers, there is a mounting urgency to adapt and upgrade education to be able to respond to the changing global economic, social and political environment.

*cater for ~을 충족하다

35 Test 3 7번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

I can't imagine a rat working for a shiny medal to hang around its neck or an inscribed plaque to decorate its cage. Appealing as it sounds having the title of "Laboratory Rat of the Year" or "Most Creative Path through a Maze," the rats just aren't motivated by such distinctions. Instead, laboratory rats want the real deal — food, safety, social contact, even some gentle stroking from an experimenter. In fact, award ceremonies are _____, as I know no other animal that will work for trophies or certificates. Other animals learn to associate verbal expressions with the subsequent presentation of tangible rewards such as food, but medals, ribbons, and awards are specific to human motivation. Awards are designed to distinguish one individual from a group of individuals, a goal that doesn't register for most nonhuman animals.

*inscribed plaque 이름이 새겨진 명패 **maze 미로 ***tangible 유형의

- ① practically useless
- ② distinctly human
- ③ of considerable value
- ④ very cost consuming
- ⑤ incredibly touching

Since then, he has continued to increase his international audience with a series of major films that tackle the problems facing modern-day Poland.

Andrzej Wajda (born in 1926) is the symbol and main director of the new generation of Polish filmmakers. The son of a Polish army officer, he grew up in an atmosphere of patriotism and romantic heroism. (①) In 1944, at the age of 18, he was drawn to the resistance movement and served in the ranks of the Armia Krajowa (AK), the Home Army. (②) After the Second World War, he studied fine art before enrolling at the brand new Lodz Film School. After making a few short films, he became Aleksander Ford's assistant director. (③) In 1957, his second feature film, *Kanal*, brought him international public recognition. (④) As well as being the most famous director of Polish cinema, he was the most typically Polish, constantly drawing on the nation's collective memory and reworking it with a powerful sense of film direction. (⑤) In so doing, he did not simply describe the events of his era; he actively stirred his homeland's historical conscience.

*patriotism 애국심

37 Test 3 12번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

The idea that money replaced barter by making transactions more efficient allows one to see the economy as something in which money is nothing more than a passive mediator — a “lubricant in exchange.” Money objects such as coins are not fundamentally different from commodities such as weights of gold: the stamp is merely something to “save the trouble of weighing” (Aristotle) and “a great convenience” (Ragan and Lipsey) but _____. The Canadian economist Todd Hirsch quipped that “you could use chickens as money” as long as people are ready to accept them as a means of exchange. However, the fact that many things can serve as money does not tell us much about money, any more than the number of actors who have played Hamlet tells us about Shakespeare’s play. What counts is the properties of objects at the time when they are used as money, not when they are offstage.

*barter 물물 교환 **lubricant 윤활유 ***quip 재치 있게 말하다

- ① holds inherent value
- ② is of little significance
- ③ has special significance
- ④ is not essential in exchange
- ⑤ has no unique importance of its own

38 Test 3 13번

다음 글의 제목으로 가장 적절한 것은?

Happiness can be brief. Remember how great it felt the last time you got a raise? Do you still feel the same excitement about it today? Probably not. Psychologists have long noted the human tendency to psychologically adapt to new circumstances. Something that initially makes one feel happy soon comes to feel like the norm. The sense of happiness fades, and an urge to acquire the next bigger or better thing takes hold again. This can make the pursuit of happiness feel like walking on a treadmill, where you have to keep working to stay in the same place — and, in fact, this cycle has been called the “hedonic treadmill.” For example, you may feel happy to buy a house. But the euphoria begins to fade as you see how much work it needs. Upgrading the kitchen feels good, but then the bathroom looks outdated. The pleasure of accomplishing one task fades quickly as the desire for the next improvement arises.

*hedonic treadmill 쾌락의 쳇바퀴 **euphoria 행복감, 희열

- ① The Never-Ending Pursuit of Happiness
- ② Humans Tend to Forget Small Happiness
- ③ Human’s Desire to Improve Their Status
- ④ How Happiness Fades from Our Life
- ⑤ Control the Urge to Buy a House

39 Test 3 14번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Writing changes the relationship between a communicator and the person with whom he or she is communicating.

The consequences of written forms of communication are quite extensive. The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies to endure through time by creating durable texts which could be handed down and referred to. (①) This allowed for the control of knowledge by central hierarchies (such as a priesthood). (②) But the invention of more transportable media, such as papyrus, allowed for centralized control to expand over a wider area. (③) Audiences now can be remote in time and space, and the communicator can guarantee that the message received is identical with the one sent, without having to rely on the memory of a messenger. (④) This means that a communicator can reach a much wider and disparate audience. (⑤) To the extent that society was no longer dependent upon face-to-face communication, societies could expand their boundaries to encompass vast spaces and diverse populations. This was, as Innis argues, the beginning of empire.

*hierarchy 지배 계층 **disparate 이질적인 ***encompass 포함하다

40 Test 3 15번

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Radiology, and in general medical imaging, is one of the areas where A.I. is advancing fast: "In many ways, deep learning can mirror what trained radiologists do, that is, identify image parameters but also weigh up the importance of these parameters on the basis of other factors to arrive at a clinical decision." Therefore some companies only build an A.I.-based product to outcompete the rest. This is common, but what normally happens is that the high end of the market, the part that is more difficult, still needs to be done by humans because the diagnosis by automation alone is not conclusive and may even require skillful interaction between the diagnoser and the patient. Therefore these companies need a dual structure in which most of the routine work is replaced but still require critical human skills to handle the remaining tasks — those also being the most expensive part of the workforce. This has two implications. If the company itself is operating on this business model, its scalability is still limited, and its return on investment reduced.

*image parameter 영상 매개 변수 **diagnosis 진단, 식별
***scalability 확장성

The fast advancement of A.I. in medical imaging, particularly in radiology, has resulted in companies using a ____ (A) ____ structure where routine tasks are automated but critical human skills are still needed for more conclusive diagnoses, leading to companies' ____ (B) ____ scalability and reduced return on investment.

(A) (B)

- ① double unlimited
- ② complex finite
- ③ double restricted
- ④ singular infinite
- ⑤ unique controlled

41 Test 3 16번

다음 글의 제목으로 가장 적절한 것은?

One key to understanding the living planet is to recognize that nothing about the physical world is static. The transfers of energy and the movement of matter in the physical world may be hard to see, as the cycles happen over scales that may be microscopic or vast. Mountains, continents, stars, and galaxies may appear permanent and unchanging to us but the entire universe, with us in it, is in fact constantly moving and changing, reusing and recycling, dying and regenerating, in all places and at all scales. On our unusually lively planet much of the flux among biological systems is accelerated and concentrated, so changes here are easier for us humans to perceive than the longer, slower cycles. However, there really are no static elements anywhere in the universe. Changes happen through flows of energy and flows of materials, and these flows take place in regenerative patterns that are cyclical.

*flux 흐름

- ① Why Flows of Energy Happen in the Living Universe
- ② Static Elements in Biological Systems
- ③ What Drives Galaxies to Change Slowly
- ④ The Immobility of Galaxies and Continents
- ⑤ The Dynamic Nature of the Physical World

42 Test 3 17번

다음 글에서 전체 흐름과 관계 없는 문장은?

If society is more than a collection of individuals, there must be some kind of relationship between them, and at the very least a sense of what is right and wrong behaviour. This has led legal philosophers in the natural law tradition to argue that there cannot be society without law. ① From this perspective, social theorists do not usually

pay sufficient respect to law. ② It is central to everything we do, not simply as an external constraint, but because it constitutes and makes possible orderly social life. ③ It is not necessary to accept the argument that the application of the law should be done not only to society but also to corporate activities. ④ This involves taking a broad view of law, so any rule or social norm we are following, for example caring for the sick or respecting other people's property, is seen as part of law, even if lawyers or the courts are not asked to intervene, and we are not consulting legal rules. ⑤ Everything in society is held together, governed and even constituted by law.

다음 글의 제목으로 가장 적절한 것은?

Humans interact with their surroundings with audiovisual cues and utilize their arms or legs to engage and move within this world. This seemingly ordinary ability can be extremely beneficial for those who are experiencing weakening conditions that limit movement or for individuals who are experiencing pain and discomfort either from a chronic illness or as a side effect of a treatment. A recent study, looking at the effect of immersive virtual reality (VR) for patients who had suffered from chronic stroke, found this technology to be contributing positively to the state of patients. During the VR experience, the patients are asked to grab a virtual ball and throw it back into the virtual space. For these patients, this immersive experience could act as a personal rehabilitation physiotherapist who engages their arm movement multiple times a day, allowing for possible neuroplasticity and a gradual return of normal motor function to these regions.

*immersive 몰입형의 **rehabilitation physiotherapist 재활 물리 치료사
***neuroplasticity 신경 가소성

- ① Virtual Reality as a Comfort to Stroke Victims
- ② The Advantages of Physical Therapy for Chronic Illness Sufferers
- ③ The Use of Audio-Visual Cues for the Rehabilitation of Patients
- ④ The Benefits of Immersive Virtual Reality for Patients with Movement Difficulties
- ⑤ Virtual Reality as a Tool for Connecting Patients with Doctors

44 Test 3 19번

다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Empathy is generally categorized into at least two types: cognitive and emotional. These need not be experienced ① exclusively and can certainly influence each other. As its name implies, cognitive empathy is more consciously active in ② what it allows us to understand another person's mental state or perspective. It's difficult ③ to see how this form of empathy could have come about in hominids until they had attained a certain level of self-awareness and sense of other. Emotional empathy, on the other hand, is ④ far more reflexive, an almost instinctive response that seems to arise from much more physiological processes. It allows us to share to some degree in another's emotional state. In ⑤ considering the possible origins of both forms of empathy, it seems more likely that emotional empathy preceded cognitive empathy. In fact, without emotional empathy existing first, it's challenging to see how theory of mind and self-awareness could have come about at all.

*hominid 호미니드(현대 인류의 조상인 영장류)

45 Test 3 20번

글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

Suppose today is St. Valentine's Day, and you wish to give your sweetheart a special gift.

One telling indication of the importance of meaning for gifts is the role of money. Cash, as generalized purchasing power, can be used to buy anything. (①) It is extremely useful. (②) Yet however great its utility, money often performs poorly as a gift because it sends the wrong message. (③) First you think that spending \$50 on a bouquet of red roses might be nice, but then it occurs to you that flowers are not very useful and that your girlfriend might prefer something else instead of roses. (④) So you conclude that \$50 cash would be a better gift. (⑤) Wrong. Red roses symbolize romance, cash does not. Cash may be more useful, but it has the wrong meaning for a romantic relationship. On St. Valentine's Day, it makes a lousy gift.

*bouquet 꽃다발 **lousy 형편없는

46 Test 3 21번

다음 빈칸에 들어갈 말로 가장 적절한 것은?

Undoubtedly, everyone must strive for excellence because mediocrity is insufficient professionally and personally. During economic downturns, mediocre employees are the first to be laid off whereas organizations hold on for as long as possible to employees who try hard for excellence. In addition, people who do mediocre work don't get as much *personal* satisfaction as those who are passionate about everything they do. However, _____. The fact is that only a *few* individuals of *extraordinary* skills (physical ability, mental focus, self-discipline, and many years of daily grueling training beyond most people's capacity and willingness) earn a gold medal in the Olympics. Most athletes fail to even qualify for a chance to compete at the Olympic level, simply because the available slots are *few* whereas the applicants are *many*. The same is true for the Nobel Prize and many other accomplishments that countless people strive for but very few attain.

*mediocrity 평범 **grueling 호된, 심한 ***slot 자리

- ① we must all be *honest* with ourselves
- ② excellence is important only in athletic and academic fields
- ③ everyone has the potential to achieve excellence with minimal effort
- ④ it is not important for people to strive for excellence in their personal lives
- ⑤ excellence is not necessary for job security or personal satisfaction

The evolution of human rights discourse and activism cannot be separated from political, economic, and cultural globalization. Globalization allowed human rights advocates to move beyond the primacy of the nation-state, though it by no means eliminated the state as a source and a target of activism.

- (A) Though imperfect and uneven, global human rights networks broadcast eyewitness accounts and visual images of human rights abuses, thus engaging a global audience in the campaign against offenders. Those efforts have not created an international consensus on the meaning and extent of the human rights regime, however.
- (B) Globalization has contributed to the fragmentation of national and international communities by linking the local to the global. It has elevated the importance of new means of communication and information technology.
- (C) To the contrary, multiple groups and political constituencies continue to battle over how to define human rights, and these groups often operate in the interest of political expediency rather than moral principle. As a result, the understanding of human rights in the early twenty-first century is possibly more fragmented than ever before.

*fragmentation 해체, 분열 **regime 체제 ***expediency 편법

- ① (A) - (C) - (B)
- ② (B) - (A) - (C)

Let's say you're storing a working microwave in your basement. You're not currently using the microwave; instead, it's collecting dust. 효용이라는 개념을 적용하면 그 전자레인지는 여러분 혹은 다른 누구에게도 진정한 가치가 없다는 것을 우리는 알게 된다 because it isn't being used right now for its intended purpose (which is, of course, to warm food). But if you donated or sold that microwave to someone who could use it, you would immediately restore its value while also saving the recipient from having to purchase a brand new one. Many consumers balk at the idea of donating or selling perfectly decent items, and that's understandable, as items cost money. But thanks to constant product turnover and innovation, electronics and appliances quickly become outdated. Giving that microwave to someone in your community who needs it to warm food right now decreases the chances of finite resources, including fossil fuels, copper, other metals, and water, being extracted from the earth to make another microwave.

*balk 멈칫거리다, 꺼리다 **copper 구리

53 윗글을 읽고 다음 질문에 영어로 답하시오. (5단어)

Test 3 11번

Creative Craft Camp

Want to get your child off the couch this summer? Then 아이들을 자신의 창의적인 예술 에너지를 발산할 수 있는 이 재미있는 캠프에 등록시키세요!

► Location:

Memorial Art Center

► Participation Fee:

- \$70 per child per session (supplies & snacks included)
- Sibling discounts are available (10% discount on each additional child).

► Age Groups and Times:

- Ages 5–8 meet from 9 a.m. to 11:30 a.m.
- Ages 9–12 meet from 1 p.m. to 3:30 p.m.

► Session Dates and Themes:

- Session A: July 4th–July 8th / paper crafts and tile mosaics
- Session B: July 11th–July 15th / costume jewelry and plastic crafts
- Session C: July 18th–July 22nd / floral crafts and oil painting

► Additional Information:

- Participants should wear clothes that they don't mind getting dirty.
- Space is limited to 8 per group, so register online now at www.creativecraftcamp.org.

For questions, email eileen@craftcamp.org or call 479–495–6002.

*sibling 형제자매 **floral 꽃의

Test 3 12번

화폐가 거래를 더 효율적이게 함으로써 물물 교환을 대체했다는 생각은 allows one to see the economy as something in which money is nothing more than a passive mediator — a “lubricant in exchange.” Money objects such as coins are not fundamentally different from commodities such as weights of gold: the stamp is merely something to “save the trouble of weighing” (Aristotle) and “a great convenience” (Ragan and Lipsey) but has no unique importance of its own. The Canadian economist Todd Hirsch quipped that “you could use chickens as money” as long as people are ready to accept them as a means of exchange. However, the fact that many things can serve as money does not tell us much about money, any more than the number of actors who have played Hamlet tells us about Shakespeare’s play. What counts is the properties of objects at the time when they are used as money, not when they are offstage.

*barter 물물 교환 **lubricant 윤활유 ***quip 재치 있게 말하다

71 윗글의 밑줄 친 우리말 의미와 일치하도록 **보기** 의 단어를 순서대로 배열하여 문장을 완성하시오. (단, 필요시 어형을 바꿔 쓸 것)

by / the idea / money / transactions /
barter

72 윗글의 내용을 한 문장으로 요약하려고 한다. 빈칸 (A)와 (B)에 들어갈 알맞은 말을 본문에서 찾아 쓰시오.

Many things in the world can be used as _____ (A) _____, but what is important is the _____ (B) _____ of objects at the time they are used as such.

(A) _____ (B) _____

Test 3 13번

Happiness can be brief. Remember how great it felt the last time you got a raise? Do you still feel the same excitement about it today? Probably not. Psychologists have long noted the human tendency to psychologically adapt to new circumstances. 처음에 사람에게 행복을 느끼게 만드는 무언가가 머지않아 일반적인 것처럼 느껴진다. The sense of happiness fades, and an urge to acquire the next bigger or better thing takes hold again. This can make the pursuit of happiness feel like walking on a treadmill, where you have to keep working to stay in the same place — and, in fact, this cycle has been called the “hedonic treadmill.” For example, you may feel happy to buy a house. But the euphoria begins to fade as you see how much work it needs. Upgrading the kitchen feels good, but then the bathroom looks outdated. The pleasure of accomplishing one task fades quickly as the desire for the next improvement arises.

*hedonic treadmill 쾌락의 쳇바퀴 **euphoria 행복감, 희열

Test 3 14번

The consequences of written forms of communication are quite ① extensive. The Canadian economist and communication historian Harold Innis, for example, describes how written communication allowed societies to ② endure through time by creating durable texts which could be handed down and referred to. This allowed for the control of knowledge by central hierarchies (such as a priesthood). But the invention of more ③ nontransportable media, such as papyrus, allowed for centralized control to expand over a wider area. Writing changes the relationship between a communicator and the person with whom he or she is communicating. Audiences now can be ④ remote in time and space, and the communicator can guarantee that the message received is identical with the one sent, 전해 주는 사람의 기억에 의존할 필요 없이. This means that a communicator can reach a much wider and disparate audience. To the extent that society was no longer ⑤ dependent upon face-to-face communication, societies could expand their boundaries to encompass vast spaces and diverse populations. This was, as Innis argues, the beginning of empire.

*hierarchy 지배 계층 **disparate 이질적인 ***encompass 포함하다

Test 3 15번

Radiology, and in general medical imaging, is one of the areas where A.I. is advancing fast: “In many ways, deep learning can mirror what trained radiologists do, that is, identify image parameters but also weigh up the importance of these parameters on the basis of other factors to arrive at a clinical decision.” Therefore some companies only build an A.I.-based product to outcompete the rest. This is common, but what normally happens is that the high end of the market, the part that is more difficult, still needs to be done by humans because the diagnosis by _____ alone is not conclusive and may even require skillful interaction between the diagnoser and the patient. Therefore these companies need a dual structure in which most of the routine work is replaced but still require critical human skills to handle the remaining tasks — those also being the most expensive part of the workforce. This has two implications. If the company itself is operating on this business model, its scalability is still limited, and its return on investment reduced.

*image parameter 영상 매개 변수 **diagnosis 진단, 식별
***scalability 확장성

a system that uses machines to do work instead of people, or the process of changing to such a system

a _____

Test 3 16번

One key to understanding the living planet is to recognize that nothing about the physical world is static. The transfers of energy and the movement of matter in the physical world may be hard to see, as the cycles happen over scales that may be microscopic or vast. Mountains, continents, stars, and galaxies may appear permanent and unchanging to us but the entire universe, with us in it, is in fact constantly moving and changing, reusing and recycling, dying and regenerating, in all places and at all scales. On our unusually lively planet much of the flux among biological systems is accelerated and concentrated, so 우리 인간은 더 길고 더 느린 순환보다 이곳의 변화를 인식하기 더 쉽다. However, there really are no static elements anywhere in the universe. Changes happen through flows of energy and flows of materials, and these flows take place in regenerative patterns that are cyclical.

*flux 흐름

80 앞글의 내용을 한 문장으로 요약하려고 한다. 빈칸 (A)와 (B)에 들어갈 알맞은 말을 본문에서 찾아 쓰시오.

In the physical world, the movement of energy and the motion of matter are _____ (A) _____ progressing and anything in the universe is never static because the flow of energy and matter occurs in cyclical and _____ (B) _____ patterns.

(A) _____ (B) _____

Test 3 17번

If society is more than a collection of individuals, there must be some kind of relationship between them, and at the very least a sense of what is right and wrong behaviour. This has led legal philosophers in the natural law tradition to argue that there cannot be society without law. From this perspective, social theorists do not usually pay sufficient respect to law. It is central to everything we do, not simply as an external constraint, but because it constitutes and makes possible orderly social life. This involves taking a broad view of law, so any rule or social norm we are following, for example caring for the sick or respecting other people's property, is seen as part of law, 비록 변호사나 법원이 개입하도록 요구되지 않더라도, and we are not consulting legal rules. Everything in society is held together, governed and even constituted by law.

Test 3 18번

Humans ① interact with their surroundings with audiovisual cues and utilize their arms or legs to engage and move within this world. This seemingly ② ordinary ability can be extremely beneficial for those who are experiencing weakening conditions that limit movement or for individuals who are experiencing pain and ③ discomfort either from a chronic illness or as a side effect of a treatment. A recent study, looking at the effect of immersive virtual reality (VR) for patients who had suffered from chronic stroke, found this technology to be contributing ④ negatively to the state of patients. During the VR experience, the patients are asked to grab a virtual ball and throw it back into the virtual space. For these patients, this immersive experience could act as a personal rehabilitation physiotherapist who engages their arm movement multiple times a day, allowing for possible neuroplasticity and a gradual return of ⑤ normal motor function to these regions.

*immersive 몰입형의 **rehabilitation physiotherapist 재활 물리 치료사
***neuroplasticity 신경 가소성

83 윗글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (30자 내외)

Q: According to the passage, what are the patients with chronic stroke asked to do during the VR experience?

A: _____

_____ → _____

Test 3 19번

Empathy is generally categorized into at least two types: cognitive and emotional. These need not be experienced exclusively and can certainly ① influence each other. As its name implies, cognitive empathy is ② more consciously active in that it allows us to understand another person's mental state or perspective. It's difficult to see how this form of empathy could have come about in hominids until they had ③ attained a certain level of self-awareness and sense of other. Emotional empathy, on the other hand, is far more ④ reflexive, an almost instinctive response that seems to arise from much more physiological processes. It allows us to ⑤ ignore to some degree in another's emotional state. In considering the possible origins of both forms of empathy, it seems more likely that emotional empathy preceded cognitive empathy. In fact, without emotional empathy existing first, it's challenging to see how theory of mind and self-awareness could have come about at all.

*hominid 호미니드(현대 인류의 조상인 영장류)

Test 3 20번

One telling indication of the importance of meaning for gifts is the role of money. Cash, as (A) generalize purchasing power, can be used to buy anything. It is extremely useful. Yet however great its utility, money often performs poorly as a gift because it sends the wrong message. Suppose today is St. Valentine's Day, and you wish to give your sweetheart a special gift. First you think that (B) spend \$50 on a bouquet of red roses might be nice, but then it occurs to you that flowers are not very useful and (C) what your girlfriend might prefer something else instead of roses. So you conclude that \$50 cash would be a better gift. Wrong. Red roses symbolize romance, cash does not. Cash may be more useful, but it has the wrong meaning for a romantic relationship. On St. Valentine's Day, it makes a lousy gift.

*bouquet 꽃다발 **lousy 형편없는

고난도
87

밑줄에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (50자 내외)

Q: Why does the writer think that cash wouldn't be better than red roses as a gift in a romantic relation?

A: _____

88 밑줄 친 부분을 어법상 알맞은 형태로 고쳐 쓰시오.

- (A) generalize → _____
(B) spend → _____
(C) what → _____

Test 3 21번

Undoubtedly, everyone must strive for excellence because mediocrity is insufficient professionally and personally. During economic downturns, mediocre employees are the first to be laid off whereas organizations hold on for as long as possible to employees who try hard for excellence. In addition, people who do mediocre work don't get as much *personal* satisfaction as those who are _____ about everything they do. However, we must all be *honest* with ourselves. The fact is that only a *few* individuals of *extraordinary* skills (physical ability, mental focus, self-discipline, and many years of daily grueling training beyond most people's capacity and willingness) earn a gold medal in the Olympics. Most athletes fail to even qualify for a chance to compete at the Olympic level, simply because the available slots are *few* whereas the applicants are *many*. The same is true for the Nobel Prize and many other accomplishments that countless people strive for but very few attain.

*mediocrity 평범 **grueling 호된, 심한 ***slot 자리

89 읽기의 빈칸에 들어갈 단어를 영영 뜻풀이를 참고하여 쓰시오. (단, 주어진 글자로 시작할 것)

Though all must work toward excellence due to mediocrity being _____ (A) _____ for leading a satisfying life professionally and personally, only a few with extraordinary skills can _____ (B) _____ notable accomplishments.

(A) _____ (B) _____

Test 3 22번

The evolution of human rights discourse and activism cannot be separated from political, economic, and cultural _____ (A) _____. Globalization allowed human rights advocates to move beyond the primacy of the nation-state, though it by no means eliminated the state as a source and a target of activism. _____ (B) _____ has contributed to the fragmentation of national and international communities by linking the local to the global. It has elevated the importance of new means of communication and information technology. Though imperfect and uneven, global human rights networks broadcast eyewitness accounts and visual images of human rights abuses, thus engaging a global audience in the campaign against offenders. Those efforts have not created an international consensus on the meaning and extent of the human rights regime, however. 그와는 반대로, 인권을 어떻게 규정할지를 놓고 여러 집단과 정치권 유권자들의 공방이 계속되고 있다, and these groups often operate in the interest of political expediency rather than moral principle. As a result, the understanding of human rights in the early twenty-first century is possibly more fragmented than ever before.

*fragmentation 해체, 분열 **regime 체제 ***expediency 편법

Test 3 23번

When we ask students “What is science?” we often ① receive the same sorts of responses whether they are elementary school, middle school, high school, or college students. Students point to a biology book and say, “That is science.” Or they may give a list of courses such as physics, biology, and chemistry. With ② additional examination, they’ll cite the scientific method as an explanation of how science is done. When we prompt them to draw a picture that answers the question “What does a scientist look like?” we again receive ③ similar messages from students across the grade levels. Students tend to draw a befuddled, wild-haired man in a white lab coat. As we spend even more time discussing these matters, students (again from across the age and grade spectrums) explain that science is a large body of very sure facts, facts that are “discovered” by ④ subjective scientists as they study all aspects of the world, a study that is sometimes described as “prying open” the natural world as if the answers are hidden inside like a prize. These scientists are often viewed as “lone rangers” who work in ⑤ isolation and surprise the world with their discoveries after long hours of diligent work.

*befuddled 정신없는 **pry open 비집어 열다

93 윗글에서 다음 질문에 대한 답을 찾아 우리말로 쓰시오. (35자 내외)

Q: What do students tend to draw when they are asked, “What does a scientist look like?”

A: _____

Test 3 24-25번

Gasoline and electricity aren't the only ways to power a car. Biofuels also offer promise for future modes of transportation. Made from organic matter such as corn, sugar beets, and potatoes or from vegetable oils and fats, biofuels are designed to supplement or replace gasoline or diesel in cars. Like fossil fuels, biofuels, such as ethanol, discharge a great deal of carbon as they burn. But the new crops continually planted to keep up the production of biofuels absorb much of this carbon. 이 작물들이 어떻게 다루어지느냐에 따라 바이오 연료가 얼마나 실제로 효과가 있는지가 결정된다. If a great deal of fossil fuel is used in fertilizing, harvesting, and processing the crops and then transporting the final product, much of the benefit is lost.

In 2007, the US Congress passed the Energy Independence and Security Act requiring that biofuel production increase from 4.7 billion gallons in that year to 36 billion gallons by 2022. Based on the bill's mandate, more than 2.8 million additional acres nationwide were given over to cropland for biofuels between 2008 and 2016. But this meant the loss of many wetlands, prairies, and forests. Carbon held in the trees, roots, plants, and soils of these areas was released into the air. Many species of wildlife, including butterflies, bees, and other animals that pollinate plants lost their habitats. Growing crops for biofuels also took over lands that had been used for food crops. So the cost of food rose. Newer or more advanced biofuels, made from nonfood plant parts or animal waste products, reduce the competition for land use.

*mandate 명령, 지시 **prairie (북미·캐나다의) 대초원
***pollinate 수분(受粉)하다

Test 3 26-28번

The John Fleishauer family includes John, his wife, Angela, his daughter, Sylvia, and two schnauzers. The dogs are nearly the same age and are both considered miniatures, even though they are somewhat ① different in size. Charles is a gorgeous 23-pound male with a beautiful coat. He is tall and lean and stands like a champion, although in his heart he's still a warm, sweet little puppy. Sadie is smaller, at just ten pounds, and has a more hyper personality. She loves to jump from lap to lap until she decides which one to snuggle into for some nap time.

One day, after the family had left for work and school, Sadie got out of the yard through a ② loose fence board. This was her first time to escape. Charles was too big to follow, so she was on her own. Sadie's family doesn't know how long she was out. It was a half-day at the school where Angela taught, so she came home early. Their home is in a quiet neighborhood, but it's near a very ③ busy street. As Angela approached her house, she saw a little dog barking with all it had at a windmill on their neighbor's lawn. Her heart nearly jumped out of her chest when she realized that the silly dog was her Sadie.

Angela opened the car door and yelled for Sadie to come. Sadie stopped barking instantly, gave Angela a huge puppy smile, pranced over to the car, and jumped in. She began kissing Angela the only way she knows how — all tongue. When Angela got Sadie home, she carried the dog inside and they both sat on the couch while Angela caught her breath. She could tell Sadie knew she was in ④ trouble by the way she had her ears pinned back.

But the little dog continued her sweet puppy smile, apparently hoping that Angela would forget what had just happened. Angela figured it was in a dog's nature to roam and wasn't about to ⑤ praise Sadie after the fact. John fixed the fence, and he and his family planted a tree where the loose board had been. Leaving the yard was disobedient and foolish, but thanks to Angela,

Sadie was protected from venturing further and reaching the busy street.

*hyper 흥분을 잘하는 **snuggle 파고들다 ***prance 경충거리며 뛰다
****Roam 돌아다니다
